Title: Alternative Facts: Learning Only Happens in the Classroom

Presenters: Jessica Martin, Amy Phillips, and Clarissa Elmore Residential Learning Coordinators and Academic Associates

Presentation/Paper: 2 or 3 presenters in 60 min session

Topic: High Impact Practices/Retention

Abstract: Just as learning occurs in the classroom, it also occurs out of the classroom. In Winthrop University's Department of Residence Life, professional and student staff instructs residential students in the "laboratory of life" with emphases on civility, integrity, communication, conflict management, and community building. With an increased demand from employers looking for students with strong soft skills and the ability to communicate with others, the value of a residential education cannot be overstated. Residential Learning Coordinators get to facilitate this out-of-the-classroom learning regularly. Attend this session to discover ways that Residence Life professional staff blends students' academic and residential lives through programming, mentoring, and recognition to create a high impact experience.

Keywords: Retention, Academics, Recruitment, Recognition

Disciplines: Education, Leadership

Full Presentation:

1. Introductions
2. Overview of Academic Initiatives Programming
