Playing the Hypothetical Stock Market Means Gold for Winthrop Grad

Quick Facts

- Hennigar participated in the challenge as a class assignment for Finance 512.

Hennigar, middle, with Gibson, left, and Cheng

ROCK HILL, SOUTH CAROLINA — Playing the stock market means you win some, lose some.

For **Ross Hennigar**, a December 2016 graduate of Winthrop University, you win.

Hennigar, a business administration graduate from Charleston, South Carolina, won first place in **The E-Valuator Asset Management (T.E.A.M.) University Challenge**. He accepted the trophy and certificate in Thurmond with **Philip Gibson** and **Jimmy Cheng**, both assistant professors of finance at Winthrop.

"I got involved with it through my Finance 512 class," Hennigar said. "We had to enter the contest for a semester assignment and choose the preferred stocks and bonds we thought would do well. Whoever made the most of those funds won first prize."

The **Finance 512 (FINC 512)** course focuses on investments, including portfolio management and investment simulations.

The **E-Valuator**, one of the investment industry's fastest-growing analytical software programs, created the challenge for universities that offer financial planning curriculums. Creators hope to educate students on how asset management can affect their future clients' portfolios.

Hennigar currently works at South State Bank.
