ROCK HILL, S.C. - The results of the latest [Winthrop Poll](#), of 1,038 respondents living in South Carolina are in. The survey was in the field from Feb. 9-17.

After weights (for sex, age, and race) have been applied, results which use all respondents have a margin of error of approximately +/- 3.1% at the 95% confidence level. Results that use less than the full sample (e.g. just registered voters) will naturally have a higher margin of error, according to [Scott Huffmon](#), director of the Winthrop Poll
