Winthrop Places Second At ASU Tourney

by Susan Roberts

At the Appalachian State Volleyball Tournament October 29 and 30, Winthrop defeated four of six opponents. WC placed second overall and in its pool, defeating East Carolina 7-15, 15-8, 15-10, in the semifinal stage of competition. Scoring was distributed among several of the WC players.

Last Tuesday was the final match of the season against Francis Marion and Presbyterian College. Results were not available at press time.

Winthrop will enter post season play, the state volleyball tournament at Francis Marion, November 12-13. Then WC will participate in the regional volleyball tournament at East Tennessee State University, November 19-20.

### DPB Holds Talent Show

by Joey Raad

Can you sing, dance, play the guitar, tell jokes, stand on your head or eat raw eggs? Well if you’re blessed with these or any other special talents, here’s your chance to become a star.

Beginning tonight, Diskin Program Board is sponsoring an on campus talent show at ATS starting at 8:00. The first three days of competition will be devoted to preliminary rounds with winners being chosen each night. These winners will then compete for prizes on Thursday.

Also at Diskins this week:

**Tuesday.** The Great Gatsby, starring Robert Redford, will be shown in Tillman Auditorium at 8:00 p.m. Admission is 25c with a WC I.D. and 50c for guests.

**On Sunday, the cinema series production. Great Expectations, will be shown in Tillman at 8:00 p.m. Admission is 25c with a WC I.D. and $1.00 for guests.**

### Hot Questions?

Academic Affairs, a committee of the Student Government Association, is conducting an Academic Hot Line Mondays through Thursdays from 7 to 8 p.m. Questions or complaints concerning any aspect of academics will be answered. Suggestions and referrals may follow each answer. The Hot Line number is 2179.

### Outing Club Wins Banner Competition

by Mary Thomas

The Outing Club won Friday’s Soccer Fest competition with a banner featuring a repelling mountain climber being attacked by an eagle with soccer balls in the eagle’s nest, under the slogan, “Pommel the Patriots.”

Club President, Diane Meyers, was presented with a silver engraved plaque at the dance Friday night in McBryde by Robin Keels, chairman of the Soccer Fest Committee. Dan Luchebro, who worked on the banner, said they tried to come up with something involving the Outing Club and “what we do.” Urchler said the banner was a “group effort” and that it took two days to complete.

Mark Hasty, Bev McCalla, Deborah Dutton, Gary Roberts, and Priscilla Gullgray also worked on the banner, in a second floor study room in East Thompson.

Urchler said he felt they had won during the competition, but “that’s natural.” “If I had been in any of the other clubs, I’m sure I would’ve felt the same way.”

Banners were judged for color, creativity, balance, originality, and relation to the Winthrop Eagle theme by four faculty members: Dr. Gary Stone, Mr. Joseph Osborne, Mrs. Sara Pettana, and Dr. Arnold Shattuck. A scale of thirty-five points was used.

Alpha Epsilon Echo, Alpha Chi Tou, Diskins Program Board, the Outing Club, Phi Upsilon, Sigma Gamma Nu, and Winhecon participated in the half-time competition, presenting their banners before the judges and marching them around the field.

"A long, long time ago, but I can still smell and see it. What a weird world... Think back to the the dark ages of teenage terrorism, when the youth furlinth the U.S. was thrown under the collective title, "motor heads", Ah, what an unkind word that was about alive. Today's street life is pretty mundane in comparison to that of the late 1970's. Students were using their machines for speed and "wet-your-pants" styling.

Look back over your shoulder to an exciting time. Everyone who owned a car was affected. There were groups of high school students who did nothing more than go around the neighborhood putting STP stickers on older people's cars, just to indoctrinate them to the whole speed movement. (Today, the speed movement means something far more interesting, from a set of fat tires and loud mufflers.) In the 60's, auto makers were putting out more and more cars which would break your neck every time the clutch was engaged, (even when the clutch was disengaged) and would keep you coughing up your front teeth from where they had lodged themselves in your throat and looking through your rearview mirror, praying to the 'God of Grease' for some record length black marks as you passed someone.

Yes, those were the days. Psychiatrists had a field day, writing up case after case of pla

Letters To The Editor

Don't Kid Yourself

AMThir Holder

Are you sick? Really now—don't kid yourself. Your roommate is sneezing and coughing all over your stuff... (What? You don't have a roommate? Well, I can think of better ways to catch little germs...). Anyway, the point is, Winthrop is maintaining its reputation as the home of the Provoke Class (also known as Prolonged Cold Feet, but that is a problem of a different horse.)

The Cold, in and of itself, may be quite beneficial in terms of laying out of classes, obtaining sympathy and crude jokes, etc. HOWEVER, there are certain disadvantages. For instance, remember the time that you finally got the chance to see your favorite member of the opposite sex—and you sneezed in his/her face! Or remember the time you had a runny nose in Botany and had to blow your nose on a piece of your classmate's shirt. Ah well, so it goes...until today.

For the first time ever, I, an undergraduate doctor of psychology, will offer to you, free of charge, any age-old-cure-all of the ailment of the Prolonged Cold. (gee)

To the Editor:

Sometimes I wonder if the senators of Winthrop College realize that they are supposed to represent the students. They also need to be aware of the decisions that are being made in the Senate.

The first step one must follow is gorging in warm salt-water every time a nationalist comes. This will soon grow to be an obsessive-compulsive reaction as one discovers that the taste is quite similar to that of an alcoholic beverage in that it warms the throat as it finds its way to your little tum.

And now is time for the proverbial apple a day, but the secret here is that one must consume the CORE. Now many people will tell you that the seeds are poisonous; the seeds are only poisonous when one is healthy and same—for what other reason do you find only sick people eating apple seeds?

Thirdly, one must EAT at every opportunity. Senate has passed a bill changing evening "loud hours" to 9-10 p.m. Sure, I remember this in the last issue last but I'm sure that many of the freshmen and their seniors are, expectantly, that such a bill was considered, and they are just as much a part of the prostitution as the "old folks." Many of the freshmen in this bill do not have time to inform the students. But why can't we at least tell the R.A.'s? I have a close friend who is a B.A.; she found out that an open dorm plan could not be changed by unanimous vote only after several floors her dormates were to do. When she finally found out, several weeks of school had passed. And when she was being changed, she found out the same way I did—TI.J. She has no idea how this new role goes into effect.

Last year's Senate was more effective of the Johnsmans, I noticed an article stating that they would be doing a bill changing evening "loud hours" to 9-10 p.m. Sure, I remember this in the last issue last but I'm sure that many of the freshmen and their seniors are, expectantly, that such a bill was considered, and they are just as much a part of the prostitution as the "old folks." Personal Lifestyle

Hunger At Home And Abroad-Part III

by Faye Williams

Have you affected world hunger today? The answer is YES! and most likely in some unrecognized yet positive ways. Did you skip a meal to sleep an extra hour? Or walk to class because your car was parked across campus? These may have been almost unconscious actions, but reduction of any type of energy consumption will in turn allow for availability of energies to produce food for others. As we realize what a strong influence we have through our own personal lifestyle, the possibilities increase and we can begin to see the importance of being aware of what we eat, conserving fuel, and knowing how much this effects us. One person is "guilty," she said, "of the platitudinous sphere of the platitudinous sphere."

In order to make use of our lifestyle priorities of human welfare, it is our responsibility. Reducing consumption for everyone. There are several aspects of each of our lives which have a positive influence on reducing our consumption and as a result allowing for more equal distribution of food. Realizing what influence we have can motivate further commitment. Reducing consumption of meat can be economically wise and frees some of the tremendous quantities of grain used as feed for cattle. The amount of grain used in producing the average cow by one average American is equal to the amount of grain which feeds five persons in India. Riding a bike or walking rather than driving a car two blocks can be an easy and effective way to reduce waste of fuel.

Beyond recognition that our personal lifestyle can reduce consumption and free grains and other foods to be more adequately used is the question of how we insure that once all of this grain is made available, it will be fairly distributed. This is where the importance of government policy arises. In order to make use of what we conserve, government policies must be directed toward priorities of human welfare. It seems that often the government is as far removed from our lives as hunger can be, but we do affect government policies also. Organizations such as Bread for the World and Impact help to summarize legislation focused on hunger issues and point out current bills which need support in order to create fair distribution of foods we make available by conserving in our own lives. The first step is realizing that our lives cause or prevent food availability and distribution. Then we can increase our effectiveness through a simplified and satisfying lifestyle.

Amelia Earhart At Winthrop?

by Debbie Mollycheck

Eighteen months before mysteriously disappearing over the Pacific Ocean, the famous aviatrix and author, Amelia Earhart, spoke here on women and "Aviation Adventures."

"A woman," Ms. Earhart said while speaking to Winthrop students in 1936, "should act now. And another thing, Ms. Earhart continues, it gives a man an opportunity to see how it feels to stay at home and wait.

During July 1937, while endeavoring to circumnavigate the globe Ms. Earhart was lost while diving near Howland Island creating a mystery that today is still unsolved. Before this tragedy, Ms. Earhart, in 1928, had become the first woman to fly across the Pacific. There have been several reports that the two had been executed by the Japanese to prevent disclosure of Japan's fortifications.

Mr. Earhart was only a passenger with two male pilots who did the actual flying. After the plane made the crossing, it has been reported that Ms. Earhart said the flight was a wonderful experience, "but all too fast.

I did was lie on the floor of the fuselage and take pictures of the clouds. I was just beaming, like a sack of potatoes. Maybe someday I'll try it alone."

Four years later Ms. Earhart became the first woman to solo the Atlantic.

The flyer, who had her first lesson at 22, told her Winthrop audience that some saw fit to exploit the tragedy. Ms. Earhart, in 1928, had become the first woman to fly successfully across the Atlantic.

Amelia Earhart was only 35 at the time of her disappearance, and her solo flight became the subject of much comment and speculation. Ms. Earhart was only 35 at the time of her disappearance, and her solo flight became the subject of much comment and speculation.
Winthrop's traditional "Halloween Happening" took place October 21 at Dinkins Student Center. The "happening" is the concentrated effort of student organizations to provide a good time for all. The organizations provide entertainment ranging from pie throwing to having one's love life rated.

Kids and adults alike shared the evening. Santa Claus appeared, receiving many requests for a "Steve Austin doll". Frankenstein roamed about as Snow White and Seven Dwarfs observed the "happening". The Drama Club provided make-up for those people not already disguised. needling a clean-up job after being smashed with the pies were members of the Senior Order and various professors who participated in the Outing Club Pie Throw.

Mr. Phil A. Wood said, "It's more fun than you suspect," in reference to the Outing Club Pie Throw.

While "Little Rascals" movies were shown downstairs at Dinkins, two talent shows and a fashion show were held on the second floor. The Association of the Ebonites talent show included several serious monologues accompanied by music and dance routines. The Sigma Gamma Nu talent show presented songs, dances, and humorous skits.

Sigma Gamma Nu also presented Penney Awards. One such award went to Pat Sutton for her Outstanding Contribution to the Field of Physical Education Through the Realm of Secretarial Endeavors while at Winthrop. The latest styles in the fashion world were modeled at the Association of the Ebonites Fashion Show.

Prior to the costume contest at 9:00, Geno the Clown, accompanied by his pet rubber chicken, amused the audience by eating fire, juggling, and performing rope tricks. After Geno's performance, all contestants competing in the costume contest formed a line and were introduced by Geno. When the parading was over, six finalists...
had been selected: Jeannie Bates, The Man Without a Face; Lisa Jaret, The Devil; Beth Mackey, and Cindy Jacobs, The Match; Debra Herrin and Suey Stith, The Nurse and The Old Lady; Craig Faris, Frankenstein; and Kim Davis' Afghan hound Sebaka, The Frenchman. The winners, Beth Mackey and Cindy Jacobs, won gift certificates to the Record Cellar.

Interviewing various people among the crowd and playing the latest hits, WCRO radio broadcast live from Dinkins. In conjunction with WCRO, Alpha Epsilon Rho raffled record albums and t-shirts. The International Club served foreign foods and held a chop stick game. The

Winthrop Computer Society sold computer printouts, as well as hot chocolate and donuts. Since plants are always popular items, Tri Beta sponsored a plant sale.

Sweating originally, Winhecon sponsored a "paint your own rock" contest. Phi U sponsored a "Color Wheel of Fortune" and Zeta Alpha a dart game. Another such game was the water bowl coin toss, sponsored by the Heritage Club. Dinkins also held a jelly bean contest. Jane Ashworth won a $10 gift certificate to the college store by guessing the closest amount (3296) to the correct amount (3077) of jelly beans. The Council of Exceptional Children (CEC) held a contest to guess the amount of candy held in a pumpkin.

Dressed in various costumes, members of Alpha Rho Tau sold balloons. Dinkins Program Board sponsored a "Halloween Hurdle Race". Selling food and drink were: Beta Alpha-candied apples; Kappa Delta Pi-cupcakes and candy; Baptist Campus Ministry-hot dogs; Social Work Cub Scots; Lutheran Student Center-baked goods. Members of Alpha Mu Omega were thoroughly washed as they sponsored a water balloon contest.

Tom Webb was pleased by the success of the "Halloween Happening". "We had fewer organizations with booths, but had more participants this year than ever before."

**Eagles Tie FMC**

Playing before the largest crowd of spectators they have had all season, the Eagles ended the 1976 soccer season, tying Francis Marion 2-2, on a Soccer Fest Friday, at the Winthrop College farm.

The Eagles wasted no time penetrating the FMC defense, as Frankie Griffin scored forty-five seconds into the first half on an assist by Marion Whaley. Thirteen minutes later, the Eagles added to their lead when Mitch Long passed to Marion Whaley, giving the Eagles a 2-0 lead.

Francis Marion began to control the tempo of the game late in the first half and scored with nineteen minutes left in the half on a goal by Langston. FMC hammered away at the Winthrop defense and finally tied the score on a freak goal when a Winthrop player tried to deflect a shot on goal only to score for the opposition.

The Eagles played FMC head to head for the remaining regulation time and forced the game into an overtime period, but neither team could produce a winning goal. Final score 2-2.

The FMC was the final game of college competition for several Winthrop players, including team captain Jeff Breazeale, Dave Gill, Alexander Bertha and Van Voravarn.

**Hockey Season Comes To An End...**

The field hockey team ended its 1976 season last Monday with a 7-3-3 record. They upset undefeated Davidson 3-0. Good stick maneuvering enabled Pat Bailey, Penny Bostain, and Diane Strickland to score the three Winthrop goals. At the end of the first half, Winthrop led 2-0. Tanner led the Davidson attack but could not penetrate the Eagle's tough defense.

Maeberta Bobb praised her team as "the best I've ever had." She commented on the degree of skill and play of the other teams they've faced. "We've had tough competition this season. This year our team was well-balanced, whereas, in the past we've been strong and weak players."

Joanne Baines maneuvered for Winthrop (photo by Jan Pierce)

**Volleyball Action**

Intramural volleyball gets underway tonight in Peabody and Withers gym. Leagues include men's, women's, and coed teams.

In intramural rules, there is a 15 player limit, with only eight PEMS allowed on each team roster. And only two volleyball club team members are allowed on a team. Two nonmajors must be on the floor at all times. At press time the volleyball schedule was not available.
