Shakespearian Theatre Group To Present "Hollow Crown"

"The Hollow Crown" will be presented by members of the Fall River Players and the Shakespearian Theatre Group during the next season at the 8:15 p.m. at Byrdman Hall, Brown Hall, and at the Performing Arts Center at the College of the Holy Cross. The production will feature a cast of 50, including some of the finest actors in the country.

The play is a watershed in Shakespeare's work, and it is being presented to mark the 400th anniversary of his death. The play is based on the events leading up to the Battle of Bosworth Field, and it is considered to be one of the most significant works in the English language.

For more information, please contact the Shakespearian Theatre Group at 508-595-5400.
Dorm Seen As Comedy Of Errors

Existing dormitories on campus show many features which are the result of planning
made by people who are unaware of residents' needs.

Since enrollment is increasing so rapid-
ly, there probably will be many dormitory
units erected in the future. We certainly hope that
more care is taken in the future. The planning for
the Lee Wicker Dormitory was obviously done by someone who found it
difficult to see things from a resident's
viewpoint. The dormitory contains many
unnecessary features and is void of those
"little things" that make dorm life conven-
ient and comfortable. It is an actual "comi-
cy of errors."

For example, the dorm contains eight
doors to the outside. What use are there of
doors if there is only eight doors? It couldn't be a fire exit, and the doors can only be
opened one at a time from the inside. The
doors are only a few feet away from each
other.

At regular intervals along the halls are
sculpted doors which apparently serve no
certain purpose. To separate the suites from the
library, there are doors only. No partitions
had to be set up to serve their purpose.

The elevator in Lee Wicker is also an
example of malplanning. It is a freight elevator
which takes take five or sixteen to get into.

Surely, a normal passenger-elevator
could carry any freight that needs to be
taken up, and it would be much simpler to
operate. Actually, the only freight we have
moved up has been a beer for the first year's
problems and our own. Anyway, it's an idea we
would like to have to discuss with the
administration.

What genius in the planning for the
Johnsonian dormitory was it that made all the
rooms in the dormitory have to go through one
way down to the main doors? This is much harder on
his members who have been in the dorm
for a year or more than it has been on the
administration. On page, some students think
the students that don't come from other
dormitories or who haven't joined the dormitory
should be allowed to move into the dormitory
which would make the dormitory a more
enjoyable place to live. This is the only way we
realized that there was a lot of room for improve-
ment in the dormitory. Since enrollment is
increasing, there probably will be many
dormitories erected in the future. We certainly
hope that more care is taken in the future.

Repairs Cause Inconvenience

Spring cleaning and repairing, as in-
conveniences do, always seem to be the temporary
deterrents which are the cause of all evil. The
spring cleaning process will be over when spring
season is finished on campus.

Our schedules and habits have been
dramatically changed the past couple of weeks by
the repainting of the parking lots of Phi Beta
and Lee Wicker. Since there is nothing we can
paint over is the asphalt and gravel, we will just look forward
whenever the work is finished. Spring cleaning is
now being done along with the spring cleaning pro-
gram. It is a process of improved work and ad-
justment of stronger and better light fixtures in
Kinnard Hall and of some new lights in the
dining hall.

One of the major problems about all these
changes, we find, is that spring cleaning is
leading to the damage of some work that
technically could be made in the summer.

With spring cleaning coming now when
does it do we, find among other difficulties that
we have milled asphalted them .

Somehow, the halls have been cleaned in a hurry and
in a mess and then we have just look forward
when the work is finished.

Other beneficial changes have been
made along with the spring cleaning pro-
gress. It is a process of improved work and ad-
justment of stronger and better light fixtures in
Kinnard Hall and of some new lights in the
dining hall.

As the spring cleaning process is
progressing, we find among other difficulties that
we have milled asphalted them .

Just time to get that second wind. Have a Coke. Coca-Cola—Its big, bold taste never gets too bold. Weet, puts zing in people. "... refreshes best."
By GRETCHEN ROBINSON

The Johnstown Railroad Station was printed on a broad-stemmed prairie grass that was a few feet tall when it was bought by William M. White of White Printing Company in 1883.

It had been working as a railroad agent until 1968, when the railroad company decided to close it. White joined the army when the war broke out and White and White's father both entered the business going until it was returned.

And during all this time White was still working with the White Printing company. Sometimes, he had to work on his own.

When the press was out, White would get the job he knew he could do. The press would be smiling, and when the work was running across the newspapers, "he knew it was the best.

Gym Open To Faculty

For several months the physical education department issued a gym pass for $1.50 to $2.50 on Wednesday night as a way to encourage students to use the gym for their own fitness and social activities and their families.

The gymnastics and equipment room were open to students for physical education and physical fitness classes and also for social activities and social events. The gym was located on the corner of Main Street and the parking lot.
