Neither hunger nor thirst can

Marshall Oil Company
POULTRY'S CLOTH IN NUTRITION PROJECT

Food for Troubled

On this report we are giving
answers which were given to
the questions of the Physical
Education Club. These answers
are based on the research of
the National Research Council.
Among the 126 students who
answered the test questions on
these foods, only 44 had to
change their ideas. This means
that, on the average, students
who were eating balanced diets
had already received this kind
of information. What would
you have done if you were
asked the same questions?

More Effective

The better we are at
substituting one food for
another, the better we are at
judging the value of our diet.
