FRIDAY, AUGUST 10.

Provost General Marshall Crowder, finding that many men in the service of the country are claiming exemption on the ground of dependents, has issued instructions for the local boards throughout the country to pass on claims for exemption with great care.

Mr. Crowder has issued instructions in detail, to the boards, and a great many people are going to find that it was useless for them to file a claim for exemption. It has already been mentioned that many men are claiming exemption on the ground that many men are claiming exemption that should not and this fact has caused the Provost Marshal General to issue new instructions.

It would be foolish for the United States to offend Germany through neutral ports. While many neutrals deny that they have been buying good from this country and reselling it to Germany, it has been proven that they are guilty of this practice.

The "Red Cross" has been clamped as shipments to neutrals, which will, in all probability, cause suffering among neutral citizens, those neutrals having no other than blame for their actions.

If now come to the attention of the government that neutral ships have been supplying German submarines with supplies and an order of the government that neutral ships will be seized at American ports under the supervision of customs inspectors. By adopting this plan, our government expects to stop submarines from receiving supplies, in mid-ocean, from neutral ships.

**THE EXEMPTION BLANKS.**

The Local Board was furnished with about 150 forms to be used by married men for the purpose of making claims for exemption. Practically all of the supply was taken up the first day of the examinations, which left the board without these forms.

We have looked up the ruling regarding these forms and find that the blanks furnished by the government is a matter of accommodation, and they consider that this would work a hardship on a number of people in Chester county and in consequence thereof they had 1,000 forms printed, which they received yesterday.

Those who now desire these forms can get same by calling on the board. After one takes a look at the forms he will appreciate the board having them printed, stand off him to make it himself, as the department said could be done. These forms are very expensive, but that they will be required to pay the expense, since the government has made no provision for extra forms.

**SELECTIVE ARMY NOTES.**

The filling of a claim for exemption does not mean that you are going to be going into the army. The local board will pass on all claims for exemption, and it has been stated that the government expects to consider every claim for exemption.

The fact that you are accepted by the local board does not mean that you will be accepted into the National Army. After you reach the point of mobilization you will be examined by an army surgeon, and the surgeon will accept 10 per cent of the men accepted by the local board will be turned down at the point of mobilization.

Several of the draft boards in Philadelphia, Penn., have decided that they will not examine married men without children. If the wife is physically able to support herself while her husband is away fighting, these boards will not grant the hus-

band's claim for exemption. Other boards throughout the country have written Washington regarding this particular matter.

All boards have been instructed to take into consideration the fact that the government will pay each man \$40 a month, and they should be able to send \$25 home to his wife each month. This fact, the authorities state, must be considered in passing on claims for exemption.

**EAT ENOUGH.**

Many a thrifty little housewife will receive with a sigh of relief Dr. Anna Howard Shaw's advice to the women of the country to maintain a high quality of meals for their families. She says that the best "kept" form of physical morality is not "intellectually." There have been so many "letters to the women" of late that it grows difficult to exercise judgment as to the wisdom of the advice given. In one case, for instance, A vast number of men and their families on a salary that might be termed moderate, to speak mildly. In some cases this spend has been increased, but raised to a high standard of physical nutrition. The house economist, therefore, who has the feeding and clothing of the family to accomplish has been acutely aware of the need of conserving of resources and economy of purchase, and to the utmost. In such instances economies are already pared down with a nice calculation to the lowest figure compatible with the retention of the maximum amount of food.

Diners of several kinds are recommended and deserved for company use only, like the best chins and grandmother's silver teaspoons. But this careful contriving has been held even to the necessities of life. On starting on a vacation which seems to have no turnings, The housewife is perplexed at the bombardment of warnings, embargoes, restrictions and instructions aimed at her. She thought that having already learned the lesson of economy, she needed no further teaching. In some cases she was inclined to be resentfully ruffled at the implication of possible prodigality.

It would help if a rule which must be observed by all mothers in order to reach those who need it strikes in its operation those who do not. Doctor Shaw is right, her intuition, that there are many who do not know where to turn for the literature of caution, for the reason that they already practice what it preaches.

"We do not mean the woman who has had a course for dinner when she goes to a restaurant, nor the woman who gives to the poor, nor the woman who overcomes, in those cases, underfeared," Doctor Shaw goes on to emphasize the necessity, which all must realize, of maintaining that sturdy sense of health which defines basic spirituality.

A consideration of our obligations in time of national need is a sober duty required of all of us. But when, having considered and decided accordingly, we go further and further into the ranks of the well-to-do, we wealth can accomplish nothing.

Mr. J. R. Moore, of the "Daily Spy" newspaper, has suggested a sweeping reorganization of their establishments. On the other hand, there can be no stronger incentive to economy and intelligent management than the sense of personal circumstances, if not of want. The family in which this dilemma is a familiar factor need apply to the extent of depleting its assets of capital, and then, if necessary, to cope with other and equally pressing problems of these anxious times.

**ANNUAL MEETING TO BE HELD IN SEPTEMBER.**

The annual meeting of the York County Interdenominational Sunday School Association will be held Thursday and Friday, September 4 and 5 at the Olivet, Presbyterian church, McCombelle, R. C. Burke, president. The session will be opened and J. T. Fair, secretary, will present the program which will be ready for distribution within a few days. Rev. E. H. Turnipseed, pastor of the Main Street Methodist church, Columbia, and Dr. D. C. Cobb, of the First Baptist church, Mrs. S. R. Moore, of Abbeville, one of the best known Sunday school experts, will be the principal speaker. The session will be opened with a special offering.

After one takes a look at the forms which will be available at the board having them printed, stand off him to make it himself, as the department said could be done. These forms are very expensive, but that they will be required to pay the expense, since the government has made no provision for extra forms.

**SELECTIVE ARMY NOTES.**

The filling of a claim for exemption does not mean that you are going to be going into the army. The local board will pass on all claims for exemption, and it has been stated that the government expects to consider every claim for exemption.

The fact that you are accepted by the local board does not mean that you will be accepted into the National Army. After you reach the point of mobilization you will be examined by an army surgeon, and the surgeon will accept 10 per cent of the men accepted by the local board will be turned down at the point of mobilization.

Several of the draft boards in Philadelphia, Penn., have decided that they will not examine married men without children. If the wife is physically able to support herself while her husband is away fighting, these boards will not grant the hus-

**MEETING CITY COUNCIL**  
Sewerage Law Enacted—All Parties Within 250 Feet of Sewerage Law Must Connect—New Alderman Sworn In.

The city council held its regular monthly meeting last Tuesday evening. The members were Mayor Davidson and Aldermen Clark, Glenn, Calhoun, Frazer and Cross.

A motion was introduced by Mr. Cross, abolishing all dry closets in buildings within 250 feet of a sewer line or one that may be eventually laid by the city. The property owners are given ninety days in which to comply with the provisions of this ordinance. The amendment was carried and voted.

Mr. Geo. W. Byars, one of the Aldermen who was recently elected from Ward 1 was sworn in, Mr. M. R. Clark, the other Alderman recently elected, is in New York with the State legislature.

The incinerator, recently erected at the gravel pit on the outskirts of the city, near the Lancaster and Seaboard Railway tracks, was inspected by the State engineer on September 1 and 2. Under the direction of Mr. W. L. Johnson, the chief engineer of the plant, Mr. Glenn, was instructed upon receipt of directions from Mr. Clark to have the plant removed.

Mr. Calhoun, the Clerk was instructed to have the plant removed by Mr. Clark, who was recently elected from Ward 1 was sworn in, Mr. M. R. Clark, the other Alderman recently elected, is in New York with the State legislature.

The work of the plant is suspended.

It was very amusing to listen to the various excuses put up by the various excused to the question of why they did not come to the meeting.

ust, 1917, in the Semi-Weekly News.

TAKE

# CARDUI

The Woman's Tonic

You can rely on Cardui. It will do what it has done for so many thousands of other women. It should help. It has taken sick, seemed to be dead, writes Mrs. Mary E. Steele, of Madison Heights, Va. "I lay down to sleep, could not get up again, just staggered around."

I read of Cardui, and after taking one bottle, I felt much better. I took 3 or 4 bottles, at that time, and was able to get well again. I take it in the spring, and lay down. I had no appetite, and I commenced eating. It is the best tonic I ever saw." Try Cardui.

## Physical Vigor.

It is in the mid-summer more than at winter, that we feel the heat, and are apt to appreciate the neediness for continuing care of ourselves if we have any regard whatsoever for our physical condition. The wave of heat which spread over the country during the past summer, was a severe victim to those persons who either through force of circumstances or carelessness had become physically weak and run down. Of course there are many cases when a man is not able to retain his vigor, and is compelled to continue his labors, which is obliged to continue his pangs of duty regardless of the consequences, which unfortunately often becomes serious. A man, however, cannot be expected to do more than he can stand physically, and it is important that he should have a period of rest at the same time which permits no period of recuperation to those who labor faithfully at their work from one year's end to another. A great many articles have been written to the interest of the work in which man is engaged, as it is to the worker himself. It puts new life and vigor into the latter, and enables him to take up his task again with renewed energy and a higher degree of efficiency.

There are many others, however, who with an abundance of time and means at their command deliberately neglect mechanics, and thereby deprive themselves of the opportunity to attain a common rule of health. Their actions are such that they come and go for the most part to suit themselves; they keep late hours and give themselves up to ceaseless pursuit of pleasure, ignoring the fact that such deprives them of needed rest, and as a result they, too, become physically unfit to produce the high index of results of which they would otherwise be capable. Vitality is a force, indeed. Indeed, it is worth while at any price, and we should possess it if it is humanly possible to do so, as means are means to the individual, as also to his friends. His personal comfort, too, also bears its influence upon the role he plays in life. The weak man who lacks vitality lacks also the strength to measure up to his duties, as he should and no matter what his mental ability is if his physical vigor is lacking. The Charlotte Observer—"The shades of night were falling as we left our destination. The harvest moon hung in the sky as we rounded Chimney Rock. At our right was Old Hickory, under whose shade we stopped. We insignificant mortals were creeping along. The river sang a hymn, and it seemed as if nature was offering her evening prayer to the Creator. But it is useless to describe the scene in this region. Go with us for your own."

Wilmington Review—"It was up hill and down hill; now in the valley, then in the high hills, and 'an' stormy day. We had to pass through hundreds of feet above ground, and yet fascinating in the extreme. The outlook was superb beyond description."

Raleigh Times—"Hickory Nut Gap is the most beautiful place in the country to be found throughout the Apalachian chain. To attempt a description of the great gray peaks, overlooking roaring cataracts and waterfalls, values below, would be sheer folly."

Charlotte Observer—"The shades of night were falling as we left our destination. The harvest moon hung in the sky as we rounded Chimney Rock. At our right was Old Hickory, under whose shade we stopped. We insignificant mortals were creeping along. The river sang a hymn, and it seemed as if nature was offering her evening prayer to the Creator. But it is useless to describe the scene in this region. Go with us for your own."

Wilmington Review—"It was up hill and down hill; now in the valley, then in the high hills, and 'an' stormy day. We had to pass through hundreds of feet above ground, and yet fascinating in the extreme. The outlook was superb beyond description."

It was upon the summit of the rugged and picturesque Chimney Gap that we stopped in the midst of a hundred majestic mountains. The view is simply sublime."

Raleigh Dispatch—"There is not a missing element in this beautiful mountain scenery. No language can do justice to the grandeur of the picture. The Broad River certainly is a picture. The country between Chimney Rock and Chimney Rock is beautiful."

We stood upon the summit of the rugged and picturesque Chimney Gap, and it seemed as if nature was offering her evening prayer to the Creator. But it is useless to describe the scene in this region. Go with us for your own."

Wilmington Review—"It was up hill and down hill; now in the valley, then in the high hills, and 'an' stormy day. We had to pass through hundreds of feet above ground, and yet fascinating in the extreme. The outlook was superb beyond description."

If you have a friend who wants to go to the mountains this year, to get information about this wonderful section of the mountains, write to Thomas F. Turner, Proprietor, Esmeralda Inn, Bat Cave, N. C.

It is a pleasure to have you come to us, and it is only when we begin to feel that you are getting tired of our company that we shall begin to appreciate its value. We should try to bear in mind the fact that we must put up with the discomforts of the mountains, and the difficulties of the roads, before we start out on our work. The men who turn night into day unselfishly, thus depriving themselves of many needed hours of rest, to meet the great demands of the mountains, are to be pitied, but their user gives scant attention to himself, and often, without being in the least prepared for it, starts himself off on another twenty-four hours of labor. It is to be hoped that every man who goes to the mountains, and is not used to them, will not attempt to stand the strain they put upon themselves. They are not to be blamed, however, for they are set to work, and their user gives scant attention to himself, and often, without being in the least prepared for it, starts himself off on another twenty-four hours of labor. It is to be hoped that every man who goes to the mountains, and is not used to them, will not attempt to stand the strain they put upon themselves.
