Miss Hi-Miss Edition
President Davis Speaks To Seniors Of The Carolinas

To High School Seniors:

It is a pleasure for me to bring you greetings from the President's office. Our special Blue-Miss edition of The Johnsonian will carry much interesting information about Winthrop, your state-supported college for women in South Carolina. Our counselor, Dr. Charles S. Davis, will present a program which will emphasize excellence in education.

Davis is a native of Mobile, Ala., Dr. Davis holds B. S. and M. S. degrees from Alabama Polytechnic Institute and the Ph. D. degree from Duke University.

Our Department of Journalism and the Carolinas have contributed to the success of this publication, and the faculty is stimulating and cooperative.

I hope each of you will have the opportunity to visit Winthrop and learn of all the advantages your college offers.

Our Director of Admissions and other members of the faculty and staff will be happy to give you sound advice and guidance in selecting the college of your choice and your educational objectives. Drop us a line and let us know when you plan to come for a visit.

Charles S. Davis
President

New President Is At College’s Helm

Assuming the presidency of Winthrop College in September was Dr. Charles S. Davis, the fifth man to hold this position in the history of the South Carolina College for Women. He has served as president of schools in other states and provinces of the Southern Association.

In addition to his administrative duties, Dr. Davis will be a member of the faculty of the Southern Association of Colleges and Secondary Schools and a member of the committee on education and administration of the Southern Association.

Winthrop is a member of the Association of American Universities and has a branch of the Southern Association of Colleges and Secondary Schools.

Winthrop serves Young Carolinians

Winthrop College, located in the geographic center of the state, has been supported by the state and neighboring North Carolina for over 77 years. Founded in 1886, the college has grown in size and scope and in recent years has become a state-supported institution for young women in the state.

Because of its support by the state, the General Assembly and the governing bodies, Winthrop is able to offer a strong and varied curriculum in the arts and sciences. The college has also established new facilities for its students at relatively small cost.

Winthrop College and the state of South Carolina, in cooperation with the Southern Association of Colleges and Secondary Schools, the Association of American Colleges, the American Council of Education, the Southern Association of Colleges, the National Association of State Universities, and the National Commission on Accrediting.

President Speaks To Seniors Of The Carolinas

Winthrop's new president has much experience in the educational world. Having served as assistant dean and principal, he understands all of the numerous opportunities for ladies at Winthrop.

Dr. Davis is married to the former Mary Greenfield, who resides in the city, and is the mother of three children.

Winthrop's new president has many friends in the Carolinas, and is a native of Mobile, Ala., Dr. Davis holds B. S. and M. S. degrees from Alabama Polytechnic Institute and the Ph. D. degree from Duke University.

President Davis will assume his duties as president in the fall of this year, and the Winthrop College community is looking forward to his leadership.

Religious Survey Is Conducted Here

A religious survey at Winthrop College indicates that over 99 per cent of the student body of the South Carolina College for Women is church affiliated.

Of the 1,372 students at Winthrop, 1,359 are church members—leaving only 14 per cent without church affiliation.

Of the church members 91.3 per cent belong to three denominational groups—Baptist, Methodist, and Presbyterian.

A total of 604, or 44 per cent of the entire student body, are members of the Baptist Church. The Methodists are second with 360 students, or 26.3 per cent. The Presbyterian students total 291, or 13.9 per cent.

The three leading denominations combined claim 1,150 students.

Seventeen denominations are represented by the students. Only thirteen indicated that they have no church affiliation.

ARTIST SPEAKS TO CLASS—Artist and illustrator Peter Cloutet was guest speaker for the children's literature of the library science department class at Winthrop in the Fall. Mr. Cloutet is a former painter and a self-taught artist who has been in the business for 20 years.

He has an ability to capture the imagination of the children with his vivid illustrations. His work is particularly effective in conveying the atmosphere of a story through his artistry.

The children are captivated by his ability to bring characters to life through his drawings. His illustrations are a blend of realism and fantasy, creating a unique world for the children to explore.

The children express their appreciation for his work and are inspired to pursue their own artistic endeavors.
BUSINESS DEPARTMENT FULFILLS TWO-FOLD PURPOSE

Winthrop College's business department prepares business students for positions in business or for the teaching profession. In addition, the department offers a two-year curriculum.

In addition to the two-year curriculum, the department offers a one-semester course for students in the business field.

The department is equipped with the latest in modern business equipment and is able to offer practical training to students. The department is also able to offer part-time employment to students.

The department is open from 9:00 AM to 5:00 PM, Monday through Thursday, and from 9:00 AM to 4:00 PM on Friday.

Aided in securing business offices, this student is becoming adept in the operation of the minicomputer machine.

EASY DOES IT—Student in Winthrop's business department learns how to operate equipment while they will

FIGURE CAREFULLY—Long hours of effort are needed to master the various tasks that are performed by the business department.

STEADY HANDS—A steady hand is required to operate the various machines used in business departments.

OFFICE APPLIANCES—In addition to various machines, office supplies are also available. The office supplies include paper, ink, and pens.

HARD AT WORK—Typing and bookkeeping are essential parts of the business curriculum at Winthrop which normally includes a well-taught young women to enter the teaching of business professions. The students at Winthrop business major must have a strong background in business, including algebra, accounting, and economics.

EFFICIENT WORKERS—The Winthrop College business department prepares business students for positions in business or for the teaching profession. The department is equipped with the latest in modern business equipment and is able to offer practical training to students. The department is also able to offer part-time employment to students. The department is open from 9:00 AM to 5:00 PM, Monday through Thursday, and from 9:00 AM to 4:00 PM on Friday.

Aided in securing business offices, this student is becoming adept in the operation of the minicomputer machine.
Courses For All Available In Fine Arts

A varied and extensive fine arts program at Winthrop College provides ample opportunity for all students to develop their artistic talents. The department is geared to provide a solid foundation for the training of artists and technicians as well as courses for students in other departments who wish to develop skills in drawing, painting, sculpture, and other studio arts.

Education, house decoration, interior decoration, and commerce students are among those who find courses in this department helpful to them in their major courses.

Forty-four courses are offered in the department of fine arts and this department is one of the major fields in which a student may begin taking courses in his freshman year. Students may take 12 hours of basic courses during the freshman and sophomore years. These courses include figure drawing, the history of art, drawing, design and color, painting and drawing.

The art major at Winthrop emphasizes art history, theory, and studio work equally during his course of study. Thirty semester hours are required for a major in fine arts for which the Bachelor of Arts degree is awarded. Plans are now underway to award the Bachelor of Fine Arts degree.

Students majoring in other fields may choose a minor in fine arts by completing 18 semester hours work in the department.

Skilled technicians in the fine arts faculty are Professor William L. McDermott, head of the department, Associate Professor Thomas Melk, and Assistant Professor Yancey Robertson.

Ceramics is one of the fine arts fields which offers many practical career opportunities. To enhance study in this field and to stimulate a new life in ceramics, a large new kiln has been added to the facilities provided in the department. A basic course in ceramic practices, including explorations in ceramic problems and studio projects in techniques, materials, and tools of ceramics, is taught. Art majors interested in creative development and experience which enable them to handle the entire scope of art materials.

Open to all students in introduction of craft materials and methods. The course is followed by an advanced study of problems and techniques in ceramics. Students may select courses in sculpting, painting, and ceramics. Advanced courses are for students in the fine arts department. Students may select courses in sculpturing and portrait-involving studio practice. A popular elective in the fine arts department is photography.

Introductory courses provide foundation experiences and later courses give students advanced training in problems in painting, composition, portraiture, experimentation, and research.

Problems in modeling and sculpting techniques, methods and materials are studied by the studio students and advanced students may take exploratory commissions and work independently. Elective courses in photography are offered as well as advanced instruction in studio processes. Further courses provide advanced instruction in other fields of photography.

Experiences in these courses include photographic techniques, scientific photography, portraiture, studio, adds, pictorial photography, cinematography and other subjects.

Launder and dry cleaning units are located on the campus for the convenience of the students. A laundry fee is included in the yearly schedule of payments to the college.

PHOTOGRAPHY—Winthrop is one of the few women's colleges in the state to offer its students a course in photography. The course in photography is an elective course, designed to give students a basic knowledge in the operation of modern cameras. Students may choose courses in the study of modern techniques in the use of the camera. Courses include studio photography, portrait photography, and other subjects.

PAINTING—Instructor Josephine M. Mendenhall, M.A., is an active painter and is a member of the faculty of the department. The department is well equipped with studio space and a variety of painting materials. The courses in painting are open to all Winthrop students regardless of major.

HOLD STELL—Living models, still life and landscape art material is utilized by students in the fine arts department for sketching and painting. Many of the courses in the fine arts department are open to all Winthrop students regardless of major.

GRAPHIC ARTS—This student in graphic arts is developing a scale model of a studio and participating. Some of the courses in the fine arts department are available to students in their freshman year.

HUNGRY SCULPTURE—Junior Cell Baker of Crewe, Va., is an elementary education major, participating in a piece of her sculpture work. Senior students majoring in fine arts are available to students in their freshman year.

CELEBRATION—The Johnsonian proudly presents the Miss Hi Misses of South Carolina.
The Johnsonian Proudly Presents The Miss Hi Misses Of South Carolina

LATIN FORUM - These students from Greenbriar High School, Winnsboro, were awarded first place for their Latin Forum at Winthrop College last year. Numerous dates and contents are held during the event when students attend the annual Latin Forum at Winthrop College.

THOUSANDS ATTEND LATIN FORUM HERE

The South Carolina Latin Forum brings to the Winthrop College campus each spring the vocal and visual representation of high school students. The 1960 Forum had a record attendance, 250 students and 13 teachers.

The Forum is sponsored by the South Carolina Junior Classical League. This is a branch of a national organization of high school students who are devoted to the study of the Latin language and culture. Each school is required to elect a De Mecenas, a Latin teacher at the Greer School for studying the human language. This teacher must be certified in Latin and have at least three years of teaching experience.

In October the officers of the League and their teachers met at Winthrop College with Miss Cline, Mrs. Barron, Dr. Jones, and Dr. DeVore to plan the 1960 Forum which will be held on Saturday, March 11, at Winthrop College. The main feature of the Forum—quizzes, games, compe- titive tests, and meals—will be held again. All students are invited. Mrs. Barron, William Taylor, and Dr. De Vore will direct the Forum.

A number of special events are held each year for the Winthrop student body. Among them are Classic Day, May Day, Junior Fellows, and special weeks for each of the freshman, sophomore, and senior classes.

Elective Lab Aids Language Study

With the awareness of the importance of foreign languages caused by the changes of the world today through more rapid means of communication have come new learning techniques.

Chief among these new methods is the use of electronic equipment.

Winthrop College has recently installed a new lab- oratory equipment to its present modern design.

The laboratory has 24 booths, each equipped with headphone, a meterlogic, and a tape recorder.

Thus, students may now hear the correct pronunciation of the language they are studying on master tapes and also record their own voices and hear the professor's as she teaches.

The laboratory is only, of course, a supplement to the regular class work for nothing can take the place of the teacher.

Every language student at Winthrop College spends one hour a week in drill work in the laboratory in addition to the regular three-hour class schedule.

Five students, majors in foreign languages, assist in the laboratory, ensuring that students leaving will have proper pronunciation.

Most high schools today are installing laboratories for their language classes. The students who require training in the use of electronic equipment in college will be better prepared for their teaching.

Students in the department of modern and classical languages support a club which features the four languages—French, German, Latin, and Spanish.

The program offers a supplement to the regular class work, giving the student information on the cultural life of the countries whose languages they are studying.

Officers for 1960-61 are: President, Edna Ann Nee of Winthrop; vice president, Carolynn Forrest of Cherokee; secretary, Betty Burgin of Spartanburg; treasurer, Mary Collins of Spartanburg; publicity chairman, Mary Collins of Spartanburg; Miss Burgin of Spartanburg and Miss Forrest of Spartanburg as cochairs of the program committee.

Each year the department presents feature- length films in French, German, and Spanish. These films are spoken in these languages but have English subtitles to assist the students.

The films are always looked forward to as a very valuable contribution to the cultural life of Winthrop, as the films give the students an accurate picture of the countries' cultural life. The films are shown weekly in the French, German, and Spanish courses.

This year in response to a general trend in the United States to study the Russian language, a Russian professor has been organized a new Russian club, in which students can listen to tape recordings and make their own recordings of their own language.

The forum carefully—Winthrop College has selected two Latin students who have been awarded a special $505 study trip to Mexico and Spain, which students can listen to tape recordings.

NOW HEAR THIS—At the master control board in the language laboratory, the teacher can speak to students individually or to all 25 at the same time. Turning the board is Dr. Frances Jacob.

Health Instruction Serves Student And Future Teacher

In the personal interest of Winthrop students as well as for a foundation for their formal education, Winthrop maintains a department of health instruction.

Under the instruction of Miss Katherine Adams, the health courses are designed to be beneficial to the students as well as the future teachers.

Required of all students in a course in personal health which stresses the principles of personal hygiene. The students are encouraged to make practical application of the knowledge gained in this course and they are given the opportunity to evaluate their personal health histories.

Community health deals with environmental health hazards and their control, the community attack on specific diseases and disorders, health problems peculiar to certain groups, and health agencies.

Winthrop's adult extension program is studied in another course which includes the aims and objectives of the extension program and the methods and materials that are used to carry on the work of the program.

In addition, in her academic duties, Miss Adams and her students cooperate with the Infirmary staff during the freshman and senior physical examination periods and in any other way in which they are need-
Increased emphasis is being placed today on the study of science in the schools and colleges throughout the country. Trained scientists are in great demand in the many technological industries.

Speaking at Winthrop in the fall, Dr. Wray A. Baus of Florida State University, a noted physicist, said that women in the scientific field will have to go into the scientific field if it is needed for more scientists to be used.

In the field of chemistry Winthrop offers the Bachelor of Arts degree. Students must complete 20 semester hours and must include organic chemistry and either physical or inorganic chemistry and instrumental methods.

The course in instrumental methods was added recently. It provides an opportunity for analysts in the use of steel in the making of steel. It is also useful in the production of steel.

College algebra and plane geometry are also required.

A major in chemistry helps a general science major to complete his work in six hours of chemistry. It is also helpful in the fields of biology, geology, and physics.

A minor in chemistry consists of 12 semester hours.

The chemistry major, in addition to providing a definite emphasis on the laboratory, gives work in the field of research as well as in the practice of professional chemistry at the bachelor's level.

A student who wishes to go in the laboratory will find that the laboratory work in chemistry should take physical chemistry. They may also take organic chemistry and instrumental methods in addition to their major.

These students are also advised to take German or French as their foreign language. German is preferable.

The chemistry department is currently housed in Tillman Hall. It will be housed in a new building by the time the summer term opens.

The chemistry department's text, "Zeta Alpha," is the basal chemistry text. Copies of the textbook are available for purchase and it is recommended for the major.

The members of Zeta Alpha are expected to take the field in chemistry and partake in the activities of the department.

Employment opportunities in chemistry at the bachelor's level are plentiful, particularly with the present emphasis on scientific research. For it is rarely a very old, stagnant field. Advances in teaching or research at leading institutions are available for students with good college records.

JOEY A. MÖDER—Tommy Wagner, a sophomore in chemistry and physics at Winthrop, and a student in a laboratory, has been a major in chemistry. The student is studying the properties of a stainless steel wire and its behavior under stress.

CHECK CLOSELY—Tommy Wagner, a sophomore in chemistry and physics at Winthrop, and a student in a laboratory, has been studying the properties of a stainless steel wire and its behavior under stress.

THE JOHNSONIAN Proudly Presents The Miss Hi Misses Of South Carolina

Major In Chemistry Offers Opportunities
Strange Names And Far Away Places Studied In Geography

Strange names and far away places become familiar to Winthrop students who take geography.

The study of geography offers opportunity to become familiar with some of the fascinating peoples and cultures of other parts of the world. Winthrop now offers a major in this department which consists of 27 semester hours of study-a minor requires 15 semester hours.

In addition to study for a major or minor, the department is also open to students who wish to take courses as electives. Some study in this department is necessary for students entering teacher-certification requirements.

Man's adjustment to his physical environment and his response to the various climatic and topographic features of the earth are two of many situations in which students in this department find the answer.

The study of geography includes such subjects as economic geography, the study of world resources and industries with emphasis on those of America; the geography of North America, a regional study of the United States and Canada; conservation of natural resources; regional geography of the world; the geography of Latin America, Europe, Asia, Africa, and the Near East; and cartography, the study of the history of making maps and of basic map characteristics.

Some of the very finest wall maps are used in these courses. This department also has a light table for use of the student constructing maps as far as possible.
Sociology Students Learn Of Social World

Study Is Stepping Stone To Career In Social Work

The sociology department at Winthrop gives many students their first acquaintance with scientific information about the social world. With a few familiar practices as the weapon, many more than children are taught that peace and make war are put under the microscope to study and examined in an objective, factual way.

A better understanding of themselves and others is obtained. Winthrop students by the sociology department. It is fully long recognized that social life is rapidly changing. Sociology students pursue their study of those changes, learning more and more about the complex conditions that help explain human behavior.

A major in sociology can be used as a stepping stone to a career in social work, teaching or research. Problems and solutions begin their study of sociology with courses like crime and society or the principles of social work.

Majors usually include anthropology, sociology, and political science. Sociology students study the meaning of social behavior among the societies of which they are a part, and minorities may accept them as electives.

In anthropology the student learns the forms of the social and cultural institutions that characterize a given society. In political science the student learns the meaning of social behavior among the societies of which he is a part, and minorities may accept them as electives.

The survey of social work courses covers a wide range of topics in social work and is conducted to prepare the student for the social work profession. Sociology students take courses in social work and learn the fundamentals of the social work profession. Sociology students are trained to work with people in social welfare agencies. They learn the principles of social work and the methods of social work. Sociology students are trained to work with people in social welfare agencies. They learn the principles of social work and the methods of social work. Sociology students are trained to work with people in social welfare agencies. They learn the principles of social work and the methods of social work.

The Winthrop sociology department has a Sociology Club to which any student who can serve as a member of the sociology faculty is invited. The club meets on the first Thursday of each month to discuss topics of interest to its members.

A highlight of the sociology department's activities is the Winthrop Sociology Forum which features speakers from the college and from other universities. The forum is open to all students and faculty and is a regular feature of the sociology department's activities. The forum is open to all students and faculty and is a regular feature of the sociology department's activities.

The forum is open to all students and faculty and is a regular feature of the sociology department's activities.

FUTURE SOCIAL WORKERS—These students in sociology study social work find out from Dr. Dorothy H. Mathews, guest lecturer from the University of California, that social work is one of the fastest growing professions in America. Dr. Mathews pointed out that the social work field is in need of new and well trained workers. Students shown, left to right, are Carol Suber, Myrtle Beach, Lucinda Bruns, Sumter, Dorothea Be orange, Sumter, Dr. Dorothy V. Blum, Upper Darby, Pennsylvania, Dr. Dorothy Mathews, University of California, and Mary Jane Eizember, Green.
Dramatic Art Department Is Exciting

One of the most exciting departments at Winthrop is the Dramatic Art Department. It is the department through which a student may acquire a comprehensive knowledge of dramatic literature and practical training in all phases of the theatre. 

Study in the department ranges from writing the play to the complete presentation before an audience. Both the junior and senior students are encouraged to participate in the many activities in this field. Participation in the department is open to all Winthrop students. 

From sources as near as theatre appreciation, playwriting, acting, directing, and costume design and as far as study of the Greek theatre, the student is prepared for any phase of the dramatic art. Prizes have been established for students excelling in any phase of the art, and a special award is given for merit in any phase of the art. 

In the past, Winthrop students have won First Place in the Woman's College of the University of North Carolina. 

The Winthrop Theatre is located in the auditorium of Johnson Hall and is equipped with the latest in lighting and sound equipment. The department has a two-week summer session for its junior students, and a full-time summer session for the senior students. The department is open to all Winthrop students as well as to children in the dramatic art department.

MR. NING THE SPOT—James St. John of Young is operating the spot light which focuses on the stage. Work with the Winthrop Theatre is open to all Winthrop students as well as to children in the dramatic art department.

PRE-WINNING PLAYWRIGHTS—Dramatic art students write plays as well as produce them and these two activities have been combined for their own benefit. The students have won first place in the Woman's College of the University of North Carolina and have won several additional prizes with "This Dark World and Night."
The Johnsonian Proudly Presents The Miss Hi Misses Of South Carolina

Theatre Activities Open To All Students

CARIBBEAN HOLIDAY—The biggest hit the Wintergarden Theatre has ever had was “Caribbean Holiday,” an original musical comedy by Mr. Christopher Reynolds of the drama department faculty. Some of the members of the cast, who had so much fun in the audience, were, left to right: Sara Carter of Racine-

ville, Wynn Hurn of Ringgold, Joyce Curtis of Newberry, Paris Court of Wilson, Jerry Qualls of Columbia, Juan Poma of Byrd, B. C., Sarah Ann White of Evans, Sandy Coombs of Union, and Lisa Williams of Lancaster, S. C.

ANTIGONE—Appearing in “Antigone” this fall were Ms. Doyle of Chester and Ms. Adams of Greenville. Antigone is a modern psychological drama translated by Louis Gainsford from the French of Jean Anouilh. This production was directed by Mr. J. Robert Swain of the dramatic art faculty.

THE WOMEN—Opening the current Theatre season in the Fall was the production of “The Women” by Clare Boothe. This marks the second successful production of this play by the Wintergarden Theatre. It was initially presented here in 1930. Appearing in “The Women” were of Wintergarden students, among them, left to right: Toni Schaefer of Rock Hill and Julie Sterling of Darrel-

ton, N. C. The Theatre generally presents three major productions during the year in addition to the usual of original, modern plays and a half-dozen children's plays.
Music Department At Winthrop Is Strong

Numerous opportunities for study and participation are available in the department of music for students who are actively interested. For those who enjoy good music and want to learn how they can better appreciate music, there are many programs by students and guest artists who appear on the Winthrop College Artist Course Series.

For many years Winthrop's department of music has been a member of the National Association of Schools of Music and provides the second and degree requirements to conform with the high standards of that accrediting agency.

Facilities for the teaching of music at Winthrop College are equal to those of any institution in the South. The conservatory of music contains a recital hall, seating 200, the stage of which adjoins the stage of the College Auditorium. It also contains administrative offices for the department, a newly-decorated reception room, four class rooms, and instrumental rehearsal room, 15 studios and 10 practice rooms.

Eighty pianos, a four-manual Aeolian-Skinner concert organ, a large, three-manual Skinner organ, a two-manual practice organ, and an electric practice organ provide ample opportunity for practice for music students.

Excellent high fidelity sound systems and a large library of long-playing records add greatly to the possibilities for learning music literature.

Basic instruments for both hand and orchestra are also owned by the college. These instruments are available for students for study upon payment of a small rental fee.

Students who wish to major in music may choose either the Bachelor of Arts or the Bachelor of Science degree. The Bachelor of Arts with a major in music is a curriculum of more liberal content providing a general cultural background with special emphasis on music.

The department of music offers two types of the Bachelor of Science degree, both providing full-accredited professional training in music. A student may elect to major in music education and graduate on one major instrument, or she may choose the B.S. degree in choral or instrumental music. The teacher certification requirements for the State of South Carolina are also included in the Bachior of Science program but the student can choose the degree area according to her major and interest. The B.A. degree provides credit for the state of South Carolina.

The classroom instruction in music theory, history of music, teaching methods, conducting, counterpoint, and composition prepares the major music for providing a musical background and developing musicianship.

Student recitals are held weekly to help the student develop confidence and poise in public performance. These recitals are intended primarily for all music students but they are open to the public as well.

Students majoring in fields other than music may elect one of the courses in music appreciation and may receive private instruction in applied music.

Students who major in an instrument give a joint recital in the junior year. These recitals are a part of the degree requirements and are held in the afternoon. One of the most important events in the life of the major music student and in the life of Winthrop is the Senior recital. This solo recital is the climax of three years of concentrated study in the field of music.

Of particular pride in the music department of the college is the four-manual Aeolian-Skinner organ in the College Auditorium.

Costing more than $20,000, this instrument was dedicated in November, 1955, and is one of the finest in the South.

Each year a noted concert organist appears on the Winthrop Artist Course Series. Concerts on this organ have been given by Virgil Fox, Robert Baker, Jerold Hamilton, and Alexander Schreiner.

Advanced students of organ are permitted to use this instrument for study, practice, and performance. A number of musical groups are sponsored by the music department. Participation by all qualified students is invited and encouraged.

In addition to its strong academic program on the Winthrop campus, the department of music is well-known for its outstanding work in developing school music programs with the public school music program in South Carolina.

The South Carolina High School Music Festival was attended at Winthrop in 1957, by Dr. Walter J. Roberts, former head of the music department. Dr. Roberts has been succeeded by Dr. Jane T. Casey who is now head of the department.

Each Spring thousands of students continue to the Winthrop campus to participate in this event. Last April approximately 2,000 students took part in auditions, in competitions in voice, piano, instrumental, band, and orchestral events.

Winthrop students with the Music Festival, two classes taught the music directors of the state in preparing choirs for the competition. The Senior and Junior Clinics are held in April in the Band Clinic is held in January.

Outstanding scholarships and assistantships are brought to the Winthrop campus for those students with outstanding musical ability.

WC Students Learn To Enjoy Good Music

MUSIC THEORY — Mr. John Baker of the music faculty is conducting a class in the theory of music.

Students in three advanced classes wrote an original anthem which is performed in church.

OUTSTANDING CLINICIAN — Directing the women’s Choral Clinic of the South Carolina High School Choral Directors’ Association is Miss Margaret Hill, president of the American Choral Directors Association and dean of the music department of Ohio State University.

TENTHROP CHOIRS — The two-organist Winthrop College Chorale under the direction of Mr. William G. Hold, music director of the college, has sold out three concerts during a ten-weeks' tour.

COLLEGE BAND — Directing a rehearsal of the Winthrop College Band is Mr. T. W. Bracken, who is also director of the school's band.

COMPOSER-PLAYWRIGHT — Mr. William H. Wink, noted composer and music teacher of Winthrop, will also be composer and playwright. A play by Mr. Wink was presented for the first time at Harvard University, and he also performed his "Monk," a short

humorous work for the organ, at Columbia University. Another play was performed at Harvard, and he won a prize at the University of Chicago.
P. E. DEPARTMENT PROVIDES RECREATION FOR ALL

Physical Education, known as Washburn's physical education department, is always a favorite at Washburn.

This department has a long tradition of excellence. It must supply the needs of the physical education majors and physical education majors who must take the two years of physical education courses to meet the requirements of the major. The courses are designed to meet the needs of the students, both physical and non-physical.

Courses in the physical education department are required of all students. From the freshmen to the seniors, the students are exposed to a variety of physical education activities during their college years. The courses include physical education, health, and physical fitness.

As an individual sport the students may enter from nine courses in tennis, golf, archery, and badminton.

Washburn offers beginning exercise, swimming, advanced swimming, and karate. Selected courses include basketball, tennis, archery, and badminton.

The P.E. facilities are very modern and are located in Washburn's new gymnasium. The facilities include a full-length indoor pool with a 16-lane swimming pool, a 25-yard, indoor swimming pool, a 6-lane, indoor swimming pool, a 12-lane, indoor swimming pool, and a 25-yard, indoor swimming pool.

In addition to the facilities, Washburn offers a variety of activities for its students. These include tennis, basketball, archery, and badminton.

GRACEFUL DIVE — Washburn's Women's water polo team scored a successful victory in a recent meet. The team worked hard to prepare themselves andexcel in the department's pool.

VARIETY OF SPORTS — The department offers a variety of activities for its students to participate in. These include tennis, basketball, archery, and badminton.

FOLLOW THROUGH — One of the best ways to enjoy the new facilities is through the variety of sports offered by the P.E. Department. The department provides a wide range of activities for its students to enjoy and participate in. The variety of sports offered by the department includes tennis, basketball, archery, and badminton.
The Johnsonian proudly presents the Miss Hi Misses of South Carolina.

Great variety of sports is offered students.

Modern dance—A popular dance elective in the physical education department of students where it is taught by Miss Alice E. Sible, students personally perform a Christmas program which was called the year "Misses for Christmas." The college students were joined by a children's group instructed by Miss Sible for the occasion. The new dance studio is located in the addition to Peddie Gymnasium.

Bowling—A great new hobby is among the facilities available to Wabash students in the addition to Peddie Gymnasium which is now in use. The students enjoy the rise of the old gymnasium and include a recreation room, student and faculty union, and a dance studio.

Archery—A possible hobby will result from the new archery range of these extracurricular activities. An archery contest was sponsored by the Winship Recreational Association in December and the event brought home a real fine archery for Christmas dinner. The archery range is located on each campus behind the Conservatory of Music.

Careful players—This looks like a light in the hands of Winship students. Taking part are: George Thomson, who is the director of the recreation facilities of the department of physical education and capable of all Winship students whether they are enrolled in the department or not. For students who are not majoring in physical education, this information is worth to all Winship students whether

Strong Curriculum Is Offered In Home Ec

The home economics program at Winthrop College is planned to help students function effectively and creatively as individuals, as family members and as responsible citizens; to increase their understanding of the art and science of better home living; to prepare them for both homemaking careers and for a wide range of careers in home economics or in a related profession.

Winthrop College invites every student regardless of her present major interest to elect some work in home economics for preparation and employment of home and family life, the ultimate choice of most young women. The department is well housed in a modern home building, with two management apartments, a nursery school, and two convenient home management shops.

Winthrop also offers to students who choose to major in home economics as an opportunity to prepare for a career which may be chosen from a number of interesting, challenging, well paid positions in various areas of home economics.

For the girl who is interested in the sciences, the home economics department offers the opportunity to qualify as a professional dietitian which is a useful, satisfying position of service to others.

Graduates from this curriculum find excellent employment in schools and colleges, hotels, restaurants, home places, and positions as food service managers and in commercial fields related to food.

If you are artistic, Winthrop offers you the opportunity to develop your talent in the field of fashion, textiles, clothing and home furnishings.

If leadership activities with young people interests you, the home economics program offers you preparation for teaching home economics. Successful teaching of home economics leads to other careers in education as supervisor, administrators, and teacher trainees.

Rural leadership programs through 4-H Clubs and home demonstration work offer additional opportunities. In addition to the county positions, the extension includes a state staff of specialists in areas of specialization in home economics.

A variety of well paid positions are open in the business world for college graduates in home economics. For example home economics are employed by equipment manufacturers and architects as planners before building through use of modern equipment.

Other home economists find careers in the textile mills, engaged in selling and marketing of modern textiles, or in the wholesale and retail trade of textiles.

Today's fabric used in clothing, rugs, and household textiles calls for new knowledge on the part of the buyer and user. Some home economics are qualified for these important positions in industry, which require knowledge of fabrics, with that distribute textiles and clothing, and with the public.

Perhaps your talent lies in applying art to everyday living through design in home, fashion, clothing or even handcrafts. These are increasingly important ways to use leisure interestingly and constructively. Home economics leads to careers in these fields.

In the field of education, women with a bachelor's degree may choose a career as a teacher in schools or colleges.

In other fields, home economics helps to plan and arrange the home life of young people. Home economics is an important part of Family Relationships. It is in two fields that it provides opportunities to bridge the professional fields. Colleges and universities, through research and graduate programs, are endeavoring to educate young women to discover new knowledge valuable in better living and to train the leaders for all programs for better living. Winthrop is participating in the development of a graduate program in home economics.

The strength of a department can be measured by its graduates, and Winthrop's home economics department in this regard is very strong. It can hardly be a bad combination of the enthusiasm of its faculty and the enthusiasm of its students.

The following names and positions of home economics alumni illustrate the different careers based on home economics training.

In the field of education, Mrs. Mary Dykes is a home economics and high school teacher, serving as a supervisory teacher for Winthrop College. Miss Olive Liddle is in home economics education at Pennsylvania State College. Miss Annie Miss Coleman serves as district supervisor of home economics education with the South Carolina State Department of Education.

In extension work, Miss Peggy Berts is assistant home demonstration agent for Loudon County. Miss Georgia Taylor is State 4-H Club agent.

In the field of business, Miss Margaret Ann Craig is a home economics specialist with DuPont and Light and Chemical in Charleston. Mrs. Berts is a home economist in the field of economics with the Southern Credit Union.

In the field of dietetics and nutrition, Miss Miriam Carraway teaches at the University of South Carolina. Miss Margaret Freeman is a dietitian at the Carolina Medical College in Charleston, South Carolina.

In the children's services division, Mrs. C. E. Melton Jones is director of the Episcopal Day School in Charleston. Miss Helen Langdon is a home economist in the modern department and Miss Mildred Ludlow, director of Shannon Presbyterians Day School.

WHAT TO BUY — Chances in the home economics department. Students who work hard at their courses and study hard at home will be able to distinguish what to buy and what must be bought. Every student is invited to end in home economics courses for a career in home or in any other area of interest. The ultimate choice of most young women.

Preparation For Many Careers Is Offered

CAREER CARNIVAL—Winthrop College staged its first Career Carnival this fall, with representatives of various homemakers' associations in South Carolina present. The Career Carnival is expected to be an annual event at the Winthrop College for Women.

JUST RELAXING—Relaxing in the newly remodeled apartment at Winthrop Hall, Winthrop's home economics building, are those students who are receiving two weeks experience in the homemaking apartment. These students are studying management, equipment and menu of the home.

HARD AT WORK—Living as the house manager, the student is just like living at home. It includes teaching the students, washing the clothes and even an opportunity to entertain friends at socials.

THE HONEY TOUCH—Bright eyes and a smile greet the right woman to the modern kitchen of the home economics home management house. Students actually live in the home for six weeks prior and operate it under the supervision of a member of the home economics faculty.

THE COOK—it's like student's home to be cook in the home management house. Maybe next it'll be expected. The students rotate the jobs so that they can get experience in each phase of homemaking.

ENGLISH DEPARTMENT COMBINES DEPTH AND VARIETY

The English department at Winthrop offers a strong, balanced program, that continues to mature with time. Every student is required to take four semesters of English. In addition to the traditional course, the department offers a range of electives that allow students to explore various facets of the language, from creative writing to literary criticism. The department places a strong emphasis on developing critical thinking skills, which are essential for success in any field.

In English, the student gains a broad knowledge of the language, ranging from grammar and composition to the study of literature. The department offers courses in literature from various time periods and cultures, allowing students to explore the diverse ways in which language is used to express ideas and emotions.

The department also places a strong emphasis on writing, offering courses in creative writing, expository writing, and research paper writing. These courses help students develop their writing skills and learn how to effectively communicate their ideas.

Finally, the department places a strong emphasis on oral communication, offering courses in public speaking and debate. These courses help students develop their ability to speak clearly and effectively in front of an audience.

The English department at Winthrop is committed to providing a well-rounded education that prepares students for success in any field. Whether you are interested in literature, writing, or public speaking, the department has courses that will help you reach your goals.

LAVISH, MY CHILDREN—One of the most popular events in the English department is the annual book sale, where students can purchase books from almost every department at Winthrop. The sale is an excellent opportunity to support the department and gain access to a wide variety of reading material.

DEEP THOUGHTS—One of the most popular aspects of the English department is the weekly writing workshop, where students can work on their writing and receive feedback from their peers and instructors. The workshop is a great opportunity for students to improve their writing skills and gain confidence in their abilities.

STUDYING THEM UP—Dr. Harmoner, head of the English department, takes a proactive approach to teaching, ensuring that the department is equipped with the latest technology and resources. The department is committed to providing a high-quality education that prepares students for success in any field.

Personnel Needed For Religious Careers

The shortage of trained personnel in dozens of careers in religion is tremendous, according to Dr. E. L. Jacobson, head of Winthrop's department of philosophy and religion. Two hundred and twelve religious workers are needed each year to teach in seminaries and theological schools in America and foreign countries where American churches maintain their own educational institutions.

Dr. Jacobson gives the following list of careers in religion that are open to women who have the proper training:

1. Work in foreign countries as missionaries of some religious denomination.
2. Work at home in religious work, such as teaching and pastoral care.
3. Work in religious education, such as teaching in Sunday schools and religious classes.
4. Work in religious organizations, such as the American Society for Religious Education.
5. Work in religious publishing, such as editing religious books and periodicals.
6. Work in religious social work, such as social case work in religious agencies.
7. Work in religious music, such as teaching and directing church choirs.
8. Work in religious art, such as designing church decorations and icons.
9. Work in religious writing, such as writing religious articles and books.
10. Work in religious broadcasting, such as producing and hosting religious programs.

Dr. Jacobson emphasizes that women have a unique ability to work in religious fields, and that they are often more effective than men in certain areas of religious work.

In the United States, the most promising fields for religious workers are in foreign missions, religious education, religious social work, and religious publishing. In foreign missions, women are needed to work in countries where American churches have established missions.

In religious education, women are needed to teach in Sunday schools and religious classes, and to develop religious curricula.

In religious social work, women are needed to provide pastoral care and social case work in religious agencies.

In religious publishing, women are needed to edit religious books and periodicals.

Dr. Jacobson concludes that religious work is a meaningful and fulfilling career for women who have the proper training. He encourages women to consider careers in religion, and to prepare themselves for such careers through education and training.
