Descriptions of series and its contents:

This folder contains the various records produced by and for the women's studies program. The Women's Studies program was founded in 1989 as an interdisciplinary program that promotes gender as a relevant and rigorous academic topic throughout the curriculum and in other areas of campus life. Among the goals of women's studies is to promote greater of women's experiences, perspectives, and contributions to all aspects of society including law, business, science, art, politics, history, family, medicine and religion. Women's studies also promotes a greater inclusion of women and women's contributions to all academic disciplines in order to correct a historical pattern of neglect, under-representation, or trivialization of women.
