# Farm and Garden

### FOR FARMERS' WIVES.

What They Need is an Occasional Change of Scene. A bright woman correspondent of Country Gentleman writes as follows: Once in awhile most farmers' wives, I think, get tired of their everyday duties and occupations—out of time with their work and surroundings. The best medicine for such a complaint is change. They should go to the home of some city cousin, of which most of us have a few, and compare conditions. The best thing we notice in a city room, which is a painful way to those of us who have been brought up in the big country. What constitutes a home in a large city can often be con-

AT A NEIGHBOR SALE. I staid almost on one floor of a country house and the tiny doorway is covered with the good sized tobacco. Everything too, comes so much into the air, we get so little, and we wish in vain for the smoking lounges that are nearly always to be found somewhere on our farm house.

City women, however, have a good many advantages that their country friends miss. They have more time for rest, recreation and reading. Their homes being small are more easily cared for. The men of the household are usually away during the day. Fruit, vegetables and groceries are brought to the door, and it is always possible to find some one to do the work. The chance to shop and attend bargain sales are right at hand. There are also theaters, lectures, concerts and in the summer, numerous little excursions that are not expensive and make a delightful change. When we visit the city, we enjoy these privileges very much. If we go in the summer, however, we hardly get home before our visit is returned. Our city friends think it costs country people scarcely anything to have company—they raise so much of their food, and they have plenty of room anyway. So if we go for one week they return us two or three. If not more. They always get the best of us. We can be certain of that, and how they enjoy the drives, fruit, milk and outdoor life—and we know we do the city pleasures, which tire us even while they entertain, so that we are glad to go home, glad to get to the ample life and take up our old work. We all have, I believe, some city friends whom we visit seldom and whose coming we look forward to with dread. Their children are unruly, and they don't wash their hands corrected. They keep our houses and lawns untidy with their hats, wraps and papers, while in their own homes

THEIR CHILDREN ARE UNRULY. They are extremely particular and don't want to do a thing out of place. There are others who feel superior to us. They view the farmer who is a family with pity, almost with contempt. They think farm life is so solitary, farm earnings so small, that they like to partake of the farmer's hospitality even while they try to excite envy and discontent, and I think they really like to have us visit them. I'm sorry, though, for the purpose of showing us their luxuries and advantages which we do not possess. Such acquaintances should never be invited by repeat the first time we have topped the parking sign and discourage them from coming again.

Willing to Oblige. The mother of Anna, aged three, hearing but not seeing her, called, "Anna, what are you doing?" "Anna came running into view and responded sweetly, "No, my ain' ma, I'm doin' you wery good to kilt (quilt) my dress."

### Good butter cannot be produced from bad cream nor a good citizen, as a rule, from a really bad egg. Of the two the former is the more hopeless proposition.

### We heard of an agricultural snicker the other day to whom an acquaintance recommended quack grass as excellent for a permanent pasture. He sowed a patch of land to the post and finds it quite permanent.

### Attention is again being given to the old time practice of feeding pigs through a hole in the wall. The practice is being revived because of the high prices for hogs. It is a sure way to get the most out of a pig. The hole is made in the wall of a pig sty and is just large enough to slip a pig's head through. The pig is fed through this hole and the feed is kept clean and dry. This is a very important point in pig raising.

### An important point to remember in the care of cream after it comes from the separator is that it should be cooled to a temperature of 50 degrees before it is added to other cream already cooled. If the cream is scalded in the old-fashioned way the milk should be put to rest as soon as possible after it is taken from the cows.

### Hands a week goes by but reports appear in the daily press of the country which tell us that the penalty of his life through being used as a target by some rattle braind farmer in running his fingers through the hair of a cow is not a light one. Some one else has been the executioner and some one else has been the hapless victim.

### Experience with new milk cows and their calves seem to point to the value of not allowing the calf to suck the dam unless she is an inferior milk cow. It is desired to allow the calf to suck the dam until she is well advanced in pregnancy. This is a very important point in cow raising.

### There is perhaps more satisfaction in picking large and perfect fruit, than in picking small and imperfect fruit. The fruit of the orchardist is the result of his own care and attention. It is a very important point in fruit raising.

### Nearly every community north and south harbors some son of nature who persists in fishing all summer and letting the country support his family during the winter. Just what is best to do in such a case is a very difficult problem. For the laws of the land will not permit of their judicial execution. It is a very important point in community management.

### For the boy and girl in town or rural life, education is the most important factor in determining the measure of success which they achieve. If this stock in trade is of meager quality, the character of the business of life which is later transacted is going to be of a low order. It is a very important point in education.

### There is much comfort connected with getting things all in shape for the winter—fuel in the shed, plenty of food in the barn, corn in the crib, snow plows all done, water supply handy for the stock, the cellar filled up with vegetables and canned fruits. When this is all done, as it should be, the man who has worked fourteen hours a day for five months may look forward to the winter season with pleasure as a time for a measure of rest and recreation. One trouble is that too many of us try to get ready for winter after it is here, and then there is no fun connected with it.

### Somewhat careful inquiry of the representative of one of the leading lightning rod manufacturing concerns of the middle west brings out the information that a barn 40 by 50, with two foot joints, could be protected for \$41.50. This equipment includes three rods and enough wire to connect them at diagonal corners of the barn. Hardly a storm occurs during the summer season without a fall of several farmhouses or barns burning as a result of being struck by lightning.

### John C. May, of Nottola, Ala., died last week leaving 11 children, 76 grand children and 21 great-grandchildren. Mr. May was a very successful planter and a very generous man. He was a member of the Alabama State Agricultural Society and a very active member of the same. He was a very successful man in every way.

### Afraid of a Million Dollars. A Chicago newspaper tells the story of a family heir to \$1,000,000 that lies dormant for the most part, but his heirs may interfere with future happiness. "Quisotic," some people would call it.

### This large heritage comes to Emil Ascher, a retailer in gloves, who has a wife and eight children. The family lives contentedly in a cozy flat. The children are all married except the youngest.

### The money comes from an uncle in Germany. It is a large sum, but it is not a fortune. It is a very important point in inheritance.

### In an interview Mrs. Ascher says: "I suppose we must take the money. But I can tell you I want nothing but my husband and children. We are very happy. I am afraid of a future with much money and so is my husband."

### Continuing the good woman says: "We are not rich. We have simply enough to eat and a fairly good place to live. All the money in the world could not make us more satisfied. It is not money that makes people rich. It is living a good life."

### There are those who would mortgaged their hope of salvation for \$1,000,000 and permit the mortgage to be foreclosed. These will sneer at the suggestion that any one should fear the loss of such a sum on future happiness.

### There are great possibilities of evil in the wall of good—in the use of a million. Improperly directed, it might easily destroy the genuine happiness of a little lifetime. It might easily bring family strife and heart-burnings and much misery.

### Money can glid, but it cannot make happiness. A family is wise above the wisdom of its day. Instinctively it feels what many would be wiser people do not understand—the peril to peace of sudden riches.

### Seven Years of Proof. I have had seven years of proof that Dr. King's New Discovery is the best medicine to take for coughs and colds, throat, chest or lungs.

### Chicago, Nov. 15.—Debrutalized football has been this year as dangerous as ever, according to the list of casualties issued.

### Gridiron warfare between the colleges, high schools and athletic clubs this year has resulted in 10 dead and 300 wounded.

### Baltazar Wilfred, Waterbury, Conn. marks, impure water, sewage Cooper, Union, University of North Carolina.

### Dougherty, Albert, Evansville (Ind.) U. S. Army.

### Dickinson, Ernest, University of Arkansas.

### Duck, J. O., Oklahoma State Normal school.

### Evans, Thomas, Utah Agricultural college.

### Beautiful Tribute to Senator Carmack. Senator Carmack has died the death of a martyr to the cause of civility and respectability. His cause is not dead. Tennessee will rise in her majestic strength and with ten thousand scourging throngs drive from her borders her scoundrel enemies who have brought about the lamented death of her most gifted and gallant son. The prohibitionist is dead; but prohibition, the glorious flower to our public life, will arise from his grave to give fragrance and beauty to this fair State of the South. Good men will rise to his aid. His memory will be kept alive and will be a noble monument to his great manhood.

### Senator Carmack. Editor, Congressman, Senator, Statesman! And may thy eternally ring with the praises of those who have entered into thy labor and who will live in the pure atmosphere made possible by thy sacrifice. May Heaven comfort thy lonely widow and bring to a noble manhood thy fatherless son, Nashville Christian Advocate.

### Once in a Lifetime. It was a pitiful mistake. And error sad and grim. I waited for the railroad train. The light was low and dim.

### It came at last, and from the car there stepped a dainty dame. And, looking up and down the place, She straight out to me came.

### "Oh, Jack," she cried, "Oh, dear old Jack!" And kissed me as she spoke. Then, though again and frightened, cried, "Oh, what a bad mistake!"

### I said, "Forgive me, maiden fair, For I am not your Jack. I have no money, no home, no care. 'Til straightaway give it back."

### And since that night I've often stood Upon that platform dim, But only once in man's wide life Do such things come to him.

### Marie Correll and Marriage. Marie Correll, the famous writer, is now engaged to be married to a young man going the rounds of the press. The form it generally takes is this: "She was asked the other day why she does not marry. She replied: 'I have three pets at home which together answer the same purpose I have a dog which grows all the morning, a parrot which awakes all the afternoon and a cat which stays out at night.'"

### Miss Correll possesses neither a dog nor a parrot nor a cat, and she has never seen any of the beings mentioned to ask her why she is unmarried. Chicago News.

### Killing Mill Changes Hands. Spartanburg, November 14. D. D. Little, president of the Crescent Knitting Mill, capitalized at \$50,000, most of which was held by Mr. Little, has sold out his entire stock to Ben W. Paoliot, president of the Crescent Knitting Mill, W. W. Lancaster, now of Paoliot, will take charge of the Crescent All Monday morning.

### The same man who had led to under arrest, and will be brought back here, and two more colored men of Union are now in jail.

### Increase of Freight Rates. Chicago, Nov. 11.—W. C. Brown, senior vice president of the New York Central lines, at a conference with F. W. Upham in Chicago today announced that the railroad of the country had agreed that a 3 per cent advance in freight rates would satisfy the requirements of the roads.

### Still Fighting Oil Trust. Chicago, 11, November 16.—District Attorney Stias to day served notice on counsel for the Standard Oil Company, U. S. Government, to apply to the Supreme Court for a writ of certiorari, bringing the record of the famous rebating case before that tribunal. This is the case in which the Court of Appeal reversed Judge Landis, who had recorded a fine of \$20,240,000 against the corporation.

### "Uncle Joe," that is to say, the Hon. Joseph G. Cannon—he is no kin to us, he was born in North Carolina—says that he will run over to the House of Representatives. Of course he will. We are betting on him. No Republican House could do without him. He is his party here in Iowa.—News and Courier.

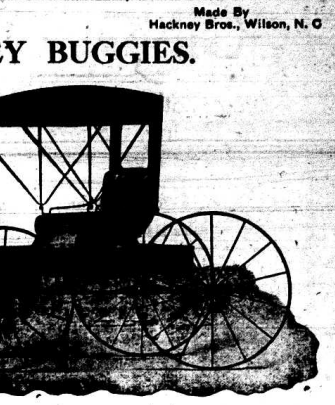

### It is said that Cooper is sorry he killed Carmack. Of course he is. McDow was sorry that he killed Carmack. Of course he is. McDow was sorry that he killed Carmack. Of course he is. McDow was sorry that he killed Carmack. Of course he is.

### Transatlantic. Five-year-old Helen was industriously learning to count by pink and blue for a doll's table-cover. She held it up and examined it critically. "Mother," she said, "I don't think this is a very stylish table-cover. It is just a pair of sleeves in it and call it a corner cover."—The December Detention.

For Sale by John Frazer, Chester, S. C.

# HACKNEY BUGGIES.

I have the exclusive agency in Chester and Chester County for the Hackney Buggy—the best buggy in the world for the money. It is light running, well built, handsomely finished, beautifully proportioned qualities combined in any other make of buggy.

# The Lantern.

Actna Cotton Mills Sold. Union, Nov. 17.—The Actna cotton mills was this afternoon sold to private sale to James S. Mitchell & Co., a commission house of Philadelphia, Pa. A creditor, for the sum of about \$200,000. This action was taken after two efforts had been made to have a public sale, both of which had failed, and it being deemed best for all interested to accept the offer made by Mr. Mitchell and close up the deal, so that the property might resume operation.

Neither Trustee Alfred Moore nor Referee J. H. Haysard would give out anything in the way of a statement but it is learned on very high authority that the above statement is correct, and furthermore that the mill will resume operation within the next 30 days.—Special to The State.

Made By Hackney Bros., Wilson, N. C.

# HACKNEY BUGGIES.

### ROYALL O. E. DAVIS, Ph.D.

Consulting and Analytical Chemist.

All kinds of chemical work done with promptness. Specialties: Cotton seed products and water. University of North Carolina, Chapel Hill, N. C.

# KILL THE COUGH AND CURE THE LUNGS.

# Patents Scientific American.

Advances in science and invention are the basis of our progress. The Scientific American is the world's largest and most influential publication of its kind. It is a must for every inventor and scientist.

# IT'S UP TO YOU

Our plan is to make every piece of printing which is turned out of this office a good advertisement for us, and for this very reason we never allow a piece of work to go out of the house until it is neatly and correctly done.

It is a certainty that you will give a neat and correct job when you give us your printing. If you ever have a difficult piece of work we would like to quote prices on it. There is no necessity for your having it done out of town.

# PUT IT UP TO US

INDIVIDUALITY—You will agree with us that your printing reaches the people you want to influence. It may be the salesman for your goods. It may carry your individuality to a distant buyer. No matter what business or profession you represent your printing should be strong and dignified. It should stand out and represent you. We have the equipment and the KNOW HOW to produce the right kind of printing at the right prices. See us about your GOOD PRINTING.
