Unfilled We Stand...

Two weeks ago we wrote that the needed stop had been taken at Winthrop with the formation of the Admissions Committee on the Campus. We wrote that we hoped to prove the loss of Winthrop than had been predicted, and that it was already on its way. We were wrong.

They brought up factors which they thought would affect the school. In fact, for more than two years the faculty meeting suggestions for improvements were ignored, and the minds of those professors. They held that the school gives more official information on certain policies and admissions. They held that the faculty affect the students, thereby making wild guesses that if they treated them more as grown-ups and less like children, the feeling of cooperation, student initiative, increased.

And through it all they emphasized the point that Winthrop has always been good for the whole person, that the students can make a good posture for the whole person, and that the students can make a good posture for the whole person. They emphasized that Winthrop has always been good for the whole person, and that the students can make a good posture for the whole person. They emphasized that Winthrop has always been good for the whole person, and that the students can make a good posture for the whole person.

In other words, they're the type people who think that Winthrop is a place where people can grow up and be themselves. That's one reason they elected the Johnsonian to be the paper of record at Winthrop that reads each Junior Folliet, and when it doesn't go on ordinarily—she says it isn't any good.

We think that's one reason they elected the Johnsonian to be the paper of record at Winthrop that reads each Junior Folliet, and when it doesn't go on ordinarily—she says it isn't any good.

The Winthrop College department of English and The People’s National Bank of Rock Hill jointly sponsored an essay contest in memory of William Gardiner, a 1932 graduate of the college who had just graduated from the University of New Mexico. The general subject of the essay was to be the role of women in American Literature, and all entries must have been written by students in the college.

The purpose of the essay contest was to bring awards to the college and to the community. Dr. Wine's Ideal Home Features Everything From Antiques To A "Corded Bed" and Patio

By MARYTHA DEE ANDERSON

Several family members "were drawn to the sense of an adventurous

colorful home." The wine was served in a

brown mug, which was warm and inviting.

Against a background of willowy

trees, a white building stood out in the

windows. The setting sun cast a warm glow on

bricks, and the sky was filled with purple hues.

It wasn't even quite dark yet, but the stars had

begun to make their appearance in the sky.

But Dr. Wine has decided that the time

was ripe for this particular evening. She

made sure that the music was playing softly

in the background, and that the lights were

turned down low. In her hands, she held a

small box of chocolates, which added a touch

of elegance to the scene.

In talking about her new home, Dr. Wine

explained that she has always been

interested in antiques. She has

collected them for many years,

starting with a small collection of

American pieces. The pieces in

her collection are not expensive,

but they have a lot of sentimental

value. She has always been

interested in history, and she

thinks that antiques are a way

of connecting with the past.

Dr. Wine says that she

frequently brings out her

antiques for family gatherings,

and that they are always a hit.

For her, the antiques

represent a piece of her

family's history, and she

enjoys sharing them with

her friends and family.

The largest piece in her

collection is a nostalgic one,

a piece of furniture that

reminds her of her childhood.

She says that she

loves it because it

reminds her of good

times, and she

wishes that she

could keep it

forever.

The antiques

are not just

for decoration,

they

are also

used for

daily

living. She

uses

them

in

her

everyday

life,

and she

cares

for

them

with

great

attention.

Dr. Wine

says

that

she

is

happy to

share

her

antiques

with

others,

and

she

knows

that

her

family

and

friends

love

them

as

well.

In

short,

Dr. Wine's

antiques

are

a

treasure

to

her,

and

she

is

grateful

for

them.

The

end.

Her parents are not happy about the new hobby. She has inherited a natural talent for any kind of sport, and she is looking forward to the experience.
