No other reports of farm failures are given in connection with the re- ports from the Physical Education Department of the College of Agriculture of the University of South Carolina and the College of Dentistry, which reported that all fields and tracts are in good condition and demand no immediate action. Among the 16,000 students who are in the College of Agriculture at the present time there are 2,000 who have received their degrees and are engaged in teaching positions. Only 105 years ago a small group of students were in the College of Agriculture, and 2,000 students today are engaged in teaching positions. All 16,000 students are in the College of Agriculture, and 2,000 students today are engaged in teaching positions.

On questions relating to horticulture, only one student was able to answer all the questions on the horticulture test. The test included the following questions: What is the difference between the life of a plant and the life of a human being? What is the difference between the life of a plant and the life of a human being? What is the difference between the life of a plant and the life of a human being? What is the difference between the life of a plant and the life of a human being?

It can be seen that the test required a good deal of knowledge of the subject matter. The knowledge required is greater than the one student was able to answer all the questions on the horticulture test.
