Cotton Men Honor Mrs. Springs.

At the fall meeting of the North Carolina Cotton Manufacturers' association held last Friday and Saturday at Pinehart, N. C., an interesting event of the meeting was the presentation by President Paterson of Mrs. Leroy Springs of Lancaster. Mr. Paterson said that the association was the only one in America that could claim the distinction of entertaining the only woman in the country who had been nominated for vice-pres-

dent of the United States. Whereupon a motion was made and unanimously adopted electing Mrs. Springs an honorary life member of the cotton association.

Profers Piedmont Section.

A well known and influential business man was talking of Florida and during the conversation said: "Yes, Florida is booming and Florida is a great winter playground but all of us people aren't afraid to go to Florida every winter and spend our time. We have to work, all of us, in some such financial shape that we can spend months away from our places of business and stop at expensive hotels or own high-priced winter homes."

"When it comes to twelve months in the year I certainly prefer the Piedmont section, where the weather bureau records show we have the finest climate in the United States when the entire months of the year is considered."

"Recall the storm in Florida a few days ago in which much property and life was lost. The Piedmont is so geographically situated, with the mountains on the west, that a storm of the nature of the one in Florida is, indeed, a rare thing."

Chesterites interested.

A number of Chester people who own stock in the Georgia-Alabama Power Company will be interested in the following clipped from an Atlanta newspaper:

Application of the South Georgia Power company for authority to finance the acquisition of light and power plant at Albany and officers will be heard on December 15. It was announced at the office of the Georgia public service commission Tuesday. The company was chartered recently

in Dougherty county. The corporation asks authority to issue 30,000 shares of nonpar stock that will be sold at \$25 per share to issue \$750,000 in five-year notes, to assume \$750,000 in bonds of the Georgia-Alabama Power Company, and to assume \$239,900 in bonds of the American Lighting company.

The application was signed by R. M. Harding, of Columbus; H. W. Patterson, of Albany; and A. A. Lawrence, of Savannah.

More Rain Needed by Plants.

A statement given out by officials of the Southern Power Company in Charlotte with reference to the various power plants operated by this company, says: "Not enough rains have fallen to warrant a reduction in the one-day curtailment of power in force for some time; it was indicated in a statement from the general offices of the Southern Power Company, Wednesday

A HARD LIFE.

One day a farmer, says The Country Gentleman, went to the county fair and his hard-working wife remained at home to see that the farm suffered no loss during his absence. He returned about dark and coming out on the porch he inquired: "I'm about tired out, Mary. Is the cows in the barn?"

"Yes, long since," replied the

There is considerable more water in the rivers now as the result of recent rains, yet the levels in various lakes, behind hydro-electric dams, are not sufficient to produce the proper heads for the full-time operation of the power plants. It was explained. Within the last few weeks, the program of curtailment has been reduced from one and a half days a week to just one day but at present there is no promise that the day's suspension of power can be revoked until more rain falls.

Wife.

"Is the horses unharnessed and fed?" "Yes." "Tows locked up?" "Wood chopped for mornin'?" "Yes." "Be them docks plucked and dressed for market?" "Yes." "Wagon wheel mended and ready to start in hauling wood to-morrow mornin'?" "Yes." "Well, then," he concluded with a sigh of relief, "let me have my supper, Mary, and I'll turn in. Farmin' is beginnin' to tell on me."
