fighter is a specimen of entrovert, but the m

who calculates the plane's stability is an equally healthy introvert.— London Daily Mail. Extensive remains of what ap-parently was once a Roman city have been discovered near Bantiba-

per piping, have been found as fragments of ceramics vases filled with ashes a outs other articles.

Swift's Premium Ham and Swift's Premium Bacon are produced from only the best hogs. Many of the animals we buy do not furnish meat of Premium quality.

Since these are the choice cuts from the best hogs, cured and smoked in the best way, with scientific care and precision, they are naturally in great demand; but these cuts, with the loin from which pork chops come, represent only about 34 per cent of the live animal.

The remaining 66 per cent consists of the cheaper cuts, such as spare rike, shoul-ders, trimmings, pigs feet, lard, etc., and atrinkage in dressing and curing. Shrinkage is equal to one pound in each five, and has no value whatever.

That is why the prices of "Premium" am and Bacon and pork loins are higher an the price of the live animal.

Everybody wants them-and yet they are only about one-third of the entire weight. "Premium" Bacon glone is only about 8 per cent.

The great demand for the choicer cuts, and the smaller demand for the cheaper cuts, constitute the reason for the compar-atively higher price of the one-third, and the lower price of the other two-thirds. (Some of the lower priced cuts sell at less than the per-pound price of the live animal.

It is only by utilizing all possible by-products and exercising the turnost still and efficiency that we are able to average a profit of a fraction of a cent a pound on all our business.

N.B. Some very delicious dishes can be prepared from the cheaper cuts. Swift & Company

### Deciding Where To Buy

S

The success of a business depends on its abili-o analyze the mental operations of the public, to determine how people decide as to where shall buy goods. The merchants who read the lie mind most accurately get the business. and to they sl public

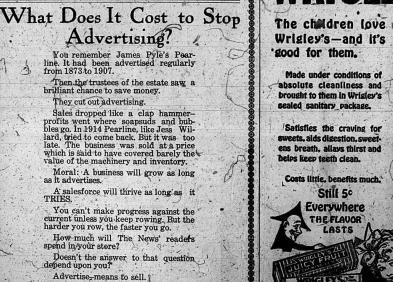

When one finds that he needs something, the question comes up where that article should be bugsht. From some source back in the mind the suggestion comes that such and such a place would be a good store is visit for that purpose. Whence comes that suggestion?

Whence comes that suggestabil In the majority of cases, it is created by the store that has made the most effort to imprave site representation on a provide the start constantly, and they forget other things that are rarely called to their stigntion. The advertised store conforms to their stigntion to its enterprises, its goods, its methods, its prices, and the advantages of trading with it: Consequently the inner consciounces, who asked what or where a person abould buy, he ap to re-spond by suggesting certain advertised goods.

It is of course true that while a store by adver-tising can always draw in a lot of new trade, it gat keep it using treally does give good values. But advertism helps a store do that, notably in these two ways:

Advertising encourages meremants to handle big lots when such are offered them at low fig-ures. They know that by appealing to the public by advertising, they can swing these big lots and turn them into money in a short time. Thus buy-ing in a farge way and takting advantages of type-ial opportunities, they are able to offer special values.

Alues. Advertising increases volume of trade, thus re tring the operating and overlead expense, per trile, making it pessible to cit prices to the pub-c. The advertised store buys and operates at low grees, and can thus make low prices.

ITS NOT WHAT IT COSTS TO GET IN THE NEWS-BUT WHAT IT COSTS YOU TO STAY OUT.

Not to advertise usually me' a 'is' -
