Women Cannot Go On "Living As Usual" Lieut. Puhr of WAACS Tells Winthrop

With 300 In Campus Victory Role
Women must resist the pressure to go on "living as usual." Lieut. Puhr of WAACS told Winthrop women at a rally yesterday before a mass rally.

The women were told that they should not only resist the pressure to go on "living as usual," but they should actively participate in the war effort. This was the message that Lieut. Puhr of WAACS told Winthrop women at a rally yesterday.

The Crooks’ Concert

In a generation of four years at Winthrop, we have not seen a band of better work. The crooks’ concert Friday night. It had everything in fact, the program was unusual because of the frequency and number of faculty and townpeople who were present. Mr. Crooks was in rare form. He was giving and giving and...

Dear Professor:

I decided to file "PS" even more, knowing it would be the last of the term, and I got the news. It was a shock, and it was a relief, all in one. But I’m grateful they made the decision. It was just what I needed. I was skeptical about it, but I’m grateful...

Army Air Corps Cadets
Train From Sunrise On

Second Class Has Half Completed Training; Type Taylors, Winthrop, Housework and Ends With 10:30 Taps

By HARRIET CARTER

Winthrop, traditionally the railroad town, has been, in a way, invaded by Army air cadets who are taking their basic training here. Among the first to be enrolled in the Army Air Corps Training Program are under Army regulation.

A typical day in the life of these 158 cadets is set forth in the schedule given. They get up in the morning at 5:30, have breakfast at 6:30, and at 7:30 they are off to the airfield. At 8:00, after a brief review, they are divided into the three academic departments for instruction at Winthrop Training Station, which will be 9:30, when there is an hour of shell. Classes begin at 10:00 and last until 5:30. The cadets live in the old Hotel Altman.

Training is conducted under the direction of Jimmy and Jimmie Woods, who have been here since the training began. "We could not have gotten away with it," Dr. Rogers says. "They give the stations 35 hours of flying, and that's equivalent to a private certifi
cation. The old, continuous, non-military, take-up, general-aeroplane course is being held in just another way to aid the war effort.

The most Memorable Day Was The Day It All Over... Pieces, Informations, Con
tact, Reports, were all flying about. "What if we should need all of these things? And don't get in a panic."

The letter, appearing in a recent "Here and There," designed by Betty and Jones Winthrop, appeared by the Winthrop English college courses, as well as one by the Department of English. This unanimous letter on the recent examination is the voice of the Winthrop mind. In these classes, students get used to the discussion of the present era.

Winthrop Laboratories Offer Practice In 9 Departments

The laboratory is an exact replica of a certain one in the nearby area, and the experiment may be something to happen in anReturned.

A Friendly Disposition Plus A Hand That's Always Ready To Help Reflected In Familiar Credit Line "Photo by Sneey"

By MARGIE MORGAN

A slender little girl, with a look of determination on her face, is standing over the countertop of a college plant store. She is the kind of person you would want to have on your team, a student who is willing to work hard and do her best. She is the kind of person who would make a great assistant manager.

The girl is busy with her work, and the store is bustling with activity. People are coming and going, buying things for their classes or for fun.

The girl is also a member of the Student Government Association, and she is working hard to make sure that the store is well-stocked with the things that students need.

She is a hard worker, and she is determined to do her best. She is a good example of the kind of student who makes a great team member.
