SAM SNODGRASS

Men have thought of the saying

that all men are born equal, and

applied it to all of the time of the

lives of men.

The maxim is changed into many

different forms to suit the

thoughts of the man who does not

think that he has had an equal

show with other men.

The idea was used at first

mainly in relation to political and

governmental privileges. Those

who framed the Declaration of In-

dependence undoubtedly had poli-

tics in view when they used the

expression.

No matter what may have been

its original meaning, it is now

used as a kind of excuse for

claiming that the reason why

some men are better off than others

is because some have not had an

equal show with others.

This view of the meaning of

the assertion that all men are born

equal will not hold true except in

its literal sense and without ap-

plying it any further than the

rights of men.

Men are indeed born equal, or

should be born equal, in so far as

their chances of success in the

world are concerned. In other

ways they were never born equal

and never will be born equal.

Some men are born with more

brains than others are born with

better health than others.

Some grow up with saving habits

that they try to live within

their income and save something

every year for investment, and so

they grow into men of fortune;

while others who grow up with

the wasteful and spendthrift

habits that they try to live

within their income and save nothing

except to wait out the refrain

of their fathers, will not get

to do not get their rights.

The man who is doing less than

any other in any community is al-

ways the man who is complaining

the most. If he cannot find any

thing else to dwell on in his daily

conversations, he will say that

times all hands are bad and has not

half a chance. The great idea

is to blame it all on the

shoulders of some other man, or

set of men, by saying that they

exceeded their rights and obtained

advantages that they are not

entitled to.

Yes, men are born equal, in a

very limited sense. They do not

remain equal. That statement is

proved to your satisfaction by

looking round you any day, and

thinking back just a few years.

Men start equal at the cradle,

but from that point onward

through life, some will out-

distance others. Do they do it by

reason of any right that they get

from the government over those

that may be accorded to others

who have lagged behind in the

race? Those who have gone a-

head of their fellows have done

it by means of the exercise of the

powers that were given them at

birth.

The matter of training has

much to do in the unequal stand-

ing of men as they go through

life. Training is important. The

mind of one man who you see

begging on the streets may be as

bright as the mind of the man

you see in charge of an immense

ALL ARE EQUAL, YET NOT

A GUERNSEY DREAM

I wish that I lived in the land

of my dreams

Where the grass grows knee-deep

high.

With a silvery sheen, like a fal-

ter's green

And the blue of the sunlit sky.

Where Guernsey cows, the whole

day browse

In fields of clover sweet,

Or drink their fill at little rills

That sparkle about their feet.

Where also stand on every hand

And barns are filled with hay

And the air is sweet with growing

wheat

And honey bees in May.

Where I can rest on old Earth's

bosom

And see my dreams come true.

And glossy green with a silvery

sheen

And a hatch of the sky so blue.

Where Guernseys graze in fr-

ing great ways

With never a "scrub" in sight.

Never a red or a black or a brown

But only the "white."

Where the milk that drips from

the milk pails lips

Is the color of new milled gold.

Like butter packed in a yellow

stack

Like the loot of a pirate bold.

When the farmer's chin is a ten

inch grin

Like you see in the minstrel show.

As he grips the hand of his fellow

man

And watches his

Announcement—Dr. J. P. Young has moved his office to the Meigs building opposite the Court House in the office recently vacated by Prof. Brockman. 6-13-20-27.

Announcement—Dr. W. R. Wallace and Dr. W. J. Henry announce the removal of their offices to the Schobers Building. Telephone 210. 7-1-21.

Mr. R. B. Caldwell spent Wednesday in Columbia on business.

Mr. J. T. Orr, who has been in his home in Richburg for the past four weeks, remains there the same.

A Mission school will be held at the First Baptist church next week, beginning on Tuesday and lasting through Friday. A plan for men and boys will be conducted by Dr. W. M. Moore, pastor of the church. There will also be classes for the women, G. A.'s, and Y. M. C. A. members. All classes will begin at 7:30 o'clock. A light supper will be served each evening. Each night of the mission school a lecture will be given. Dr. Dean Crane, of Columbia, will be the lecturer for the first night and Rev. W. C. Barrett, of Gastonia, for the second night. There will also be a speaker for Wednesday night but has not been announced yet. Rev. Wallace Johnson, of Gastonia, will lecture Friday night. All denunciations are cordially invited and those who do not care to attend the classes will be welcomed at the lectures each night.

The News is in receipt of the following communication: In the semi-annual celebration of the Yaphank Literary Society, one of the outstanding events of the college year, at Erskine, the following Chester boys have been chosen by the members as participants: H. Maxton, Jr., Senior orator; J. T. Bigham, Jr., Junior debater and Matthew White, assistant marshal. This celebration will be given the first Friday night in March.

Dr. Flournoy Shepperson, pastor of Parity Presbyterian church Chester, is scheduled to address the Business Men's Evangelistic Club at Fort Mill Sunday afternoon at three o'clock, on the general subject of Christian activity among the laymen of the church. A classical musical program has been arranged for the services.

Dr. R. E. Abell was called to Rock Hill Wednesday evening to see Oscar L. Jackson, freight engineer of the Seaboard Air Line Railway, who had his skull fractured Wednesday afternoon by being struck by a beam on the Catawba trestle between Catawba Junction and Van Wyck. It was reported that the engineer had his head out of his neck when it was struck by a beam. Mr. Jackson is a resident of Abbeville.

Take Oath Of Office.

Columbia, S. C., Jan. 20. Formal and solemn ceremonies marked the beginning of a new state administration, newly elected state officials being sworn in at the hall of the house of representatives here today.

Both the governor and lieutenant governor stood in the speaker's rostrum while being sworn in, but the other officers were arranged in front of the desk on the floor of the house.

When a dead seal is brought home by an Eskimo hunter the body is ceremoniously treated to a drink of fresh water in the belief that all his life the seal has been craving a drink of sweet water. The hunter who satisfies this craving with himself on good terms with the seal's spirit, through it with the spirit of seal will live in hunting.

Men slow to make promises are less likely to break them.

ANNUAL BANQUET K. OF P.

Local Lodge Held Annual Banquet Last Evening.—Hon. Herbert Giles Principal Speaker.

The members of the local lodge of Knights of Pythias held their annual banquet in Harwood's Hall last evening. After the members, their wives, and guests had assembled they were invited to take their places at the attractively decorated tables.

Dr. Flournoy Shepperson invoked the blessing after which the ladies served a beautiful three course turkey dinner.

Mr. Z. V. Davidson, who has made for himself a record as toastmaster, was in his accustomed place last evening and in a pleasing manner introduced the first speaker, Hon. Herbert Giles, past grand chancellor, of Alton.

In his discourse Mr. Giles said that Pythianism should stand for the enlightenment and truth of ideas in the land. He said Pythianism has never had a greater opportunity to inspire the youth of the land. They should have faith in mankind and strive to lift up instead of throw down.

In speaking of the youth Mr. Giles mentioned the playground. He said it was one solution to the outlet of the energy that abounds in the youth of today. It has been statistically proved that within a radius of two miles of a playground, there is no crime. He urged the Pythians to inspire in those who doubt God, a love for Him, because God loves His children and wanteth to love Him.

Mr. Davidson introduced the second speaker in the form of a cross word puzzle, who proved to be no other than Mr. Angus H. Macaulay. To carry out the plan Mr. Macaulay kept the audience guessing as to what he was going to say next and as usual delighted them with his witty and humorous remarks and jokes.

Mr. J. M. Hemphill was the next speaker and after telling a joke, which he said was the only one that Mr. Macaulay left, he proceeded with an able address, using for his subject, Trust and Confidence.

Mr. Davidson, thanked the ladies for the delightful dinner so splendidly served and in bidding all good night hoped that they would live to attend the annual banquet in 1926.

HE STAMPED HIS!

A lawyer was standing on the steps of a post office in a Kentucky town, when an old colored man came up and asked, "Kin you tell me, sah, is dis de place to buy postage stamps?"

"Yes, indeed," said the lawyer, "but you don't need no stamps on letters 'til you get de stamp on 'em."

"Well, you see, de conglomeration of parallelisms so much like the ordinary efferescence, and so the government decided to send the letters free."

The old Negro shook his head doubtfully, drew a long breath, and then replied: "Well, boss, dat may be true, an' I don't say it, but I kin tell you dat de government wouldn't give no stamps to de poor folks."

"I don't see how you can be so sure," said the lawyer, "but you don't need no stamps on letters 'til you get de stamp on 'em."

"I don't see how you can be so sure," said the lawyer, "but you don't need no stamps on letters 'til you get de stamp on 'em."

WOMEN.

Women are queer things, no doubt about that. They hate to be thin, and they hate to be fat.

One moment it's laughter, and the next it's cry. And you can't understand them, however you try.

But there's one thing about them that everyone knows. A woman's not dressed till she's powdered her nose.

I have studied the sex for a number of years. I have seen them in laughter and seen them in tears, Oh! her ways and her whims I've pondered a lot.

To learn what would please her and just what would not. But all I have learned, from her moan or later she'll powder her nose.

At church or a ball game, at dances or a show,

Take Care of Them

The Better Sire Campaign being on in Chester county brings to mind the fact that many people do not take the proper care of their cattle.

You cannot expect a cow to be a good producer unless she is well housed. Now would be a good time to let us sell you the lumber for a good substantial cow barn. Treat the cow well and she will return the treatment many fold.

There's one thing about them all that I know. At weddings or funerals or dinners of state, You will find that her hand will dive into her waist, And every few moments she will pick up a pose, And the whole world will wait till she powders her nose.

Experiment Proves Pure Bred Sire

Copied from *Hoards Dairyman*.

It is possible to "grow" into the dairy business and do it economically, according to the results of the "Arkansas experiment" of the Iowa Experiment Station. With a bunch of scrub cows and a pure-bred sire, given the proper feed and care, this experiment proves that a herd of scrubs may be developed into profitable producers in three generations. An average increase over their scrub ancestors of 99 per cent in milk production and 94 per cent in butterfat production in a grand-daughter, have been recorded. The tests with scrub cows and pure-bred sires of three dairy breeds, Guernsey, Holstein, and Jersey.

Average increases over their scrub ancestors of 42 per cent in milk production and 39 per cent in butterfat production have been recorded for daughters of scrub cows and purebred bulls.

Because of the initial expense required, comparatively few dairy farmers are able to have purebred herds with which to start in

the dairy business. Consequently most of the dairy products of the country come from grade cows. This means that there are many farmers with common cattle who are anxious to build up a higher and more economical production by improving their herds, thus benefiting them to enter the dairy business on a really profitable scale.

"Will a pure-bred dairy sire do the job efficiently?"

It was with a view to answering this question for the dairy farmer that in 1907 the Iowa station began the "Arkansas experiment." Seven cows, four yearling heifers, two heifer calves, and one young bull were purchased in an isolated section of Arkansas. The animals were inferior, small, and of slight abdominal, udder, and mammary vein development. Also records showed that no pure-bred bulls had been used previously in that section.

The environment from which these cattle were obtained was not suited to heavy milk production. The cattle received little if any grain and were forced to ex-

ist on the scanty supply of available grass and hay. These animals had been kept as family cows, with no other function than that of supplying enough milk for family use and raising calves until they were old enough to fatten for themselves. No records of milk production or of the length of the lactation period had been kept.

After they were purchased and taken to the station the scrub cows and their calves were given the same care, feed, and shelter as pure-bred dairy cattle in the college herd.

Of the cows that were of producing age when they came to the station, two were four-years old and the rest mature. The four-year-olds produced on the average 5,984.6 lbs. milk and 149.24 lbs. fat. Under good care and feed they steadily increased until at seven years of age they showed an increase of 4,007.7 lbs. milk and 228.91 lbs. fat, or an increase of 69 per cent in milk and 64 per cent in fat over their first year at the station. Allowing for a natural increase of 49 per cent in milk and 46 per cent in fat was due direct-

ly to proper care and feeding. In other words, ordinary scrub cows, given proper care and attention almost doubled their yield of milk and butterfat.

The younger animals when subjected to good treatment, greater will be its response. Heifers raised under poor conditions cannot be expected to give good production even with good feeding during the milking period. Those cows coming to the station at four years of age produced 14 per cent more milk and 8 per cent fat than did those coming at maturity, while those coming as heifers produced 27 per cent more milk and 24 per cent more fat than did the older animals.

It was the use of purebred sires, however, which showed that a high producing dairy herd could be developed with the use of scrub dams. Big high production alone is not sufficient. Economical production is a necessity for the dairyman. Feed records were kept during the investigation and it was found that the granddaughters of scrub dams, three-quarter

bloods, gave the cheapest production, with the half-bloods or daughters next, showing that grading up the herd with a pure-bred sire not only increased production but overed the cost of production.

Comparative feed costs per 100 lbs. of milk produced showed \$2.84 for the scrubs, \$2.77 for the half-bloods, and \$2.45 for the three-quarter bloods. These feed costs were determined on the basis of including both lactation and dry periods.

The pure-bred sires used in this experiment were, with one exception, the herd bulls used at the College dairy farm. None of the sires were purchased at high prices although they were well bred for type and yearly production. Young bulls of equal breeding are available at prices sufficiently reasonable that the man who milks cannot afford to use a scrub bull, however cheaply he may be purchased.

MANY RETURN TO WORK

Thousands of Weavers and Other Workers Elsewhere, in New England, However, Refrain from Industry. Conflicts Greatest Crisis in Its History.

Boston, Mass., Jan. 20.—The most serious crisis in the history confronts the textile industry of New England.

While thousands of weavers and other mill workers are still on strike in the mills of southern Massachusetts and Rhode Island, the trouble has spread to Boston and mill owners are openly alarmed at the danger of a general, if not unprecedented, labor war in New England.

Weavers and other workers to the number of 80,000 are out on strike in New Bedford and immediate vicinity as a protest against the general 10 per cent cut in wages. The situation is acute and mill owners, city and state officials, and the state department of labor appear helpless.

One of the greatest blows to the unions was dealt at Fall River this afternoon when 34,000 strikers, after listening to speeches made by representatives of the Davol, Tencinsh and Bernard mills, dealing with southern competition and alleged propaganda, returned to their work.

"The entire south is watching you, realizing that the southern competition is having its innings, that we are feeling the pressure and the situation of the industry in New England is at hand," they were told. "Sheer propaganda relative to your cut in wages and the alleged increase in officials' salaries and dividends is getting the results. You are killing your own throats, closing up your own mills and driving them out of existence to the delight of the southern manufacturers, and you can't seem to see it."

Following an appeal for the workers to return to their mills and debate the matter with those thought in mind, men and women in groups of fifty and a hundred returned to work. When the weavers returned in a body this afternoon the remaining strikers returned in a body.

While the situation cleared in Fall River, it grew more acute in other cities, especially in Rhode Island.

All Roads Lead To Home

Just so all the industries of the Southern Public Utilities Lead to Chester homes.

We want you to know we are ready to serve your home with light, with heat, with all modern home making appliances.

Beautiful Lamps for your living room are now especially priced. Smoothing Irons, Waffle Irons, in fact all appliances for the home in up-to-the-minute design are ready for you at the

J. G. HOWZE, Sheriff Chester County, Chester, S. C., Jan. 15th, 1925 16-23-30.

BONUS INSURANCE NOT SALABLE HINES RULES

Washington, Jan. 20.—Warning to war veterans that bonus insurance policies can not be sold and at present have no loan value was issued today by Director Hines of the Veterans' Bureau. He said reports of attempts to sell certificates had reached him.

The director pointed out that the certificates are payable to the veteran or his beneficiary at the expiration of twenty years and that designation of a beneficiary for a financial consideration is illegal. After two years the certificates may be used as security for a loan.

Persons who buy the insurance certificates also were warned that a beneficiary named in a certificate is not to designate another under the law.

KILLS GIRL AND THEN SHOTS SELF

Pekin, Ill., Jan. 20.—Mary Eitenmiller, 20, who was shot today by Fred Lichtenberger, who later tried to kill himself, has a small chance to recover, attending physicians said tonight.

Miss Eitenmiller was shot in an automobile parked in a field near her father's farm, four miles south of Pekin.

Lichtenberger, though seriously wounded, is expected to recover.

In a signed confession late today Lichtenberger said he shot Miss Eitenmiller after she had pleaded with him to kill her. They had spent two nights in his automobile, according to the confession of Lichtenberger, who had worked for six years on the Eitenmiller farm until he was discharged a few months ago for paying too much attention to the girl.

He said in the confession that he met the girl after church Sunday night and that they spent that night, most of Monday and last night in his automobile, riding about the country near Pekin. Early today when the girl's father was seen to approach, the confession said, she asked him to kill her.

Lichtenberger said he fired once as she sat in the automobile and she asked him to shoot again. He said he pulled the trigger without looking at her and then shot himself twice.

Better Sire - Better Tires

From information coming to us we are thoroughly convinced that Chester county is in need of better sires and we hope the scrub sire will be entirely eliminated from the county.

Better Tires

But speaking from a personal standpoint right now, we are in the Automobile tire business and it is here that we can best serve your interests. We handle the famous FIRESTONE AND GOODYEAR Tires and we are now in position to sell them to you cheaper than you have ever been able to buy them. In fact what you save in buying tires from us can go toward buying a better sire with which to build up your herd. You cannot afford to buy an automobile tire or tube without first seeing us.

When in need of gasoline, oils, accessories of any kind, or batteries we solicit a call from you.
