WASHINGTON, March 9.—Secretary of War Geo. W. Davis today issued a statement that the War Department would not be sympathetic toward the Mexican revolutionary movement. The statement follows:

"The War Department at present recognizes the government of President Porfirio Diaz of Mexico as the only legitimate and recognized government of that Republic. It is also the opinion of the War Department that the recently organized revolution in Mexico is a purely internal affair, and that the United States has no legitimate reason or justification for interfering with the internal politics of that country. The War Department is of the opinion that if the internal conditions of Mexico are such as to make it necessary for the United States to interfere, the interference should be left to the government of Mexico, and that the United States should take no other action than to recognize and support the legitimate government of that country."

WAR DEPARTMENT

MARCH 7, 1911

WASHINGTON, D.C.

To Secretary of War G. W. Davis: (Via new York)

I am in receipt of your dispatch of March 5th. I therefore transmit you the enclosed dispatches from the department of California.

Respectfully,

[Signature]

Washington, March 5.

CABBAGE YELLOWS

Disease of a Forsage Plant

The disease is not to be ignored, and it will be necessary to take steps to prevent its spread. Several methods are recommended:

1. Remove and destroy affected plants.
2. Avoid planting cabbage or related crops in the same area for several years to prevent a buildup of the pathogen.
3. Use disease-free seed or transplants.
4. Practice crop rotation.
5. Apply fungicides as directed by the label.

The control of cabbage yellows is crucial to maintaining the health of the cabbage crop. Taking these steps will help prevent the spread of this disease and ensure a successful harvest. 

Winter Work in Orchards

It is vital to the orchard manager to plan and implement winter work to prepare the orchard for the growing season. Some tasks that can be done during the winter include:

1. Pruning trees to promote growth and remove dead or diseased wood.
2. Apply dormant oil or similar products to prevent pest and disease damage.
3. Fertilize trees to provide nutrients for the new season.
4. Check tree supports to ensure they are in good condition.
5. Remove any debris or fallen fruit from the orchard.

By preparing the orchard in the winter, the manager can ensure a healthy start to the growing season. 

Rubbing Eases Pain

Rubbing soothes the tension and stress that accumulate in the body, helping to ease physical pain and discomfort. It can be done using a variety of techniques, such as:

1. Massage with oil or lotion to help the muscles relax.
2. Use a hot or cold compress to relieve pain.
3. Use deep breathing and relaxation exercises.
4. Apply pressure to specific points on the body to relieve tension.

Rubbing can be a natural and effective way to relieve pain and promote healing.

Scientific Farming

FOR A LARGER CORN YIELD.

At Small Cost It Can Be Nearly Doubled.

The yield of corn can be raised from 3 to 5 bushels an acre by good management. It is greatest on the lightest, most sandy soils and least on the heavy clays. Damp weather produces small pods and a poor stand. In the northern states corn is usually a winter crop. The crop is raised in the fall and the seedling is hardened in the spring. The average corn crop for the U.S. is about 10 bushels an acre. The yield of corn can be nearly doubled by the use of National Mazda Light. It's better. It's brighter. It's three times as bright as carbon lamp-light and costs no more. It's the best light for reading, study, work or play. May we talk with you about the lighting of your house, store or building?

WHAT THE GARY SCHOOL PLAN DOES
Lessons Expenses of Housing School Children.

WIDER USE OF BUILDINGS.

C. Frank Gilbreth, Assemblyman of New Jersey, is introducing a bill in the New Jersey Legislature that would authorize the school authorities to use school buildings for purposes other than education. The bill is designed to increase the efficiency of the school system by making better use of the available buildings. The school authorities would have the power to use the buildings for religious, industrial, commercial and philanthropic purposes. The bill also provides for the elimination of small schools and the consolidation of schools into larger units. The bill would provide for the construction of new buildings and the improvement of existing ones. The purpose of the bill is to make the school system more efficient and to reduce the cost of education. The bill would also provide for the improvement of the physical environment of the schools.

Engineers Fox and Arguimay, on the other hand, are proposing a bill that would authorize the school authorities to use school buildings for purposes other than education. The bill is designed to increase the efficiency of the school system by making better use of the available buildings. The school authorities would have the power to use the buildings for religious, industrial, commercial and philanthropic purposes. The bill also provides for the elimination of small schools and the consolidation of schools into larger units. The bill would provide for the construction of new buildings and the improvement of existing ones. The purpose of the bill is to make the school system more efficient and to reduce the cost of education. The bill would also provide for the improvement of the physical environment of the schools.
IN MEXICO.

President Villa has decided to move to the United States. He has ordered his troops to withdraw from Mexico and to remain in this country for the time being.

THE EIGHTH ANNIVERSARY OF THE NATIONAL EXCHANGE BANK.

The National Exchange Bank of Chester, S. C., celebrated its eighteenth anniversary on March 14th. The proceedings were held in the bank's offices, and a large number of friends of the institution were present.

Mr. John L. Remedy will Give You All These.

Mrs. Joe Person's Remedy

Pure Blood, Good Digestion, Rest and Laughter.

No one who has an ounce of common sense will disagree with the following statements:

1. Pure Blood.
2. Good Digestion.
3. Rest and Laughter.

The reasons for these statements are:

1. Pure Blood:
   - Better in every way.
   - Stronger every day.
   - The body is healthier as it ages.

2. Good Digestion:
   - Food is digested more quickly and more fully.
   - The body is easier to digest food.
   - The body is more efficient in its use of food.

3. Rest and Laughter:
   - Restful sleep is obtained.
   - The body is relaxed.
   - The body is rejuvenated.

The above statements are made by the late Dr. Charles E. Remedy, a well-known physician, who died recently, and who was a great advocate of the benefits of Mr. John L. Remedy's Remedy.

CHESAPEAKE MILITARY COMPANY

There is a movement on foot in Chester to organize a military company, which would mean much to the city.

The Company was the idea of Mr. J. F. C. Russell, and on Monday evening of last week, the memory of the late Mr. J. B. L. Cuthbertson. The meeting was held in the Boarding House of the First National Bank.

Mr. H. B. Albritt, Chairman of the Industrial Committee of the Citizens' Union, was called to order.

The meeting was called to order at 8:30 o'clock, the roll being called, and the following members present:

Mr. H. B. Albritt, Chairman;
Mr. J. F. C. Russell, Secretary;
Mr. J. L. Jones, Treasurer;
Mr. J. B. L. Cuthbertson, Assistant Secretary;
Mr. W. H. P. Albritt, Assistant Secretary.

The meeting was then adjourned.

W. W. MOORE,
Chairman.

THE BIRD'S HEADERS

A Locomotive Headlight Just In-

By F. B. Dix, Engineer.

The Bird's Headlight is a Patent locomotive headlight of the usual type, mounted so as to permit of a curve and is tilted, the weight at the toe. Its design is to throw the light on the track, against some track which is subject to the action of the demonstration.
