### MYSTIC THEATRE SCENE OF FIRE

#### Small Blaze Last Night from the Picture Machine Was Quickly Extinguished.

The Mystic Theatre, situated in the building adjoining the Carolina on Main street, was the scene of a small fire last night. A show was being shown when some of the films caught on fire from the lantern and instantly the place was filled with smoke. About twenty five people were in the place at the time and in a second's time it was empty. The lantern was burned up, three films some of the chairs, and part of the woodwork. The building was otherwise unharmed and this morning presents a dilapidated appearance.

The ringing of the alarm soon had the fire wagon on the scene and in a few minutes after the water was turned on, the blaze was extinguished. Smoke permeated the Carolina line and the postoffice driving the people on the streets. It took some time for the place to be cleared of smoke.

A pretty big crowd gathered in a short time as is usual in the case of fires, but the burning lantern made a pretty big blaze and some people thought that the postoffice was on fire and this helped to draw the crowd. It took some time for the building and the burning of the other things enunciated nothing else was hurt.

Mr. A. W. Moseley, the proprietor of the theatre, said this morning that his loss was about \$500 without any insurance. The damage to the building, which is owned by Mr. T. L. Eberhart, will not amount to very much.

### A CARD.

Editor Lantern:—Referring to the recent article in your paper, signed John W. W., which appears to have been written for the sole purpose of criticizing the work of the Public Works Department during my administration as chairman, I wish to make the following statement: Ordinarily I would deem it unnecessary to reply to this article, as most of our citizens keep posted on city affairs, but in view of full of distorted or ignorant misrepresentations that I wish to give those who are not posted some facts and figures. The Water and Light receipts since the plant was put in are as follows:

1898-9	\$1,858.67
1899	2,675.94
1900-1	3,215.72
1901-2	4,288.61
1902-3	4,336.34
1903-4	5,358.39
1904-5	6,515.22
1905-6	7,491.12
1906-7	9,150.33
1907-8	9,920.06
1908-9	11,930.90

The receipts for the last two periods were made during the present administration. As to the pump and air compressors: Two years ago the council found it necessary to make some improvements in the water works department. The filter at Sandy river needed overhauling and the whole system was badly in need of renovation and repairs. We regarded it as imperative that the people have pure water. The matter of purchasing a pump to be operated by compressed air was gone over thoroughly. The purchase of this pump meant quite a saving over the old system. It meant the doing away with the dragging of coal three miles and practically abolishing the Sandy river station as the pump was to be operated from power plant in the city. The report that after buying this outfit we had not been substituting electricity for steam power, thus giving the city as much and as cheap a power as is obtained by any city in the United States. We have since sold off something over \$1,300 of this outfit and have on hand about 1000 feet of pipe and the pump, all painted and as good as it was the day we bought it. The price of piping has dropped about ten cents since we bought it. We have had several bids on it but prefer to hold for higher prices. The makers have also promised to take the pump off our hands as soon as they find a purchaser. We are not going to let some loss in making this change but we figure that the difference in installing the electric over the steam pump, the saving in dragging the three miles to one station and one mile to the other, the doing away with the coal altogether and the reduction of boiler horsepower over steam, will more than make up in a short time what we lose by the change.

I don't know where Mr. Wix obtained the information that leads him to believe that our water and light rates have been recently raised thirty five per cent. Possibly through the same source from which he created the other startling information. The facts are: Our water rates have been reduced during the last two years and the light rates are the same as they were when the rates were put in. Rates on lights are as cheap, I think, as any in the state.

Any citizen sufficiently interested can go to Mr. Hamilton, supt. public works, or to our city clerk and have the above facts substantiated by the records. I do not care to discuss them further through the papers. If however, Mr. Wix is desirous of more light, we will call a meeting of the citizens at the opera house, in the ward, or anywhere else he wishes and let the voters judge between us.

Respectfully,  
Z. Vance Davidson.

The Ashley Case. Greenville, April 23.—The second day of the trial of John W. Ashley, charged with shooting to death George Strawn, was held in the Federal court here, was a hard one for all parties concerned. Many witnesses were examined. The government rested its case shortly before noon. The defense began putting up its case.

The feature of yesterday's proceedings was the placing on the stand of Mrs. Mahala Ashley, wife of the defendant, who testified as to the correctness of an account book, in which appeared certain accounts against Will and John Strawn, Powell and George Johnson, the negroes whom, it is alleged, Ashley kept in a state of peonage. Mrs. Ashley, it appears, was the bookkeeper for her husband's business. She showed long accounts against the negroes and said all the items charged against the negroes were got by them in person.

Another interested witness was Mrs. Lonnie McMillan, widow of Joe McMillan, who was killed last fall. She swore that she had seen the defendant with John Davis when arrested by Joshua Ashley and his sons. It developed that Josh Ashley had been appointed by Magistrate Green a special constable to serve the warrant, which charged the negroes with obtaining money under false pretenses from the late John McMillan.
