VETERAN PROSECUTOR TELLS OF INTERESTING MURDER CASE

J. K. Henry After Thirty Years of Militant Service as Solicitor, Chairman of the Board of Prisoners, and in the United States Army...

for a magistrate to swear out warrants. Lucick was arrested, but was not taken from the town...

A Beautiful Woman. Charles T. Williams had been station agent at Tunnel Hill, Ga., and was a man of fifty years...

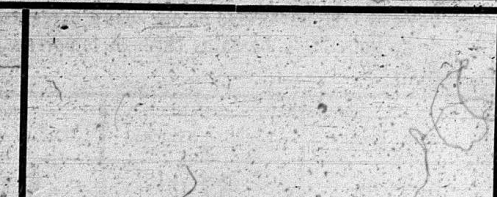

Solicitor Henry went to Georgia and dug up a trunk containing many letters from Mrs. Anderson to Williams. She was a beautiful woman...

When they got up to Evansville, Ind., the other attorney said Mr. Henry was the man who had been connected with the murder...

The Husband Hiding Out. Here was Williams, a man past middle age, here was a man 42 years old, both in the same community...

As dinner at the home of a friend Mr. Moore, the solicitor and the owner of the newspaper...

"Where are you going?" the gentleman asked Mr. Henry. "Oh, to Greenville," he replied.

I pity no man because he has to work. If he is worth his salt he will work. I envy the man who has a work worth doing and does it well.

—Rosevelt

other lawyer in the Pullman. When the train pulled into Atlanta the two men came face to face...

When they got to St. Louis, the solicitor grabbed a fast back, while the other man went to the hotel...

When they got to St. Louis, the solicitor grabbed a fast back, while the other man went to the hotel...

The State opened its case and the newspaper reporters predicted a sensational trial...

If it could have exploded it could have caused a more profound sensation in that court room.

roy F. Youmans, "I came here to get my child and to save my name," was his reply and the court room applauded Judge Watts in vain...

Robert A. Anderson is enough in itself for a "thriller," outside of all the other vivid and serial details...

of the fact of the other man was a habituated drunkard and he was leaving the city...

of the fact of the other man was a habituated drunkard and he was leaving the city...

of the fact of the other man was a habituated drunkard and he was leaving the city...

woman on the stand and said that the reason they fled was to save Mrs. Anderson. That she had confessed to the murder...

of the fact of the other man was a habituated drunkard and he was leaving the city...

of the fact of the other man was a habituated drunkard and he was leaving the city...

of the fact of the other man was a habituated drunkard and he was leaving the city...

of the fact of the other man was a habituated drunkard and he was leaving the city...

been up to. Reese Escaped After All. After more than a month, permitting the prisoners to get up into the left of the jail, they walked to the portion which overhung the front stairway...

As it was then got away and went on for hours before the fact was discovered. Some of them were taken after and testified to the wonderful magnetism of the man Reese...

The "fearful life of John Reese" is a story which has been published in the "Life" magazine...

There is one collateral feature of this case which is of great interest. It is the fact that Reese was a poor man...

# Farmers of Chester County:

JOIN THE

## South Carolina Cotton Growers' Co-operative Association

The Banks and Merchants listed below give their endorsement to the Co-operative Association--- Here is how strong they endorse it:

We, the undersigned Bankers and Merchants, doing business in Chester County, South Carolina, desire to offer our facilities to all members of the South Carolina Cotton Growers' Co-operative Association, and we will give to the members of the Association the same terms we offer to others. We believe in the orderly selling of products as conducted by the Association, and that it will bring stability to the market, and that the farmers and all who are dependant upon them will benefit by this new system. We agree to respect the terms of the contract made by the members of the Association, and will gladly permit the delivery of our customers cotton to the Association, and in every way do what we can to co-operate with them in their efforts to improve their condition.

### TARIFF REACHES POCKET OF MASS

Consumer Must Now Pay Tax on Many of Life's Necessaries. Legislation Has Been Designated by Senator Simmons as the "Protestant's Own."

Washington, March 14.—The Fordney-McCumber tariff act, described by Senator Simmons as the "Protestant's Own," commenced to reach into the pockets of the masses. Great quantities of sugar are coming in, and everybody must pay either \$1.50 (the rate on Cuban sugar) or \$2.25 per hundred pounds, the rate on all other. The duties on toys, cutlery, and other things that people must have are raking in the cash.

It is estimated by treasury officials that the act will bring in more than a half-billion dollars the first year, and that will be many millions

in excess of the original estimate when the legislation was under consideration. The principal reason for this is that the United States is the only country able to buy freely and liberally, and in spite of high duties the products of other countries are coming in this way. It was pointed out that Germany, Austria, France and other countries in the "world war" zone are hard pressed for money, and the United States can buy and is buying. It would not be taking much more if it had free trade. Conditions are described as "absolutely abnormal." While imports are increasing, exports are going down. Other nations are taking some of the trade built-up during the war. This is especially noticeable in milk and milk products.

The new tariff went into effect the last of September. A great rush of imports were coming then. The re-

port for August was very large. Immediately after the Fordney-McCumber rates went into effect large quantities of wool, which had been in hand, were brought out. That helped to raise the revenue. This wool was sent to this country for the emergency tariff duties, but a controversy with the classification laid it up, and it was dumped in later.

### Electric Bitters

Made a New Man of Him. "I was suffering from pain in my stomach, head and back," writes H. A. Alston, Raleigh, N. C., "and my liver and kidneys did not work right, but four bottles of Electric Bitters made me feel like a new man." PRICE 50 CENTS AT ALL DRUG STORES.

### HOOVER PROMISES A SURVEY OF SPINNABLE COTTON IN WORLD

Washington, March 12.—Secretary of Commerce Hoover today gave assurances to Senator Harris, of Georgia, that a survey of spinnable cotton would be made throughout the world on July 31, of this year, and a controversy with the classification bureau of foreign and domestic commodities.

In the last congress Senator Harris introduced a bill which the senate passed, authorizing a world census of spinnable cotton each year. The bill was favorably reported to the house census committee, but failed of consideration in the last days of the house.

The actual amount of cotton on hand in the world, Senator Harris said, had a far-reaching effect on the price and the plan for raising cotton, as well as the campaign against the boll weevil. He charged that in accurate information was used by cotton speculators to depress prices of cotton and that if the actual amount was known, it would tend to stabilize production and prices.

### PHYSICIANS STUDY HIGH TEMPERATURE

Young Woman Expected to Recover, Although Fever Not Declining.

Escanaba, Mich., March 11.—Surrounded by physicians, Miss Evelyn Lyon appeared today to have won out in her fight for life last night, though her temperature still hovered around 115 degrees.

Early last evening she was seized with intense pain, which in spite of all the doctors could not be continued throughout the night.

Numerous hypodermics were administered, but they apparently had no effect and finally were abandoned. Her temperature today continued to run 115 and her pulse was estimated at between 160 and 170.

This morning Dr. Woleff of Russ Medical college and Dr. Morris Fabohn arrived from Chicago and were in consultation throughout the day with Dr. Defeat, attending physician. They made several visits to the bedside of the patient but would make no statement when they left for Chicago tonight except to say that a statement would be made upon arrival in Chicago tomorrow. Dr. Defeat declared after the conference that he believed his patient would recover.

### DEPOSITORS NOW ON DEATH WATCH

Widowed Men and Women Swam Bank Whole Operators Disappear

New York, March 14.—The "Universal Service"—the "identical" right upon the neighborhood bank, here operated by the three Tibbo Brothers who mysteriously disappeared Thursday taking with them all knowledge of the \$2,000,000 entrusted to their care.

Hundreds of wild eyed men and women frantic over losing the savings of life times swarmed around the bank today crying for revenge. Dogmas of patrolmen and detectives, fogging a raid and violence, have surrounded the building.

The depositors are openly threatening to kill the three brothers if they can be found.

Official announcement that Vincenzo, Ricardo and Vito, the three brothers had disappeared with their families and belongings was not made until yesterday although they have not been seen since Thursday.

Every port touched by ships leaving New York has been asked to watch for the trio.

The first fortune but sinister group of depositors gathered at the bank when the closing sign was hung out yesterday. This has been swelled by families and belongings was not made until yesterday although they have not been seen since Thursday.

Women in the gathering wrung their hands and wove while men pushed back and forth through the crowd cursing and uttling the threats. Some of the women carry babies in arms while other children cling to their skirts.

Highly excited speakers harangue the groups swaying them with their oratory and instilling them. Threats to kill on sight are heard on every side and the officers have foiled several efforts to raze the building and demolish it.

### THE NEED OF GOOD FOOD.

By Loretto C. Lynch.

Calling upon a physician the other day, a young man in great pain with a badly swollen hand, asked if he might see the physician ahead of me. When he returned from the private consulting room he volunteered some valuable information. He had decided to keep back his quarters for the winter. He had a kind of employment, which made it impossible for him to board where the three square meals were served by the light of the sun.

### GET YOUR PLAN UNDER WAY.

You are long on ideas but short on carrying them to completion.

Full of enthusiasm when you hit upon an idea you think might be valuable. But when its development requires work, possibly drudgery, your enthusiasm begins to wane.

It does not take much for you to lose your ambition, and so many a worthwhile idea of yours—dis missed without worthwhile results.

Later you may be chastened and bitterly blame yourself when some other person makes a success of a plan similar to the one you were to lay to rest upon it.

At the present moment you have some good ideas stored away which would give you a good boost financially and otherwise, but you allow these ideas to remain dormant.

The far-away future is not a good time for the success you hope to attain.

NOW is the time to START, for it may take more time than you think to realize success for your plan.

Failure to start an undertaking has caused many a man to be a failure.

### No. Six-Sixty-Six

This is a prescription prepared especially for MALARIAS or CHILLS or FEVERS. Five or six doses will break any case, and it takes them as a tonic. Fever will not return. It acts on the liver better than Calomel and does not grip or sicken. 25c

Failure to start an undertaking has caused many a man to be a failure.

NOW is the time to START, for it may take more time than you think to realize success for your plan.

Failure to start an undertaking has caused many a man to be a failure.

NOW is the time to START, for it may take more time than you think to realize success for your plan.

# Hupmobile

No compromise of good designing or fine manufacturing is ever forced upon our engineers.

They are entirely free from the limitations they might meet if they were dependant for some vital parts on outside manufacturing sources.
