What is security?

BY JEFF CLARK AND LISA WRIGHT

Security is an unusual word which has many definitions. However, a particular definition is prevalent in each area where the word is used.

At Winthrop College, Security has a most definite meaning — the patrol or campus police which "are here for the protection of students and their property," according to the Winthrop Student Handbook, 1978-79.

This group of officers, who have their main office in MacBryde Hall, are dedicated to their jobs and "have a genuine interest in students and want to help them."

Winthrop Campus Security is an organization similar to other established organizations. Security has many rules and regulations governing such functions as traffic, parking, m-o-u-s-e vehicle registration, and campus order.

This description is an explanation of what Security at Winthrop is. The JOHNSONIAN will, in further issues, analyze Security regulations and procedures in order to observe whether or not the Winthrop College Security follows the regulations set for its operation.

What some students have to say

Janet Eubenburg, junior, related a recent run-in she had with Security. "The first day I was back from Christmas recess my car was parked in the middle of the parking lot in Lee Wicker. While my boyfriend and I were unloading my stuff, Security towed away my car. I was not blocking anyone, and I was not parked there very long at all. Then they started to tow my boyfriend's car and he ended up paying $10.00."

Donna Stupone, junior, claims, "Security is inconsistent. One day they will tow cars and give tickets and the next day they won't do anything." She told us, "One afternoon my boyfriend and I couldn't get out of a parking place. Security wouldn't tell anyone to move their car so we had to go up over the curb to get out."

Several students suggested that Security drive through the pits and alumni parking lots more than they do.

Junior Mary Coree wanted to know, "Why can't Security help someone with their car when they need help. For example, helping someone to jump start their car?"

One student's gripe

Security regulations state: "The registrant must present a valid driver's license, state vehicle registration certificate, and liability insurance policy or certificate to register a vehicle. If the state vehicle registration certificate is in the name of someone other than the prospective Winthrop registrant, written authorization from the legal state registrant must also be presented at the same time of registration."

This regulation sounds excellent and would greatly insure the proper registration of all cars on campus, if properly enforced. However, Jeff Clark, a spring semester transfer student, did not follow these guidelines when registering his car.

CLark went to the Security Office with driver's license and registration to register his car. After entering and asking about registering his vehicle, Clark was told to fill out a card which could be found on the table to the right of the entrance.

Clark filled out the form for his father's out-of-state car and was prepared to present the necessary papers; yet, those papers were never requested. The secretary asked for the $4.00 fee and handed Clark a decal for his car. The secretary did not ask for his driver's license, state vehicle registration (for an out-of-state car), or liability insurance policy or certificate. Also, even though the car was registered in Clark's father's name, written authorization from the legal owner was not required.

The only prerequisites for a registration decal, in Clark's case, was $4.00 and his signature.

Youth services need volunteers

BY JEFF CLARK

Winthrop students working toward a degree in education or social work who are looking for some type of work in their fields that will give both experience and a good statement on the performance record now have this opportunity open to them.

Steve White, coordinator with the South Carolina Department of Youth Services-Youth Bureau Division, is operating a tutoring program for junior high students through the Youth Bureau. The program involves working with children from ages 13 to 15 or 16 in academic areas such as English and math and also in recreational activities like basketball, softball and swimming.

The Youth Bureau, acting as an outlet for children and their needs, specializes in coordinating resources in order to find solutions to the problems which contribute to youth delinquency. In the times past, people did not recognize the needs of the disadvantaged child, but now, through giving them programs like tutoring, students can find ways to help solve youth problems. In this way, the Youth Bureau provides a means for the community as a whole to accept part of the responsibility of assisting its disadvantaged children.

White is interested in locating volunteers of all types to help with this project. "Many of the kids involved in the program are socially disadvantaged," White said. "They aren't stupid. In fact, the majority of them are very intelligent and have great potential if they just had an older 'brother' or 'sister' to look up to and learn from."

The hours for tutoring are flexible to the maximum. The hours are primarily worked out between the student and the tutor on an individual one-to-one basis, usually five days per week for about an hour or two.

There have been and are now several Winthrop students helping kids with all types of studies. One student helped a boy for an entire semester by simply going over his homework with him twice a week.

Anyone can tutor, White said. All a student has to do is meet with White and answer a few questions about what type of person he could not work with. "No special qualifications are necessary. Anyone who can shoot basketball or play the drums on Saturday or Sunday is qualified for volunteer work with kids.

Anyone who can do anything is a potential tutor. White said that by tutoring, students may "help develop tools that (the kids) will have for the rest of their lives."

Students interested in tutoring but whose course load just won't allow it should call anyway, White said. "The Youth Bureau will be sponsoring a Summer Tutoring Camp during June and July which will involve four days of tutoring per week.

This camp will be set up for the benefit of students and tutors," White explained. "For more information concerning the program, the kids, the experience benefits, or the sign-up procedures students should call Steve White at 323-1774, during regular business hours, 9 a.m. to 5 p.m., Monday through Friday."

New dean of students named

ROCK HILL — Thurston Jeffrey (Jeff) Mann, 29, has been named dean of students at Winthrop College.

Mann, 29, who was director of student development at North Carolina State University, was approved for the deanship by the Winthrop Board of Trustees Saturday, April 2, 1979.

A native of Raleigh, Mann has been assistant dean of student development at N.C. State and assistant to the associate dean of student affairs at East Carolina University in Greenville, N.C. He served two internships in administrative positions with the N.C. Department of Administration, Office of State Personnel.

Mann holds a bachelor's degree from East Carolina (1972) and a master's degree from N.C. State (1978) where he was enrolled in a doctoral program in higher educational administration.
**Honest is assertive**

College is a place where one begins to realize that he is totally responsible for his own behavior. Often one's behavior is less than what is desired. The many situations we find ourselves in during our college years may call for a need to learn an effective way to react to problems and circumstances.

Picture this...your roommate has just asked you for the hundredth time this semester if she could borrow one of your blouses. You hate to loan out your clothes, but say yes anyway, afraid she wouldn't like you if you said no.

This is an example of a passive response. According to Dr. Gary Kannenberg of Winthrop's Counseling Center, a passive way of thinking generally means holding in thoughts and feelings. The major consequence of this is anxiety and a feeling of powerlessness.

In the above example, the girl loaning her clothes more than likely experience a feeling of irritation, either at herself or her roommate. Yet, she will carry that feeling within, denying herself a chance to get thoughts and feelings out honestly.

Now, let's look at a behavior example in the opposite extreme. Suppose two guys living in Thornton are dating the same girl. Both know about the other, and as far as the girl is concerned, both relationships are equal. One of the guys doesn't like the other dating the girl and eventually ends up knocking the daylight out of his competition.

This is an example of an aggressive response. Kannenberg said that although aggressive behavior does indeed get out thoughts and feelings, one rarely will get anything accomplished. The other person may also respond aggressively and eventually the whole point of the matter will be lost.

"And, even if you win, you can still suffer the consequences of guilt," Kannenberg said.

There is one way to respond though, that has few consequences and some benefits beyond passive or aggressive behavior. Assertive behavior is an honest and appropriate expression of what one thinks and feels.

Honest and assertive are the most beautiful things about being assertive. It can mean so much to you, and to others as well, when you can honestly tell them what's on your mind in a manner that is suitable to your age and maturity.

Assertiveness is being in touch with feelings and thoughts and being able to say them out loud and say them right.

There's no way people can realize they may be doing something you don't like, unless you tell them. Many times, YOU don't even like what you say until you start talking and put your feelings into words. All can learn something through assertive behavior.

Information on assertive training is available in the Counseling Center. It's all a matter of breaking habits.

It is being in tune with YOUR OWN thoughts and feelings that help you to be honest with yourself, so you can be honest with others. The beginning of an assertive response is an awareness of yourself.

*By Bruce McDanel*
Name your poison, continued from page 2

Maybe you think of marijuana as "kid's stuff." How about some HARD DRUGS? Would you care for any LSD? This drug must be pretty potent, because even Harvard University famous professors, Timothy Leary, after he started experimenting with this "mind expanding" drug which is used to poison coyotes and wolves on western ranches. The doctors told Herman that they would pay him $5,000 if he would engage in this project, and he was admitted to the hospital. He was sent through a strict period of abstinence and exercise to clear the drugs out of his system, and he was given plenty of vitamins to help build his resistance back to normal. Then he was brought into an operating room, and he was hooked up to several different instruments which were to measure his responses to the drugs. After the doctors hit Herman up with the first drug, and allowed it sufficient time to circulate to his brain, they asked him how he felt. Herman's eyes were wide open, and he was smiling. He stood up wobbily, then he fell flat on the floor. With effort he raised himself back up, and as he clung to the arm of one of the doctors he said: "Like, wow! That's the best drug I think I've ever done! What sensations! I feel like I'm rushing down a dark cave river in a fast canoe... I see strange lights and colors all around me... Please, doc, tell me what kind of drug that was that you just gave me... it's really fantastic!"

The doctors chuckled among themselves, and the one who was holding Herman up said: "That first injection was a placebo, Herman. You're straight as a rail right now.

"Oh... bad trip," said Herman, "BAD TRIP!"

Thoughts for the weekend: Should Winthrop have co-ed dorms? The students deserve autonomy. A co-ed dorm would be only a token extension toward granting them full human rights.

S.B. McDaniel-Graduate Student

"I think it would be better for the school in that there would be probably less damage on the halls. Besides, people are going to do what they are going to do anyway." Dick Troy-Graduate Student

"Once you reach the age of an adult, eighteen years of age, you should have the right to have visitors whenever you want. But I think the students should vote on the matter and they should decide. They should be able to take the responsibility for their own actions." William Thompson-Junior

"Co-ed dorms are for mature adults and not children. And college students can act like children at times." Gina Cunningham-Senior

"I think it's wonderful. At Wofford the dorm I was in was co-ed. None of the girls dorms ever got torn up there, only the men's dorms. I was in the co-ed dorm and we had no problems." Jack Rogers-Graduate Student

Recruiting made easy, compliments of Admissions

BY LISA WRIGHT

Many students attending Winthrop do not realize how the Admissions Office prepares for the recruiting of new students, even though they have experienced the results of their efforts. The Admissions Office works hard to prepare recruiting materials containing academic information as well as facts about cost, dormitories, social life and campus appearance. Part of the interest that students like to know when looking at colleges.

According to Dr. Knight, director of Admissions, “We are trying to give students information about academic program offerings, financial aid, and cost. Our recruiting brochures are not created to give a false impression of the campus by providing inappropriate pictures and inaccurate information. Pictures are important, but we try to give a realistic look at the campus in both words and pictures.”

One of Admissions activities includes “Winthrop Day.” High school students and their parents are invited to visit Winthrop for a day. Faculty and staff are available to discuss any questions the students and parents may have. Admissions has also created the Student Advisory Board. The board is composed of Winthrop students who provide tours of the campus for the students and parents and act as official hosts and hostesses during the Winthrop Day activities.

Prospective students are encouraged and always welcome to visit the campus. As Knight said, “If we could, we would like to let each student experience a day at Winthrop.”

Margaret Williamson, assistant director of Admissions, said, “We send samples of recruiting material to two senior English classes at Rock Hill High School and let these student look at the materials and offer suggestions for developing our brochures. We also look at recruiting material from other schools and compare our pamphlets and brochures with them. In order to find out what prospective students are interested in knowing about a college, a questionnaire was given out to a hundred students in this year’s freshman class. The questionnaires were filled out and returned to Admissions. According to Margaret Williamson, “The areas the students were most interested in were Cost-67%, financial aid-43%, dormitories-62%, campus appearance-61%, and academic program offerings-71%.”

The questionnaire helps the Admissions Office to know what type of information to focus on when preparing next year’s recruiting materials.

“Using the information obtained through the results of the questionnaires and the suggestions offered by the students in the senior English classes,” Williamson said, “we hope to publish information that is informative, as well as attractive.”

The Admissions Office is committed to giving prospective students an honest and realistic look at Winthrop and what the school is all about, not just from a pictorial point, but from the perspective of “I want to know” and “Want to know” information.

Honors dinner

The annual Honors and Awards Dinner is scheduled for Wednesday, April 11, at 6:00 p.m. in McBryde. Students will be invited by invitation only.

Trustees discuss building programs and fee changes

BY SULA M. SMITH

The Board of Trustees met Saturday, March 24 to hear free committee reports and to discuss proposed fee adjustments for the 1979-80 school year.

The meeting opened with a report from Mary Sue McHveen, chairperson for the committee for the Board of the Proposed Closing of the MacFeat Nursery and Winthrop Kindergarten.

A written report, read aloud by McHveen recommended that the two schools remain open for the next three years during which a thorough evaluation and future recommendation should be made concerning their continuance.

The recommendation was unanimously approved by the Board.

Second on the agenda was the Field House Committee report. According to Mabel Hamilton, the committee recently met with the architect commissioned to direct the complex to discuss available plans.

The 6,000-seat multi-use field house is designed with many purposes in mind. "It's something to be used for any number of things," said Hamilton, "from art or antique shows to tennis matches."

"I personally think it's a beautiful plan," she said.

Next step for the field house, according to Hamilton, is money. Funds have been decided on, but she said the committee endorses what it has seen.

The building program through 1980 was discussed next. The meeting began with a report from Hamilton from the Committee for Plans and Development. She said that a plan has been proposed to build a new MacFeat Nursery and Margaret Nance House. It was recommended to appear before the committee and to keep appearances as the old ones.

Vail said that he asked the state engineer about renovating the two buildings. He said that the engineer told him the two buildings are in such a condition that it would be almost impossible to renovate them. The renovations would cost more than a new building.

A new housing complex will be built in the same area as Wofford and Richardson. It will house the same number of students as MacFeat and Margaret Nance, leaving them available for academic purposes.

Merritt Wilkinson, Merry Rock Hill, thought that a world-wide tear down buildings until new ones have been to replace them. He felt that there were many ways the colleges could be using MacFeat and Margaret Nance instead of tearing them down.

A lengthy discussion followed.

A motion was finally made by Senator Lake that Winthrop apply to Housing and Urban Development (HUD) for a loan to build a dormitory to house 400 students with the intent of supplanting MacFeat and Margaret Nance for dorm use.

Following this discussion, the Trustees went into executive session to elect an architect to begin work for campus renovations and all construction necessary for making Winthrop accessible to handicapped students in compliance with section 504 of the Rehabilitation Act of 1973.

Wibur Smith and Associates of Columbia, McGarity and Pitts of Spartanburg, and NIBTB of Greenville were three firms to be recommended to the State Budget and Control Board by the Trustees.

The naming of the new dean of students was also approved in Executive session.

Two art exhibits on display in Rutledge

"Reflections of Italy," an art exhibit featuring the works of Mary Mintich and David Freeman, associate professors of art at Winthrop College, opened Tuesday, March 20 in the Intimate Gallery at Rutledge on the Winthrop campus.

The exhibit, which is free to the public, includes works inspired by Mintich's and Freeman's travels throughout Italy last summer as artists-in-residence based in Cortona, Italy.

The sixth annual Invitational Textile Crafts Exhibition opened in the Main Gallery of Rutledge on the Winthrop College campus Tuesday.

Some 100 works, including hand printing and weaving are on display from 19 exhibitors from 10 states. Open through April 20, the exhibitions can be viewed from 8:30 a.m.-4:30 p.m. weekdays and 2-5 p.m. Sundays.

Sigma Phi Epsilon charters first national fraternity at Winthrop

On March 31, 27 men were added to the membership files of Sigma Phi Epsilon Fraternity at Winthrop this past weekend. This event marks the induction of the first national social fraternity ever to be chartered at Winthrop College and their installation celebration paid every justice to this historic occasion.

On hand to share in the festivities were such special guests as Chuck White, executive director of Sigma Phi Epsilon National, and "Mac" MacDonough, past Grand President and Order of the Golden Rod, who is the highest award given by Sig Ep.

Following an afternoon of ceremonial affairs, the program culminated with a formal banquet at Johnson's Motor Lodge. Teams from Davidson College and Clemson University made Sigma Phi Epsilon a National Fraternity out of Richmond, Va. They have over 256 chapters across the country and are the 2nd largest fraternity in the U.S. The South Carolina Delta chapter was formerly known as Alpha Mu Omega which started at Winthrop in 1976. The group colonized with Sig Ep last April. They have been involved in such services as Special Olympics, United Way, and the Winthrop Alumni Phone Action. They sponsored the first annual Winthrop College Raft Race this past fall and support an annual scholarship fund in memory of Phil LeGrand, a Winthrop student killed in 1976.

A bright future awaits the men of South Carolina Delta. They hope next year to spearhead a drive to establish a "Fraternity Row" around the campus and make the spirit of fraternities come alive at Winthrop College.
Meet Tommy Scott Young

BY CYNTHIA J. WILSON

"Better than good Southern preaching where the voice is
pushed full range from wheezing, to a shout thrown like a
punch in the gut. This poetry reading also had visual aids-
a Hollywood handsome poet and actor breathing fire to scare the hell out of
you," said editor of Red Books, Charleen Whisnant Swansea,
upon first hearing poet and dramatist Tommy Scott Young.

Reciting from his poetic works and from the works of
Langston Hughes, Paul Lawrence Dunbar, Robert Hayden,
and Luther Keys, Young captivated the Winthrop audience
with his March 21 performance at Joyce Center.

Chris Carter, a sophomore Business Administration major,
described Young's recital as aggressive. Lisa Wright, a junior
Communications major said, "Unlike other poets, he is goddamn
because he is an actor. He puts a lot of actions into his perfor-
mance."

At the age of 36, the Blair native has studied with such artists
as Kathleen Freeman and Yaphet Koto, founded the Meat Theatre in California,
the National Endowment for the Arts Foundation, and has written two
books of poetry: "Crazy Wolf Sings a Crazy Wolf Song" and
"Black Blues and Shiny Songs.

Recognized in 1977 by Columbia Newspaper Inc. as
being one of the 10 most promising young South Carolinians,
Young has been an artist-in-residence for the South Carolina Arts Commission, the Georgia Council for the Arts and the
North Carolina Cultural Arts Commission.

As an artist-in-residence, he has taught in community
and university programs including arts at the University of Southern California, UCLA, and
Institute College.

Commenting on Young as a poet, Dr. Thomas Shealy, Foreign Students Advisor, said, "He is very representative of South Carolina as well as an intangible voice of the black people by his
use of words and language.

Sun, fun, and manatees

BY RICHARD A. PODMORE

"You can feel the pressure on every part of your body, squeezing more tightly with
every foot you descend." Does that sound like a Navy recruit-
ment ad or a beer commercial? For 14 members of a Winthrop
scuba diving class, the feeling was real at Crystal River, Florida
during Spring Break.

The class, taught by Larry Ogbum of the Waterford Dive School, made its first open
dive on Friday, March 16. The 14 students slipped into the
72 degree water at 9:00 a.m., all anxious to complete the final
exercises of the course begun at
Winthrop.

The final exercises included buddy breathing, no air ascents,
and a test of ability for coping with equipment malfunction or
loss. According to Ogbum, the class adjusted quickly to the
fresh water and silty bottom. Many of the students stated that
the deeper water presented a much different atmosphere from
that of Winthrop's pool. Ogbum said that the class hurried
through the exercises, probably so that they could have more
free time to explore their "new world."

On their first dive, the students saw a manatee, or sea
cow. The animal was about six
feet long, nearly as big around
as a 55-gallon oil drum, and
probably one of the ugliest crea-
tures that the class had ever
seen. Manatees, which are on the
endangered species list, come to
Crystal River between December
and March to feed on the vegetation and to enjoy the
warm water.

The class also encountered fish of all types. The fish
swarm in schools of twenty or more and usually kept their distance from the divers. However, a few students took some bread under
the water and the fish went wild. The students fed the fish
by hand, and they often had to move away to keep the fish
from hitting at their hands and
faces.

On Saturday, March 17, after
making five dives in two days,
the class had completed the
course. Each student was given a
certificate, a dive log book, and
an Open Water Diver jacket
patch. Ogbum said that the class
had completed the course with fewer
problems than most.

"Photographs and memories"

Picture London, England in the 1920's. The Tower, London Bridge and Buckingham Palace. From London you travel to Edinburgh, the lake district, then across the English channel to Europe. In Europe you find Ghinona, Lisbon, Algiers, Rome and Normandy. These do not dilute the cathedrals and architecture found on European soil. The spires, moats, and seemingly mystic castles of the "old world" endure. Generations of Americans visit them, preserving their memories on photographic paper, then carry them back across the Atlantic to share with friends.

Look at America in the 1900's. New Orleans in 1925 is the backdrop for a photographer's impression of the organized mayhem known as Mardi Gras. Turn the page of his photograph album and you find yourself standing ankle deep in the sand near Beaufort at WIlloghby Beach -witnessing the hurricane damage to ocean front property. Flipping over a few more pages (and a couple of years), you find yourself watching the now-stilled antics of a Girl Scout troop at camp or you are perched on the seat of a slightly leaky rowboat on the Hudson River; you are strolling through plush gardens in Connecticut or examining the Civil War wounds inflicted on Harper's Ferry, Va.

You are looking through the Haasis Family papers in the Winthrop College Archives, a collection of several thousand pieces of correspondence, photographs and family records. Eleanor Haasis (died 1976) and Cuthbert Haasis are the primary figures spotlighted in the collection. It highlights the moves, moods, and ancestry of this colorful family. Beginning with nineteenth century family letters, the collection features the preserved photographs and personal papers of Eleanor and Cuthbert Haasis. The family papers lend insight into the talents of this brother and sister in the areas of conservation and civil engineering.

Through a study of the collection, researchers are exposed to our nation's early childhood. That love for nature is reflected in this collection of family papers. While Eleanor Haasis was making her mark as a horticulturist, her brother Cuthbert was building a reputation in the field of civil engineering. A substantial portion of the photographic file in the collection is given over to Cuthbert's study of the roads, bridges, and railways that patched the Ohio countryside in the early 1900's. A graduate of Rutgers University, his photographs of these civil engineering projects are visual reminders of the turn-of-the-century determination exhibited by our nation's workers.

Cuthbert Haasis' project as a civil engineer is not preserved in pictures. His compilation of "The Book of Weight" proved to be an invaluable tool for engineers who needed a quick reference to the weight of anything from acetylene to walnuts. Well received by his contemporaries in the field of engineering, the book was published and distributed by Haasis. The family papers include copies of the book and the original manuscript.

Besides the ecological and engineering aspects of this collection, the Haasis Family Papers feature newspaper clippings that chronicle the growth of Aiken, S.C., weather records of that area (used by the Haasis' for development of planting schedules), the 1845 immigration records of one of their ancestors, and bits of memorabilia that lend insight into this respected and honored family. The Haasis papers embody a fine collection of Americana and South Caroliniana and constitute a valuable research collection for persons wishing to use the resources of the Winthrop Archives. The papers will be available to researchers this spring.

The Haasis family getting crazy. This is one of many pictures that supplement the Haasis family papers which were donated to Archives.

Tonight, let it be Löwenbräu.

THANK YOU

Winthrop

Penny's two cents worth
BY PENNY THERRELL

It's almost here. The end of another long year of college and the start of a short, sweet summer. For many college students, the problem is what to do now that you don't have anything to do. You would like to get a summer job and earn a little money for school next fall, but working at Dick's Quick Chick just doesn't cut it anymore. Well, why not try big? No one says you have to run back home to look for a job. Why not venture out into the world a little and find a new and exciting job of your own?

Every summer thousands of high school and college students are employed at theme parks around the country. They do everything from selling tickets to riding bicycles in high wire acts. Some students dance their hearts out, while others give guided tours in sign language.

The salary for theme park workers varies according to the job and the location, but it usually ranges from $2 to $8. Many of the parks even provide a place for the summer workers to live. You may work anywhere from six to nine hours a day depending on the position. There are hundreds of theme parks in almost every state in the U.S. They provide summer jobs with good pay, a chance to meet people from everywhere and a change of scenery from the old home town.

For addresses and information on the different theme parks check with the Winthrop Career and Placement Center or Dean's Library.

Another job that many college students have found challenging and exciting is working at summer camps around the country. There is a summer camp to be found for almost anything you are interested in, from tennis to water polo. You can keep up on your kid power ability while you earn a nice salary with free room and board. You can choose from a number of camp positions such as lifeguard, tennis instructor, or just a cabin counselor. You can take your choice of camps also. You can locate in the middle of the Foothills Mountains or on the sunny coast of Florida. For those of you who think it would be boring to chase little kids around all summer, just be in mind that there are little boys and little girls, there are also counselors watching over them who could prove to be very interesting.

Information and camp addresses may also be found in the Winthrop Career and Counseling Center or in any state newspaper.

Bear in mind that time is the most important element to remember in applying for these summer jobs. The jobs usually go on a first come first serve basis so you need to apply early.

A LOOK AT HISTORY
AND CURRENT EVENTS

By Dr. Birdsell Vauat, Professor of History, Winthrop College

The recent wave of Infant death in Naples has once again focused attention on southern Italy, one of the poorest-stressed areas in all western Europe.

The ancient Romans referred to southern Italy as Felix Campana, "happy Campana." But this region, known to modern Italians as the Mezzogiorno (midday), has had an unhappy past and is experiencing an unhappy present.

Today the region struggles under the heavy burden of 5.5 million people occupying some 5,249 square miles, an area about the size of Connecticut.

The crowding is most severe in Naples, the region's largest city, where some 280,000 people live in less than three square miles of the city's center. Estimates are that 65,000 families live in one-room apartments. Some 6,000 housing units have no running water; more than 10,000 have no toilets. Perhaps 90 percent of all the housing units in the old part of the city fail to meet minimum sanitary standards.

The harbor area, the so-called Quartieri Muri, are the most decayed. Houses are so dilapidated that collapsing roofs pose a constant danger.

Land speculators routinely ignore the proposals of city planners, while occasional efforts to bring the worst offenders have virtually no effect.

Such conditions encourage the spread of disease. The most recent epidemic has been preceded by many others. A cholera outbreak in 1976 frightened all of Europe.

To compound the problems of Naples, government and crime. Smuggling, theft, prostitution and drug-dealing are highly risky that they have attained close to professional status.

The fields to the north of Naples, near Capua and Caserta, add to the south, around Salerno, are fertile, but can no longer provide enough food for the growing population.

In the midst of such massive problems, the official government planners for the South are inclined simply to throw up their hands in dismay.

Once, in search of a simple solution, the planners decided that new roads would lead to economic development. The Naples area came to have an abundance of highways. But it was soon found that road building alone would not bring economic development to the region.

As a major seaport, Naples has inevitably attracted some industry, with factories producing steel, automobiles, textiles and electronic equipment.

Industrial productivity, however, remains at a disappointingly low level. Were it not for huge state subsidies, many companies would have closed.

The workers' level of education is low. Every third person in the region is a school dropout or functionally illiterate. The problem of absenteeism is immense and strikes are frequent.

Some have suggested that southern Italians simply lack the incentive to work. Yet there are some conscientious workers here. Magnificent fields and carefully tended vineyards attest to this.

But old agrarian habits are not easily transferred to an industrial setting, with its regulations and unbroken rhythm of hard work.

Unemployment is widespread. With 10 percent of Italy's people, Naples has 25 percent of the country's unemployed. Many of the unemployed are reconciled to a life of idleness and welfare payments. Among them are many university graduates, who refuse to find positions commensurate with their education.

The increasing up Naples and energizing the economy of southern Italy appear to be close to impossible. But if the current disaster strikes, there are demands and hopes for change.

"It appears that there will be action at last," a foreign reporter recently told an official in Rome.

"Don't make me laugh," the official replied.

Pi Delta Phi

Five new members were initiated this semester into the Alpha Mu Chapter of Pi Delta Phi, the French Honorary Society, according to Tom Shanly, sponsor. The five new members are:

Abdelkader Elrahal-Elarabi, Fred Hembree, Laurie Howell, Shasta Pierce, and Testa Sebhatu.

Burger eating contest

The second annual Burger Eating Contest will be held April 7, at Towncenter Mall. Representatives of local restaurants will be Jamie Ramere, Sam Crain, Jim Gibson, Tommy Simmons, and Tim Burke (alternate). The contest will be judged by six cheerleaders. T-shirts, prizes, trophies are to be awarded to the team champions as well as the individual champion.

Softball team posts season-opening victory

BY JAN WISE

Neither the weather nor Barrington College could stop the Winthrop softball team in the first game of the season March 23 at Peabody Field. The Eagle sluggers braved a constant downpour of rain to capture a 9-2 victory over Barrington, which has been the Rhode Island State Softball Champion the past two years.

Junior Chris Sherman started at the mound for the Eagles. Both teams held each other to a 0-0 tie the first inning. Winthrop jumped to a 4-1 lead the next time at bat. In the third inning the Eagles boosted the margin to 5-2 and further extended it to 7-3 in the fourth inning.

The Rhode Island school staged a successful comeback in the top of the fifth inning. Five bitters for Barrington were walked by Winthrop relief pitchers Bebbie Carroll and Glenda Gregory. Two runs were scored on walks and another two added with a sacrifice and a single by the Barrington batters.

Gregory halted the Barrington effort by snagging the 3rd out for Winthrop on a line drive hit back to the mound.

In the bottom of the fifth inning, pinch hitter Carol Gor
gus hit a deep fly ball to center which was fielded for the first out for the Eagles. First baseman Sheila Stewart then reached base on an error by the Barrington shortstop. Next, second baseman Elizabeth Bultman hit a double to score Stewart and tie the game 5-5. Bultman then reached third base on a steal. Third baseman Pat Springs and catcher Denise Skallet were then walked by the Barrington pitcher. With the bases loaded, shortstop Elaine Baker came to the plate and connected on a hit to third base which was dropped by the Barrington player. Bultman was able to score the winning run for Winthrop on the error.

Women's tennis team is undefeated

BY JAN WISE

The Winthrop women's tennis team has gone undefeated in the first five matches of the season to date. Now at 5-0, the Eagles boast a strong lineup with junior Amie Jones, a three-year starter on the tennis team. Also with successful records are seniors Amie Paul and Robin Lichteck; as are sophomore Julia Wingard and freshmen Donna Lewis, Ailyn Hoag, Cindy Roof and Lori Hoag, winning rim for Winthrop on the error.

Men netters are 3-5
BY DAVID JACKSON

Midway through this current season, the Winthrop Eagle men's tennis team's record stands at 3-5. The Eagle netters are under the direction of second-year coach Pat Taylor, who also doubles as Rock Hill Country Club pro.

Taylor has a relatively young seven-man squad which includes three sophomores and four juniors. "Our three sophomores play Nos. 3, 4, and 5; so we have a good base for the future," said Taylor.

The Eagles play a 20-game schedule which includes such tough clubs as Limestone, North Greenville and UNC-Charlotte.

The season ends with the District Six tournament April 19-21 at Presbyterian College. Taylor said "District Six is a very tough tennis district. Presbyterian finished 8th in the nation last year and Coastal Carolina is also very good."

Winthrop's No. 1 player, Chris Harrington, is a junior from Charleston, S.C. "While he is an experienced player, this is his first year of intercollegiate tennis. This really hurt him early in the season, but he's coming on strong now," Taylor said. Should Harrington capture the District Six singles title, which Taylor feels he has an excellent chance of doing, he would advance to the NAIA national championship tournament in Kansas City.

Aside from Harrington, the Eagle tennis team consists of No. 2 player Sid Jones, No. 3 David Johnson, No. 4 Doug McDaniel, No. 5 Dexter White and No. 6 Lanny Lowery.

Doubles teams for the Eagles are No. 1 Harrington and Jones, and No. 2 Johnson and White. The No. 3 doubles are shared by McDaniel, Lowery and Billy Martin.

Men's tennis is still in its infancy at Winthrop. However, with a streamlined schedule the young and improving Eagle netters have a good chance of posting their second consecutive winning record.

The Winthrop publication finished second to the University of Missouri-Kansas City.

Cheerleading try-outs
Athletic Director Nield Gordon announced that try-outs for the 1979-1980 cheerleading squad will be held April 17.

Gordon said, "All students, regardless of class, are invited to try out for the squad." There are five openings for women and the number of men will be determined at try-outs.

"All interested students should report to Withers gym, 7:00, Tuesday, April 10 for the first of two workshops," said Gordon.
