There was quite a large attendance on an ice cream supper that was given under the management of the Lockport Athletic Association at the Lockmore Mill village last Saturday night. The supper was an outdoor affair; the refreshments being served in the dining hall of the Cameron, or York No. 3, returned last Friday from an extended stay in the peach growing region of Georgia, and were assisted in the commercial grade. He brought back for distribution among his friends and acquaintances some of the specimens of Albertus, which he had secured in his district on last Friday let a contract for the building of a handsome new brick school building to consist of five classrooms, a gymnasium, and a playground. Heungnam was the lowest bidder and will not undertake the work. The new building will be in addition to the one now in use, and will complete the school district. It will have about \$20,000 worth of buildings. **York county gets \$1,600.87 for the year ending March 31, 1901. He paid during the month of July, the tax going one-third to the state treasury, one-third to the state highway fund, and one-third to the county, which pays it. The total tax for the state last month amounted to \$141,377. Charleston paying the largest sum, \$141, of which the county received back half. **On the temper of the boys on the 15th to some of the sports editor of the Yorkville Enquirer has talked. He says that the boys of the names of the Palmetto league will know that they have been playing illegal. "There is no personal feeling between the boys of the two teams, all the players being boys and on good terms; but both sides feel that they must win their own game, and that they must respect their respective teams and they are willing to give the best they have in the effort." **That is a pitiable state of affairs, and it is a pity that on which neither side can trust the other for a fair deal in the running of the ballgame, but perhaps the only way to settle the matter is different from those prevailing in other parts of the state. Take that upcoming election; for instance. It is a pity that the candidates should be mentioned. It is a pity that it is always the "other side" that is cheating; but it is a fact that there are sometimes cheating on both sides. It is a pity that the other side is cheating.

men to feel justified in cheating. As the result fact elections are being crowded out of the country and it is difficult to suggest a remedy that would be satisfactory.

The control of municipal elections is hardly do complete even at the present time. There are too many suspicious of influences that might keep wrong-doing. Possibly an open ballot would insure an honest election, but the real reason for the fear because of the intimidation coercion to which it would be subjected. "The injuries of W. Broad Johnson, referred to in the last issue of the Enquirer, have been long being maintained in an automobile accident, were incurred while Johnson was trying to escape from a Georgia prohibition enforcement officer. He was not to be obtainable at the time. Yorkville Enquirer "went to work," but since then it appears that Johnson has been picked up by the North Holly Bridge Thieves and is now, accompanied by his wife and two five-gallon whiskey to Norfolk in a Ford touring car, and is being kept by the late Senator Lewis Johnston on information that he had been previously told to him. After being put under guard at Charlotte, the officer told to drive him in a faster car. Passing a mile or so by some woods, later, Thomas

SECRETARY SLEMP:

As a matter of course, the public will have much significance to the character of man the President should select for his secretary, and the fact that Mr. Coolidge has picked Mr. Slemp for that position is taken as indication that he wants to be guided politically with sagacity. Mr. Slemp is a member of the upper class. The fact that he is a Southerner man does not necessarily imply that the President has a republican bias. On the contrary, it might appear that his first designation as secretary of the treasury out of the tellers of the treasury

Mr. and Mrs. J. B. Mackintosh, who arrived in Chesterfield, having accompanied home Mrs. Mack Davis, has been the guest of Mrs. Mack Davis. The school reports the company in that section as very good. Mr. and Mrs. Henry Townsend of Charleston, Mrs. W. C. Cook and son, Emma, of Lancaster, controlled in recent years. It might be taken as taken of a new departure in leadership and one which may prove interesting to the old. Mr. Slump is not only a politician, but he is a man of progressive ideas in party management and he is likely to do more talking than being talked to.—Charlotte Observer.

lance, and William McDow, of South Lancaster, motored to Great Falls Monday to visit relatives and see the great hydro-electric plants. "A. J. Mack and family have moved from Heath Springs to the farm, occupying the dwelling vacated by Mrs. C. G. Skipper and family—on West Dunlap street. Mr. Marshall H. Cannon, of the H. H. Cannon company, doing business in the E. W. Sittard old store room." "P. S. Cannon, proprietor of Hotel Royal, has been in the city for some time, moving by the serious illness of his sister, Mrs. H. W. Lightfoot of that city, who had suffered a stroke of paralysis some time previous. She died about noon of the 10th day before Mr. Cannon could reach Vermont." "Stonewall community assembly assembled Wednesday afternoon at 7 o'clock, at which visited the home of Mr. and Mrs. T. T. Hilliard and took away the father of the latter. Mr. Mackey was 87 years of age. He was survived by two daughters, Mrs. W. T. Hilliard of Stonewall, and Mrs. J. Sam Bruce, of Heath Springs, and six sons: Walter W. Mackey, of Lancaster; Walter W. Mackey, of Lancaster; James A. Mackey of Anderson; Ed. F. and Rufin Mackey, of Heath Springs; and Mackey of Stonewall. Mr. Mackey had been in poor health for some time and the end was not unexpected. Funeral services were conducted at Beaver Creek church at 2 o'clock, by the Rev. Dr. Dykes.

Port Mill." John McElwain, colored, 28 years of age escaped from the custody of the Chicago Police Department on the Cuyler road at 8 a.m. Monday morning. According to the information obtained, McElwain was a member of the Chicago Police Department and was assigned to a prisoner to give him some information. McElwain, who evidently was off or in the city, was prepared himself to escape. He made a getaway and succeeded to have gone in the direction of the Cuyler road. McElwain is serving a life sentence for the killing of Ernest Lancaster, superintendent of the Lancaster County Jail, several years ago. McElwain was arrested at the scene of the killing and was not as appreciated for many years. He was arrested in Detroit, Mich., brought to Chicago and sentenced to life imprisonment at the fall term of the Chicago Police Department. The Lancaster county changing sentence was passed. The authorities have offered a reward of \$100 for the return of McElwain to the Chicago Police Department. —Lancaster News.

FRANT SWORN OUT
FOR FRANK H. BARRETT

Columbia, S. C., Aug. 12.—A warrant has been sworn out for Frank H. Barrett, of Barrett and Company, cotton factors of Augusta, Ga., neglecting to file a statement made over to him by a man named John Allen, who is charged with having stolen the warrant is said to allege fraudulent transactions in connection with the purchase of cotton. The firm recently was placed in a involuntary receivership by the court.

Barrett, Sheriff W. M. Howard, of Aiken county, when reached over long distance said he had heard Magistrate J. M. McCall, of Aiken county, say that the warrant had been issued and that the magistrate was bound to issue it to Augusta this morning to arrest the matter.

Barrett, the sheriff, Mr. Seidman said the warrant was sworn out by C. R. Lybrand of Wagner, S. C., on Aiken yesterday afternoon. Sheriff Lybrand said that while he had no connection with the warrant, it would be impossible for action to be taken should Mr. Barrett refuse to appear for the service of the warrant, until the case had been heard by the Governor Clifford Walker of Georgia. This he said, would decide the thought upon the return of the warrant to the Aiken county sheriff who is at present in the Carolina mountains.

SECRETARY SLEMP.

As a matter of course, the public attaches much significance to the character of man the President would select for his secretary, and the fact that Mr. Coolidge has picked Mr. Slemp, of Virginia, may be taken as indication that he wants to be guided politically with sagacity. Slemp is a politician of the better class. The fact that he is a Southern man does not necessarily imply that the President has a reconstructive eye on Southern Republicanism. On the contrary, it would appear that his first determination is to take his party organization out of the influences that have

rolled in recent years. It might be taken as a token of a new departure in leadership and one which will prove interesting to the old guard. Mr. Slomp is not only a politician, but he is a man of progressive ideas in party management and he is likely to do more talking than being talked to.—Charlotte Observer.

the twelve Grace aldermen were present passed a resolution, the next of which fol-

to the Texas Farm Bureau Association to assist in orderly marketing of the cotton crop in that state.

While the amount was not disclosed it is understood that it will total at least \$30,000,000 and may be substantially more, depending on the size of the crop and the market price of the production.

In America there are 1,100,000,000 people, and in the world there are 2,500,000,000 people. In America there are 1,100,000,000 people, and in the world there are 2,500,000,000 people.

RE-DISCOVERY OF RELIGION
IS SUBJECT OF AN ADDRESS

Methodist Laymen at Lake Junaluska Are Given History of the Religious Movement Since Remote Times, and Shows Why the Heathen World Points Finger of Scorn at Christianity.

Lake Junaquaka, Aug. 14.—Placing before the laymen of the E. church, South, gathered at Lake Junaquaka in conference, number 26, 1892, a paper concerning the progress of Christianity since the death of J. Stitt Wilson,* of Berkeley, Cal., himself a layman, and considered the following foremost men of the day in connection with the church along lines of Christianism: Lecturer, as well as an author and lecturer of international repute, spoke of the influence of the church and lovelessness of Christianity and built up a powerful ecclesiastical machine.

The speaker told of the reformation, following the dark ages, when people again began to rediscover the truth of the teachings of Christ, its subsequent decline and rebirth, in its rebellion against the ruthless and ungodly spirit of the church, and its return to genuine service, and its mission to the world, but striving to find again the truth and teaching of Christ. The Puritan

It is estimated that fully one thousand people at Junaluska at this time are new arrivals who have been attracted by the laymen's conference, the first to be held under the new organization of the board of lay activities. Laymen from every section of Southern Methodist territory.

The program outlined by G. L. Morelock, executive secretary, is featuring strongly the devotional services by Dr. Ernest Webb, of Austin, Texas. Dr. C. M. McConnell, specialist in rural missions, is giving a series of addresses on the problems of the country church, speaking daily at the conference.

Dr. Wilson will give a series of platform addresses on the general theme of the social teachings of Jesus every evening during the laymen's conference which closes on the evening of Wednesday.

Seek the Light. Asserting that he had selected the language of the topic of his address particularly with reference to laymen as leaders of the church, herein on the business of the kingdom and with a desire to reach into the frontiers of thought for the Kingdom of God at a trying hour in the world's history, the speaker classified his remarks into two parts. In the first, he said, men this question and seek to discover a new measure of Christ for our time and generation. The Methodist church is great and mighty spiritual machine reaching to the ends of the earth, what a marvelous thing it would be if it could be quickened to a new life because of the discovery of a new meaning to the message of Christ."

marks under the head of what he described as three somber reflections.

"If there are any people on earth," said Dr. Wilson, who are in a position to face serious considerations they are those who endure the

**EUROPE FACING
GREAT PROBLEMS**

Face to Face With Another War.
Utah Senator and Louisiana Representative. — PAUL J. BAKER

New York, Aug. 13.—A picture of Germany on the brink of revolution and of Europe face to face with another devastating war, was brought home today by Senator Reed Smoot of Utah, who went abroad at the request of the late President Harding to study conditions in Ger-

He gave as his first reason for presenting the somber side of the question the fact that people of today have lived through a period which has witnessed the most terrible thing ever seen in the history of mankind—the world war. In the

last 10 years, declared, we have put to death, 10,000,000 of our choicest youth; another 10,000,000 wounded and mutilated, and there are 30,000,000 who died in the aftermath of war in the western nations of the world; while a tragedy still hangs over Europe which may involve the civilization of the world.

Ample grounds for asking the position to pay.

Europe will be able to get along without American foodstuffs in large quantities, they added, because crops abroad, in contrast to everything else are good.

Senator Smoot said he believed it still was possible for Europe to get its house in order without a period of chaos, but he declared that un-

question whether there is need of discovering the religion of Jesus, he thought might be found in the reflection that it was not in heathendom, but in the western world of Christianity which witnessed this tragedy of death and horror and hell. If it been in a heathen world, said the speaker, we could have pointed to them and said we will send you like the nations acted soon, war would surely come.

While the chief difference between France, Germany and Great Britain appeared on the surface to be over reparations he said he suspected that beneath this lay the problem of coal.

In view of what he had seen he said, he earnestly hoped that Ameri-

ministers and missionaries and tell you how people in a land of Bibles and of Christ live.

Ground for Questioning.

The second ground for questioning, stated by Dr. Wilson, lay in the fact as presented by him that in the heathen world there are rising up thinkers and students who have come

could remain free of Europe entanglements. He did not believe, however, that entry into the world court under the reservations suggested by the late President Harding would constitute an entanglement. On the contrary he thought America could do much to aid Europe in its readjustment without herself becoming unduly involved.

to Western lands and have been highly educated. They have come to observe us and have gone back to reflect on life, and now are asking for a religion. In China they have broken down their own superstitions; in Japan there is earnest study for some form of religion that will develop character; in India there is inquiry for a religion that will teach

men show no liveli-
ness. "Now are these leaders and think-
ers boasting of us," said the speaker.
"They are saying 'We have seen your
city and civilization and if what we
see is the work of Christ, we will be
the king of Christ.' Don't you see?"
The protests against Christian
civilization coming from heathen
lands were cause for somber con-
sideration. He asserted

ported with the question of repa-
tions the center of contention.
Unless something is especially
done for relief, the present govern-
ment in Germany will fall. Every
man of event points to a revolution
before winter comes. It is the
monarchy, compulsion, communism
or a division into separate states as
it was before Bismarck.

Depicting the rise of the Christian era, which flourished only 150 years after Christ, and its decline in power.

The taking of sculpture has been a movement of art in the United States since the departure of any art work from that country unless the sale is approved by the Ministry of Fine Arts and a group of connoisseurs.

New carpets and rugs in Smyrna are given an appearance of age by the bleaching process which follows washing and scrubbing. They are hung in the sunlight on the roofs of the factories and homes of the workers.

FOUND DEAD IN HOTEL

Mr. Harry B. Ferguson, Traveling Salesman, Found Dead in Carolina Inn Wednesday Afternoon—Died From Natural Causes.

Mr. Harry B. Ferguson, a traveling salesman, representing the Block Wagon Manufacturing Company, of Atlanta, Georgia, was found dead in the Carolina Inn, in Chester, Wednesday afternoon shortly after six o'clock.

One of the maids at the hotel reported to Mr. W. N. (Doc) Smith, one of the hotel clerks, shortly after six o'clock Wednesday afternoon that she was unable to get into room No. 1 to clean it up. Mr. Smith referred to his register and found that according to same the room was occupied by Mr. Harry B. Ferguson, of Atlanta, Georgia. He went up to the room and looked through a window and from appearances came to the conclusion that the occupant was dead. Mr. Smith returned to the lobby and asked Mr. Robert Fraser, of Chester, to accompany him back to the room. They, with one of the hotel waiters, returned and the waiter going through the window opened the door to the room, which had been locked on the inside.

Messrs. Smith and Fraser entered and found that Mr. Ferguson was dead. Coroner J. Henry Gladden was immediately notified and upon reporting had Dr. W. B. Cox make an examination of the body. Dr. Cox stated that Mr. Ferguson died from natural causes. Several bottles of medicine found in the room would indicate that Mr. Ferguson had been taking medicine for indigestion.

Mr. Ferguson retired Tuesday night and nothing had been seen or heard of him from that time until his body was found Wednesday afternoon.

Those who viewed the body and the room state that there was no evidence of disarrangement in the room and from the expression of the dead man's face it was evident that he died without pain, possibly during his sleep. Apparently Mr. Ferguson was thirty or thirty-five years of age.

The first for which he was traveling, in Atlanta, was notified and message from them advised the authorities to ship the body to Atlanta. Nothing of the man's family connection is known in Chester.

Coroner Gladden empaneled a jury, of which Captain R. G. Mills, was foreman, and yesterday morning the witnesses were heard and after which the jury rendered a verdict to the effect that Mr. Ferguson died from natural causes.

ELECTION VERY QUIET.
Hon. R. O. Atkinson Elected to House of Representatives Over Two Opponents—Election Very Tame.

In a very quiet election for a Representative to serve in the House to fill the unexpired term of Captain J. Lyles Glenn, who was appointed Senator, Hon. R. O. Atkinson was elected last Tuesday over two opponents, Major Jas. S. McKewen and Mr. S. A. Rodman.

Only 329 votes were cast in the entire county, Mr. Atkinson receiving 222 of them.

The vote by precincts was as follows:

Precinct	Atkin-	Mc-	Rod-
	son	Known	Man
Baton Rouge	9	1	6
Wilksburg	6	10	1
Great Falls	39	8	4
Carter's	15	8	7

90 PER CENT. BAD CHECKS GO TO PAY FOR "GAS"

Greenville automobile owners and drivers are going to ride whether they are able to pay for gasoline and oil or not.

This was the conclusion drawn Saturday afternoon by City Magistrate George W. Batson, as he issued some half a score of warrants charging various local persons with issuing worthless checks to filling stations.

"I have never seen such a condition in my life as exists right here in Greenville," said the magistrate. "At least 90 per cent. of all bad check warrants I write are made out to some filling or service station."

"People seem to be determined to ride on and on whether they can honestly pay for the gasoline and oil they use or not, they are going to ride."

"Well, high all the bogus checks which are brought in into this office are made out to filling stations and are for amounts ranging from \$1.50 to \$10."

"I have written 30 bogus check warrants thus far in August. Of that number 27 are made out to gasoline service stations and call for small amounts such as would be paid for a tank full of gasoline and a quart or half gallon of oil."—Green-

"The Quality Food Store"

when you use too much Choke

FOR more than two generations our development and manufacturing men have been in hourly quest of the finest lubricants for every purpose. For twenty years the great field of motor car lubrication has multiplied their experience by an astounding variety of new problems promptly and successfully met.

Your dash choke, for example. So long as you leave it out you pour raw gasoline down your cylinder walls, washing off the oil, leaving surfaces unprotected, diluting the oil in your crank case. Our experience is that it's better to replace the choke promptly, let the motor rest an instant while the "gas" vaporizes, then use the starter again. Don't keep on grinding with the choker out!

Polarine is a prime-quality motor oil developed by long, practical experience to resist dilution. With reasonable care on your part you can trust it for perfect lubrication.

WE ARE A PART OF IT THE GREAT BUNDLE OF LIFE

By Dr. W. R. M. Jones

"Every man for himself" is the motto of selfish people. But the social standard is: "Every man for himself and no man dead to himself." Let each strive to be better than himself. After all, if we do or do not believe that the Bible is the Word of God, and its precepts are all profitable, we must acknowledge that the above code is a practical rule of life for all men. Light social values. Each one of us is a part of the great bundle of life, and we are, more or less, dependent upon another.

If it is true, beyond controversy, that the youth of any community are quite apt to be the crown upon the pack, if the men are vicious, vain, egotistical, live without the incentive of high aims, if they are loafing, busy-bodies, bores, shiftless, indifferent, the boys will grow up to become such things. As with older generations, the men are an old story and a true one. Infinitely more apt to be a hundred times worse than the boys. What the boys are, the men are. The boys are also, and women and girls. The example set by the youth of the community will largely determine the character of the women will be.

The kind of life each man and woman lives, makes of the character of the youth of the community.

Applying the above rule to civic life, we may say that the leaders of the community are largely responsible for the moral standing of the community. Beginning with the church, we may safely assert that the character of the church largely determines the character of the community.

Then take the business men of a community, more than a little depends upon them in the training of younger generations in common honesty, probity and real character.

Community merchants will often allow their stores to become the rendezvous of all sorts of people, where all in its worst form is indulged, and often evil projects are hatched out. Young men are nearly always found among the loafers, and the things heard by them are added to their stock of knowledge, and eventually prove some young fellows undying.

There are the town or city officials. No man has a right to be in authority, any kind of civic authority, who is not respected for his probity, and upon whose character the community can depend to live right himself, and make it possible for others to do the same.

Every man in the employ of the city should be a law-abiding citizen himself, and be known to be morally clean.

It is certainly a sight that would make angels weep, to behold men undertaking to enforce laws that they themselves are known to be breakers of.

More than they imagine, office holders in this and every other community, are responsible for the good or bad of a community, and for the standards maintained before the young people.

What right has a boogie sympathizer at a council board when there is a law in the land that makes the manufacture, sale and possession of booze a crime? Will such a man do his duty? Will he respect his community from criminals?

What right have the voters of the city to hand their money, their community to hand their lives over to men who will betray their trust, and for gain or lust or favor will sell them out?

"Be not deceived, whatsoever a man sows that shall he also reap." Reading this is a warning. We have need of good men, and the kind of seed that is sown, if our young people are left, mostly to the influence of evil or moral indifference, the crop will be "corruption."

LEARN TO FIND OUT WHAT ALIENS YOUR CAR

By Dr. W. R. M. Jones

The average motorist, who cannot make his car repair in life, can successfully, often can detect trouble early and cut down the labor charge for repairs by having some idea what is wrong when the facts his car to a mechanic.

One of the first tricks to learn in "diagnosis" is to turn the motor over slowly by hand with the crank turned. The compression should be about equal on all cylinders. A weak resistance on one cylinder often indicates a deep scum in the wall of the cylinder. The faint hiss of escaping gas some times can be detected.

A crack in a cylinder which does not show in-leakure road test, is detected when the crank case is drained by the presence of water in it from the radiator. Water should be forced out a steady stream.

For checking the crank case, a simple device is used. The car is driven with the wheel jacked up and in gear. The wheel should show a slight five or six inches play. The car is then driven in and out of the axle to show wheel bearing loose, wheel. The wheel is then jacked up and the car is driven in and out of the axle to show wheel bearing loose, wheel.

With one rear wheel jacked up and the brake set, the motor may be run with the car in gear to check whether the whole run true. If the crank case is cracked, it will be detected when the crank case is drained by the presence of water in it from the radiator. Water should be forced out a steady stream.

Oil sampling, tested by leaving the car running, is detected by the fouling of spark plugs with a gunny can deposit or excessive carbon build up on the combustion chambers.

An excessive noise at the front of the car indicates worn or badly adjusted timing gears.

After the water has been run long enough in the cooling system, it becomes warm, feel the radiator for cold spots. They show the circulation of the water. The water should be replaced if the stoppage is great enough to cause the engine to overheat. The pump may be tested by removing the upper hose, connect with the pump appears to run erratically, while the lower hose is on the rim.

Indicates a bent axle or a sprung spring. Differential noise to the side, and the wheels on parts or out of adjustment usually can be heard when the car is run with one rear wheel on the ground.

With both rear wheels spinning, the rear of the car is on a badly worn spring and tire. Gear usually are evident by their sound. Front wheels, of course, may be turned rapidly while jacked up to detect looseness. Move in and out of the axle to show wheel bearing loose, wheel.

When the point is pressed down, the clutch should disengage quickly. Failure to do so indicates the clutch brake is badly worn or poorly adjusted. "Grabbing" or slipping on hills because of worn clutch is evident to experienced drivers.

Brake bands too tight on one side will cause a pull on that side which sometimes slides the wheel while the other turns freely.

No other or mother lives to themselves. No church member lives to himself. No city official lives to himself. No voter lives to himself. No one could all have it said of all "He liveth unto the Lord."

One of the worst insect pests that ever got into this country is the Japanese beetle. It feeds on grass and on the leaves of fruit trees, vines and cornstems and is spreading very rapidly. In certain sections the beetles have grown so dense that they have been known to have the appearance of being over-whelmed with bee swarms. They are a brilliant iridescent bronze green in color. They came in with some imported Japanese lilies.

Forty-three million dollars was lost in 1922 through alteration of checks.

Young Sumter Man Shot Dead in Room

R. Edgar Blackwell Dies From Bullet Wound, Probably Self Inflicted.

Sumter, Aug. 14.—R. Edgar Blackwell, bookkeeper at the Edgar National bank of Sumter, was found shot dead in his room at the Y. M. C. A. from a bullet fired into his head.

Blackwell was found lying on his back, between 5 and 6 o'clock this afternoon. His body was found by the negro janitor shortly after 6 o'clock when he entered the room to fill in fresh towels.

The body was carried over to Governor Seale, who had it taken to a local undertaking establishment, where it was viewed tonight by a jury. The janitor will be held some time to-morrow.

Blackwell it is stated was dependent for several days over some love affair, and it is thought that he took his own life for this reason.

He was a young man about 27, of quiet and friendly demeanor. He has made Sumter his home for six or seven years being employed by the First National bank for the past four years, where he was considered a valuable man and a faithful worker.

His father and mother are both dead. He was married to Miss Mary Ellen Blackwell, living in Sumter and one brother, W. J. Blackwell, formerly lived here.

Don't Visit With Busy Man

Experience of Colonel Waters With President Harrison Right Well Act as Warning.

We once heard a busy man say he wouldn't waste time to see his "long-lost" brother. Another brother, however, there hangs a tale. There hangs a tale.

Colonel Waters was a member of the United States. Colonel Waters became one of the west's distinguished lawyers. One time Waters went to Washington on business and there decided that it would be an act of discourtesy "if he didn't go up and call on his old army pal, President Harrison, then in the White House. So he made himself known to the president's secretary. "Walk right in," said the secretary. "The president is at his desk alone right now." Waters walked in. President Harrison had just come down to his desk and did not know of his old army pal's visit. The colonel started right to attract the president's attention. This didn't bring results. Then he coughed. Whereupon President Harrison looked up and said, "What do you want here?" "Not a thing," retorted Waters, as he turned on his heels and walked out.

Creative Reading

By Dr. W. R. M. Jones

I would insist, with all the emphasis at my command, that one of the great needs today is creative reading. This need has steadily become greater in proportion as the people of the world have inclined to democratic principles of government.

For, clearly, democracy to be successful requires not merely a enlightened leadership but clarity and soundness of thinking by the general population. In the absence of such thinking, there always will be a chaotic leadership by the enlightened may come to be despised, blatant demagogues be given power, and social experiments tried of disastrous possibilities.

And to insure clarity and soundness of thinking there is nothing more necessary than what I would call creative reading.

By this I mean the attentive and interested reading of books, articles and editorially selected book reviews, and to make use of it, I do not believe to add should be regarded as a moral obligation on the part of all who believe in government of the people by the people.

It is not enough, all is not regarded by the community?

Ask any book dealer and you will quickly learn that the reading man is not only the patron of the book but the patron of the publisher, the printer, the distributor, the bookseller, the library, the school, the church, the club, the community, the nation, the world.

For every street car reader, reading the editorial page of a newspaper you will find 50 absorbed in the sporting page. They are likely to discover that, in about the same proportion, readers of light fiction dominate over readers of "serious" books during railway journeys.

How do things stand with your self? Do you make it a point to do some creative reading, reading that will invigorate your mind and the better enable you to meet your responsibilities as a member of a self-governing society?

If you do not—if your reading habits are as those of the mass of your neighbors—you will do well to question yourself sharply with regard to the degree of your personal fitness for governmental service and defects of responsibility which you may have been guilty of committing.

That government, so far as it has been established through your opinions and your vote, is of your own making. If it is to be changed for the better, the change can be effected only as a result of your thinking by you and your fellow voters. To gain the better thinking creative reading is indispensable.

But, you perhaps protest, it is impossible to persuade people in general to do creative reading, for "they" and the people will have no creative reading means, "dry" reading of that.

To which my only answer is that they must have some of it if democracy is to endure, and they must have a great deal of it if democracy is not simply to endure, but to come anywhere near realizing its aspirations.

Immigration to America

By Dr. W. R. M. Jones

Strict enforcement in the future of the law against steamship companies which bring to the United States emigrants in excess of the monthly quota allowed by the 2 per cent restrictive act was announced by W. W. Hubbard, Commissioner of Immigration, as the fixed policy of the government. In no other way, said the commissioner, can the flow of immigrants to this country be controlled under the law.

Despite heavy financial penalties by the law, steamship companies, thought at excess of emigrants in the rush incident to the opening on July 1 of new yearly quotas. The last monthly quotas of emigrants, countries were exhausted the first eleven days. The movement to America is still high and immigration officials have resorted to strict law enforcement as the only solution.

For each person in excess of the monthly quota his country brought to the United States, the steamship company bringing him may be fined \$200. In addition to this, the company is required to pay the return passage of the person arriving. In case of the Baltic, which brought 400 Scotch Irish and British subjects, the fines would have amounted to \$80,000 if the government had not yielded and permitted entry.

Great Britain and Ireland sent 14,036 emigrants to America during the first eleven days of this month, despite efforts of the British government to discourage emigration. Recent arrivals raised the number beyond the monthly quota and Commissioner Hubbard was summoned to Ellis Island to handle the unusual situation.

Germany and Austria are the usual countries which are not using up available allotments—Savannah Press.

Tulsa, Okla., Mayor Will Have Policemen Anyway

By Dr. W. R. M. Jones

Tulsa, Okla., Aug. 15.—Declaring that the military cannot supersede civil authority while conditions are as they now exist, Mayor H. H. Newhook issued a statement here today asserting that the civil authorities of Tulsa will continue to function as though martial law had never been imposed.

The governor, insisted martial law as a result of flooding out of Tulsa.

The mayor intimated, however, that since the military rule so far has been on an extremely "limited basis," the city government, including the police, will continue to cooperate with the military authorities.

David Starr Jordan, president emeritus of Leland Stanford Junior University, said: "The base of higher education is the desire to substitute system and drill for inspiration, to develop methods and standards in place of intellect. The university, as such, does not 'give' opinions, but means to form them."

Your car and motor are balanced—the fuel should be, too

PRACTICALLY all the development and improvement in cars and in motors have been in the direction of finer and still finer balancing of parts, weights and stresses—to obtain greater and still greater flexibility. It is only natural that some car makers have succeeded better than others in their effort to produce a really balanced motor fuel.

Most gasolines today give you more flexible and versatile power than they did a few years ago. Here, too, it is natural that some refiners have succeeded better than others in their effort to produce a really balanced motor fuel.

There's a long story of refining experience and study behind "Standard," the balanced gasoline. It is the logical fuel for any finely balanced motor. It gives you everything you need in a motor fuel. Stick to "Standard"—the all-round, balanced gasoline.
