## Government Documents at Dacus Library

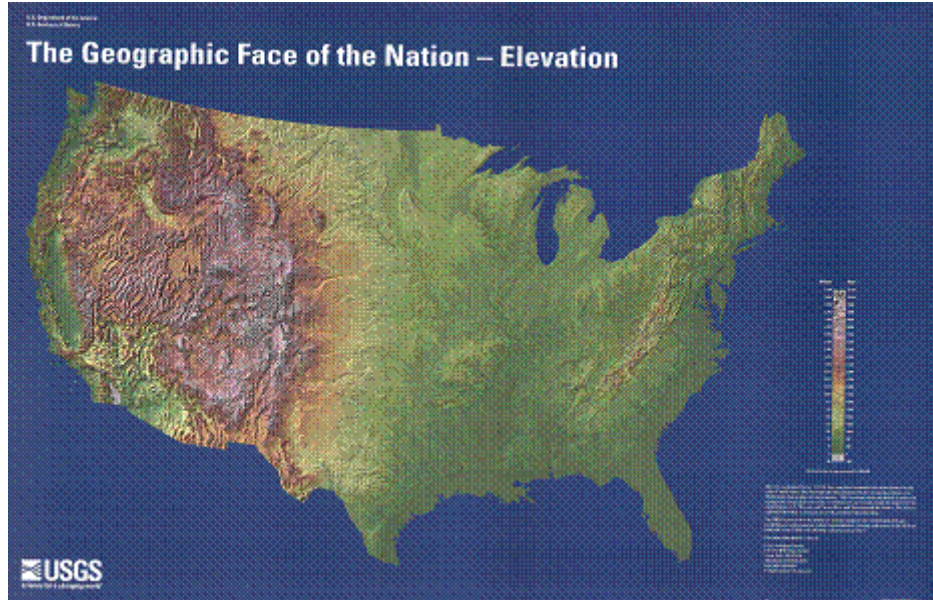

# MAPS

Night Lights 2001 (NASA)

Did you know that Dacus Library's Government Documents Department has maps? We have a variety of topographic, environmental, biogeographic, political, historical, forest and road maps from federal agencies such as the U.S. Geological Survey (USGS), Central Intelligence Agency (CIA), the Department of the Interior (DOI), and the National Oceanic and Atmospheric Administration (NOAA). Many maps produced by government agencies can also be found on the Internet.

Government maps are searchable by place name in the Dacus Online Catalog. To find a map, enter the place name in the search box and click "Submit." You will see a list of records containing that place name. To find maps, click "Modify Search" in red letters at the top of the page. The *Advanced Keyword Search* page will appear. Under "Location" choose "U.S. Document" and under "Material Type" choose "Maps." Click "Submit." To find Internet maps that are listed in the Dacus Online Catalog, choose "Internet" under "Location" on the *Advanced Keyword Search* page. Small maps are shelved along with the books in the government documents collection and large maps are located in the government documents reference section along the back wall.

Open the following links to find a variety of U.S. government maps on the Internet:
