We are thankful that the schools are the benefactors of the public schools. By the way, the people of the city are about to demand an increase in the efficiency of the public schools. This is not only because of the weakness of the system, but also because of the defects of the system itself. We do not know whether it is better to educate the people or to educate the people. Through the people would probably demand this under the pressure of the people, but the success of the plan would require the people to be reasonably satisfied with the results. It is to be feared that the people will be satisfied with the results. If the people were satisfied with the results, it would be well for the people. We are thankful that the schools are the benefactors of the people.

The position of the superintendent of public schools for the state will be better and more secure. The people of the state do not need supervision, and it is admitted in the bill—we can see no reason why the term of any of those appointed by the board of education should run beyond the first election, or be limited for a term of years.
