The boll weevil has financially ruined thousands of people today and it is found in Chester county. Possibly you are a doubting Thomas and don’t believe it will hurt you. Better think about what happened to the doubting Thomas during the flood.

**People made fun of Noah when he was building the ark—they didn’t believe there would be a flood, but there was and you doubtless have an idea what happened to those who did not listen.**

LOCAL and PERSONAL

We received a personal address to the manager of the Chester-York Motor Oil Refining Co., June 21st, from Rev. R. C. O'Keefe, the class master of the Scots College, who informed us that he was a most handsome young man, and that he had been selected for the head of the department of the Scots College, at the last meeting of the board of governors. The manager of the Chester-York Motor Oil Refining Co. is a most promising young man, and we wish him every success in his new undertaking.

An Improved Gasoline

Every motorist should profit by this announcement

For many years the Standard Oil Company (New Jersey) has maintained a special division of its staff whose activities are devoted entirely to the development of new products and the constant improvement of those already being manufactured. A large share of the work of this Development Department centers around the production and quality of "Standard" Motor Gasoline.

As a result of continuous research work and exhaustive, practical road tests conducted by this Department, we are able, to announce the production of a decidedly improved quality of gasoline.

The "Standard" Motor Gasoline which is now obtainable at every "Standard" filling pump is improved—not only in one particular respect but in every way that has a bearing on the actual performance of motors.

The average gasoline user is not aware of the large number of factors that govern the quality of gasoline he buys. In fact, he usually doesn't care about the factors. He is interested, first, last and always, in the quality as it is delivered to him. So, without a wealth of technical information, the motorist measures gasoline quality by one, and what is after all the final, deciding test, namely—its behavior in his motor.

Gasoline must be good not in one respect but in all respects. To make it seem better, even to an expert, without really being better, is not an improvement. Our present product is really better from every standpoint—so much so that you will quickly notice the difference.

It has never been the practice of this company to claim economies and technical merits for its products which the average motorist could not prove for himself. Give "Standard" Motor Gasoline a trial. This is all we ask you to do. We are confident that, purely on the basis of its performance and economy, you will use it regularly. Try it today.

STANDARD OIL COMPANY (New Jersey)
This is the first of a series of informative advertisements concerning the relation of gasoline quality to the operation and performance of motors.
