## Feasterville Items.

March 28.—Feasterville, Mr. and Mrs. R. B. Betall, of Greenwood, S. C., recently visited Mrs. Betall's father and mother, Mr. and Mrs. W. J. Keller, of this community. We extend congratulations and best wishes.

We hope there will be a good attendance. It may get instrumental in getting both the old and young people interested in this worthy cause.

Mr. Editor, I am glad that you prepared my last communication in the statement that the characters mentioned therein were worthy of a place in the Hall of Fame. If any man's gift of mind and heart and eloquence of speech entitles his statue to be placed along side that of Calhoun's it is George McDuffie.

The most powerful speech ever made in congress against the tariff was made by McDuffie in 1824. His wonderful power of conception, coupled with his familiarity with economic questions enabled him to speak as one warning the people of an impending danger. Subsequent events and existing conditions have verified the declarations of that great statesman.

I would suggest that the press of our state take this question up and get it agitated. Some years ago while in Washington, I visited Statuary Hall, and while admiring the statues of eminent men from various states, I was forcibly impressed with the fact that we have been derelict in our duty in not having long since placed therein the statue of our eminent statesman and worthy exemplar, John C. Calhoun. Notwithstanding the fact that he has been dead more than a half century, our people have just awakened to a realization that we cannot longer afford to defer the erection of his statue beneath the dome of the capitol, along side those of Washington, Robert E. Lee, Daniel Webster, Abraham Lincoln and others.

Pardon me for this digression. I hope I shall be able to write more lucidly in my next piece.

Robt. R. Jeffares.

This morning at 6 o'clock, (Wednesday the 27th), the death angel entered the home of Mr. and Mrs. A. O. Pittman and waded away the sweet spirit of their little daughter Ruth, aged about twelve years. Improved Farming.

—Mr. J. M. Judge, who has been visiting in his old range in the eastern part of the county and across York County, returned home Tuesday. He visited places, once familiar, where he had not been for more than 20 years. He reports great improvement in farming about W. Lee Mill and Landsford. He says land which was originally poor, making not more than 20 or 30 pounds of seed cotton to the acre when it was cleared, now makes a bale, and is getting better every year.

Prof. Hard's Lecture.

Of course everybody wants to hear prof. Hard, and it is only necessary to remind our readers that tonight's the time. He will talk about high schools. This is a subject that he is making a special study, and we may profit by his conclusions.

Mr. John Frazer says he has in this one of the finest horses he has ever had. He has one that he can't sell at less than \$500, but there are others.

All the postoffice fixtures were moved to the new location yesterday evening, and mail is now being distributed from that place.

Mr. R. L. Patrick, of the seminary at Due West, has many acquaintances in and about Chester who will be pleased to learn that he is to preach at the A. B. P. church next Sabbath. He won distinction while in college on both composition and delivery.

Attention is directed to the mention in another place of the art exhibition next Monday. This gives an opportunity to see specimens of art from the hands of masters of national reputation. Those who can appreciate art will be highly entertained, while those who are uncertain will have an opportunity to see how it strikes their taste and judgment.

—Mr. Samuel Bosch, who lived two miles west of Rock Hill and was nearly 90 years old, died Tuesday.

Analysis of Water.

Mayor Hardin has received from Chief Chemist M. B. Hardin, of Clemson college, the following analysis of our city water:

Samson College, S. C., March 26, 1907. Laboratory Number 8018.

Sample of water, city supply Sandy River, filtered etc.

Received March 12, 1907, from H. Hardin, Esq., Mayor, Chester, S. C. Grains per U. S. gallon of 231 cubic inches:

Total solids, dried at 100 degrees Centigrade, 5.670.

Chloride, .175.

Hardness equivalent to carbonate of lime, 2.100.

Parts per million:

Actual ammonia, .021.

Aluminized ammonia, .036.

Nitrogen as nitrate, .300.

Nitrogen as nitrite, none.

Water slightly turbid, and faintly yellowish. Chief constituents: a carbonate of calcium and sodium, with small quantities of carbonate, sulphate and chlorides of magnesium, sodium and potassium. There is very little organic matter in the water and there is no evidence of contamination by impurities of animal origin. The water is safe, but would be more acceptable if perfectly clear and colorless.

Respectfully,  
 M. B. Hardin,  
 Chief Chemist.

W. H. Hardin, Esq., Mayor, Chester, S. C.

Mrs. L. L. Bory, of Charlotte, who is visiting her mother, Mrs. M. J. Lewis, and other relatives near Blackstock, was in the city yesterday.

Report of Grand Jury.

The grand jury brought in the following report Tuesday afternoon and was excused from further attendance at this term:

To Hon. Chas. G. Dantzier, presiding judge:

We the grand jury of Chester county beg to submit the following report:

1. We have passed upon all bills handed us by the solicitor for our county and reported the same to the court:

2. We have not examined the county jail, poorhouse or other public institutions, but have appointed committees to examine all the county works and institutions and instructed these committees to report at the next term of court.

3. It has been reported to us that Frank Gwinn is guilty of the offence of assault and battery with intent to kill and carrying concealed weapons, and we recommend that an investigation of this case be made by the solicitor in this case.

4. We recommend and direct that the supervisor buy immediately a good and suitable chair and place in the court house room for the use of the presiding judge.

5. The grand jury reported last year that the Southern Power Co. were violating our Sunday laws, and we recommend that the same be looked after; and we now beg to report that the Southern Power Co. is still violating our laws, by working on Sunday; and we recommend that prosecution be made. The witnesses are as follows: J. C. Jerdan, D. G. Anderson, and W. M. Drennan.

We wish to extend our thanks to the solicitor and presiding judge for courtesies shown us.

# MILLINERY

Already Klutz' gorgeous collection of Ladies' Ready-to-Wear Hats have arrived. It would take the pen of Poe and the crayon of Christy to describe and picture them adequately to you. The prices are far less than the millinery establishments that cry "exclusiveness" as a cover for their great profits. Klutz' hats are trimmed by fat salaried New York milliners, and are right up to the notch in style. Klutz spends very little money and trouble on "Show" hats. This is a very practical store and wastes no money on empty ostentation. Klutz has samsacked the milliners' shops of New York for the best and most beautiful hats for the actual wear of the thoughtful Chester women. At any rate here are ten thousand dollars worth of hats—these figures may astonish you, but they are exact—by which you must judge us. It cannot be merely the low prices which is giving us our present astonishing volume of millinery sales. And another thing, Klutz' regular sales folks do the selling; we have no high salaried milliners for a big show; we don't believe in that sort of thing.

### COBALT SILK.

Klutz is exclusive agent in Chester for this brand new wrinkle in Spring Silks, known as Cobalt Silk. It comes in many exquisite royal rainbow colors. Cobalt Silk weaves and washes like the human flesh. Looks exactly like the royal Tullefs Silk, yet unlike Tullefs in that it loves the wash tub. Klutz price is still only 60 cents the yard, although the demand is as tremendous throughout the country that within the last week the manufacturers have shot the price of Cobalt Silk skyward and come the yard. Write or send for lovely samples.
