WC students elect senators, officers

BY MICHELE HAULTER

Winthrop students voted for Dickins Student Union chairmen, Intramural Board officers, freshman class president and vice-president, and Student Government Association senators on Wednesday, Sept. 12.

The new DSU chairpersons are Lisa Bahorek, activities committee; Amy Nichols, short courses; and Don Morton, special events.

Intramural Board officers are David Capps, Jane Garza, Sidney Jones, Donna Massey, and Angie Morris.

Also, Stella Oliver, Jan Rampus, Sherry Stewart, and Cynthia Wagg.

Anthony Burdette won the election for freshman class president, and Robin Beasley is the new vice-president for the freshman class.

SGA senators are Kim Dickens, Berenys Fisher, and Joanna Simmons for Bancroft; Karen Smith for Breazeale; Jym Byrd, Tommy Mattox, and Greg Lewis, Tommy Mattox, and Greg Lewis for Phelps; Steve Ann Hickey, and Tammy Mc- Lee Wicker.

Others elected were George Gardner, Alex Oliphant, Wilfred Rodgers, and Jay Witherspoon for Richmond; David Bedinger for Roddye; and Ducky Coble, Laura Jamison, Karen Potton, and Toni Wallace for Wofford; Nancy Lobitz for Winthrop Lodge.

According to Cherry Wansky, chairman of the election board, voter turn-out was about average. "There were a lot of people running for offices," she said. "About 67 ran, which is really good for Winthrop. The competition for senators was really tight in all the races, but especially Phelps and Richmond. In Richmond there were 11 people running, which made for a lot of campaigning."

SGA vice-president Jimmie Williamson said that even though more students than usual ran for senate, not enough day students ran, SGA will appoint enough to cover the day student election.

The number of students elected is based on population, with about one senator to every 100 students.

As part of SGA's legislative branch, senators represent student opinion with their votes on current issues. Recommendations are also made by senators to administrators concerning student interest.

The Intramural Board is designed to organize teams, individual, dual, or club athletic competition for all Winthrop students, faculty and staff.

According to Jan Rampus, one of the new officers, they are all looking forward to a great year. "Many students are already involved with intramurals," she said, "and we anticipate more involvement and excitement in sports at Winthrop."

For the third straight year, Winthrop College has set an all-time enrollment record. A total of 4,979 students registered for classes this fall to eclipse the previous record of 4,810 set a year ago. This is the sixth straight year that Winthrop's enrollment has increased.

The 4,979 students are a 7.3 percent increase over last year and 31 percent increase for state-supported colleges and universities.

Men make up 50 percent of the student body. There are 1,473 men and 3,506 women enrolled at Winthrop this year.

The freshman class of 1,329 is the largest since 1970 when 1,339 freshmen entered Winthrop. The sophomore class of 885 is the largest since 1971 when 984 entered Winthrop. The 872-member junior class is the largest junior class ever and the senior class of 752 is the largest since 1973.

There are 1,066 graduate students registered, a slight decrease from last year. There are 3,501 full-time students and 1,478 part time.

Film maker presents "Gal Young Un"

Florida film maker Victor Nunez will present his new feature length work, "Gal Young Un," Sept. 19 in Joyces Center for Continuing Education at Winthrop College. Nunez will be on hand to comment on his work and answer questions following the 8 p.m. screening. The program is free to the public.

"Gal Young Un" is adapted from a short story by Marjorie Rawlings. In the story, Matt, an old woman, lives alone in her rural Georgia home. She meets "Trax," a good-for-nothing young man who schemes to take her land and home.

Nunez shot the film in Georgia's Alachua County near Rawlings' home. Production work included restoration of the author's home and a car explosion scene designed by J.B. Jones, special effects man for several James Bond movies.

Nunez studied film at Antioch College and received a Master of Fine Arts degree at the University of California at Los Angeles. While on the West Coast, Nunez was a directing fellow at the American Film Institute. He later became assistant professor of film production at Florida State University. Several years ago, he left teaching to work full time at film making.

The Rock Hill presentation is part of Independent American Film Makers: Southern Circuit, a traveling program of films and film makers. The series is sponsored by Joyces Center at Winthrop, the Greenville County Museum of Art, the Columbia Museum of Art, the College of Charleston, Image and the High Museum of Art in Atlanta, and the New South Film Center, a facility of the Mississippi Museum of Fine Arts.

Grant assistance is provided by the National Endowment for the Arts, the South Carolina Art Commission, the Atlanta Bureau of Cultural and International Affairs, and the Mississippi Arts Council.

For more information, call Joyces Center, (803) 323-2196.

A scene from the Nunes film to be shown at Joyces.
Save money, preserve health, quit smoking

Health is the word that's going places these days. Americans are eating less, exercising more, getting fit. Fray day I see people jogging everywhere, on the road to the college farm, or along Eden Terrace. Overweight people are dropping pounds, slimming down, realizing their potential.

Another trend among Americans in general and college students in particular is giving up the health-damaging habit of cigarette smoking. THE FUTURE magazine found that only 7% of Princeton's freshmen were smokers in 1977. Princeton's figure in 1969 was 45% of the freshmen were smokers. I don't blame Harvard's freshman said they were smokers.

How about Winthrop College? Are we as aware of the detrimental smoking causes our health? I know most of us are. The American Cancer Society and other organizations have saturated us with health warnings. Everyone knows that cigarette smoking is damaging to one's health. It is so on each package. The problem of smoking is not one of awareness--it is twofold.

This is not a story about smoking. It is about health. How to get it. It is not about how to smoke. It is about how to get rid of smoking. It is not about the reasons why people begin smoking. It is about the reasons why people should quit.

There are people on this campus who think that the first floors in Bancroft and Margaret Nance residence halls should be considered the smoking floor at Grand Central Station. Despite the "No Smoking," signs posted on the doors, male students continue to use the residence halls as an ashtray. It is a habit of students who have smoked for years. Male smokers also seem to think that this is just a way to get a break. It's all right to walk in and find their way, unescorted, to which ever room they're visiting. Is it my opinion that this traffic through Bancroft and Margaret Nance residence halls should be stopped. And I'm not alone in that opinion. I'm sure that some male students have a different purpose of restricting traffic through these residence halls is to make life convenient for them in bad weather. But that's not the purpose at all. We have to define why we want the traffic controlled.

One of the reasons is privacy. The male students who smoke in the hallways live in while he or she is at college is home. It's where the smoking is done. Hallway smoke, does laundry, eats and does all the other things involved in daily living. The male students in the residence hall often become like family members. There is a sense of Home Away from Home. Why should the girls. Ringing on the first floors in Bancroft and Margaret Nance be asked to suffer through the same. None of us would like it if neighbors from next door were to smoke through our front door, through the house and out the back door in order to visit someone who lived in the same building. We simply because it was a shorter route than going around the corner. You don't ask the neighbors for that at all, right? So why expect the Bancroft and Margaret Nance residence halls to be used this way?

But more important than invasion of privacy is the risk to the people who do not ever live there. Some of the women residents may not wish to be caught in pajamas with hair in cutters by a male walking through on his way to class. But I'd say the majority would object, and this must be considered.

It becomes evident that Western Man has lost a fundamental tenet of union with nature. It also becomes clear that in the course of our evolution, our brain has grown at the expense of our legs and our skins. We are not able to sense the beauty of nature because we are no longer able to experience it. So, how much does your health mean to you? Maybe you think you aren't smoking enough for it to hurt. The number of smokers who smoke before you know it. According to THE FUTURE, more and more Americans hooked on smoking started before they were 20. Maybe it's best you quit while you can.

Habitual smokers, the Royal College of Physicians of London calculated, shorten their lives by an average of five to seven years for each cigarette, which is almost equal to the time spent smoking it. A 20-year-old American who smokes 2 packs a day for the rest of his life can expect to die five years younger than a non-smoker.

Tobacco is responsible for eight or nine out of every ten lung cancers. It also contributes to coronary heart disease, other bronchial, and emphysema. Another disturbing factor of smoking is the fact that smoking combines to boost cardiovascular disease risks. U.S. Food and Drug Administration Commissioner Donald Kennedy warns that "if you take the pill, don't smoke; if you must smoke, find another method of contraception."

I'm not telling anyone to quit smoking. If you really enjoy it and you'd rather not quit, that's up to you. But at least know the health risks you are taking. Another alternative to quitting is switching to a lower tar cigarette. Some brands are considerably less harmful than others.

Gamble Ford

It's not Grand Central Station

Ellen McDowell

There is a course at Winthrop which is for everyone. It is Biology 106, called Environment and Man. It is unique because the studies focus on the interrelationship between the two. Many of those courses are shocked at just how dangerous man's poisoning of the planet is.

It becomes evident that Western Man has lost a fundamental tenet of union with nature. It also becomes clear that in the course of our evolution, our brain has grown at the expense of our legs and our skins. Letters . . . .

Dear Editor:

We would like to respond to an article written by Bob Ford on Sept. 10, titled "It is up to You". We would like to ask Bob what right he has to state that students don't have any good parties here at Winthrop. Who is he to say that quality entertainment hasn't been provided at ATS?

We would like to remind Bob that such groups as the Atlanta Rhythm Section, Mother's Finest, Count Basie, and Gene Cotton are just a few of the groups that have appeared at Winthrop in the past two years.

We would also like to remind Bob that such names as Brian Hauser, Peter Alsp, Barry Drake, and the Plum Hollow Band are just a few of the names of groups and people that have appeared at ATS.

We would like to say that we're sure there are many students that will agree that there are challenging opportunities and stimulating entertainment here at Winthrop.

We would like to suggest that perhaps Bob got too close to deadline time, and didn't investigate what he was writing about in his story.

If Bob has taken the time to come and talk to people in the respective areas that he referred to in his story, he would have a different view of the social atmosphere at Winthrop.

Sincerely yours,
Ronnie Laffitte
Paul Varza

To all students here at Winthrop:

We, the Dinkins Student Union Officers, would like to express our appreciation to all of the students that participated and worked on the Back-to-School Bash. If we hadn't had a little rain, we feel the event would have been even more of a success than it was.

We did note one discouraging fact, and would like to draw your attention to it. Many people brought their own beverages (i.e., liquor, beer, and wine) to the event. We don't mind cleaning up your trash, but we do want to protect individuals from cutting their feet, or whatever could happen when glass bottles and beer are concerned.

As a result, we in the programming here at Winthrop have decided NOT to provide beer at the Bash. We hope that you will understand and respect the decision. If you have any questions, please ask the Programming Board.

We want to let students know now and will inform you later that NO alcoholic beverages will be allowed any more.

Sincerely yours,
Ronnie Laffitte
Sally Grice

TJ/EDITORIAL PAGE THREE
McLaurin, Margaret Nance to be razed

Two 80-year-old residence halls at Winthrop College will come down, making way for two academic buildings designed to look just like the buildings they replace, college trustees agreed in April.

McLaurin Building, a 1901-vintage residence hall, will be replaced by a new home for Winthrop's College of Arts and Sciences. Margaret Nance Building, built in 1895, will be replaced by a new headquarters for the School of Education.

Before either residence hall is razed, the college will build a new high-rise residence hall, similar to twin towers at the north end of the campus. The new building will house 400 students and cost an estimated $4.5 million. The construction timetable depends on the securing of an HUD loan.

The action came after the trustees Planning and Development Committee met with state engineers and a Columbia architectural firm. Both agreed that renovation and restoration of Margaret Nance and McLaurin would cost more than new buildings. An estimate for renovation of McLaurin was $3.3 million, a new building was estimated at $2.2 million. Renovation and restoration of Margaret Nance would cost $3.6 million. A new building would cost $3 million. The board also approved the addition of three new degree programs. The bachelor of social work degree was approved to take the place of the social work curriculum which is currently taken with other majors. The new program will provide career-oriented training for those seeking positions in institutional, research or health and environment fields.

The master of science in biology was approved to replace the master of arts in teaching degree in biology, Thomas Morgan, dean of the College of Arts and Sciences, said that the new program will be more attractive to students seeking positions in institutional, research or health and environment fields.

The specialist in school psychology degree was also approved. Morgan said that the new program would complement the present master of science in psychology degree by offering training beyond the master's level for students who want careers at more advanced levels in the public schools and similar settings.

In other business, the board:
- Referred to committees recommendations for fee increases in the Academy of Music, Withers Kindergarten and Magnet Nursery.
- Elected Howard Burns of Greenwood, current chairman, to another term.

SKYLAB probability wins attention

Two Winthrop math professors, Dr. Ed Guettler and Sid Watkins, achieved fame this summer when their SkyLab probability comparisons won amazing attention.

Guettler and Watkins did their research at the suggestion of Pete Pepinsky of the Public Affairs Office. Pepinsky asked the chances of Skylab falling on York County, or Rock Hill, or Winthrop itself.

The two math geniuses couldn't answer those questions because NASA was releasing only sketchy information. Instead, they compared the one in 600 million odds NASA did release to other better known odds, such as being dealt a perfect bridge hand, or winning $2000 in supermarket bingo, or drawing a royal straight flush in poker.

Pepinsky then sent the results to a local paper. United Press International picked the story and sent it over its wires.

To the surprise of everyone involved, the story was found in newspapers not only in North and South Carolina, but as far away as Pennsylvania, New Jersey and Florida. Pepinsky even received a clipping from a U.S. Army paper in Germany.

Pepinsky said, "Winthrop's faculty does all kinds of really substantial things, yet something like this comes along and gets really incredible coverage."

Dr. Guettler just laughed and said, "It wasn't anything big, people were just interested in it."
Co-ed dorms are great!

BY KELLY GORDON

Winthrop College has its own form of co-ed living quarters in Thomson Dormitory. Thomson is Winthrop's second co-ed dorm. Last year, the first co-ed dorm was used to house freshmen men. According to Dean of Housing Cynthia Cassens, "The timing was right. We were ready to try the co-ed option."

Cassens said that a survey about the co-ed dorm was taken near the end of last year, and more Winthrop students were in favor of and wanted to live in a co-ed dorm than Margaret Nance could accommodate. That was a reason for the move to Thomson. Another reason according to Cassens was that "the survey said the students would rather have suites than community baths in a co-ed dorm."

Another suggestion the survey revealed was to not house freshmen in the co-ed dorm as was done in Margaret Nance. "That's one reason for the success of Thomson," said Cassens. "You can tell that the level of maturity is higher with the upperclassmen."

A Winthrop student had a similar viewpoint. "I think co-ed dorms provide greater opportunities for juniors and seniors. Sophomores and freshmen are too immature.

Another Thomson resident said, "This is the freshman's first time away from their parents for a long period of time, and they want to go wild. If I knew I did." A Winthrop co-ed who lives in Wofford, a women's dormitory, said, "My parents wouldn't let me stay in the co-ed dorm, but I would love to try it, though. I think it would be a good experience. But when your mom and dad pay for your education, you live where they want you to live."

Parents approve?

New York, August 15-In a startling reversal of parental sentiment from as recently as ten years ago, nearly 95 percent of parents whose children live in co-ed dormitories approve of the living arrangements, according to a nationwide survey of students. The survey was conducted by McClay's and the results appear in the September issue, published today.

The statistics and personal comments of students indicate that the relaxed living arrangements have lessened the traditional campus preoccupation with sex: more than half of the young people surveyed who live in co-ed dorms have little or no sex lives, more than 37 percent of these students say they never have sex; more than 16 percent claim to have sex "less than once a month." Less than 18 percent say they have sex "more than twice a week," it was reported in McCray's.

Almost 95 percent of college men and women sharing living quarters say they do not date anyone living in their own dorms. "The atmosphere is like the least bit sexy," a female junior told McClay's. "We live together like brothers and sisters; it's all very family like, domestic and, uh, well, chummy."

Most of the residents interviewed said that their parents didn't have negative feelings about them living in a co-ed dorm, and many feel that it made the sexual aspects of co-ed living less. As one co-ed put it, the general consensus of the residents is "if you're going to do it, you're going to do it. It doesn't matter where you are." Most of the residents, however, do not have any immediate plans to add more co-ed dorms. Cassens also reiterated that the school has no immediate plans to add more co-ed dorms. "Thomson is fulfilling the need for a co-ed dorm. So far it seems to be working just fine."

Co-ed dorms are great!

Parents approve?

“Job prospects ’79: ‘same song, same verse’”

BY HELEN CORDES

(CPS) — This year’s job prospects? “Same song, second verse,” is how one placement expert described it.

But while graduates will find that many aspects of the job market remain constant from last year — the hiring volume is up, and business and the sciences are still the hottest majors — job seekers will find two major trends developing. For one, the government, both local and federal, is hiring significantly fewer people. It’s a trend that may have particular consequences for liberal arts majors. Secondly, openings for para-professional and "service" type jobs are outdistancing professional openings in many disciplines.

Yet for the moment, recruitment, according to a number of sources, is intensifying, some say to the levels of the "boom years" of the sixties.

In December, a 25 percent increase in recruitment was projected by College Placement Council (CPC), which annually monitors employment opportunities in over 700 businesses. Council officials noted that more companies would be sending more recruiters who stay longer, a continuation of last year’s trend, when 40 to 50 percent more students were interviewed than in 1977.

Preliminary reports indicate the prediction was correct.

We’re seeing a lot more offers," said Ed Fitzpatrick of Michigan State University’s placement office, one of the country’s largest.

The University of California at Berkeley reports a 20 percent increase this year, as does William and Mary College. At Lehigh University, offers are up 33 percent from last year.

But while CPC predicted a five percent increase in job offers for "non-technical" fields — which include most liberal arts disciplines — the drop-off in government hiring will probably cause a six percent decline in the number of jobs available in those areas.

The federal government is expected to hire 15 percent fewer graduates this year, CPC says. That would bring government hiring to its lowest levels since the 1960s.

The decline stems from President Carter’s mandate allowing agencies to fill only one of two vacancies, and recently-enacted Civil Service regulations requiring a two percent reduction of federal civilian jobs.

Meanwhile, state and local governments forecast a 12 percent decline, which many attribute to cost-cutting measures like California’s Proposition 13.

The effects are already becoming apparent. CPC has noticed "less interest in college candidates" from governmental agencies. Because governmental agencies are a prime employer of liberal arts majors, more of these students are expected to turn to the private sector for jobs, creating a competition that is projected to force many into jobs that don’t require a college degree.

But liberal arts majors aren’t the only ones who may end up with jobs they’re over-qualified for. Department of Labor statistics suggest that in many professions, "assistant-type" jobs are increasingly in demand.

The field of education, for example, is still widely regarded as overcrowded, because of a glut of education majors in the early seventies, and the decline in the number of elementary and high-school students. But teacher’s aides are in high demand, with 160,000 openings by 1985 anticipated by the Labor Department.

Even with an excess of lawyers (this year more than 30,000 law graduates will compete for only 21,000 jobs), para-legals are an "emerging profession," according to Aaron Craner, director of the Institute for Paralegal Training in Philadelphia. A growing number of institutions are starting paralegal training in face of the demand.

Similarly, while the U.S. Department of Health, Education and Welfare is taking steps to restrict the number of medical students to combat an "oversupply" of doctors, a market is emerging for para-medics, such as nurse practitioners and physicians’ assistants.

Nurse practitioners, in particular, are often having an easier time of getting a job than doctors since they need not work under a doctor’s supervision, and can find positions in areas hard-pressed for doctors.

Math majors down

This fall, even though there are more students registered in math classes at Winthrop, the number of math majors is down, according to Dr. Ed Guettler, head of the Math Department.

Guettler said more people are enrolled in the lower level courses because fewer students are willing to take foreign languages. Also, the large freshmen classes the past two years have provided more people with a math-foreign language requirement to fulfill.

The math department is presently working on an Applied Math major, which would award a BS degree. Now, there is only a BA degree available to math majors.

Guettler says he thinks the offer of a BS and the growing enrollment will boost the number of Winthrop math graduates.

"I spent my freshman year looking for a parking space."
The Winthrop Eaglettes welcomed thirty new members on September 9 in Peabody Gym for this year’s first meeting. Interested students turned in applications and were notified our second year as the Eaglettes, said, “We are beginning projects this school year.” Sillivant said, “is the Eagle Homecoming scheduled for the weekend of February 8, 9, and 10.” The chairman of the Eagle Homecoming committee, Patricia Matthews, has been working on this since last year. We plan to be the organizers of this event while involving many of the other campus organizations. It should be a great finish for Winthrop.” The other officers on the Board of Directors for the Eaglettes, in addition to Sillivant, are Kelly Gordon, Pam Gray, Cindy Patterson, Lisa Wright, and Susan Honeycutt.

Baseball coach Horace Turbeville is looking for some managers to take care of his teams equipment this fall. Anyone interested should contact him at the athletic department, extension 2125.

**Eaglettes begin second year**

The Winthrop Eaglettes welcomed thirty new members on September 9 in Peabody Gym for this year’s first meeting. Interested students turned in applications and were notified days later that they were part of the Eaglette Organization. Karen Sillivant, chairman of the Eaglettes, said, “We are beginning our second year as the Eaglettes and have gotten off to a great start.”

The Eaglettes’ main function is to promote and support all Winthrop athletics. This is done by providing ball girls for the soccer games, making posters, selling spirit items, hosting home basketball games and other activities.

Sillivant said that this year looks promising since the number of students has reached nearly fifty. “One of our main projects this school year,” Sillivant said, “is the Eagle Homecoming scheduled for the weekend of February 8, 9, and 10.” The chairman of the Eagle Homecoming committee, Patricia Matthews, has been working on this since last year. We plan to be the organizers of this event while involving many of the other campus organizations. It should be a great finish for Winthrop.”

The other officers on the Board of Directors for the Eaglettes, in addition to Sillivant, are Kelly Gordon, Pam Gray, Cindy Patterson, Lisa Wright, and Susan Honeycutt.

BY DAVID JACKSON

The long dreamed-of Winthrop College Athletic Fieldhouse seems to be moving ever closer to reality.

The next-to-the-last architectural design of the upcoming building is now on display at the athletic department, where it is being reviewed by those coaches and trainers who will be working in it.

“Last minute changes are now being made,” says athletic director Niel Gordon. “Once this is done, the plans will go back to the architect and they will work on the final draft. This final draft is all that is holding up the bids for construction.”

Gordon is not sure when this final draft will be ready, nor when bids will be accepted for the construction of the building. He does hope that the ground breaking at the college campus will take place around the first of next year.

The actual construction of the fieldhouse should take about eighteen months. It is Gordon’s hope that it will be ready for the 1981-82 basketball season.

But this new 7,000 seat facility will feature much more than just a basketball court.

In addition to the main floor, which will be used by the Eagle basketballers, there will be two “cross-courts” to be used for intramurals. In addition, regulation volleyball lines will also be placed down on the main floor.

The seating area will be located on the third floor and will be portable, and can be moved back to leave the whole floor open for such events as concerts, dances and intramural meets.

Besides the main floor, this huge building will also feature such things as a fully-equipped training room, several regulation dressing rooms (including special ones for Winthrop female staff and students), wrestling room, weight room, golf area, archery area, baseball area, and classroom facilities for educational purposes.

Although this new coliseum will feature these classrooms, Gordon wants to emphasize the fact that most of the other Intramural education classes will remain in Peabody Gym. The fieldhouse will only be used for auxiliary PE activities.

To top all of this off, the concourse of the main floor will feature a track outline. However, this does not mean that Winthrop will be getting a track team any time soon.

The actual construction of the fieldhouse should take about eighteen months. It is Gordon’s hope that it will be ready for the 1981-82 basketball season.

This new fieldhouse will certainly be a welcome addition to the Winthrop College scene. It will be nice to see the basketball teams get out of tiny and cramped Sullivan Junior High Gym. The men’s basketball program will need a facility like this if they are ever to realize their dream of NCAA Division I status.

Of course, the coliseum will benefit many of the other Winthrop varsity sports as well. It will provide Locker facilities for the soccer and baseball teams whose practices and playing fields are already located at the farm. (Whether or not the field hockey and softball teams will move out to the lake area upon completion of this building is uncertain.)

Beyond this, Winthrop’s new fieldhouse will benefit anyone interested in certain recreational sports. The track, baseball, soccer, wrestling room, archery range, and intramural facilities will see to that. This facility, although expensive, will be of tremendous overall benefit.

This building has been actively planned for and talked about ever since athletic director Niel Gordon arrived here in March of 1977. Now, nearly two years and a half long years later, the end is in sight.

The plans for the Winthrop fieldhouse do sound nice. Let’s hope that they become a reality as soon as possible.

Attention all you 1900-odd people who play intramurals at Winthrop. The rumor you have been hearing is not true.

The rumor that the intramural board will soon pass a rule which states that no more than three Winthrop varsity athletes may participate on any Intramural team in any Intramural sport.

Not true.

Evans Brown, who is Winthrop’s Intramural director, says this rule is contrary to the Winthrop Constitution. Thus the Constitution would have to be amended in order for such a rule to pass. This would entail a student body vote.

Should these actions take place, the Winthrop students themselves will decide this Intramural issue through the ballot box. Before that, no rule change will be made.

THE JOHNSONIAN will report more on this story as it develops.

SEPTEMBER 17, 1979

BY DAVID JACKSON

The long dreamed-of Winthrop College Athletic Fieldhouse seems to be moving ever closer to reality.

The next-to-the-last architectural design of the upcoming building is now on display at the athletic department, where it is being reviewed by those coaches and trainers who will be working in it.

“Last minute changes are now being made,” says athletic director Niel Gordon. “Once this is done, the plans will go back to the architect and they will work on the final draft. This final draft is all that is holding up the bids for construction.”

Gordon is not sure when this final draft will be ready, nor when bids will be accepted for the construction of the building. He does hope that the ground breaking at the college campus will take place around the first of next year.

The actual construction of the fieldhouse should take about eighteen months. It is Gordon’s hope that it will be ready for the 1981-82 basketball season.

But this new 7,000 seat facility will feature much more than just a basketball court.

In addition to the main floor, which will be used by the Eagle basketballers, there will be two “cross-courts” to be used for intramurals. In addition, regulation volleyball lines will also be placed down on the main floor.

The seating area will be located on the third floor and will be portable, and can be moved back to leave the whole floor open for such events as concerts, dances and intramural meets.

Besides the main floor, this huge building will also feature such things as a fully-equipped training room, several regulation dressing rooms (including special ones for Winthrop female staff and students), wrestling room, weight room, golf area, archery area, baseball area, and classroom facilities for educational purposes.

Although this new coliseum will feature these classrooms, Gordon wants to emphasize the fact that most of the other Intramural education classes will remain in Peabody Gym. The fieldhouse will only be used for auxiliary PE activities.

To top all of this off, the concourse of the main floor will feature a track outline. However, this does not mean that Winthrop will be getting a track team any time soon.

The actual construction of the fieldhouse should take about eighteen months. It is Gordon’s hope that it will be ready for the 1981-82 basketball season.

This new fieldhouse will certainly be a welcome addition to the Winthrop College scene. It will be nice to see the basketball teams get out of tiny and cramped Sullivan Junior High Gym. The men’s basketball program will need a facility like this if they are ever to realize their dream of NCAA Division I status.

Of course, the coliseum will benefit many of the other Winthrop varsity sports as well. It will provide Locker facilities for the soccer and baseball teams whose practices and playing fields are already located at the farm (whether or not the field hockey and softball teams will move out to the lake area upon completion of this building is uncertain.) It will also provide a nice, new place for the volleyball team to play.

Beyond this, Winthrop’s new fieldhouse will benefit anyone interested in certain recreational sports. The track, baseball, soccer, wrestling room, archery range, and intramural facilities will see to that. This facility, although expensive, will be of tremendous overall benefit.

This building has been actively planned for and talked about ever since athletic director Niel Gordon arrived here in March of 1977. Now, nearly two years and a half long years later, the end is in sight.

The plans for the Winthrop fieldhouse do sound nice. Let’s hope that they become a reality as soon as possible.

Eagles take on mighty USC

BY DAVID JACKSON

The Winthrop College soccer team under head coach Jim Casada faces a very stern test this Wednesday, Sept. 19, when they travel to Columbia to take on the highly regarded South Carolina Gamecocks.

Last season, in a match played at Winthrop, South Carolina defeated the Eagles 4-1. However, the match was closer than the score might indicate. Winthrop scored early and led 1-0 for about forty minutes. Only when a key Eagle defender (MVP Frankie Griffin) got thrown out did the Gamecocks come on to take command.

Is there a big talent difference between NAIA and NCAA schools in soccer? According to those who should know, not really.

Coach Casada says there is "only a marginal difference in quality... The biggest difference is that the NCAA allows eleven full scholarships. South Carolina, for example, gives out eleven. Very few small schools can afford this. Our scholarship total is a little less than two."

Casada feels that as a result of this scholarship difference, as well as the increased interest in the sport, the NCAA will become much more powerful than the NAIA within ten years.

However, right now the talent is about even. Casada went on to emphasize this point by saying that "of the six NCAA schools we play this season, only one is one of our five toughest opponents overall."

That "one" is South Carolina, and Winthrop will face that test this week.

Another interesting aspect of this game is the fact that one of Winthrop's newest backs, Reynold Dansen, played on that South Carolina team which defeated Winthrop last season. Dansen transferred to Winthrop last winter. He is very excited about this upcoming match.

As far as playing for Winthrop as opposed to South Carolina, Dansen says that "it's not really that much difference because we do play NCAA schools still, and the NAIA schools are just as tough really."

We certainly hope that Winthrop will be "just as tough" against South Carolina this Wednesday.

This week will also find the soccer team doing a little traveling this week. On Sept. 21, they will travel to Athens, Georgia (whenever that is) to participate in the Superior Soccer Classic Tournament. The other three schools involved are Tennessee Wesleyan, Wimington (Ohio) College, and the University of Alabama at Birmingham.

By the time this paper comes out, Winthrop will have already played three matches. The results of those matches (against Newberry, and The Citadel) will be reported on in next week's JOHNSON.

Field hockey '79: Ellerbe's new experience

BY DAVID JACKSON

For first year coach Ann Ellerbe, this fall's job as field hockey coach is one of the most common - and challenging - that her sport offers.

Ellerbe is a senior, and is one of the underclassmen who make up the Winthrop field hockey team.

Ellerbe has kept all nineteen of the athletes who tried out for field hockey team hopes to this year's team. In a regulation field hockey game, each team puts eleven people out on the field and only four substitutes are allowed for the whole contest. Once a player has been substituted for, she cannot return to the game.

This year's team has eight freshmen. Because of so many new players, Ellerbe has not assigned definite positions for each player: "I don't want to have a whole lot of inexperienced players having to play to- gether. Positions will depend on how these freshmen play."

Ellerbe feels that her team's real strength is offense. "Defensively we're a little bit weaker, but we're working on it. All of our experience is on offense. Offensively, we are strong."

Naturally, Ellerbe is not too familiar with many of the teams on this year's schedule. However, "going from what I've heard," Furman (way on October 14) and Clemson (home on October 16) appear to be Winthrop's toughest opponents this season. The field hockey team opens its season this Friday, September 21, at Catawba College.

Here are the members of the 1979 Winthrop Eagle field hockey team. (Photo by A. P. Copley)

Eagles take on mighty USC
Women, black male grads progress

According to the Conference Board, a major research organization, there are only two women in the workforce. But their progress toward equal employment rights had inspired some institutional obstacles.

One obstacle points out Mitchell of the Conference Board, is that women live longer than men. Consequently, business pension costs are higher for women than they are for men.

Employers also worry about the "hidden" costs of maternity leave for women. Only 40 percent of the firms the Conference Board surveyed had maternity leave programs, and even the administrators of those complained about the cost of hiring and training temporary help to fill in for the employee on maternity leave. More than 40 percent of those who take maternity leave, moreover, don't return to the company when it's over. That is why 80 percent to keep the hiring of women down.

Nevertheless, women have made significant strides in the labor market. Women's ambitions have risen accordingly. About 17 percent of the entering female graduates of 1978 planned to enter the "traditionally-male" fields of business, engineering, law and medicine. In 1965, only six percent of the entering women freshman aimed for "traditionally-male" careers. Yet women still dominate the "traditionally-female" study area. According to a battery of studies by the National Center of Educational Statistics, women earned most of the degrees awarded this spring in home economics, library science, health professions, foreign languages, education, the arts, area studies, and letters. The only field women in the class of 1978 dominate that the women in the class of 1971 didn't dominate is psychology. All told, women will get 46 percent of the BAs awarded this spring, versus 43 percent in 1971.

Last chance

Fine Arts Concert Series tickets will be available for students free of charge with a Winthrop I.D. at Dinkins Information Desk only until Wednesday, Sept. 19. The opportunity to reserve seats in Byrnes Auditorium for this year's concerts has been extended through Wednesday in order to serve more students. Only 600 students have picked up tickets.

Students may also pick up single tickets at Dinkins until 1 p.m. on the day of each concert.

BY MARIE A. GOODSON

Generally used for the Communications classes, the audio/visual facility located in Tillman consists of a set, including background and spot lights, two Norelco cameras and the control room. In all, there were so many gadgets and things there that it would be impossible to name them all. Although the Educational Department could make use of all its video taping, this facility is used to produce some video tapes that are used for instructional courses on campus as well as off campus.

The chief staff of this operation is Mr. Fields, who has been here at Winthrop for 20 years. Mr. Tom Bender is electronic technician. Mr. Bender is the man who puts together the recording system.

If you are interested in checking this “electronic wizardry” out for yourself, call Mr. Fields at 232-2139.

Mr. Fields also works with the radio station. Currently, the staff at WCRO, has it been an unsure start, but the momentum is gathering.

WCRO, 640 on your AM dial, is on “automatic” with the “Fife Parade” between the hours of 4:30-5:30 p.m. and 11:30 p.m. to 1:00 a.m. and live between the hours of 6:30 p.m. and 11:00 p.m. Monday through Thursday.

“Let’s get a lot planned this year,” said Lisa Wright. WCRO is hoping to get several things added to its program, including news and announcements from the various clubs and organizations on campus. Lisa is requesting that anyone with any ideas please call WCRO and let it be heard. The request line has in fact been initiated.

To hear your favorite, old or new, call 232-2139 during the hours of 4:30-5:30 and 11:30-1:00.

You will be glad you did!

Any information to be announced should be sent via Campus Mall to WCRO, Tillman Building Room 18, before 5:00 on Monday through Thursday.

In the name of nutrition

BY RITA PETTIT

Winthrop College Public Affairs Office

At Winthrop College people are cutting, burning even exploding food. And it’s all in the name of good nutrition.

These people — the faculty and staff of Food and Nutrition, are trying to find out more about your food with over 15 instruments in a nutrition lab that looks like a mad scientist’s paradise.

But this lab is very practical. Just because you prepare something doesn’t mean someone will eat it,” says Betty Stailings, department chairman.

With that in mind, students use the texture testing system to measure the tenderness of foods cooked in different ways.

Lend me your eyes (and ears)
Harley named to board

ROCK HILL — William B. Harley, president of The R.L. Bryan Company of Columbia, has been named to a three-year term on the advisory board to the School of Business Administration at Winthrop College.

Formed in October 1977, the advisory board works with Winthrop faculty and students to improve the School of Business Administration academic programs, making them of greater service to the management of businesses in the state.

Harley has been with R.L. Bryan since 1938. He has served on the board of directors and as first vice president. He was past president of Printing Industries of the Carolinas, Inc.

A native of Spartanburg, Harley is past president of the Greater Columbus Chamber of Commerce and is former chairman of the board of trustees of the Epworth Children’s Home.

He served as South Carolina’s first public representative on the board of directors of the Southern Association of Schools and Colleges and is currently serving as a member of the executive board of the Indian Waters Council, Boy Scouts of America.

Harley is married to the former Marjorie Luther. They have two children.

Loan sessions set

Due to the high default rate on National Direct Student Loans last year, pre-loan counseling for each loan recipient is being required by the Federal Government this year, according to Student Aid Officer Mollie Bethea.

Every student receiving one of these loans must attend one of the four sessions scheduled on Wednesday (Sept. 19) and Thursday (Sept. 20) in Daniel Auditorium. The sessions will be conducted by Bethea and James McElwain of the Accounting Office.

Understanding what they were receiving, she said the purpose of these counseling sessions is to explain the loans in detail. National Direct Student Loans are awarded to students with the understanding that no repayment is due until 9 months after he leaves school for any reason for which the loan is repaid.

Even though the national average of default last year was very high, the Winthrop rate is only about 13%, according to Bethea. Since then, said this rate has dropped due to NDSL getting in touch with the late students.

Violent crimes on increase

The largest crime in criminal activity in four years occurred during the first three months of 1979 — 11 percent increase over the same period in 1978.

Health Center available

"People have the right to health care that is accessible and that meets professional standards, regardless of race or national origin," said Mrs. Anne James, Head Nurse of Crawford Health Center. All undergraduate students taking 12 or more semester hours as well as students taking 6 hours or more who have paid the health fee of $21.00 a semester are eligible to use the Student Health Service, according to James. Students taking 5 semester hours or less are not eligible to use the Health Services except in case of emergency.

The Health Center is open Monday through Friday from 8 a.m. to 7 p.m. Registered nurses are on duty during those hours. Physicians are present and seeing patients Monday to 2 p.m., Tuesday and Thursday 9 a.m. to 12 and 1 to 4 p.m., Friday from 4 to 6 p.m. Wednesday, is set aside for Gyn Clinics from 1:30 to 4:30 p.m. Students are seen by appointment only. A sickness and accident insurance policy especially formulated for Winthrop students is available for those who wish to enroll. Enrollment period ends on September 30, 1979.

Since the Health Services is closed from 7 p.m. until 8 a.m. weekdays and Saturday and Sunday, all students are advised that an emergency will be treated at York General Hospital Emergency Room during those hours. In case of accidents, students are advised to provide appropriate transportation to the hospital.

"For more detailed information about Student Health Service," said Jones, "please consult the 1979 Student Handbook, in special folders from the Health Center Office or call us at the Health Center. The number is 2206."

Webb completes third book

The desire to capture the mood of the past and a love for research and creativity have led a history professor through 15 years of study to his third book, "Kentucky in the Reconstruction Era." Ross A. Webb, professor of history at Winthrop College, spent 15 years developing his topic which provides a new interpretation of the history of Reconstruction in Kentucky.

Webb points out in his book that congressional intervention in the affairs of the state produced a strong desire upon the part of Kentuckians to protect their democratic rights from being absorbed by the federal government. That strong reaction prompted historians to call Kentucky a "pre-Conced- easal" state, when in reality Kentucky's political philosophy as well as behavior was "anti-ad-ministrational" and "anti-congressional." Webb says.

Webb was also drawn to his personal knowledge of Kentuckians in writing the book. He was associate professor and director of undergraduate studies in history at the University of Kentucky for 10 years.

"My book is a new story of Kentucky," it a revisionist's interpretation," he explains. "While many historians characterize this period of Kentucky history as one of violence and prejudice, it was, in many ways, a catalyst which was ultimately to result in the development of a more progressive state.

To the seeds of Reconstruction, if Ley can be called that, fell upon fertile ground and once the "new departure" was generally accepted by Kentuckians, the state would make remarkable advances. "I think my book will have meaning for students of Reconstruction. One cannot understand the contemporary Civil Rights movement without an understanding of Reconstruction," Webb says.

Teacher screening

Speech and hearing evaluations will be offered for those students electing teacher education and for other interested students. This offer is to continue at least until September 28.

Dates are Monday, September 17 through Friday, September 28.

Screenings will be held in 117 A Johnson between the hours of 10:00-11:30 and 2:00-4:00 daily during the two-week period. It is not necessary to make an appointment.

Work will begin Oct. 7, 1979 (E.O.E.)

News Briefs

Outing Club

Winthrop Outing Club went to King's Farm last year, to greet its new officers, to welcome students back to Winthrop, and to discuss planned events for the upcoming school year, according to Karen Thompson, newly-elected president.

Thorn opened the meeting with a background history of the organization and welcomed the new leaders of the club. The club will take place in the last week of October. Thorn said the work- shop will be a seminar on the different aspects of gospel music and anyone, including the public, can participate.

Thorn also said they are interested in having the Ebene-otide T-shirts that will go on display in the near future. Students giving questions should contact him at ext. 4743.

Workshop covers music

Winthrop Theatre's first production, "A Thurber Carnival," took its first step last week with the selection of students for its cast, according to director Blair Bailey. Students selected were Donny Blakett, Reggie Brunn, Cheta McMillan, Don Savelle, Jeff Smith. Also, Kathy Bishop, Elizabeth Cole, Susan Morris, Carol Sullivan and Eie Trovel.

The presentation of "A Thurber Carnival" will be October 24-27 at 7 p.m. at the Johnson Auditorium.

Winchon

Officers for Winchon, Winthrop Home Economics, have been elected for the 1979-80 year, according to Mary Dunlap, club reporter.

Dunlap said Winchon is open to all home economics majors and minors. The club encourages growth in all areas of Home Economics, Family and Child Development, Dietetics, Business, Home Economics, and Textiles, Clothing and Interior Design.

Dunlap said that Winchon meets every month on the 1st Tuesday at 6:00 p.m.

Placement and Career Planning

The Office of Placement and Career Planning, room 119 Thurmond, is now open to all students for Career Counseling, Job Hunting Workshops and On-Campus Interviews, according to Bill Shepherd, director of Placement and Career Planning.

Shepherd said students can participate in "The Job Hunt Is On Workshops," entitled "Getting Placed" on September 18, 19 and 20 from 11:00 a.m. until 4:00 p.m. Shepherd said on-campus interviews with representatives of business, government and education will be conducted during the month of September and in the near future, but students must come by the Placement Office, to establish their placement which is in order to be properly helped by the Placement office.

Shepherd said that students with questions about Placement and Career Planning, should call Ext. 2141.

Association of Ebionites

The Association of Ebionites held its first meeting of the school year, to greet its new officers, to welcome students back to Winthrop, and to discuss planned events for the upcoming school year, according to Larry Thorn, newly-elected president.

Thorn opened the meeting with a background history of the organization and welcomed the new leaders of the club. The club will take place in the last week of October. Thorn said the work- shop will be a seminar on the different aspects of gospel music and anyone, including the public, can participate.

Thorn also said they are interested in having the Ebene-otide T-shirts that will go on display in the near future. Students giving questions should contact him at ext. 4743.
Slowing down is more than just a safer way to drive. It's also a great way to save gas and money.

You'll get about 20 more miles from every tank of gas if you drive 55 mph instead of 70 mph on the highway. That's like getting a 6¢ discount on every gallon of gas! And it's just one of the easy ways you can save gasoline.

- Keep your car well-tuned and you'll save about 4¢ on every gallon of gas.
- Keep your tires properly inflated and you'll save 2¢ on every gallon.
- You can save as much as 3¢ a gallon by using radial tires.

Saving gas is just that simple—and with the rising energy costs we're facing today, it's never been more important.

Think about it. If you use all these simple gas-saving techniques, it's like getting a 15¢ discount on every gallon of gas!

For a free booklet with more ideas on how to save energy and money, write "Energy," Box 62, Oak Ridge, TN 37830.

U.S. Department of Energy
Watchout rapids, here we come

What better way to see the fall colors, the mountains, and the outdoors, except by rafting! The Dinkins Program Board Travel Committee will sponsor a rafting trip on Saturday, September 29 down the Nantahala River, Bryson City, N.C.

Whitewater rafting on southern rivers has been growing in popularity, mostly as thrill-seekers head to the rapids for their outdoor adventure. Even the most inexperienced can enjoy the rushing river trip. A lecture and demonstration on safety and paddling is given before starting down the river, and an experienced guide accompanies each trip.

The total cost for the transportation, and a rafting spot is $19.00 per person. The last day for sign up is Tuesday, Sept. 18. Where? Dinkins Information Desk. Got any questions call Dinkins Program Board, 2245, otherwise, see ya on the river!

Tequila Mockingbird

The Tequila Mockingbird Chamber Ensemble is "A concoction more intoxicating and perhaps more habit forming than a Harvey. Wallbanger," according to REEL NEWS.

This unusual ensemble will perform in the Recital Hall on September 17 at 8 p.m. The program is free and open to the public.

The trio, which plays baroque music using the unusual combination of violin, vibraphone, and tuba, was boosted in a joint venture of the Concerts and Dance Committee and the School of Music. According to Ray Feaster, C&D chairman, the concert is "in the interest of both students and faculty."

Maxim Gerbugonoff presents Tequila Mockingbird Ensemble. L. to R. are Jurgen Schwietering, violin; Michael Joseph, vibraphone; and Burt Stromp'f, tuba.

Wine-making

Wine stompin'!!!

Tuesday, September 18, Ronnie Laffitte urges students to "spend the night with DSU." To start off the evening, the second half of the short course, Winemaking, will be held in ATS from 7-8. Dr. Melford Wilson of the Political Science Department is the instructor, according to Short Courses Chairperson Lorraine Campbell. "There is no charge for the course," Campbell said. "The grapes are furnished, but they will be squashed on Thursday, Sept. 13, during the first part of the course, and will ferment until Tuesday." Sign up for the course is at the Dinkins desk.

Photography short course

From 8-9 on the 18th, the last of the Basic Photography short courses will be held in 221 Dinkins. Since this is the last chance for the course, Campbell urges all interested students to attend.

CPR course

Saturday, September 22, Short Course is offering a class in Cardio Pulmonary Resuscitation (CPR) in Dinkins Auditorium. "The class will last from 9-5 and will be taught by a member of the American National Red Cross," Short Courses Chairperson Campbell said. "There is a $4 fee which covers the cost of books and supplies. Persons completing the class will receive Red Cross certification." Students can sign up for the course at the Dinkins desk. According to Campbell, a list of all short courses for the semester is available at the desk, and students may sign up for all of them now.

"Las Vegas at Winthrop"

Tuesday evening, September 18, DSU will sponsor "Las Vegas at Winthrop" in McBryde beginning at 9 p.m. Admission to this gala event is $1 and a WCID. Laffitte described the evening as "something new and fun for Winthrop. We will have all the features of a regular casino—roulette wheel, craps games—the whole thing. The $1 admission gets you $1 in play money which you use for gambling. There will be an intermediate when Edmonds and Curly, a fantastic comedy act, will perform. Winnings from the games are to be used to bid on prizes which we will auction off at the end of the evening, so the more you win, the more prizes you can bid on." Refreshments will be available.

Edmonds & Curly

Loose, vulgar, funny and very funny. Two people of his type between them have a happy hour lost in a garden.

Loose Price, Which Way Is Up?

September 20th 9:15 p.m.
Tillman Auditorium, 50 cents WCID, $1 guests
