Big News For Farmers

Dr. Clarence Poe, of The Progressive Farmer, will be in Chester on next Saturday afternoon, April 15th, at two o'clock, to speak to the farmers of Chester county about the Co-operative Marketing Plan.

Every farmer in the county who possibly can should be in Chester to hear Dr. Poe. He is the farmers friend and has a vital message for the farmers.

CHAUTAUQUA ORATOR SELECTS VITAL TOPIC

Dr. Huber W. Hurt to Speak on "The New Industrial Day"

Well-Known Lecturer Will Set Forth Practical Principles of Individual and Collective Living.

"The New Industrial Day" will be the subject of a challenging lecture to be given at the coming Chautauqua by Dr. Huber W. Hurt, scholar, writer and orator. This is a lecture which sets forth powerfully and convincingly practical principles of individual and collective living. For twenty years Doctor Hurt has been speaking to audiences in this country and abroad. He will be one of the headline lectures of the Chautauqua. Doctor Hurt is a true orator. A thorough master of his subject, he makes his ideas stand forth vivid and real to his hearers. During the war he was chief of the Educational Division of the Foreign Economic Bureau of the Committee on Public Information. The Citadel club passed resolutions endorsing the rules of the S. I. A. and the Southern college girls. It is the commercialization of colleges athletes by offering financial inducements to players. The Citadel club voted to send delegates to the state meeting of the alumni association at Charleston in June. Women To Be Tried. For the first time in more than thirty years a white woman will next week be tried for her life in York County. She is Mrs. Effie Hudgins, aged 39, charged jointly with Albert Zimmerman, aged 24, with killing her husband, J. Pink Hudgins, on the outskirts of York, on the night of November 6th, last. Mrs. Hudgins is in York county home, having been denied admittance to the home of her father, whose wife is the mother of the child men, when she was released on \$500 bond two months ago. Both Mrs. Hudgins and Zimmerman will be defended by Thomas F. McDew, of York.

SPECIAL NOTICE.

In regard to the Tag Day which will be in Chester on Saturday April 15th, for the benefit of the Association of the Blind of South Carolina, located at 1431 Calhoun St., Columbia, where the adult-blind of this state are given a sixth-kind course in fiber furniture, basketry and mat-making, their board and \$1.00 per week while they take the training, we wish to state that this work is not self-supporting, as they are unable to make the work fast enough while they take the training to make it so. It has been principally supported by Columbia, with exception of sales of their handwork since it began last September, one year ago. Yet fourteen counties have been represented at this shop.

The particulars pertaining to this institution have been investigated both by your Mayor and the Chamber of Commerce, and is most heartily approved of by them. This work needs the attention and co-operation of our sighted friends. Will you help us to help ourselves by contributing a small portion of your means to this work on next Saturday.

F. L. Crawford, Assistant Fire Secretary.

BRIEFLY TOLD.

There are three distinct parties in the Canadian House for the first time in the history of the Dominion. They are the Progressives, the Conservatives and the Independents.

The wooden brigantine Essex, flagship of the American fleet which broke up the slave trade on the west coast of Africa, is to be stripped of its engines and beached at Delhousie as an armory and station ship for Minnesota naval reserves.

Senators and Congressmen were assigned experts by the Treasury Department to help them with their income tax returns. After lying exposed to the weather in the mountains of British Columbia for 10 years, a gold watch was found recently by a mountain climber and restored to its owner, who declares it to be running and keeping perfect time.

A deputy police commissioner of New York City believes that unless street traffic is to be allowed to take to the streets, the city will have to be drawn in Manhattan at Fulton street, and automobiles forbidden to go south of the post office. He also recommends that horses be barred from the city after 1925 and that the Sixth Avenue highway be widened to 175 feet and the Sixth Avenue highway with motor bus service.

The foot and mouth disease threatening not only the cattle of

EXCURSIONS IN THOUGHT.

Not Every Question Can Be Answered With "Yes" or "No."

R. N. Allen, Teacher of Manual Training.

Every one has heard the ancient adage "where there's a will, there's a way." But every question could be answered with a simple "yes" or "no" and he was very promptly asked if he had quit beating his wife. "No," he replied "yes" would have implied that he had been actively engaged in that pleasant sport in the past. To have replied "no" would have been a confession that he was still engaged in the practice. Therefore, the person who made such a careless and dogmatic statement was reduced to the necessity of making a reply that was neither yes or no.

When a person is presented with two alternatives but whichever one he may choose is equally against him, it is unavailing to ponder there are many dilemmas in life. Frequently we have to choose between two evils instead of between a good and an evil. However, there are many questions and problems which thoughtful people reduce to simple dilemmas—and which they think can be answered only by a yes or no. Moral, economic, religious and political problems are far more complex than the plain dilemmas of everyday life. However, as simple as they seem.

Some folks will tell you that all acts must be either moral or immoral. That sounds reasonable. However, careful thinking will convince a person that there are many acts that have neither moral or immoral attributes. There is a third alternative, for such acts may be immoral or strictly non-moral.

There are individuals who think that everything that may happen must fall into the category of things right or things wrong. Such a conclusion is unwarranted. For there are many acts that may be classed strictly as indifferent. Things right at one time may be wrong at an other; things wrong at one time may be altogether right at other times. Questions of right and wrong are more relative than most people are willing to admit.

Quite a number of people who have been investigating the subject of spiritualism are inclined to explain the various weird manifestations are produced by disembodied spirits of departed persons or else that the devil is operating upon the minds of men in such way as to deceive them. Some folks go so far as to say that there are superior spirits who are able to produce mechanical and psychically various results. They are not willing to explain them, may be, and very likely are, wrong. May it not be the human mind and intelligence is powerful enough to produce all of the material manifestations and to accomplish the subjective wonders in writing or otherwise of the time and place he is to report for duty. All persons liable for road duty will be called out for service in sections near their respective residences, and when notified to appear must either pay four dollars (\$4.00) or perform the six days labor in person, or by substitute, as now required by law.

All persons liable to road duty who shall refuse or fail without law, to appear to appear and render the service required of him in person or by substitute after receiving twenty-four (24) hours notice or warning in writing or otherwise of the time and place he is to report for duty shall be guilty of a misdemeanor and punishable by a fine of not exceeding twenty-five dollars (\$25.00) or imprisonment at hard labor, not exceeding thirty (30) days.

County Board of Directors, Chester, S. C., April 11, 1922.

Well-Known Collegian Male Quartet Here at Chautauqua

The well-known Collegian Male Quartet will be one of the popular attractions at the coming Chautauqua here. The members of this notable organization are exceptional singers, and they are also accomplished musicians. They have had 1500 experience together and their ensemble singing and playing are exceptional. They are capital entertainers and the program provided by them are of a unusual and interesting sort, which will be long remembered by Chautauqua audiences.

Every citizen desiring to participate in the City election to be held on Tuesday, May 2nd, 1922, is urged to have a City registration certificate issued this year.

G. W. Byars, Mayor.

W. D. Colvin, Registrar.

FRIDAY, APRIL 14.

A shoe salesman says that the public has no conception of the losses that have to be paid as the result of the frequent style changes in foot wear. He remarked that many shoes that were made to be retailed at \$8 or \$9, and could not be marketed before their design went out of style, had to be sold by the manufacturers for \$3 to \$1.

A woman went into a store the other day, and bought a shoe made to retail for \$20, for three dollars and some odd cents. It may be nice to pick up these bargains, but when goods have to be sold at such a sacrifice, other people must pay more on their stuff to make up for the loss.

These conditions are equally bad on many kinds of women's clothing. If makers and dealers have to sell such bottom prices to get rid of past season's stuff, it follows that when the goods are new and fresh, the figures must be high enough to balance the loss on unsold portions of their stock.

The loss would not be so serious if it fell solely on wealthy people who can afford to pay high for novelties and the latest up to date thing. The majority of young women, including a multitude of working girls, feel shabby unless they have new styles, and they have to pay liberally for the privilege of having the latest fashions. There are many families who complain bitterly about the high cost of living, who could do something themselves to reduce it if they would buy common sense stuff that changes but little from season to season.

Many items in our inflated prices are the result not so much of the

war, but of the lack of thrift and sense on the part of the people. They can avoid a considerable element of cost when they become more independent of the most recent style.

MILES COVERED BY FLOOD WATER

Situation More Serious Along Mississippi. Traffic at Staudtville in Flooded Area—Live Stock Taken to Safety.

New Orleans, April 12.—Reports from Helena, Ark., that approximately 250 square miles of land in the lower part of Phillips county were covered by water from the White and Arkansas rivers, which are backed up by the high stage of the Mississippi river, gave situation today.

The village of Melwood, in the flooded area, was reported covered with from eight to ten feet of water, while Elaine is completely surrounded by water with water a few inches deep in the streets.

Railroad and all vehicular traffic has been stopped in the flooded area and few people remained in their homes to take chances with the high water. Practically all live stock has been removed to higher grounds.

A hurry call for levee builders was sent out from Arkansas City today and men were rushed to that point to aid in strengthening a one mile stretch of levee along the Mississippi river. The levee is holding, being raised to a greater height to meet the increasing floods expected.

In the Helena districts scores of houses, which were flooded by backwater, have been washed off their foundations and a number demolished by the high waves resulting from the winds, which have contributed largely to the present higher river stages by preventing the water from flowing southward.

Levee engineers in all the districts continue to express confidence there will be no serious break or overflow at any point. Strict guard is being maintained at all probable danger points, while material and equipment to handle any emergency has been placed at strategic points.

At Old Town, Ark., where a serious break was successfully overcome a bout ten days ago, renewed sloughing was reported today at the southern end of the old slough,

ERSKINE-P. C. CAME.

Great Interest in Game Here Next Tuesday—Presbyterian Line-up.

The baseball game between Erskine and Presbyterian College Tuesday, April 16th is looked forward to with a great deal of interest by the people of Chester and surrounding section. Both colleges have good teams, about evenly matched, and the game promises to be a good one. The fairground is being put in condition for this event and arrangements are being made to take care of a large crowd.

A great deal of local interest is being manifested as "Billy" Lewis, a well known Chester boy, will pitch this game for Presbyterian College and Hindman, another Chester boy, will play at second.

The aggregation has been coached by "Dety" Phillips, a Chester boy, who has made an enviable record in athletics in South Carolina. Both teams will arrive over the Seaboard Monday night at 8 P. M., and will be entertained in the homes of the friends of the two institutions they represent.

The Presbyterian College line-up will be as follows: Lewis; pitcher; Williamson, catcher; Brown, first base; Hindman and Warren, second base; Holliday, third base; Moore, short; Mahison, left field; Galloway, center field and Damphier, right field. Substitutes, Keith, Barnash, Miller, Wilson; Crawford, Manager. W. A. Johnson, Faculty representative.

GOVERNING OFFICIALS TO SEND S. C. MESSAGE

Spartanburg, S. C., April 13.—A special message from the President of the United States to the Sunday School workers of South Carolina will be read at each District Sunday School Association Convention throughout the State during the month of April.

Messages will also be read from the Governor of South Carolina and from officials in the Baptist, Methodist, Presbyterian, Lutheran, Episcopal, A. R. P. and Christian churches. These conventions are interdenominational and each of the 219 Sunday School Association Districts in the State is expected to hold a meeting according to State Superintendent, Leon C. Palmer.

WANT AD COLUMN

Double Veneered Mahogany Duet Bench with music compartment. Reduced from twenty dollars to thirteen dollars. Shipped express prepaid. John A. Holland, Greenwood, S. C.

Wanted—Man with car to sell the BEST Ford Oil Gauge made, \$109.00 per week and extra commissions. Benton Harbor Accessories Co., Benton Harbor, Mich.

Meeting Last Monday.

The April meeting of the Civic Club was held in the Sunday School room of Bethel Methodist Church, Monday afternoon, April 13th.

As Mrs. E. P. Calhoun had declined the office of president, to which she was elected at the last meeting, Mrs. R. B. Medart was nominated and unanimously elected to this office.

The report of the treasurer showed that a nice sum was realized from the Winktop Glee Club entertainment, of which \$36 was donated to the Milk Fund of the public schools.

Mrs. Lettner stated that Mr. Haden of Winthrop College had submitted some plans for planting the shrubbery on Dora Jones School grounds. These plans were accepted and the committee instructed to finish the planting according to them.

The Club voted to co-operate with the Health Department and Chamber of Commerce in making Clean Up Week a success and to continue its co-operation with Mrs. J. G. Gureton in the Cross Work.

Plans were made for the sale of Christmas tickets and the following committee appointed for this work:

Mrs. I. C. Cross, General Chairman; Mrs. M. A. Clark, Chairman; Ward 1: Mrs. W. B. Cox, Chairman; Ward 2: Miss Mary Sledge, Chairman; Ward 3: Mrs. W. H. Lowrance, Chairman; Ward 4: Mrs. L. T. Nichols, Publicity Chairman.

THE FARMER'S INCOME.

An Allamance County Citizen Does Some Figuring.

In a letter to Greenbush, News an Allamance county citizen wastes everything to return to the same kind of "normalcy" that farmers are compelled to endure, and this meditative farmer breaks the following remarks:

There's not a 10 year old boy who doesn't know that it takes seven dozen eggs at 20 cents per dozen to pay a dentist to extract one tooth. He also knows that his mother's preparing butter at 20 cents per pound and that the net proceeds for one month not including the cost of feed for one good cow will not pay an ordinary school teacher for one day's work of five hours.

Every farmer knows that neither John Calvin nor Martin Luther forewarned that he should pay salaries of \$4,200 each to county superintendents of schools and county managers with 75-cent corn. This means that these two officers will cost the people of Allamance county over \$115,000 counting interest at 6 per cent (and we are paying this rate) this is the cost for 10 years. According to an act of the legislature our manager will be appointed first Monday in November of this year, at "above mentioned salary. By referring to census reports we find that these two men receive for one year's compensation the following cost to the farmer, to wit: All of the corn produced on 60 farms, operated by 150 farm hands; allowing each hand 20 per cent of each officer's salary we find that it costs the farmer over \$125,000 not including horse power and upkeep of same. It requires the annual earnings of 12 farmers to pay the salary of one tax collector that the Morrison administration has just started in North Carolina, and there are 18 new jobs of this kind. The collector gets \$2,500, and the farmer seven cents per bushel, the farmer pays his expenses while the state pays the expenses of the collector. Every state employee may shoot gardens, milk cows, fatten his corn feed and catch all the way from the Atlantic to the Pacific, but the farmer must have protection from the politician, the profiteer, and the boot weevil.

WILL BUILD HIGHWAY.

Greenwood, April 12.—As soon as contracts can be let, work will begin on the top soil highway connecting the town of Greenwood with the decision of the Greenwood highway commission last night. The first mile of this road, leading into Greenwood, will be hard surfaced, the remainder to be constructed of top soil.

Abbeville has already constructed an improved highway to the county line, and the road to be built by Greenwood will connect Greenwood and Abbeville by means of an improved road.

KAVANAGH TO SPEAK ON LAWLESSNESS

Noted Jurist and Criminologist Has Important Subject.

WIN Deliver Great Lecture, "Traitors to Justice," at Coming Chautauque Here.

One of the notable lecturers at the coming Redpath Chautauque will be Judge Marcus A. Kavanagh, eminent jurist and criminologist. He will

deliver a great challenging address "Traitors to Justice," dealing with the important and timely problem of the curbing of lawlessness.

Judge Kavanagh is a member of the American Bar Association's special committee on law enforcement.

He has been on the bench in Chicago for more than twenty years and has made a thorough study of the ways of criminals and the causes and prevention of crime.

Judge Kavanagh is both a great student and an eloquent speaker. His lectures, "Traitors to Justice" will be long remembered by Chautauque audiences.

THE AUTOMOBILE.

The automobile is a vehicle used to carry passengers and encourage violent exercise on the part of pedestrians. It also encourages profanity, the desire to get there quickly, and young lawyers who specialize in damage suits.

Automobiles are not essential to happiness unless the neighbors have one. Mother and the girls suffer keenly every time it passes the house, and lay awake at night trying to think up new arguments that will impress old Dad. Dad finally decides that he might as well starve to death as be pestered to death and arranges for a second mortgage on the house.

Then he quits an agent who once told him that a man of his standing should have a car, and does his part to discourage the discovery of new oil wells.

The agent has been demonstrating with the car for six months, but it is still a new car. As he told Dad, it is "just nicely lumbered up." But by the time Dad drives it home it has become a used car and has depreciated in value another 25 per cent. And the gasoline bills have had a similar effect on Dad's bank balance.

The members of the family learn to say "The Car" always with capitals; to speak casually of what "she" did on that hill north of town, and to draw liberally on their imaginations when revealing the number of miles obtained to the gallon.

During the first three months the car is washed every second day and

run under a shelter when rain threatens. But when the paint begins to dim and the tires to wear, the mud of many roads chokes the spokes and the family refers to the car lightly as "The old boat."

The fever has cooled. But one more family has learned to class an automobile as a necessity, and one more rod has been placed in pickle for the chap who invented the motor-car.

There was more could be said good and bad of the automobile.—Exchange.

HOOVER SEEKS VIEWS ON BUSINESS SITUATION

Washington, April 12.—Trade associations throughout the country were asked today by Secretary Hoover to furnish voluntarily to the commerce department statistical information concerning the industries to be published by the government for the benefit of business and the public generally.

Several hundred representatives of national and interstate trade associations met in conference with Mr. Hoover to discuss means of making available to the commerce department data on the various industries at stated intervals.

He told the conference that the methods to be employed in supplying the statistics could be best worked out with the individual associations desiring to co-operate with the government and stressed that the service was to be voluntary with no intent on the part of the department to force associations to furnish statistics.

Back Comes Your Money!

If you do not find VALDURA ASPHALT PAINT the most durable, satisfactory and economical preservative paint you ever used, we will refund your money.

VALDURA is real asphalt—95.5% pure. Oil-soluble Asphalt—not money can't buy it; it's good asphalt, the best produced, and there is no better preservative than genuine asphalt.

Valdura Asphalt Paint

Is made in brilliant Black and rich shades of Red and Green. It comes all ready for use. It does not need any additions or heating, and you can apply it at any time of the year. It won't run in the hot weather and it won't crack in the cold weather. A gallon of it goes further than other paints of its kind. It is popular price and sold in any quantity from 1 Gal. case up.

Every property owner ought to have it on hand at all times. It will quickly cure a leaky roof or preserve and protect any surface you apply it to—metal, wood, concrete and even paper.

You ought to read the VALDURA Booklet and try the free sample can we will gladly furnish for the mere asking.

AIR "CHATTER" NOW POPULAR

Wireless Telephone Receiving
Stations Are Rapidly Growing in Number.

MILLIONS BY END OF YEAR

Washington, June 10. Record of Receiving Stations, Not Officially Estimated, Shows Number Will Soon Be in Existence.

Washington, June 10. Before the end of 1922 there will be installed throughout the United States a minimum of 1,000,000 receiving apparatus to pick up the "chatter" that is being broadcast daily through the air by radio, so government officials in Washington estimate.

No license and no record is required of receiving stations and there is no way of knowing just how many there are, but where there were only about 25,000 a year ago it is believed there are at least 200,000 now, and of these nearly half have looked into the radio game in the past thirty days.

Developing Radio Operators

Washington has never witnessed anything like the way the wireless telephone has captured the imagination of the American people. As such, many come under the D. C. Bureau, a division of navigation in the Department of Commerce, Washington, who is literally deluged with applications for licenses for sending stations, especially the big broadcasting plants.

The big growth has come within the past month since the first successful demonstration on a large scale of the wireless telephone. Prior to this the department conducted propaganda to induce amateurs to break into the game, so the nation would have a reserve of radio operators who knew the game. Now it can hardly wait for thousands of amateurs that come in.

Manufacturers of receiving apparatus for the wireless telephone report that they cannot begin to fill the orders and are doubling their output every few weeks, while the turning out of home-made apparatus is being undertaken by the inventive American.

Farmer Will Benefit Most

As government officials in Washington see it, perhaps the greatest benefit from this new and marvelous development will accrue to the farmer in reducing his isolation. One month back the Department of Agriculture began broadcasting market reports from postal stations at six points. Since then three state universities and a half dozen newspapers have taken up the proposition.

Deciding Where To Buy

The success of a business depends on its ability to analyze the mental operations of the public and to determine how people decide as to where they shall buy goods. The merchants who read the public mind most accurately get the business.

When one finds that he needs something, the question comes up where that article should be bought. From some source back in the mind the suggestion comes that such and such a place would be a good store to visit for that purpose. Whence comes that suggestion?

In the majority of cases, it is created by the store that has made the most effort to impress its reputation on the public mind. People remember the things they hear about constantly, and they forget other things that are rarely called to their attention. The advertiser's store conforms to the laws of psychology, by constantly calling public attention to its enterprises, its goods, its methods, its prices, and the advantages of trading with it. Consequently the latter consciousness, when asked what or where a person should buy, is apt to respond by suggesting certain advertised goods.

It is of course true that while a store by advertising can always draw in a lot of new trade, it can't keep it unless it really does give good values. But advertising helps a store do that, notably in these two ways:

Advertising encourages merchants to handle big lots when such are offered them at low figures. They know that by appealing to the public by advertising, they can save these big lots and turn them into money in a short time. Thus buying in a large way and taking advantage of special opportunities, they are able to offer special values.

Advertising increases volume of trade, thus reducing the operating and overhead expense per article, making it possible to cut prices to the public. The advertised store buys and operates at low figures, and can thus make low prices.

Carbon dioxide

For gas victim

Public Health Service Tests Method for Efficiency in Mines and Elevators.

Carbon monoxide is ousted

Breathing is Stimulated by Use of Inhalator, Filling the Lungs With Oxygen—Inventor Says Device is in Use.

New York—Persons overcome by suffocating gas are being treated with carbon dioxide and oxygen by the United States public health service, in a series of studies to determine whether the carbon dioxide treatment should be introduced into mines and grain elevators where the life-saving devices are prescribed by the United States government.

From each person treated by the new method, which was devised by Irvin Yandell Henderson of Yale, working under the United States bureau of mines, a few drops of blood are taken at the moment when the inhaler is first applied, and a few drops more are taken at the end of 20 minutes' use of this apparatus.

"The samples of blood are sent to Dr. Henderson at Yale," said Dr. Stuart Scott, who has been assigned by the United States public health service to take charge of the test of the invention in this city, where it is being used for the first time on human victims of gas poisoning.

"The samples, any being analyzed to discover what percentage of carbon monoxide has been removed from the blood in the 20 minutes' period in which the inhalator is used. It will take a long course of experiments to determine the effect of the treatment. If it is finally shown that the use of carbon dioxide mixed with oxygen is the best antidote for gas poisoning, the inhalator will probably replace the different varieties of purifier now in use in government service."

Used to Stimulate Breathing—The function of the carbon dioxide is to stimulate breathing, which becomes extremely feeble in a patient overcome by gas. The strong breathing keeps the lungs filled with oxygen, and the faster the oxygen enters the lungs, the faster the blood is cleared of the carbon monoxide.

In Bellevue and other hospitals a number of experiments have been carried on in the administration of carbon dioxide to patients who have been brought under care during operations. The use of carbon dioxide with great care in such cases is said to speed up breathing so that the patients quickly clear the ether from their systems and suffer less than the usual ill effects from it.

The average case of gas poisoning is not the best kind on which to show the beneficial effect of the inhalator, according to Dr. Henderson, because usually one under anesthetic for many hours. During this time, lack of oxygen in the body often produces degenerative changes in the nerve and other body cells. The mere restoration of the patient's breathing apparatus cannot repair the damage already done throughout the system of the patient.

The great benefit claimed for the use of the carbon dioxide process is in the early treatment of acute cases of gas poisoning, of firemen asphyxiated by smoke and steam, and of carbon monoxide poisoning. Profound harmful changes may take place in the body of the sufferer within a short time in such cases, and slow processes of reoxygenation do not save the patient from what often is a permanent loss of life in disturbed nerve centers and constitutional troubles.

The use of carbon dioxide in the resuscitation process, however, is believed to be capable of clearing the blood so quickly that a person suffering from severe asphyxiation may recover without ill effects if the remedy is used quickly.

World's Largest Egg—Pennsylvania, Pa.—The world's largest egg was produced on the farm of Joseph Gullone, of Dillwynville, near an extensive and high school, according to information given by New York poultry authorities, who examined the egg and looked up the records. The measurements of the egg are 6 1/2 inches and 5 1/2 inches respectively. Weight of the egg is 2 1/2 pounds. The record egg was laid by a Rhode Island Red pullet. A second egg of similar size was laid by the same hen.

Electric Bitters—Made A New Man Of Him—"I was suffering from pain in my back and neck," writes H. T. Allen, Raleigh, N. C., "and my liver and kidneys did not work right, and four bottles of Electric Bitters made me feel like a new man."

Great Comedy, "Friendly Enemies," a Chautauqua Attraction

"Friendly Enemies" is one of the most popular of recent comedy successes. Scores of cities throughout the country have alternately laughed and wept over this irresistible comedy drama whose plot grows out of the conflicting convictions of two lifelong friends. A complete production of "Friendly Enemies" will be given at the coming Redpath Chautauqua by a cast of distinguished Broadway actors organized by William J. Keighly, manager of the New York City Producing Company of the Redpath Circuit.

NOTICE OF ELECTION.

Notice is hereby given that an election will be held at the City Hall, in the City of Chester, S. C., on Tuesday, May 2nd, 1922, to elect four Aldermen to serve for the ensuing two years.

For this election the polls will be open at 8 o'clock A. M., and close at 4 P. M., and at such election only qualified electors having City registration certificates issued during the year 1922, will have the right to vote.

Messrs. B. T. Byars, W. C. Minter, and S. E. Wylie have been appointed managers of said election.

J. B. McInure, City Clerk and Treas. Chester, S. C., April 17th, 1922.

See Us About Your Next Job Printing

ITS NOT WHAT IT COSTS TO GET IN THE NEWS—BUT WHAT IT COSTS YOU TO STAY OUT.

What Does It Cost to Stop Advertising?

You remember James Pyle's Pearl-line. It had been advertised regularly from 1873 to 1907.

Then the trustees of the estate saw a brilliant chance to save money.

They cut out advertising.

Sales dropped like a clap hammer—profits went where whoapsuds and bubbles go. In 1914 Pearl-line, like Jess Willard, tried to come back. But it was too late. The business was sold at a price which is said to have covered barely the value of the machinery and inventory.

Moral: A business will grow as long as it advertises.

A salesforce will thrive as long as it TRIES.

You can't make progress against the current unless you keep rowing. But the harder you row, the faster you go.

How much will The News' readers spend in your store?

Doesn't the answer to that question depend upon you?

Advertise—means to sell.

Not to advertise usually means, ter.
