Public Forum Slated For Wed.

The Rules and Regulations committee of the Student Government Association has finalized plans for a Public Forum to be held on Wednesday, March 29 at 8:00 p.m. in Dickens Auditorium. The forum will bring top administration face-to-face with concerned students for a question-and-answer session covering on four major areas of concern to Winthrop students and faculty.

"The forum is an attempt on the part of the SGA to cut down the barriers between us to give students a chance to air their grips and give students a chance to get an immediate answer to their questions, if that answer is available," said Dale Dow, Vice-President. The four major areas of discussion will be the changing wine and beer policy on campus, the proposal to seek state funding to lower Oakland Ave., the proposed policy on parking lots, and the future of the inter-collegiate sports program.

"These are the really crucial issues," said another spokesman, the president of the committee. "We want to bring students and administration together in a public hearing type atmosphere. A lot of people have misconceptions that the forum will, hopefully, clear up.

The Winthrop administrators scheduled to be present for the forum are President Vall, Dr. Mary T. Littlejohn, Dean Dr. Gibson, Associate Dean Dick Cunningham, Tom Webb and Athletic Director, Nield Gordon.

Questions will not be limited to only those four issues. The sessions will be open to the entire student body.

Special Traffic Report

BY SULA SMITH

A special meeting was attended March 10 to discuss traffic recommendations by President Vall and Assistant to the President; Dale Dow, Vice-President of SGA; and Assistant to the Chairman of the Traffic Committee.

We went through the Senate Traffic report and got recommendations from President Vall and Drennan," said Dow. "The college has no authority for Oakland Ave. and the surrounding area. We are to meet with Rock Hill City officials on Friday, March 24, myself, Dave Oppen, Dr. F. Brownley, Provost for President Vall will attend the meeting," he said. "We're trying to get the city to enforce slower traffic and install red lights at important intersections. We'd also like to see no right turn on red signs at those intersections and better utilization of crosswalks.

One important issue to be discussed at the meeting is making Oakland safer for pedestrians.

"Dr. Vall is not going after the lowering of Oakland," Dow said. "Instead we want to make drivers more aware of the pedestrians so they'll be more careful.

"A lot of traffic recommendations were made for the crosswalks which we'll act on pretty soon. We're going to put out visual signs reminding drivers of the 20 mph speed limit on campus. Security is going to bring out their radar, and the speed limit will be strictly enforced," Dow said. "We're going to have better maintenance of crosswalks and will even repaint a few of them. The walks that are present now were constructed before the student center was built, and students' walking patterns have changed.

Improper parking violations have proven to be a big problem on campus. Dow said, "One suggestion by the administration, which I agree with, is to have a student police force to handle non-moving violations. We may also give R.A.'s the authority to call for the tow trucks when necessary. These are just ideas for now.

As for the parking lots, Dow said, "There is a possibility of more parking lots being paved. We want to get state funding for that and do it as economically as possible."

A few of the Traffic Committee's recommendations have been acted on. They suggested that the one-way direction of traffic at the farm be reversed. This was done over spring break. In addition, the entrances and exits of the Summer Rd. parking lot have been changed to allow for a two-way flow of traffic. This will be more effective once the lot is paved.

East Meets West

BY RALPH JOHNSON

Because of the recent increase in student enrollment, the Housing Office has been forced to make changes in the residence halls for the coming year. Earlier in the semester, the Student Government Association appointed a Housing Committee to investigate current housing problems and to make suggestions to the Housing Office about possible solutions to the situation.

The Committee arrived at the following solutions which were accepted by the Housing Office: Freshmen women will be housed in Wofford, two floors of Richmond, Margaret Nance and Benner Annex. Presumably enrolled women students will be housed in Richmond, Finley, Phelps, Phelps Annex, Margaret, Nance, and Benner Annex. Men will be housed in East and West Thomson.

Children's Arts Fest

College has a way of making you feel run down, even old. Laughter becomes a lost art form, and you begin to wonder if you're the last one that's got the ability to smile about the little pleasures life once had to offer. Is it possible that we've lost forever the chesire cat smiles we once wore as children? Are we to wander, like the guy in the old Loggias and Missisa song, looking for a way back, back to the days of Christopher Robin ... and Pooh ...? If we've found yourself wandering, wearing a forever crown, don't worry because help is on the way.

The 4th Annual Children's Arts Festival will be held Sunday at City Hall, Rock Hill, and if you wear a crown when you enter, the children will guarantee it won't be with you when you leave.

Once again, Winthrop people (the finest people we know) will be doing their part to make the festival a success. An International Students display, Pottery by Jim Lay, Drama by Chris Reynolds 'Crazies,' Dance by Joan Luns, and Fairy Tales by Rita Crompton, are Winthrop offerings to the 4th Festival. There will also be puppet shows, batiking, printings, sketching, and much more. Smiling, spellbounding and intriguing, Inquitive children are the greatest attraction at the festival as they serve to remind us of the thrill of discovery and the simplicity of pleasure.

Take a short walk or drive downtown this Sunday, between two and five for the Children's Arts Festival. It's so little effort for so much enjoyment.

Special Traffic Report

Eagle Run Draws 120 Runners

It was an excited, determined group of runners crowding into the street in front of the Winthrop College student body on March 28 in preparation for the 1ST Eagle Run. The air was still thick with a biting chill, the last truss of snow storm that had left the streets cold and white just two days earlier. Now, the streets were dry, filled with running shoes, bare legs and laughter. Words of encouragement were given to novice runners by those who were returning to this masochistic madness.

On the sidewalk, Dr. Littlejohn stood poised with the starting pistol aimed skyward. With a short tug on the trigger, the 150 runners were transformed from a standing mass to fluid flesh and the run had begun. This was the start.

Only 106 would finish.

The winners? That depends upon your way of reasoning. The first male finisher was John Schwartz in a time of 22:25. Schwartz also led his team, PENTAPENNERS to a win in the team competition. Wendy Warner led the Penmen with a sub-thirty minute time as she crossed the finish line in the forty-seventh position. But there were other runners.

Most of the runners came to the starting line thinking a T-shirt and certificate would be their reward. Many of them carried a deep satisfaction across the finish line that counted more to them than anything else they could have been given.

Who could doubt that the 1ST Eagle Run was successful. Ask the runners, they'll tell you just how successful they felt. They'll tell you what you mis-

NORTH CAROLINA DANCE THEATRE TO APPEAR IN ROCK HILL ... At Winthrop College at 8 p.m. Tuesday, March 28. Tickets, on sale at Joyce Center, are $7, $5 and $3 for area students. Part-time Winthrop students may receive one free ticket.
Hunger Is Our Problem

This Saturday, SGA, in conjunction with other student-related organizations, will support the CROP Walk for Hunger. Participation in the walk will sponsor students so much money for each mile walked. As concerned as we are about starving people in the world, we ought to take a closer look at the people in our own backyard.

Overpopulation is clearly one cause of starvation. The Worldwatch Institute, a think tank in Washington, D.C., estimates that world population will reach 10 billion by the year 2050. According to the organization’s estimates, the world population is growing by about 2 ½ individuals per second - over 200,000 each day. Ninety million new faces are added each year. Possible death by famine, as many as 30 million people in the next few years is before us. Worldwatch predicts that more people will starve to death in the 20th century than in any previous century with the numbers running as high as 800 million by the end of the century.

Most of the attention is focused on population growth in the Third World as the sole source of increasing demands for food. Developed nations are an equally important source of demands. According to Dr. George H. Kieffer, author of several books and head of the Worldwatch Institute, the U.S. consumes 80% of the world’s grain to produce one pound of poultry in the U.S. He further estimates that it takes five pounds of grain to produce one pound of beef. At the present time, about 1 million people in the developed countries feed enough grain to their livestock to provide for the minimal nutritional requirements of another 2 billion people.

The result of this is that while world population has been growing at 2% and agricultural production has been increasing by 25%, world demands for food have increased by 3% per annum. World hunger, therefore, is sustained and promoted by the economic systems of the affluent countries. What appears to be a food shortage may in fact be an uneven worldwide distribution of economic power. If this is the case, where, then, are our values?

The population issue, like so many others, presents at least three confusing pictures. First, the Malhushian view contends that the population crisis will rise to such an extent as to cause utter catastrophe. The Rockefeller Commission, in its report called “Population and the American Future,” views population as an intensifier and multiplier of other social problems. Finally, the Marxist position maintains that population is a non-problem since the real issue is one of development. That is, redistribution of income will rectify social injustices. The Marxist sees the population problem as a problem of the rich world but of the developed countries who attained and continue to sustain their affluence at the expense of the rest of the world. The United States, as powerful as it is, can influence the direction of global population policy. Before attempting to tell other nations what changes they should make, we should: adopt an official population policy; develop foreign aid programs which focus on family planning and serious attention to curbing our own wasteful consumption patterns.

Any and all of these suggestions run counter to the American consciousness. The value systems are centered on a love for the individual. Whether we like it or not, we are interdependent with other parts of the world.

Is It Spring Yet?

BY KATHY KIRKPATRICK

There are certain signs: the doors of your room flung wide, the chatter of children running through trees; the fretted faces of your morning coffee. You will notice it all at once— this warming of the air and of the world around you. Be sure to notice it, for it is a certain joy about it, a certain lightness beneath your skin. It is the opening of the doors you meet, the first short sleeves from behind desks and doors to walk or ride or run. They are strangely stirred, as if awakened from a long sleep and now eager for the motion of living.

Spring is a rediscovery of the body. We may find it beneath a wool sweater, forgotten and in need of repair, yet capable of response to the warming world around us. The birds and buds and sunlight whisper to us that we are not alone, that we are not dormant for months. Listen.

If you listen you may find yourself strolling across a lawn for no apparent reason, or buying a bouquet of the bluebells, the pink phlox, the bluebells and another one, smaller, for the chichadees, sparrows, wrens. You may find yourself scattering the seeds of wild flowers or hanging a lush fern on your porch. Almost certainly you will find yourself sprawled in the grass, beside a pool, or on top of a downtown. For, of each of us surrenders to this season, to this color, to the smells, to the sounds, to something primal and a little lovely.

So here we all go in our short-sleeved shirts and open-toed sandals, feeling just a little cool in the shade, yes, and after the moon dips down, ignoring the tinkle of the O.T.C. pill bottle and turning our faces up toward the sun.

Is it spring yet? Without considering a godhead or my calendar, I’d say: yes. Yes, it is.

Making Carbon Copies of Human Beings

BY BOB FORD

Humanity is living in the world of the future; where science fiction is fact, where examples of the future are around us. Cloning, for instance, is not just an idea; in fact, somewhere around the world a clone human being was born using this technique.

Cloning, a subject well-loved by science-fiction writers past and present, has again been brought to public eye. It seems a doctor has revealed the existence of a healthy fourteen-month-old clone, a mutation disputed among medical and scientific circles. Yet, whether the attempt at cloning a human is not the issue at stake. Once again there are some questions: Is it ethical to attempt an ethical choice, a path we should follow?

I contend that it is. I maintain that cloning animals and humans is - or rather, can be - of tremendous benefit to the continued progress of humanity. Successful clones of humans and lower animal life forms will be beneficial in the field of medicine, as a source of foodstuffs, and in practical uses, too.

For instance, in an effort to alleviate the food shortage, we could clone fast-supplying animals. We could clone more dairy cattle, achieving the perfect results of long-term breeding projects. Fish could be manufactured. The possibilities are endless.

The possibility exists, too, of preserving nearly extinct classes of animals. I find this thought quite exciting. Of course, there are other uses-you can imagine a whole line of Secretaries' or a continuing family of prize-winning bulls? The Budweiser Beer people, with their Clydesdales, ought to find this idea stimulating.

Yet, there is a great controversy over the cloning of humans. It is a delicate question, fraught with many philosophical and theological implications. The prime concern seems to be the soul. It has been asked if clones would have souls. The implications are clear: If we can create a being with a soul, what happens to our theological outlook on God and man? We would become Gods, in one sense (as creators). Yet, in another sense, the other soul would represent an inhuman clone. A clone is created and it has no soul, what is it? These explanations and their answers will probably remain unanswered, even if (when) humans are cloned. Let us look at it from a medical standpoint.

"The Budweiser people, with their Clydesdales, ought to find this idea stimulating."
Traffic Suggestions

To the Editor:

I would like to thank you and Mr. Cale for your recent response to the Student Senate Traffic Committee. The committee seems to have lost focus on what the real traffic problems of our campus are.

The greatest congestion, confusion, and danger to safety on Oakland Ave. exists at the two intersections where we all stand in a huddle waiting for lights to guide speeding traffic through turns and congregated pedestrians. An even more dangerous situation awaits the student who attempts to dodge through cars across Cherry Rd. Perhaps we all need a gentle reminder to use our freedom and our time wisely.

But what comes to my mind as the main campus traffic problem is not pedestrians but cars and parking.

From the day you first visit the college, through four years of searching (and your out-of-town relatives getting towed) to the tremendous jam of graduation you'll be faced with parking problems. To say that Winthrop parking could be relaxed is a gross understatement. It needs to be revamped. Parking areas and streets need to be re-recognized to provide adequate visitor parking near the dorms, upperclass parking closer to classes, and all sticker restrictions removed after 2:30 p.m.

Present towing policy needs to be re-evaluated in terms of what it is fair to ask of students and especially visitors who are unfamiliar with the campus, parking zones, and white-line rules. Students need to ask whether it wouldn't be more feasible for the campus security to buy a towtruck and keep towed cars on campus rather than let a private company make tremendous profits off of our students. The profits Winthrop might make from towing cars could be used to improve the present traffic situation. Though ultimately we must realize that our cars are the problem and not the answer, money made by towing cars could be channeled into pavement for the pits, the purchase of new parking areas, and a campus shuttle service.

These ideas seem abstract in March of 1978. But a real, concrete project would be the encouragement of the use of bicycles instead of cars. The college could at least outline and create safe, convenient bike routes both on campus and in greater Rock Hill for those who seek to live a simpler, more responsible lifestyle.

Student leaders and elected representatives, I challenge you.

Alexandria Broughton

We Want Gymnastics

Dear Editor:

We would like to end the battle of Winthrop women's gymnastics team versus N.C. Gordon once and for all. Mr. Gordon certainly does not have a popular position on our campus. But, we do believe he has done his best. We are not saying though that we agree with everything that has happened in the last month. We strongly disagree.

It seems to be unanimously decided on this campus that the women's gymnastics team is not proficient enough to produce a team which Improves more with every season. And, although the team does not have winning seasons, more and better girls turn out each fall. In the past several years, the gymnastics team has scored higher overall than in each previous season.

We hope that in the future the student body will no longer have the misfortune of reading about their expulsion from the sports roster in the local school paper. Remember us as the team that never gave up even though we lost everything we had.

Maritap Derteille (co-capt.), Beth Amick (co-capt.), Cheryl Beddard, Detra Mansey, Nancy Konski, Linda Rhodes (a concerned supporter).

Environmental Concerns

We quote from the article "Three Intercollegiate Teams Cut" by Nanci Ritter. Yes, everyone agrees that Winthrop does not produce top flight gymnasts but, neither do any other sports. We would like to bring to everyone's attention that we do have a team genuinely concerned and terribly dedicated to one another and to gymnastics. We would also like to add that although Winthrop is small, we do have a team which is more than Clemson University, who was due to perform here along with Furman University on Feb. 2, 1978. Clemson did not appear because they could not get their team together. Also important is the fact that Clemson is a club, not a team. At least Winthrop has enough interest to produce a team which improves more with every season. And, although the team does not have winning seasons, more and better girls turn out each fall.

In the past several years, the gymnastics team has scored higher overall than in each previous season.

We hope that in the future the student body will no longer have the misfortune of reading about their expulsion from the sports roster in the local school paper. Remember us as the team that never gave up even though we lost everything we had. Maritap Derteille (co-capt.), Beth Amick (co-capt.), Cheryl Beddard, Detra Mansey, Nancy Konski, Linda Rhodes (a concerned supporter).
Dinkins Sponsors White Water Rafting

BY PAUL VARGA

All right, all you people who dared to go snow skiing this winter, here's another opportunity for you and other thrill-seekers to test your luck. The Dinkins Travel Committee is sponsoring a white-water rafting trip on April 8. Like last year's fall trip, the rafting will once again be on the scenic Nantahala River. The Nantahala clear- water rushing through the beautiful mountain gorge which is located in the midst of the Appalachians. The river is ideal for white-water rafting and features a breath-taking finale for rafters: Nantahala Falls. Should you fall into Nantahala Falls, have no fear, because there is someone on shore to throw you a rope. In fact, friendly, experienced guides are always around to insure relative safety.

The cost for this trip is $14.99 (sale price) and the sign-up deadline is March 29. You can register at the information desk in the Dinkins Student Center. Here are the particulars: the bus will leave the Student Center at 8:00 a.m. on the 8th; rafting on eight mile stretch of river will be from 2 p.m. until 5 p.m.; the bus will arrive back at Winthrop at about 11:00 p.m. Rafting can be a very chilling experience once you get wet. Since you will get wet (soaked most likely) be sure to bring a great deal of clothing.

To raft or not to raft is the question; the answer is simple. If you have adventure in your heart and a lust for living life to its fullest, then you ought to go. See you there!

Religious Concurrents

BY A. M. WEBBER

The Lutheran Student Association will meet on Monday, March 27 at 6:30 p.m. Tuesday afternoon at 4:00 p.m. The Lutheran students will meet to continue their work with disadvantaged children. The Regional Retreat will be April 7 through 9 at Lutheridge. Wesley Newman, and West- minister students will deal with the issues of the Migrant Ministry on Tuesday, March 28. Included in the program, which begins at 6:00 p.m., will be a film entitled, "Children of the Field." The program will be held at the Wesley Foundation. Center-ury Episcopal Center sponsors Holy Community every Tuesday at 5:45 p.m. The Annual Southeastern College Conference will be held April 7-9 at Camp Weed, Saint Teresa Beach in Florida. The theme, "Breaking Loose," will center around a look at chains and shackles worn, as well as the shedding of some and the maintaining of others. The re- treat begins with dinner on Fri- day, the 7th, and ends at lunch on Sunday, the 9th.

Vespers at the Baptized Stu- dent Union on March 30th will be lead by the missions group that went to New York over spring break. The group included Doug Coleman, Veron Craig, Karen Duncan, Sharon Duncan, Sally McCollum, Rose Schultz, Kathy Worley and Rev. Bob Porterfield. Immediately following vespers, there will be a Gong Show to raise money for blankets for the world needy. There will be a small admissions charge. The State BSU Convention will be March 31-April 2 at Toccoa, Ga. Those interested should register by April 29th.

Social Work Activities Continue

Social work month activities continue throughout March at Winthrop. The theme of this year's professional social work month is "Advancing the Quali- ty of Life."

Upcoming activities include a meeting Tuesday, March 28 at 7 p.m. in Dinkins 222. Open to the public, the meeting will concern social services in the county. Fred Collins, from the Dept. of Social Services (DSS) in Columbia, will be the guest.

Activities held earlier in the month were a bake sale and beer raffle and a NASW program. The club at Winthrop is open to all students interested in social work. This year's officers are President-Pam Moore, Vice-President-Nancy Bennett, Recording Secretary/Treasurer-Jackie Ballenger, and Corresponding Secretary-Susan Little. The club's faculty advisor is Mr. John Ellis, a member of the social work staff.

Winthrop's Social Work cur- riculum prepares a student for the first level of professional prac- tice in a wide range of social service agencies. Winthrop's cur- riculum is currently the only accredited undergraduate pro- gram in the state. Martin Hope is the coordinator.

Home Economics Display

The archives department has assembled a display highlighting the history of the School of Home Economics from 1898 to the present and the work of the Untapped oil on U.S. coast

More than 113 billion barrels of oil are expected to yet be dis-covered in and off the U.S. coastal shelves. There are 2,300,000 holes drilled in the U.S. coast, and almost half a million of these are producing wells.
Harlan County, U.S.A. To Be Presented At Joyines

“Harlan County U.S.A.,” the 1977 best documentary Academy Award winner, will be presented by cinematographer Harlan County, U.S.A. day, March 27, at 8 p.m. In “Harlan County,” Kopple began work on a documentary about Coal mining families. Chief cinematographer Perry and producer-director Barbara Kopple spent three years on the film. They lived with miners’ families, attended their union meetings and descended through dark, narrow chutes into the mines to film the story. Kopple and Perry endured insults and even gunshots to capture the immediacy of the action. The story tells itself without narrative or embellishment.

Showings and ticket sales for the film are being arranged by the National Endowment for the Arts and the South Carolina Arts Commission.

“Harlan County U.S.A.” is an account of the long and violent struggle between striking Brookside mines of Kentucky and parent company Duke Power of Charlotte, N.C. An intentionally biased view of 1978 confrontations, the film probes a larger scale the bleak, perilous existence of coal mining families.

Chief cinematographer Perry and producer-director Barbara Kopple spent three years on the film. They lived with miners’ families, attended their union meetings and descended through dark, narrow chutes into the mines to film the story. Kopple and Perry endured insults and even gunshots to capture the immediacy of the action. The story tells itself without narrative or embellishment.

Showings and ticket sales for the film are being arranged by the National Endowment for the Arts and the South Carolina Arts Commission.

“Harlan County U.S.A.” is a prime example of an emerging genre called “activist” film making, in which film makers take a stand on a political issue. Following the success of “Harlan County,” Kopple began work on a documentary about the United States Food and Drug Administration “does not recommend the pill for women 40 and older.”

It is not just the pill, Jain said, that accounts for the increased death risk in women over 45, but the combination of the pill and cigarette smoking. He said that the effect of the two together is multiple-ative; that is, the total risk is greater than the factor of smoking plus the risk factor of taking the pill. For women ages 40-44 who smoke moderately and use the pill, the death rate is 59 per 100,000, compared to 31 per 100,000 for smokers alone and 7 per 100,000 for pill users.

For women from 35-39, the combined rate is 23 per 100,000 and for those between 30 and 34, it is 16 per 100,000. For women under 30, Jain did not cite figures, but said that the combination of taking the pill and smoking is still more hazardous than any other method of birth control.

Jain said that for women 40 and older, the combination of the pill and puffing on cigarettes is “more hazardous than using no birth control at all and instead facing the risks to life presented by pregnancy and abortion.”

Although the image of dying at 40 or so in childbirth may be more vivid than dying of an excess of state smoke and contraceptives, the latter possibility is just as real.

So you just quit taking the pill, right? THE TIMES said that no advantage will be gained by making a sudden change, either by discontinuing the pill or seeking other methods of contraception, “because the pill takes several years to affect the cardiovascular (heart and blood vessel) system.”

Insights To Satisfaction

BY NANNI RITTER

"I learned not to reach out into the world for satisfaction but to come from satisfaction so that whatever comes up, I'm satisfied," Valerie Harper, star of CBS television series, "Rhoda," said during a masterclass workshop with Winthrop College students. Mr. Harper—four time Emmy winner—and Anthony Zerbe, detective from television's "Harry-O," arrived at Winthrop College to present the two-act play, "Dear Liar."

The following morning Ms. Harper and Zerbe answered current questions and gave advice about the theatre during a two-hour workshop.

One student asked, "Why the tours every year to different colleges?"

Zerbe, holding the tough-guy image of Lt. Trench in "Harry-O," answered, "When you are 19, there's a lot of choices you haven't made yet. The theatre exposes the 19 year old to that from a different view." Zerbe believes that, "to be with someone is at the age of 19 when there is enough energy, appetite and stamina there, to find out what life is all about. 'Not that I don't like 60 year old people or 40 year old people," he said jokingly.

Another question came up: "Now that you're 'making it' what would you like to do next?"

"Making it" does not have to do with contact," Ms. Harper answered. "Making it is YOU saying 'I'm making it.'" Zerbe added that it is making Valerie happy. "That's not how I'm making space for," she said. "I've learned to be satisfied before I even start."

Ms. Harper said that every barrier in one's life is put there by that person. "What comes into your life is what you choose," she said.

"Making it" for Zerbe is, "being in the spotlight of satisfaction. It even has to do with finding incredible satisfaction about being a student here in northern South Carolina."

During the chat-session, a self-improvement test referred to as the EST Training was recommended for students. Ms. Harper took the two-weekend test three times and a half years ago. "The conditions of my life did not change, but the way I experienced my life transformed totally. You learn to lead your life instead of it leading you," she said. "If I were to lose 'Rhoda,' tomorrow that would be OK," she added.

Her advice to drama students was "reach out and create your own place to work. You have got to be willing to fall and embrace failure—DO IT!"

Zerbe suggested taking the EST test first, "It becomes more in touch with yourself," then decide if the college has enough money, "you to perform and sense yourself as a performer," Zerbe thanks God for, "television, film, and everything that even breaks it open further because there is more to do—there is more possibility."

Ms. Harper said, "Listen—you don't NEED the EST training but you would find the richness you are lacking. Do what you are doing. Don't change anything, just own up to it."

Zerbe aroused by all the questions left off the stage into the aisle saying, "part of the job of an actor is being just in the dark in so you can stop being who you think you are or who you think you have to be there."

Zerbe thinks the reason why people go to the theatre is, "you are learning about things and making called upon to perform some act, so what you got to do is just be there."

BLEACHER FEATURE

Team up with a rich, thick shake from McDonald's before you head for the game. Then when your throat gets dry from all that cheering, you can send in the relief—a cooling blast of your favorite flavor shake. So before the game, make yourself a part of a great team—you and McDonald's. McDonald's

PAID ADVERTISEMENT

The week before spring break, Senate passed a resolution supporting the CROP Walk for Hunger which will be held April 29. Participants in the 10-mile walk will have sponsors who pledge a certain amount of money for each mile walked; the money will go to fight hunger.

Senate also approved three allocation requests from the Student Activities Fees Committee; the recommendation for $500.00 for Winthrop Theatre passed second reading and the allocation recommendations totaling $831.00 for the Outing Club passed second reading.

The proposed revisions to the SGA Constitution and By-laws have been completed and were presented to Senate for discussion on Wednesday, March 22. If passed by the Senate and ratified by the student body, this constitution will be the governing body of rules and regulations for the Winthrop College Student Government Association. Come to the SGA Constitution (Wednesday nights, 7:30 p.m. 221 Dinkins) and become familiar with your Constitution!

Academic Affairs is presently working on legislation to establish student advisory committees in each department or school of the college. These committees would advise on all aspects of education, including course structure, attendance, and textbooks.

Rules and Regulations is in charge of the public forum which will be held Wednesday, March 29, at 8:00 p.m. in Dinkins Auditorium. Top Winthrop College administration will be present to answer questions and hear student views. The three main topics of discussion will be: 1) the changing of beer and wine policies on campus; 2) the proposal to seek state funding to lower Oakdale Avenue; 3) the proposed college-wide travel policy.

Rules and Regulations is also working on a 7-8 page booklet clearly defining the responsibilities of SGA Senators. Such a clear job description would replace the vague guidelines which are presently used.

Student Life has completed a survey for Epicure, and the results will be reported in Senate shortly. The survey basically dealt with the variety of the menu in the cafeteria. The Student Activities Fees Committee would like all campus organizations funded through Student Activities Fees to know that there is still money available. Any organizations wanting funds should submit written requests to Robin Abbott, P.O. Box 5610.

Don't forget! The public forum, with top administrators present, will be held Wednesday, March 29, at 8:00 p.m. in Dinkins Auditorium.
Simon Scores A Hit With

THE GOODBYE GIRL

REVIEWED BY LYNNE POPE

Disco has never been so glamorous—Dancing has never been more fun to watch. This “blue collar” story unfolds the adventures of a handsome youth who works in a paint store during the day, and becomes the envy of his friends on the dance floor, by night. (Could he be a male version of Diane Keaton of LOOKING FOR MR. GOOD-BART?)

From beginning to end, the Bee Gees are heard, their sound blending with moving pictures to create a most delightful sensation of rhythm for the viewer throughout the film. Of course, some people may not go to a movie for music and rhythmic enjoyment, and those people should not go to see and hear this one.

The street talk makes for a very realistic flavor to John Travolta and his gypsy relationships with his peers, his girlfriend, his boss, parents and brother. Sometimes, the SOUNDS of the words in much of the dialogue are more meaningful than the words themselves. Admittedly, the plot is not a complex one, but a “slice of life,” sensory-appealing film like this one is refreshing when you just want plain fun and entertainment.

Lighting effects, the flashing dance floor, and the grainy appearance of the film itself, are skillfully put together with problems, trials, victories and joys of the characters.

One wonders however, what ever happens to Travolta’s brother after he left the priesthood to join the disco set. Did he go back to the church after being disillusioned with the glitter of the dance floor? And will Travolta himself find a white-collar job and perhaps move out on his own, away from his parents? After all, he is only nineteen years old. The kid has plenty of time. And he knows he can’t make a living dancing all night, no matter how good he looks.

The conclusion one comes to, after all, perhaps is—who cares, anywhere? This movie has enough excitement and thrills to keep you occupied without worrying about why and how of character analysis. Forget it and enjoy the show!...
Men's Tennis: Five And One

The men's tennis team had five victories and one loss in the singles matches against Baptist College in Charleston on March 4.

Paul Findley won over Wayne Myers 6-3, 6-2. Joel White- side conquered Jerry Leford 6-0, 6-0. David Johnson won against Richard Johnson 6-1, 6-1. Carroll Hester and opponent Stormy Hook played two sets with a score of 6-2, 6-3. Dave McNabino won over Charlie Vasquez with 6-3, 6-0. The loss for the team was Jerry Leford from Baptist scoring 6-7, 6-4, 6-5 against Macky Rawls. The doubles scores were: Findley-Whiteside 6-1, 6-0 against Myron Leford, Johnson-White winning 7-5, 6-3 against Keansy-Johnson. Hester-Poole winning over Hook-Vasquez 6-3, 6-4.

Did You Know?
Did you know that hummingbirds are capable of flying backwards?

Thanks.... BY RON LAYNE

The SGA and THE JOHNSONIAN would like to say "thanks" to some very special people who made the 1ST Eagle Run an acknowledged success. A great deal of time and effort was given by members of the college community and we think they deserve mention.

First, we have to extend a word of thanks to members of the PAO who were instrumental in making the run a fun race for the participants. PAO provided the design for the certificates, advice when it was most needed and solutions to some of the problems encountered in organizing the run. They also managed to field two runners for the event, and were on hand for photographing the event. "Thanks Pete, Dan and Joel."

We are especially grateful to Dr. Littlejohn, who supported us throughout the project, and who took the time out from a busy Winthrop day to give us a special "thanks" for us.

The competitive 'feel' of the race was highlighted by the awards provided by the Winthrop Athletic Department. The members of the Winthrop Athletic Department also provided us with some of the materials used in the actual running of the race. "Many thanks . . . ."

One of the major problems encountered in any run is traffic control. Chief Williams went to great trouble to see that the Winthrop Security people were stationed at the major intersections of the course to stop traffic for the runners. We also owe Chief Williams a word of thanks for the mile markers and course markers used in the outlying community.

Next, mention must be made of the twenty-five coeds who were involved as "human direction signs," timers, aid station attendants, and registration personnel, without whom we would have been hopelessly lost and confused. A special word of thanks to a brave few who worked their writing hands into a cramp as they filled out 106 Eagle Run Certificates.

With only two and one-half weeks to organize the event, we were worried that we would encounter problems in the coordination of the event that would leave us with no one to turn to for advice. Our worries were ill-founded. The run was a great deal of trouble to see that the Winthrop Security people were stationed at the major intersections of the course to stop traffic for the runners.
