As a rule, students in the study centers are taking three or others a single subject, and the courses have been closely studied with particular emphasis on the subject matter. During the past term, however, a number of these students have been provided with a college environment where they could both develop their intellect and work hard. The students have been given the opportunity to develop their intellectual abilities and to work hard. The course in this study centers have been so arranged that all different types of college credit courses have been included. The courses that are offered are both in the field of study and in the field of work. The courses have been so arranged that the students can develop their intellectual abilities and work hard.

The purpose of the study centers is to provide a means for the students to develop their intellectual abilities and work hard. The courses have been so arranged that the students can develop their intellectual abilities and work hard.
