Dinkins Wants You To Be Involved

BY NANNI RITTER

Are you interested enough to become involved with your school and what goes on in it? Would you like to voice your opinion on how many beer busts Dinkins should sponsor? Or how many "Stars" should Byrnes accommodate next year? Dinkins is now taking applications for committee members. Applications can be picked up at Dinkins Information desk.

Paul Varga - President and Debra Bright - Vice President of Dinkins Board and eight chairpersons for separate committees took office April 15 to serve for the upcoming year of 1978-79. Each chairperson will appoint 10-15 people to their staff. Positions are available on the following committees: 1) concerts, 2) Dinkins activities, 3) Special Events - responsible for Halloween Happening, Beer Busts, etc. 4) Short Courses 5) Tournaments and Games 6) Travel 7) Films and 8) Publicity - responsible for the campus bulletin boards.

Deadlines for applications will be May 1. Return applications to Dinkins Information desk.

Varga said, "Anyone who is interested in the programming activities on this campus and has time, should get involved with Dinkins committee. It is rewarding and fun.

Anyone who is interested in working together to help achieve the goals of each committee should apply. Dinkins is one of the main areas of information for day students as well as dorm students. It is through "working together" that Dinkins has such a wide variety of committees available for students to take part in.

Bright, Vice-President, said, "Programming is becoming an essential part of Winthrop. As the college expands the social atmosphere will expand in its needs. Bright added that as a committee member you will become a "part of meeting those needs."

Constitution Approved By Students

The student body voted unanimously Wednesday, April 19 in favor of the proposed Constitution, according to Dale Dow, former Vice-President of the SGA.

"The vote was 90 in favor of, and none against. It was a special election and the voting hours were not as long. That contributed to the small turnout," Dow said.

"The old Constitution is dull and void," he said. "Senate will read it a third and final time but this is it - this is the new Constitution for the Student Government Association.

"I feel pretty good. I'm glad that we finally got it passed," Dow said. "It's going to be a good base to build the future on."

Work Study Wages And Tax Credit

BY SULA SMITH

When the minimum wage was raised during the winter, many students on the Work Study program wondered why their wages were not raised. Peter F. Caporosl, Director of Financial Aid, has the answer to that question.

"There are two programs making jobs available to students. One is the Federal College Work Study. Students must fill out a Financial Aid form and show a demonstrative financial need. Those students who want to work but don't demonstrate a real need are put on the Winthrop College Student Employment Program," Caporosi said. "The Federal Regulation Law written says that colleges are only required to pay students $2.30 an hour. This is minimum wage for college employed students."

"When I heard of the raise in minimum wage, I went to President Vail and Dr. Littlejohn. President Vail was concerned with the impact it would have on students," Caporosi said. "I knew it would cost Winthrop an extra thirty-thousand dollars to make up the difference and we couldn't handle that in our budget."

"About that time a memo came from the Federal Office of Education saying that until the Regulation Law was changed the college would not have to pay the Federal minimum wage to students," he said.

"If we had gone to $2.65 it would've meant that students under Winthrop College Employment Program would've been put out of jobs to allow for enough money to pay those on Work Study. We have to pay 20% of Work Study salaries - the Federal Government pays the rest," Caporosi said. "The entire salary is paid for by Winthrop College for those on the Work Employment Program. It would've been unfair to have two different salaries for kids doing the same thing."

A raise is due eventually for the Work Study and college employed students. Two bills are presently under consideration in Congress and the decision between the two will determine what happens to Financial Aid and student employment.

The issue, according to the Student Financial Aid newsletter, is whether individual students are not likely to benefit from the credit since they have small or no income, whereas others are eligible for student aid.

The newsletter stresses the fact that letters need to be written to congressmen and senators in support of the Student Financial Aid bill. The first bill will grant a $250.00 tax credit and thus leave less for students needing further assistance.

The second bill, the Student Financial Aid bill supports a Student Financial Aid appropriation to the needy students. A family must have an adjusted gross income of $25,000 before receiving the $250 tax credit. According to the Financial Aid newsletter, the argument for the Student Financial Aid bill is that, with the tax credit grant, independent students are not likely to benefit from the credit since they have small or no income, whereas they ARE eligible for student aid.

The newsletter stresses the fact that letters need to be written to congressmen and senators in support of the Student Financial Aid bill. Caporosi said, "I urge students to make every effort to fight the tax credit by writing their congressmen."

"Come-See-Me!"

"Come-See-Me" on pages 8-9
There Ain’t No Such Thing As Too Much Fun

The 1977-78 school year is fast coming to an end, and before the last days come, I’d like to reflect on some of the changes taking place here at Winthrop. The year has been a good one. We proved that we could unite together and accomplish something. We saved the chimneys! You students decided that it was up to you to get it done—and you did it. Never before during my years at Winthrop did the students ever work like that. It is stimulating to feel the change in attitudes, to see involvement and true conviction for a cause.

We also broke an activity barrier by sponsoring for the first time, the Eagle Run marathon. We forgot our books for awhile and got into something that was fun. What was even better was that some of the faculty and staff joined us. This was the first year also, for the Eagle to be recognized as our mascot. We have a nickname. It may be a little corny, but what nickname isn’t? It shows others that we aren’t wintry Winthrop students anymore. We’ve changed, and our name is just one indication.

The best change of all is that slowly we are coming out of seclusion, and we are beginning to act like college students instead of conservative square toes. In the past, Winthrop was a very structured and stiff place. Everyone was too concerned with obeying rules and regulations. Now the rules are not so strict and you can feel that after the studies are done students are beginning to have a little fun. People are getting out more. Winthrop is beginning to get a bit crazy and it feels good. The party started at the Beef Ball and continued right on into the night. We’ve had a good time at ATS this year. The entertainment increased and so did student interest and participation.

The year for sure, has been a highlight to Winthrop’s party power. When the warm weather hit I never saw such a mass migration to the roofs and to the shack. After Spring Break I thought half the student body had deserted and extended vacation because class attendance decreased considerably. WHO CARES?! It’s spring, and we’re lucky students who can cut a class if the “need” arises. We might as well enjoy our status while we can because the way I hear it, the working world allows for no slackness and is not too much fun.

Now please don’t get me wrong. We do have responsibilities, and we do have STUDIES which have to come FIRST. But for the first time in a long time we’re beginning to think of something besides work. Lord knows when you graduate you’ll have more than enough work to think about.

The year is about over and everyone will soon be going home. In these final weeks of school, study hard and get your work done, but play hard too. You need to get a good balance of both. That’s what college is all about—figuring out the easiest, most effective way of getting one-hundred-things done at once, and yet have time for a social life, sleep, and meals besides.

So ahead! Do something crazy while you still have the chance. Go out to the Shack one afternoon and take the day off, before it costs you part of a salary to do it. Enjoy being a student, and have a little fun.

Sara Smith

POIsT:

UFO’s Should Be Taken Seriously

BY BENNY CAIN

The astronomical profession is unanimous on one issue: there is intelligent life in the universe. Given that evolution does occur to the level of intelligence as on some of the planets which are similar to earth (in terms of atmosphere, temperature, elemental make-up), latest estimations by astronomer Carl Sagan suggest that there are between fifty thousand and one million existing civilizations IN OUR GALAXY significantly more advanced than our own. Considering the rate at which technological achievement is accelerating here and the unlikelihood that any contact with extraterrestrials would reveal beings whose civilization is only six thousand years old (our situation), it is likely that extraterrestrials contacting us would not only be more advanced than us, but inconceivably more so, at least as inconceivable as our civilization must seem to Stone Age Filipinos and Australian aborigines. Given estimates that there is only a 0.5% chance that any given contact would be with a civilization at our own level of development as our own. Hothman Thomas Kuhn has suggested that we look for extraterrestrial by looking for verification of itself. Only when the mass of evidence contradicting the fash-

COUNTERPOINT:

Seeing Is Not Believing

BY BENNY CAIN

UFO’s are the latest myth. They did not exist as SUCH until 1974. Of course, we’ve always hadphenomena in the sky which resemble modern UFO sightings, but they are always interpreted. The term “phenomenon” is interpreted as a sign from the gods or as a flying saucer, depending on the religious persuasions one occurs to. At our present cultural level, the idea of benign or hostile phenomena, or various phenomena is everywhere. That which is conceivable and at the same time motion-rich naturally takes precedence over that which is the simplest and most plausible explanation.

It is true that science evolves by the destruction of paradigms. But the supplanting paradigm is simpler and more reasonable. For instance, the pre-Copernican complexity of orbits was supplanted by the much simpler heliocentric theory. Do we have to invent extraterrestrial civilizations to explain UFO’s? No. All we have to do is examine the wealth of terrestrial objects and phenomena for which they are mistaken. Have there been mass sightings of UFO sightings every year, every civilization in the galaxy must be on our doorsteps. How absurd.

The fact is that there is not one single artifact left by UFO’s which cannot have a terrestrial origin. Why won’t the little men ever get washed and be photographed? Precisely be

Do You Sometimes Feel Like A Computer Card?

PHILIP, I’M GETTING WORRIED ABOUT PRINCESS MARGARET’S PERSONAL LIFE...
By Ron Hough

Long ago, when the earth still lay untainted in her green splendor, when chivalry and galantry were common qualities, and when evil creatures now extinct still roamed the land, men inscribed "Here Be Dragons" on the uncharted sections of their maps. Drautes, Elves, and Hobbits still flourished. Magic, good and evil, was not uncommon and was practiced by many. Creatures of all sorts rose to great power, building great castles and establishing tremendous store of wealth.

Yet many of the powerful unearthed evil forces never seen on the face of the earth and many of the Great were brought to ruin. Their castles were slowly inhabited by many creatures most foul. However, the treasures remained. Slowly, the rumor of wealth untold spread across the land and many adventurers undertook quests in search of the hoards of the Great. Butting the onslaught of evil forces, many fell in their quests, yet some succeeded, returning with small fortune and tales of treasure too vast for an army to carry away. These accounts of evil and treasure fanned the fires of greed and many more began the grim journey in search of wealth, power, and fame.

Many failed, few returned. All spoke of the horrors of the dark ways beneath the castles—the dungeons.

Have you ever experienced the desire to take the road which "goes ever on and on?" Have you ever been consumed by a raging fire of greed on a gainful hunger for wealth and power? On the other hand, have you ever imagined yourself performing deeds of renown, overcoming the dread forces of darkness? Have you ever wondered what it would be like to be a hobbit, dwarf, or elf? If you find yourself afflicted with a vivid imagination (an affliction hardly unintended), if you enjoyed Tolkien's trilogy, or if you find role-playing to be a fascinating pastime—In short, if you are into fantasy or escapism of any sort—then a dungeon is for you.

Yes, those selfsame dungeons of days gone by have been recreated for you in an adulthood game called "Dungeons & Dragons" (distributed by TSR, Inc.). "D&D," as its many aficionados refer to it, is a somewhat complex role-playing game requiring the basic gaming equipment from TSR, some paper and pencils, and at least three imaginative players.

One player assumes the role of "Dungeon-Master." He creates a dungeon, stocks it with all manner of evil creatures (from giant ants to zombies), and distributes great quantities of treasure. Of course, to reach the treasure, the other characters have to fight these monsters. Then, too, the Dungeon-Master with a lively imagination may make the dungeon even more devious with traps and suchlike.

The other players create characters with the aid of dice (like most games, D&D is dependent on dice). The characters have qualities such as strength, intelligence, dexterity, etc. High rolls in these categories mean a character may have a better chance of survival—which is the name of the game.

Lest you think this is some local fad (like 1046 regular players here at WC), there is a large group of D&D-ers at UNCC, another crowd at Clemson (with some known to play for entire weekends), and a very large clique at Memphis State (who recently held a fight-to-the-death, winner takes all tournament). A hobby shop in Columbus which carries D&D is open about six weeks behind in its orders.

As absorbing pastime, D&D is rapidly becoming a widespread national fad, especially among college campuses. So, if you ever hear a student solemnly telling another about how he killed a couple of orcs and a troll, then was burned to death by the breath of an Ancient Red Dragon, don't worry, because it is only D&D. See ya, and remember—never laugh at a live dragon...
Traveling The U.S. For Under $350

BY KIM DAVIS

Everything’s ready. You’ve got the $350 that you’ve been saving since last summer, a sleeping bag, and the tent your mother almost threw away. You wave good-bye and back out of the driveway, on your way to everywhere.

Traveling across the United States by car at your own pace can be a rewarding and educational experience. You not only get to go out of the way places and see all your favorite monuments, but you discover how other people think. Meeting new and interesting people along the way is what makes a good trip an unforgettable adventure.

Once you decide that you have enough time, money, and ‘guts’ to take off, there are quite a few helpful hints to make the going safer and economical. LEFT’S GO: THE STUDENTS’ GUIDE TO THE U.S. AND CANADA recommends the following:

Use Traveler’s Checks instead of carrying cash. They’re good anywhere and if lost, are easily and quickly refunded.

Contact the AAA for good road maps.

If you have specific areas or cities you want to see, write that city’s Chamber of Commerce for information.

For a National Park listing, contact Department of the Interior, National Park Service, Washington, D.C.

Youth Hostels and YMCA’s offer lodging in some cities. They’ll be listed in the Phone Directory, or contact Youth Hostels of America for information.

Check the 5-day weather forecasts for the area in which you’ll be.

ALWAYS carry an ID. As a common courtesy, let somebody back home know where you are and where you’re heading.

What happens if you decide that the time you have set aside to travel just isn’t enough and you’re running out of cash? You could call home, but some have found a more adventurous way to keep gas in the tank and food in the trunk.

Kim Davis, a man from Mexico, Pennsylvania who has traveled across the States twice, found that “there are a lot of people out there that are on the border line of whether they need someone for work or not. But when someone comes around with enough initiative to go out walking the streets, that is impressive enough for these people to decide to hire you.”

Davis started out traveling by car with two other guys. After six weeks, they split up and he started hitchhiking. It was then that he got his first job—working on a commercial fishing boat.

“Your more or less have to go to populated areas if you want to find something fairly quickly,” Davis stated. Although there is work in the country, it’s usually seasonal and if you’re not there at the right time, jobs are hard to find.

Some jobs to be found are sweeping floors, loading trucks or any odd job to be found around a business location. Others include farm work, cleaning out basements, working with fire fighters, fishing, and helping take county censuses. In addition to pay, some people will give you a meal and a place to stay for the night. As in finding any kind of part-time job, you need a little imagination and initiative. But those few dollars do come in handy.

When traveling by car, Davis stayed in State Parks because “they were less expensive and roomier. When we got further West, we stayed in U.S. Forest Service campgrounds which generally were free. Sometimes they would want three dollars put in a box, but that depends on how honorable you are.”

Once he started hitch-hiking, David found he could “pretty much walk off the side of the road and find a place to stay for the night, which saves money.” However, if you can get to a rest area or campground, you can sleep in a tent with some facilities available. Most states allow free use of rest areas.

If you decide to pitch a tent wherever you stop for the night, try to have it set up before dark. Other supplies you’ll need will be a stove and ice chest for cooking and storing food. Preparing your meals is cheaper and convenient, even if it is a bit of a chore sometimes. In this way, Davis averaged $3 a day for food. Catching your own fish and snacking on berries along the way can also help cut costs. There are a lot of edible plants out there, so it might be worth the effort to check out information on that subject.

When traveling, it might be advantageous to find out beforehand when tourist areas, such as Yellowstone or the Florida beaches, are most crowded and most expensive. If you’re trying to keep costs down to extend your trip, you might wait until the crowd and the rates die down a little. Take a side trip or come back on your way home.

Unless you travel only in the summer, when the weather is generally warm and hot, the climatic conditions vary according to latitude and regional area. The further north and the higher you get, the colder it will be, at any season. Expect snow in the North from mid-November to late March or early April. Studded snow tires are a necessity in the Northern states, but illegal in most of the Southern states.

If you plan on hitch-hiking, or get stuck in that situation, remember that it’s illegal on the interstate highway system and toll roads. Stand in front of freeway exits and behind toll booths. If the Highway Patrol stops you, act courteously but be prepared to give you a warning and might even take you to a side road parallel to the highway. Since most motorists tend to own look someone standing by the side of the road, you might try something creative, like waving or on your hands or standing on your head. People will notice you.

One more word about food. David recommends carrying fresh fruits and vegetables, canned meats, and lots of noodles, rice, and soup to stretch out a meal. Take advantage of fruits and vegetables that grow wild—don’t be afraid to experiment.

If there’s a bit of outdoorsman in you, perhaps this way of traveling is for you. You can stop when you’re tired, stay where and when you like, and learn a variety of ways to cook Spam. But maybe the best aspect of it all is what Davis says. “The best thing is the people you meet... the things you learn about the area you’re in. If you are fortunate enough to be picked up by someone from the area, many times they will tell you things about the area that you would never have learned if you just drove on through.”

Students Receive Distinguished Awards

BY KATHY KIRKPATRICK

Thirty-four Winthrop students received distinguished awards at the Honors and Awards Banquet held on Wednesday, April 13 in McElroy.

The awards were given to Polly Todd and Dale Dove who were recognized for their outstanding service. Todd received the Mary Mildred Sullivan Award and Dove received the S. Benton Smith Sullivan Award.

Other awards given were the American Legion Award, to an outstanding Winthrop junior, Karl Follens; The Henry Radcliffe Sims Scholarship, to a rising senior, Kay Cassady; The Betty Huddles Exon Scholarship, to a rising senior, Teresa Darby; The Julius Friedheim Scholarships, to the rising junior and rising senior from South Carolina with the highest academic average, Linda Hutton Short and David Boyer.

Also, The A. Markle H. Leach Scholarship, to a rising senior, Jossi Hall Custer; The Elizabeth Hine Watkins Scholarship, to a rising senior, James Brown; The Kate V. Wofford Foundation Scholarships, to Cynthia Ford; The Guild Cylcle Scholarships, to two students with the highest academic averages during the freshman year, Delva Logan Sutphen and Nancy Lee Bates; The Alpha Lambda Delta Book Award and Sophomore Award, to Catherine A. Whittingham and Amy Laura Brown.

Other awards given were The President's Prize in Poetry, to Kathy Kirkpatrick; The President's Prize in Dance, to Corrine Felder and JoAnne Holder; and The Robert Lane Prize for Fiction, to Ron Lepere.

Awards in the School of Music were The Theodore Presser Foundation Scholarships, to Richard Arthur Smith, Deborah Owen, and William Gibbon; The Salute Claywell Honors Award, to Yelicia Beaty Edwards; and The Rock Hill Music Club Award, to Richard A. Smith.

Awards given in the School of Home Economics were The Virginia Kelly Langston Scholarship, to Janelle Candace Perry; The Home Economics Education Department Award, to Sandra Boggs; and the Elizabeth Burt Memorial Award, to Anna Holland.

The Joanne R. Scarborough Scholarships were given to two students in the School of Education, Betty Joyce Byrd and William McGill Bigger.

Awards given in the School of Business were The National Business Education Association Award, to Kathy Ann Dembry; The Wall Street Journal Award, to Dale Dove; and The Rock Hill Savings and Loan Association Award, to Jackie Ruby Ford and Betty O. Richardson.

Awards given in the College of Arts and Sciences were The Cara Barrett Stratil Scholarships, to students majoring in art, Pamela Slaughter Childress and Annette L. Rhodes; The Mary Elizabeth Massey Prize for Excellence in United States History, to Donna Lynn Clemons.

Announcements of awards was preceded by dinner, entertainment by The Winthrop Singers, and an address given by Distinguished Professor Dr. Ross Webb.

Todd Ushers Dinkins Through Change, Growth

BY SYDNEY BREEZE

The Mary Mildred Sullivan Award went to Polly Todd, and the S. Benton Smith Sullivan Award, both on April 12 at the Honors and Awards Banquet.

Polly’s achievements include working with Dinkins for three years as her campaign chairperson, then as a vice president and president. She has worked with THE TATLIES for two years, and was costume chairman for Classes Night and Junior Polly in her junior year. Polly is a member of Phi Kappa Phi and the vice president of Phi Epsilon Pi. She also received the TCI department award in interior design.

Speaking about Dinkins Student Center, Polly said, “Over the past three years, we’ve grown an awful lot. We weren’t even organized when we first started. I think we’ve worked hard at being a good bit of recognition as an organization. We’ve established ourselves that we are here and doing things for students.” She also thinks the film series has been helpful for the students.

According to Polly, Winthrop, specifically Dinkins, “has helped me in an awful lot as a person as far as being able to assert myself more than I have.”

“When I first came to school, I kind of just sat in my room and studied. I really didn’t get involved. Dinkins has helped me. It’s given me an awful lot of self-confidence.”

As for her future plans, Polly said, “That’s the one question I get from everybody. I don’t have an answer. I’m not sure about what I want to go into. I’m not worried about what I’m going to do. I’ll find something that I enjoy. I would love to go to graduate school eventually, but I don’t know right now where I want to go, or what I want to do.”

But for Polly if the future is a reflection of the past she’s in for smooth sailing.
Women Administrators At Winthrop

BY PHOEBE LARK

It has been said that a woman's work is never done and no doubt this statement can be applied especially to the woman who strives for a highly respectable, but rare, administrative position.

According to the College Press Service, female presidents and high level administrators are still scarce. The stability of women in many formerly male dominated professions is not echoed in academia.

"The solution may lie in the careful counseling of young women, including advice on breaking down internal barriers that make some women fear success," said Majode Wagner, former president of Sonoma State College in California.

Dr. Mary T. Littlejohn, vice president for student affairs of Winthrop College said, "there are barriers and a tendency for most men to be threatened by able women but I haven't found any barriers at Winthrop. I was invited by the president into this position."

"I have recently recruited one woman for a student aid officer and one to be associate Dean of Students, but in the last two years, I have filled six positions with men. It's not because I don't want to recruit women, but because I can't find women dedicated to this type of life."

Dr. Littlejohn, mother of four, is a graduate of Trinity University in Texas.

"...for college I worked for the University of North Carolina Press at Chapel Hill and also met my husband there. We began raising four children and I sold real estate part time. While we lived in Minnesota, I became active in Party Politics after we moved back to Charlotte. I went back to Chapel Hill and got my Masters. I worked for two years as a guidance counselor in the Charlotte schools. I was encouraged to get my doctorate which I did, in Educational Psychology. I then headed for college teaching and I knew this was what I wanted to do."

"A high administrative position is more burdensome, a woman has to do work at home and at her job. I think the main reason most women are not career oriented is because most women would rather marry than have a career."

"Many women's careers are very likely to make her make sacrifices in her personal life. Sometimes women have to choose between a personal and professional life. I don't blame women for choosing a personal life."

Dr. Connie S. Lee, assistant vice president for Development at Winthrop, said, "I started college at the age of 26 and a lot of people didn't understand why I wanted to go to college at that age. The only reason why I wanted to go to college was to teach history in high school. I like having a job which keeps me in touch with students."

"If I had gone to school after high school, I would have gone to a school that offered Veterinary Science, but after I completed college and I received my Master's in History, I realized I couldn't stay on the college level working without a Ph.D."

I left Winthrop in the spring of 1973 and went to the University of South Carolina for a doctorate in Secondary Education and Social Studies."

"I feel like some men are not receptive to women in administrative positions, but the best way to handle it is by not letting it bother me, by maintaining a sense of humor and by treating men with respect when they deserve it," said Dr. Lee.

"I am one of the finest plumbers for women for administrative position."

Dinkins Summer Program

BY MARIE WEBBER

In the past, Dinkins has provided extensive, low risk programs for the summer. There are fewer formalized programs because of the nature of summer school. Tom Webb, Director of the Dinkins Student Center, stresses that "less programmed events leave the students more time to recreate themselves with the facilities present."

Unlike during the year when the program board and committees are present, programming for the summer is handled by Webb, student employees and any available student officials. The extent of activities they have been able to offer has been limited by faculty and students together on the golf range, picnics and watermelon cuttings to be correlated with Fred Angerman, of Epicure food service. Along with these activities are the Dinkins facilities and the Intramural Programming of the Physical Education Department.

Auditions

For Chorale

Auditions for membership in next year's Winthrop Chorus (1978-79) will be held on Wednesday, May 3, between the hours of 11:00 a.m. and 12:30 p.m. Other times are available by appointment. There are openings in all voice parts, auditions should be prepared to sing a song of their own choosing. An accompanist will be provided as needed.

A sign-up schedule of audition times is posted on the School of Music bulletin board. The auditions will be in Room 201 of the Music Conservatory.
Winthrop Prepares For End Of School

P.O.P. Winds Down

The Peer Outreach Program, organized by Frank Joseph, Coordinator of Career Planning, with assistance from Dr. Bill Childers of the Counseling Center, has come to a close for this semester. P.O.P. was an attempt by upperclass PCC's (Peer Counsellor Counselors) to contact the members of the freshman class to obtain information about career goals and offer assistance in the area of career goals as well as other areas of college life.

Some of the problems encountered were difficulties in making contact with students, finding time to meet that were mutually convenient, students being unaware of the program, students missing the meetings and cautious attitudes.

The major benefits were students who felt more informed, freshmen appreciating someone to listen, counselors feeling they had made a contribution by assisting someone, and students feeling generally more at ease with meeting and dealing with individuals. An additional plus is that some counselors and students are interested in the continuation of and participation in the program next year.

Joseph expressed his appreciation of the volunteers, their time and efforts. Joseph was surprised at the involvement and that students were willing to give of their time so freely. Joseph said, "This contradicts the statements heard of Winthrop students' apathy."

The major benefits were students who felt more informed, freshmen appreciating someone to listen, counselors feeling they had made a contribution by assisting someone, and students feeling generally more at ease with meeting and dealing with individuals. An additional plus is that some counselors and students are interested in the continuation of and participation in the program next year.

2. Magazines will need postage guaranteed to be sent to you. Otherwise, the publisher will be notified of your change in address.

Spring Bash Time Again

BY MARIE WEBBER

To close the year in style, Dinkins has planned the annual Spring Bash. Games, fun, BEER and PLUM HOLLOW are scheduled for the event. The activities will take place at the Shack on April 29 from 1:00 to 6:00 p.m.

The games will include such old favorites as volleyball, sack races, frisbee throws, and the favorite of favorites, the raw egg toss. If that doesn't suit your fancy, PLUM HOLLOW will return again. This blue grass band has time and again proven to bring Winthrop foot stomping enjoyment. To make the day a guaranteed hit, Dinkins has promised to let the BEER flow.

As a primer for this event, there will be a midnight swim beginning at 11:00 p.m. on April 28. There will be refreshments and plenty of fun for all.

Congratulations SENIORS

HERE'S LOOKING AT YOU!!

THE JOHNSONIAN Staff

Wishes You Luck

1978
By Sidney A. Breeze

The contestants were all assembled. Their trainers paced nervously. This was it; this was the Big One. The spectators spoke in hushed whispers as the moments drew nearer for the beginning of The Great Race... the Fight to the Finish. Yes, this was the Come-See-Me Weekend Annual Frog Jumping Contest.

It was a Sunday afternoon, the time was 2 p.m. The spotter was the nationally-known celebrity, Ronald McDonald (yes, that’s right—“Who’s our McFavorite hamburger down?...’). The drama of the contest was added to by the music of the Caledonian Pipe Band. People from all over came to see WHO would be the winner.

The first contestant was Vernon Grant, last year’s winner. The spunky little fella—the mayor’s choice—jumped an impressive 10’5”. Would the winner be the same as the year before? Only time would tell.

Winthrop College was represented by Diane Mayen’s champ, Chelsea. Unfortunately, Winthrop’s female hope didn’t get too far off the ground (pardon the pun), and came up with a jump of 7’4”—not a bad jump, by any means—but not good enough. Bob Knight’s Joe Cool III fizzled terribly. Afterwards, Bob (being the sport he is) attributed Joe Cool’s failure to his confusing Diane’s frog, with his own.

One hopeful was disqualified for being too small. (The little fella was only 2’ long.)

Two political candidates, Colleen Yates and Tom Smith (Smith is a candidate for S.C. Lt. Gov.) entered frogs—both of which didn’t do very well. Ms. Yates donated her frog, the Sumter Co. Champ, to the city of Rock Hill for next year’s competition.

Several frogs fizzled at the starting block—Jose, Elma, Erod-oh, so many. Who would win the coveted ceramic, gold plated frog which signified the winner of this most tense competition?

One light moment in the competition was produced by one of the female trainers who was obviously terrified of her own frog. The poor girl screamed and jumped to the crowd’s delight as the tension was momentarily reduced to silly giggles.

Then, finally, the contest was over. It was time to announce the winner. Third place went to Stamp Jumper, with an 11’2” jump; second place went to Freedly—13” Jump. The time came for the announcement of the winner.

The crowd cheered wildly as the chubby, green, song-legged John Boatwright, from a humble little pond in Leslie, S.C., was tagged as this year’s Come-See-Me Weekend Annual Frog Jumping Contest champion. The happy trainer, Mr. Henry S. Griffith, of Leslie, held his champ proudly as his young son clutched the large trophy, while photographers gravitated around them. And now, back to you, Howard....

Mr. Henry S. Griffith of Leslie, S.C. holds champion frog, John Boatwright, while son clutches trophy. (Photo by A.P. Smith)

Rice Krispie’s Treat

BY SUDIE TAYLOR

Vernon Grant owes it all to Rice Krispies. A bowl a day isn’t the cause of his success, but the three elfin creatures Snap, Crackle and Pop he created are.

Illustrator, cartoonist and artist, 21 of Grant’s works are on display throughout April in Rutledge’s Intimate Gallery. Grant is also father of “Glen the Frog,” the symbol of Rock Hill’s annual Come-See-Me Weekend.

All of Grant’s paintings have a homespun, innocent, Norman Rockwell quality. Scenes of farming, hunting, and skiing are popular. Young couples and sailors are also favorite subjects, each with wide, blue eyes, pug noses, and angular bodies and fingers.

Seven works of the exhibition are devoted to illustrations of favorite nursery rhymes. In both “Sing a Song of Sixpence” and “Old King Cole,” variations of the Rice Krispie trademark mascots are pictured.

Each of the works displays a whimsical, old-fashioned air. In one, a country girl is pictured stomping her foot to the beat of a nearby phonograph record, while the cow she is milking looks on disapprovingly. Another quasi-one shows a high school couple sitting in the rain for the box. The lanky boy holds a tiny umbrella over the fair-haired girl while raindrops trickle down his face. Grant brings a unique, child-like magic to each of his paintings.

While Vernon Grant may owe it all to Rice Krispies, he is quite an artist in his own right. Snap, Crackle, and Pop would agree.
BY BONNIE JERDON

A renowned poet, he had scheduled a poetry reading at Winthrop one afternoon that week. April 13, before continuing his trip to Boone, N.C. His host, Scott Ludvigson, was concerned, for he was several hours late. It was a long drive from Auburn, Alabama, where R.T. Smith, the poet, was also a professor. For one with preconceived ideas of poet wringing professors with bald pates, spreading mustaches, entered the room with Mr. Ludvigson, sharp, brown beard framed his narrow face. Green-brown eyes peered blamed upon bis tardiness. His classes at Auburn, his magazine, and his poetry.

But left behind his blues. Smiling, Smith added a couple novels which he said were very bad. He started writing shorter and shorter things until he settled on poetry. That was six years ago. His poems have been published in magazines across the country from New York to New Mexico. One poem is currently being considered for THE PARIS REVIEW.

Oh Coward-Brilliance In Two Acts

FEELING as if I were watching a musical done by a professional group of actors rather than college performers, I could not help but be singularly amazed by the wide range and the professional ability of the actors.

Ralph Johnson

Feeling as if I were watching a musical done by a professional group of actors rather than college performers, I could not help but be singularly amazed by the wide range and the professional ability of the actors.

BY RALPH JOHNSON

To begin the musical, but I'm not an old Drifter fan. At the peak of their popularity, I was but a mere gzm in somebody's eye; possibly not even that far along. And when Under the Boardwalk was performed, they were a hit. Now The Sounds of the Drifters, who don't have that much fun for me, are proving to be a hit. The lead singer sang a bit off key and each member seemed to be playing his own best. Eventually, however, they lightened up and made a respectable finish.

After a brief break dunng which the band members were added to the rest of the equipment, the men returned and began The Sounds of The Drifters, who came out with a flourish. They sang and danced their way through not only a number of old Drifters tunes, but also through some songs which were popular at the same time. A great nostalgia trip for those who remember the Drifters, and good fun for those who don't.

Chorale and Singers To Present Concert

The Winthrop College Chorale and the Winthrop Singers will perform concert at 8 p.m. Thursday, April 27 and 28, in South Hall on the campus.

The chorale, a select chorus of 33 voices, will perform featured motet by Bach, titled "Jesu, mein Freude." (My Great Joy). The 25-minute piece features one hymn throughout, alternating with passages from the eighth chapter of Romans. Secular music by Brahms and Aaron Copland is also included in the chorale program. The groups will each perform portions of a program they gave at the Music Educators National Conference in Chicago April 12-16. Included are "A Fifth of Beethoven," "American Trilogy," and "Old Fashioned Love Song." A number of solos by various members of the 15-member group are also planned.

Both groups are conducted by Robert Edgerton, director of choral activities at Winthrop.

The senior year blues.

The end of college, the last year. You can't wait to get out, to be rid of endless lectures, tortuous finals, required courses about which you couldn't care less. Yet leaving... Where are you going? And why? And will it work?

To introduce the idea of life insurance at the end of college, the last year, many questions. Why? Why not wait? Can't you put it off? Of course you can, and millions of people do. But you might be impressed by the fact that over half a million college students started with our plan.

Why does life insurance seem a good idea to so many seniors? Perhaps because they feel the inevitable encounter with the real world, even while they're still plugging away in college. Or maybe it's because they're already thinking about things like investments and protection. And, of course, it's easy to see the financial motive; there's no more economical time to begin a life insurance program than when you're young.

Fidelity Union Life is set up to work specially for you. Think of it as a couple of interesting facts: the average age of our policyholders is 29, the average age of our policyholders is 29; the average age of our policyholders is 29. And our College/Military plan is designed especially for seniors.

We're glad to talk with you, or simply send you some interesting information. Get in touch with us today!
Labor's Blacklist
Reprinted From THE WALL STREET JOURNAL

It is not often that we stick our nose into a strictly private conflict between management and labor. Especially when the struggling match goes back 16 years. We just assume that sooner or later one party or the other will blow in the town or both sides will be so black and blue that they'll come to a gapping compromise.

But the beef between the Amalgamated Clothing and Textile Workers Union and J.P. Stevens & Co., which dates to at least 1963, has gotten out of hand. The union has essentially lost its long fight to organize Stevens. Most of the 44,000 workers of Stevens' 83 plants through the South have made it painfully clear that they do not want to be represented by Amalgamated. Over the years the union has tried elections in the 12 District locations and lost all but one, at Roanoke Rapids, N.C., which voted union 1,826 to 3,448 in 1974.

The union has lost a fortune in its long drive, and its frustration and bitterness are not hard to understand. But we can't sympathize with the union's last-ditch tactics. Because Stevens can't be beaten in a fair and square stand-up fight, Amalgamated has now resorted to terrorizing businessmen who do business with Stevens. The object is to starve Stevens into submission by isolating it from the rest of the business and financial community.

The tactic isn't likely to achieve the union's goals, but it is having dramatic short-term effects. Manufacturers Hanover Corp., threatened by the union with having union pension funds yanked out of the bank, has parted instead with two directors associated with Stevens. They are James D. Finley, chairman and chief executive of the textile firm and David W. Mitchell, a Stevens director who also is chairman and chief executive of Avon Products Inc.

Then it was Avon's turn, yanking Mr. Mitchell off Stevens' board after the textile union threatened a boycott of Avon products, on top of its unsuccessful boycott of Ste- wen's products. A string of labor leaders, politicians and clergy—men including a number of Catholic bishops—openly advocate the action. The same tactics applied to Stevens' board. Unlike a straightforward boycott, a letter signed by 30 or more of the textile union leaders area says that such a statement is a threat to the business area being.

And it is all madness fry by now. There is no denying that Stevens lost its union vote but union claims that the company does not fight fair are more dubious. It's true that over the last 15 years the union has been able to make unfair labor practice charges against Stevens stick 15 times. On the other hand, hundreds of its complaints have been dismissed, and the firm is confident that the National Labor Relations Board is scarcely antinun, this seems to us to be the worst kind of hard, tough fight, not the record of a rogue employer. Even the 12 successful complaints seem to have little to do with the union's inability to win elections.

Clearly, the problems with J.P. Stevens, the Southern textile industry and the South in general are not going to be toughened by the likes of a single corporate management. The textile industry is subject to fierce international competi-

Jones And Louland
Honor@ed

Dr. Dorothy Jones, professor of sociology at the University of Southern Mississippi, has been selected as the Outstanding Junior Faculty Member at the annual meeting of Phi Kappa Phi. Mrs. Jones is the first woman to receive this honor. She was selected by the Student Senate of Phi Kappa Phi for her scholarly contributions and her dedication to the welfare of students. She has been a member of Phi Kappa Phi since its founding in 1909.

DOROTHY JONES

Forty-three Inducted Into PKP

Forty-three Winthrop College students have been inducted into Phi Kappa Phi, the national honor society for scholastic achievement. Eight women, 30 junior and five graduate students were honored in induction ceremonies April 6. Membership is open to students in all fields of study who maintain high scholastic standards and rank in the top five percent of their class in the final semester of their junior year or who rank in the top 10 percent of their senior class.

The following students were inducted. They are listed with their hometowns and majors:

SSENORS - Larry Dale Dow of Rock Hill, economics; Charles Derwood Eames of Lincoln, chemistry; Gompich tylko Elora of Fort Mill, history and political science; Terry Paul Jackson of Rock Hill, business administration; and Joseph S. Smith of Fort Mill, business administration.

JUNIORS - Natasha B. Blackwell of Rock Hill, fashion merchandising; G. W. Burton of Charlotte, home economics; Angela Lorraine Campbell of Panama Beach, Fla., biology; Cathy Keohoe Campbell of Mooresville, history; Sally J. Cavin of Charleston, history; and Vicky Lynn Cooch of Indian, special education; Kay Worthington of Orangeburg, interior design; James Elliott of Charleston, history; and Sherryl H. Elrod of Charlotte, history.

GRADUATE STUDENTS - Miriam Boyle of Lancaster, computer science; and Anne Love of Rock Hill, business administration.

JONES AND LOULAND will be honored at the final meeting of Phi Kappa Phi.
Dr. Lewis Awarded Highest Honor

Elodie Patricia Bailey Lewis, dean of the School of Nursing at the University of North Carolina at Greensboro, was awarded the Mary Mildred Sullivan Award on Sunday, April 15, at the annual Winthrop College Alumni Association meeting.

Dr. Lewis, who attended Winthrop from 1936 to 1938, was nominated for the honor by Dean W. E. Daughtry, 215 Park Road, Portsmouth, Va., Ma. Cole will present the award on Monday, April 30, at Winthrop. The award was presented by Charles B. Vail, president of Winthrop College, during the morning business meeting.

In its nominating letter, the Greensboro Alumni Chapter called Dr. Lewis a modern Florence Nightingale. "Her career in nursing has brought her much recognition on local, state and national levels. Her innovative approaches to the health care field, promoting new concepts and encouraging high professional standards of nursing care, will long be felt in our country's efforts to provide quality health care for patients," the letter said.

Dr. Lewis was born April 22, 1920, at Page Pond, S.C. She graduated from Pageland High School in 1936 where she was salutatorian. She attended Winthrop three years before transferring to Vanderbuilt University to pursue a nursing degree. There was no bachelor's program in nursing at UNC-G in 1966. She built the program from scratch, since there were no students, faculty, curriculum or physical facilities.

Under her leadership, the UNC-G nursing school became the largest in North Carolina in seven years. She was awarded the O. Max Gardner Award for excellence in higher education in 1976 as the faculty member in the University of North Carolina system who had made the greatest contribution to the welfare of the human race.

She was a charter fellow of the National Academy of Nursing. She currently serves as president of the American Association of Colleges of Nursing.

Dr. Lewis has written some 30 articles for professional publications; served on local, state and national committees; worked diligently for the enactment of vital legislation—the North Carolina Nurse Practice Act and the U.S. Nurse Training Act; and served as a consultant for the Division of Nursing, Department of Health, Education and Welfare.

She teaches a Sunday School class of 10-year-old boys and volunteers her services as a nurse for persons unable to secure an emergency nurse.

By coincidence, Dr. Lewis is being honored by Winthrop College at a time when plans are underway for establishing a bachelor of science in nursing degree at Winthrop. A cooperative program with the Medical University of South Carolina, the degree will be a continuation program for registered nurses.

Associate Dean Needed

By Marie Webber

The Dean of Students Office is presently in the process of filling the position of Associate Dean of Students/Director of Housing to begin in July of this year.

The Dean of Students Office is searching for someone who has at least 1 year of full time work experience in college or university housing, extensive experience in staff development, and experience in dorm programming, budget preparation, and management.

The responsibilities of this position will include effective reorganization of the housing program, the housing office activities, staff supervision, selection and training of graduate residence directors and resident assistants, and work with the SGA Judicial Branch.

Smith Wins Second

Winthrop College senior Timothy Quay Smith of Belmont, N.C., placed second among the national collegiate organist competition at the annual convention of the Music Teachers National Association in Chicago April 4.

Smith was one of five finalists from across the nation to compete in the MTNA competition. He was chosen from the nationals by winning the South Carolina auditions in November and the southern division auditions in Louisville, Ky., in February.

Smith, 22, son of Mr. and Mrs. Quay T. Smith, 111 Forrest Drive, Belmont, N.C., is an organ major in the School of Music at Winthrop. His principal teacher during his high school and college years has been David Lowry, college organist at Winthrop. He is a graduate of South Point High in Belmont.

A scholarship student, Smith is a member of the regular Winthrop Chorale. He won the 1976 student competition of the Charlotte Chapter of the American Guild of Organists.

Smith also serves as organist/choirmaster of Purdy Presbyterian Church in Chester.

Student Recital Announced

Kathleen Daughtrey Cole, a graduate student from Charlotte, N.C., will give a voice recital Sunday, April 30, at 8 p.m. in the auditorium of Winthrop College. The recital is open to the public free of charge.

Daughter of Col. George W. E. Cole Jr., 2115 South Road, Fort Worth, Va., Ma. Cole will perform compositions by Mozart, Schubert, Tippett, Strauss and Barber.

She was a finalist in the Regional Metropolitcan Opera Auditions in Canton, Ga., in February, 1978.

The vocal recital is partially supported by the Robert and Jane Carter Foundation, Inc.

PABST EXTRA LIGHT

HALF THE CALORIES, ALL THE TASTE, NATURALLY!
Winthrop College basketball coach Nelld Gordon has signed one of South Carolina's top high school prospects to play for the Eagles next year.

Timothy Wayne Raxter, an 18-year-old senior at Rock Hill High, has signed a grant-in-aid to attend Winthrop next fall. A 6-6, 195-pounder, Raxter led his high school team to a 16-8 record and to the finals of the upper state playoffs this year.

Raxter was all-conference and all-area during his junior and senior years. He was also named all-tournament during his senior year. In 1977-78, he averaged 18.9 points and 15.1 rebounds per game. He hit 54 percent from the floor and 62 percent at the foul line. His high game was against Union when he scored 26 points.

During his junior year, Raxter scored 18.6 points, grabbed 17.5 rebounds and blocked 72 shots. He hit 63 percent from the floor and had 29 points, a career high, against Lancaster.

Coach Gordon called Raxter an outstanding defensive player. "He will give us a front line that few colleges will be able to match," he said.

Gordon, who has recruited 10 other players for Winthrop's first basketball team next year, said Raxter was the only player he tried to recruit this spring. "He was our top prospect from the beginning of the year," he said.

Raxter said he chose Winthrop because he liked the school, the students, the basketball players and the coach. "I feel I'll enjoy playing there," he said.

He is the son of Jerry and Linda Raxter, 904 Kentwood Drive, Rock Hill.

Special Olympics — Special Day

Special Olympics Events held at Northwestern High School April 14 from 9:00 until 3:00 were exciting for all participants and volunteers alike.

Hundreds of children gathered Friday morning to take part in the Third Annual Rock Hill Special Olympics co-sponsored by Camp Arc and the Winthrop Human Development Center. Co-ordinators were Hiram Hutchinson from Camp Arc, Jack Tarleton from the Human Development Center, Tom Duncan, also from the Human Development Center, and Lee Alford.

The day was clear and sunny-perfect for over four hundred students to participate in planned athletic events. Schools represented were: Samuel Fork Elementary, Kenshaw Elementary No. 1, Northside Elementary, Heath Springs Elementary, Buford Elementary, Buford High, Kenshaw Elementary No. 2, York No. 1, North A. High, Southside Elementary, South Jr. High, Lancaster High (I), New Horizons, Clover, Edgewood Elementary, Great Falls Elementary, Great Falls Middle, College Street Elementary, Jones Elementary, Andrew Johnson High, Lancaster High (II), Fort Lawn Elementary, and Erwin Elementary. Each student wore a particular colored T-shirt identifying his school, and banners marked spots in the bleachers for each.

First call in the field was for the Softball Throw where participants were called by age groups. On the track, relays and the fifty-yard dash were being run. A sky show highlighted the lunch hour while youngsters, volunteers, and spectators ate boxed sandwiches and hamburgers, and drank iced tea or Coke.

In between events, Jimmy Ray from the YMCA organized other activities to entertain the athletes. Anne Martin from the York County Museum intrigued spectators with live snakes, while the "Great Zamboni's" performed during gymnasium breaks. The Winthrop Drama Theatre applied make-up to would-be cowgirls. After lunch, participants ran the 200-yard dash and completed the standing long jump. Closing ceremonies in the early afternoon marked the end of an enjoyable day.

Volunteer Coordinator said, "Special thanks go to Winthrop College Students who made up a majority of our volunteers. The Alpha Mu Omega Fraternity, Delta Zeta Sorority, and the Drama Club represented group volunteers. Volunteers came from several fraternity groups, from Rock Hill including the Insurance Women of York County, the Newcomen Club, the Jr. Women's Club, the Jr. Welfare League, Beta Sigma Phi Sorority, Community Service Officers and those from City Parks and Recreation. Students from the Catawba Academy also volunteered."

"They all did a super job and we hope to see them again next year," Reeves said.

The kids didn't have a lot of time to talk. They were busy getting ready to run or throw, or just having a good time. When Bernard Drakesford told Winthrop Elementary was asked what kind of day he was having, he said, "A good day!"

And it was, too.
Professors Receive Grants

Ten faculty members have received grants for research projects through the Winthrop College Research Council.

They are:

- Roger Baumgarte, $2,266 in support of "Andrew Morell: Translator of Liberal Thought."
- Mark L. Kowal, $1,400 in support of "A Biography of Samuel White Baker.
- Edward F. Adams, $2,255 in support of "An Analysis of Wages Earned by Full-Time and Part-Time Female Workers.
- C. Michael Smith, $472 in support of Information of Carson McCullers.
- Anne B. Keyt, $250 in support of "Can the Human and a half years in the armed forces before returning to LSU as a teacher and there he worked on his dissertation. He has contributed translations to the collage des hautes etudes in Paris.

When asked how he feels about retiring, Dr. Guilbeau replied, "After 40 years of teaching, and other things, it is time for me to stay in Rock Hill though I am preparing a two-volume work that I expect to have ready in 180 days, dealing with French linguistics."

Mr. Paul D. Whitten has taught at Winthrop for 20 years. Before coming here in 1947, Whitten worked in Chemistry for 12 years and has been involved in a number of student and community activities.

Dr. Guilbeau feels that the students are more responsible and more serious than the students were when they were working to support themselves.

Ernst Archer Professor For 1978

Ernst R. Archer, professor of management at Winthrop College, has been named the school's Distinguished Professor for 1978.

Charles B. Wall, president of Winthrop, presented the citation at a faculty meeting Tuesday afternoon (April 18).

The citation carries a $500 cash award from the Winthrop Alumni Association and release time for research.

Archer is the 18th faculty member to receive the Distinguished Professor Award. Selection is made by a student-faculty committee.

Citing his combination of "industry, intellect, and excellent academic credentials," President Wall said Archer has influenced markedly the lives and careers of his students.

"In him we have the striking example of a superior individual who maintains freshness in his teaching, a reputation for excellence in public service and an impressive history of research and publication," said the Winthrop president.

Wall said Archer's students have been the "beneficiaries of his thoughtfulness, his knowledge and academic talent. "Equally important, the businesses and industries in 1967 to look to Winthrop for assistance now enjoy the extraordinary skill of the distinguished professor," he said.

Archer has assisted in the development of more than 2,000 corporate managers since he joined the Winthrop faculty in August 1958.

A native of Watkinsonville, Ga., Archer came to Winthrop from Georgia College, where he was an assistant professor.

He was an industrial engineer with Gillette from 1958 to 1963. He joined Burlington Industries in 1963 as a senior industrial engineer and later served as production manager of a Missouri plant and manager of a Georgia plant.

Archer left Burlington in 1966 to become corporate director of industrial engineering for the apparel division of Philadelphia and Reading Corp. He returned to Georgia College in 1967.
Everyone says that your college years are the best years of your life. That may be so, but they're sure not the richest. And that's where McDonald's can help. We've got enough good, hot food to keep you going through exams, spring breaks and the games. And still leave you enough money to have some fun. So stop by McDonald's for your next meal or snack. We can go through college together.
