MARGINALIA.

History is littered with a preponderance of crimes and misfortunes. We should like to believe that Voltaire's view is only that of a pessimist, that the facts suggest in Turn every evil there is, the sight of crime and misfortune.

The darker side of history is not so pleasant to behold, but it is best that it is so. The history of a nation is written primarily for the edification of its children, for the edification of the future, to make prominent those elements in the arts, the sciences, and religion; to make the world better and to raise its people.

The art of writing history is to be read, to be understood, to be appreciated. It is the art of telling a story, of making it come alive for the reader, to make them feel like they are part of the story.

The stories of armies, the carnage of battle, the destruction of cities, the suffering of the innocent, are all part of our history. They are a reminder of the cost of our freedom, the cost of our progress.

These stories are not just about the past, they are about the present, about the future. They are a reminder of the importance of peace, the importance of understanding, the importance of compassion.

We should remember that the stories of the past are not just stories, they are lessons, they are warnings. They are a reminder of the importance of learning from the past, of not repeating the mistakes of the past.

In the end, the stories of the past are our history. They are a reminder of who we are, who we have been, and who we will be. They are a reminder of the importance of freedom, of the importance of justice, of the importance of compassion.
