## Lindsay Mercantile Co.

The Store that Does Things CHESTER, SOUTH CAROLINA. The Store that Does Things

Every man, woman and child is commanded to attend this event. Entire above stock will be sold on our premises, that we guarantee to protect every buyer accordingly. We shall refund money to any purchaser for any reason whatsoever, if not satisfied. No housewife should overlook this bargain feast. Mind you at a season of the year when all other merchants are exacting the highest price for their wares. You never heard of it before and you never will again, therefore take advantage of the greatest bargains ever put before the people of Chester and vicinity. A story briefly told. We have been obliged to make much larger purchases than our regular course of business demanded in order to have gotten the elegant lines of goods that our mammoth store contains at the remarkably low figure that we have obtained this merchandise at and in order to give the public the benefit and share our good luck with them, we will inaugurate the SALE OF ALL SALES, which you must and will attend, for it will make it expensive for you to stay away.

Two Parables.

"There was a certain householder, which planted a vineyard and heeded it round about, and digged winepress in it, and let it out to husbandmen, and went into his country; And when the time drew near, he sent his servants to the husbandmen, that they might receive the fruits of it.

"And the husbandmen took his servants and beat one and killed another, and stoned another.

"Again, he sent other servants more than the first, and they did unto them likewise.

"But last of all he sent unto them his son, saying, they will reverence my son.

"But when the husbandmen saw the son, they said among themselves, This is the heir, come let us kill him, and let us seize on his inheritance.

"And they caught him, and cast him out of the vineyard and slew him.

"When the lord therefore of the vineyard cometh, will he do unto those husbandmen? (Matthew 22:33-40)

There was a certain state which, through its legislature, built a great grove shop, and hedged it round about and put a whiskey tank in it, and built a tower on it to see the husbandmen, and went home to attend to their own affairs.

And when the time of the profits drew near, it sent its servants to the husbandmen, that they might receive the fruits of it.

And the husbandmen took the servants, and mistreated one and killed another, and perjured another.

And again it sent other servants, constables, inspectors and investigators, more than the first, and they did unto them likewise.

But last of all, the legislature selected some of its own members and clothed them with the highest authority, and sent them to attend to the duties why the husbandmen had diverted the profits into their own pockets and defrauded the state.

But when the husbandmen saw the committee from the legislature come, clothed with authority to investigate their doings, they said among themselves, This is the son of the legislature, the people's great lawmaking power. Come let us kidnap the committee and kill some of its members, if necessary. Let us usurp the authority of the legislature, and the people and conduct this dispensary as we please.

Whereupon, the husbandmen violently abuse and curse members of the committee, and say: "If you report to the people anything about our affairs, we'll kill you."

When the people, the lords of the legislature and the grove shop, come, what will they do unto those husbandmen.—Fee We Advocate.

New Wireless Tests.

To ascertain whether communication by wireless telegraphy can be had with submerged boats—that is, whether the water can be made a medium of transmission of waves of wireless telegraphy—experiments will now be made at Newport, B. I., by order of the Navy department, under the direction of Commander Albert Gleaves of the torpedo station, via a "torpedo special" dispatch to the New York Herald.

As the tests will be novel in every way and as the results to be obtained would be of great service the experiments will be watched with much interest.

Either the Shark or the porpoise will be used for the experiments. The vessel will be fitted with a transmitting apparatus similar to that used for sending through the air, and with a low aerial from which the current will be projected. The apparatus regularly in use at the torpedo station will be employed for receiving.

No attempt will be made at first to send messages from the ship to the submerged boat, for it is believed that the water is found to be a satisfactory conductor of the waves they can be transmitted either way.

Some experiments have already been tried. Operators at the torpedo station recently switched off their aerial and yet heard and read every message sent from a Fall River line steamboat off Point Judith. They believe the waves of electricity were transmitted through the water and the ground to the station.—Ex.

A Banking Conundrum.

A western exchange publishes the following conundrum: A banker scattering bones for his dinner saw a \$10 bill on the counter. He picked it up and took the number, in order to find the owner. While at home his wife remarked that the butcher had sent in a bill amounting to \$10. The only money he had with him was the bill he had found, which he gave to her, and she paid the butcher. The butcher paid it to a farmer, who carried the farmer paid to a merchant, who, in turn, paid it to a washwoman, and also, owing the banker a note of \$10, went to the banker and paid the note. The banker recognized the bill as the one he had found; and which, up to that time had paid \$80 of debt. Of careful investigation he ascertained that the bill was a counterfeit. Now, will some of our friends tell us what has been lost in this transaction, and by whom?

Essentially Rotten.

There are persons who honestly believe, even in the face of such scanning evidence, that the dispensary is the best solution of the liquor problem. But if one could take all the men who hold jobs in one sort of another, employ them directly with the G. M. I.—and the number of those is great—and all those who are hoping to get jobs from it—and the number of those is greater still—the vote for its continuance as a South Carolina institution would be very small. Most men believe that it is one sort of another, essentially rotten, and that it cannot, in the nature of the case, ever be otherwise.—New-Berly Observer.

An Alarming Situation.

How Patrons May Aid Faithful Carriers.

The following bits of advice are gathered from exchanges and are printed to aid rural route carriers: You will be doing your carriers a great favor if you stamp your mail before putting same in box or use government stamped envelopes with return upon upper left hand corner. This will guarantee delivery or return of letter. If you should not happen to have stamps or stamped envelopes, wrap amount up in paper. Remember that in stamping your mail, if the meter is put in the box, the carrier has to get off his gloves or mittens to get hold of the loose pennies.

Always stamp upon the upper right hand corner. When addressing a letter to one who is not a regular patron of a rural route postoffice, you should mark on the envelope in whose care the letter or package should go.

In addressing your letters do not write above the middle of the envelope as the address may be partly blurred by being struck with the postmarking stamp.

In regard to boxes, help your carrier by having a good time in a good easy place to drive up to and always have your mail ready.

To put ease visitors who are expecting mail, you should give the carrier their names.

Any mail matter deposited in box is subject to ordinary postage rates. Packages should be well wrapped and securely tied, and all valuable letters and packages should be registered.

The mail boxes are protected by the government. Anyone tampering with them should be reported at once to your postmaster.

Don't let your neighbor hitch his horse to your mail box post, so that your carrier has to get out of his wagon to put the mail in.

Don't forget to clean snowdrifts from your box.

Don't let your mail box post lean half way over.

Don't set your box on your picket fence. If you do not blame the carrier if he hits your fence and tears him to pieces.

Don't put letters in the box and forget to raise the flag.

Don't forget that the flag means much to carriers in the way of saving time.

Don't forget to nail your box on the post when your neighbor's cow leans against it.

Don't forget to haul a few loads of gravel and put around your box, so that the carrier can get to your box easily in winter.

Don't be afraid to meet your carrier half a mile to get your mail while the roads are bad (especially where he has to reverse). He'll more than repay you when you get busy with your cows.

The Very Best Remedy for Bowel Trouble.

Mr. F. B. Broughall, an old and well known resident of Chicago, writes: "I regard Chamberlain's Colic, Cholera and Diarrhoea Remedy as the best remedy for bowel trouble. I make this statement after having used it many times in my family for several years. I am never without it. This remedy is almost sure to be beneficial in every case. It is not a purgative, but it is a cathartic, and it is not a cathartic, but it is a purgative. For sale in all drug stores."

Different Cries of the Baby.

Normal—Loud and strong, and the nature of a scream; baby gets red in the face with it.

Pain—Usually strong and sharp, but not generally continuous; it is so accompanied by contortions of the features, drawing up of the legs and other symptoms of distress.

Temper—Loud and strong, and usually violent, accompanied by kicking and stiffening of the body.

Tires—Usually more fretfulness and moaning than real crying, although real crying is continued by very slight causes.

Ranger—Usually a continuous, fretful cry; rarely strong and lusty.

Indignance of Baby—Stops short when the baby gets what he wants, only to begin again when the object is withdrawn.—Frank Barkley Copy in June Outlook.

People Burnt in House.

Waltham, June 1.—This morning at 3 o'clock the residence of Louis Cartrel was burned with it a young couple, Mr. and Mrs. Joe Hudson, who have been married only a few months.

The fire was extinguished in one hour, near the residence of Judge Wickliffe, in West Union, and when Mr. Cartrel awoke almost the entire down was made so across them, but they were never seen, and in a short time all that was left were their charred remains.

Both Mr. and Mrs. Hudson were from the Salem section, but both had been here for several years. Mrs. Hudson was the daughter of Mr. and Mrs. A. T. Reid of Waltham.

The probable cause of the fire and other particulars are not known. This is a most horrible affair and the community is shocked.

The coroner's investigation brought out no definite origin of the fire. The kitchen portion seemed to have burned first. When Mr. Cartrel and others awoke the flames had made great headway. One man ran to the foot of the stairway and called loudly for help. The flames were then where it made it impossible to go to or come from their room.

A stone was thrown through the window, and the flames were seen. Mrs. Hudson's charred body, with the limbs burned off, was found lying on the bed springs. The body of her son, who was found in the center of the building, showing that he had arisen and possibly had reached the door. His remains were found a piece here and there.

The bodies of both were placed in one coffin and carried to the residence of Mr. A. T. Reid and will be carried to Salem tomorrow for burial. Many people were out to view the scene today, where there was nothing but sorrow and gloom.

Seneca, June 1.—Joe Hudson, a respectable white man, and wife were burned to death last night about 3 o'clock at West Union, eight miles from here.

It seems that the house was completely enveloped in the flames before the fire was discovered and the charred bodies of the unfortunate couple were found just as they lay in bed.

They had been married about six months and the man was a hard worker.

No one is suspected of burning the house, but it was known that Hudson carried money with him, a short time ago having been seen with \$50 in his pockets. Some think the couple were murdered and the house then burned.—Special to The Statesman.

How to Break Up a Cold.

It may be a surprise to many to learn that a severe cold can be completely broken up in one or two days' time. The first symptoms of a cold are a loss of sleep, a sore throat, a discharge from the nose, and a thin, white coating on the tongue. When Chamberlain's cough remedy is taken every hour on the first appearance of these symptoms, the cold is broken up and the system is in a healthy condition within a day or two. Madrid Cast Down in Gloom.

Madrid, June 1.—The city which was only yesterday the scene of happy rejoicing in celebration of the wedding of Alfonso and Ena, is today cast in gloom, caused by the attempt upon the lives of the young monarchs.

The horror of the dastardly crime and the sorrow caused by the deaths of so many innocent victims has unnerved the populace. The people have now no heart for entering into festivities which have been planned for the next ten days and it is probable that they will be cancelled.

The story of the dastardly crime has been assured by a high police official that the man who threw the bomb has been arrested and is now being held in the Madrid police station. He also states on high authority that the prisoner made a confession that he is the would-be assassin.

With all the horror over the deaths of sixteen people killed by the bomb there is an undercurrent of feeling of great rejoicing over the almost miraculous escape of the king and queen. Their coolness and bravery has made a deep impression upon the people.

The assassin is known as Mateo. He said he did it for the room he was in which he threw the bomb. Not more than fifty were injured, though reports had twice that many. General Weipert is among those seriously hurt.

Senator Carter's Story.

A group of senators who have been prominent in the legislation were discussing the aftermath of criticism that has befallen some of them. The way that Senator Aldrich is being ridiculed with a great victory is mentioned.

"I am afraid some of us," said Tom Carter, "are going to get a reward for our work for fifteen hours a day the last three months about like Judge Smith's uliger Sam's breakfast."

"How's that?" asked two or three senators.

"Why, the judge had one old dairy. When the judge got up in the morning about 9 o'clock he would go out and hunt up Sam. When he found him a colostrum about like this would issue: 'Sam, you good-for-nothing uliger, you, did you milk the cows?'"

"Yes, Massa, I done milked de cows."

"You haven't chopped the Massa's wood."

"Yes, Massa, I wended the culio patch."

"Massa, I worked free hours on dat lign patch, and I done got dat done."

"Well, I bet you were too good to lay that fence on the back lot."

"Over in de gutter nail?" Yes, Massa, I done did dat for you."

"Did you make my jump?"

"Yes, Massa, you lay nigger, you have got something all right up, have you?"

"Yes, Massa."

"Well, then, Sam, you can go over to the penitentiary in the pasture and get your breakfast. Be off with you, now."—New York Times.

Denatured Alcohol.

Denatured alcohol has been placed on the free list by both houses of congress, as we understand it. Much importance seems to have been attached to the proposition, even the president calling special attention to it in a special message concerning Standard Oil operations as disclosed by Mr. Gardner in a way it has the same importance. Such alcohol may be used for lighting purposes we believe, but the chief purpose referred to in most articles we have read about it that it takes the place of gasoline for automobile power. Standard Oil controls the gasoline supply in this denatured alcohol, and it will be cheaper than gasoline and the price of that must come down if it is to meet with this alcoholic competition. It is thought that it is nearly impossible for the trust ever to control the denatured alcohol industry so long as the product may be imported free. So the automobilists have been looked after; also the people, so far as lights are naturalized alcohol for oil. All concerned, if they will substitute the denatured alcohol which is good for automobilists and people generally. If this is so, would not every body be much more benefited if the sugar, they consume, the steel they use and the many other manufactured articles of everyday convenience or necessity were also admitted free? Isn't that a logical conclusion that if gasoline and lights are made cheaper by free entry that all of the other articles would too.—Columbia Record.
