Students victims of senseless shooting

BY KELLY GORDON

We were crossing the Sandwich Construction parking lot, and I sort of noticed a car out of the corner of my eye. I heard somebody holler, 'Hey, boys,' and when I looked over, I heard a boom and saw a flash of light.

The 'boom': Steve Arnold heard and the flash of light he saw late last Friday night, Nov. 9, were accompanied by a volley of shotgun pellets which struck him on his upper body and face. Stray pellets also struck John Imholz, who was walking back to the Winthrop campus with Arnold.

Both of the Winthrop students knew they had been shot at, Imholz said he started running around the building to escape more possible shots. Arnold, who was knocked down by the impact of the pellets, got up and started running back to campus to get some help. Arnold-only made it to the other side of Cherry Road before he collapsed.

Both students were rushed to the emergency room of York General Hospital. Imholz did not have to be hospitalized and was released at 2:30 that morning. Arnold remained in the intensive care unit until Monday, and is now listed in satisfactory condition. Arnold sustained injuries in his left arm, a lung, and his face, particularly in his right eye. Dr. L.D. Bartel, Arnold's ophthalmologist, is still uncertain if he will lose the eye.

Eighteen-year-old Raymond Boyd and 20-year-old David Deville Robinson, both of Rock Hill, are charged with two accounts of assault and battery with intent to kill. They are also charged with three firearm-related incidents which took place shortly before the wounding of Arnold and Imholz at 11:30 p.m.

They are charged with malicious injury to an animal in the 11:15 p.m. shotgun killing of a German Shepherd.

The third of the firearm charges occurred on the Winthrop campus shortly before the Arnold and Imholz wounding. Boyd and Robinson are charged with pointing a shotgun at Scott Johnson.

Soccer team district champs

BY DAVID JACKSON

The Winthrop Eagle soccer team had an incredible week as they captured the District Six championship and won the semifinal game of the NAIA Area V regional tournament. The 2-0 district championship victory over Erskine on Saturday, Nov. 10, was particularly remarkable in that it was played less than 12 hours after the shootings of Eagle players John Imholz and Steve Arnold (see opposite story). Furthermore, this game was scoreless through 190 minutes of regulation and overtime and needed a professional-style shoot-out to resolve the issue.

The Eagles' season did not end with the Erskine win as last Wednesday they defeated Berry College of Rome, Georgia, 2-1, in the NAIA Area V semi-finals. Now with an overall record of 16-4-1, they were scheduled to play at the University of Alabama last Saturday.
Safety is your responsibility

The recent shooting incident of two soccer players, Steve Arnold and John Imbach, is further evidence, although an unfortunate one, of Winthrop's growth. In my editorial in the Oct. 16th issue I lauded our good luck in that we lack the crime that usually comes with growth. I wonder what it would be like to avoid parties for fear of being shot. We have been made sharply aware that thinking from such a secure position is foolishly. We all need to be on the lookout for a potential disaster.

Students don't need my warning. Driving around campus after dark recently, I noticed my eyes turned my way with every student I approached. Although I don't mean to Single out any particular student, I believe that regarding each car as a possible danger is a wise defense against the unknown and unpredictable.

One thing we can be thankful for is that Security is on the job. Two cars and one walking officer keep a constant patrol of campus. The two students approached Friday night said there were no Security personnel prior to the shooting on Cherry Road were lucky that Security was around, but next time this may not be the case. The best defense is a good offense.

If you must cross campus after dark, please follow this advice offered by Chief Robert Williams of Security:

1. Go in pairs.
2. Carry a whistle.
4. Get the license plate number of a car which seems to be following you, or from which people are shooting at you.

A woman student which took place on Cherry Road probably could not have been prevented. It was a freak. But the fact that the same car from which the shots reportedly were fired earlier was seen earlier on Winthrop campus should warn all students to be prepared in case of an emergency. Security's number is 2201. You may be thankful someday for remembering it.

Bonnie Jarvis

Just one big gripe session

I sure hope you guys appreciate this. It's not easy writing an editorial while my Dallas Cowboys are on television. I never get a chance to relax once I get home. But No-o-o. Seems like every TV program I want to watch supposed to say—Ask her if she wants my teddy bear too? Or else If you're going out, would you

besides, Dallas is losing. Stanback is hurt, and Philadelphia just intercepted a pass. I think my Cowboys are going to become a full-blown 'big school.' We have joined the Big Eight Conference. We then noticed parking shortages. Followed by less courses and more crowded classrooms. There was then a housing shortage.

But not until last weekend did Winthrop become a full-blown 'big school.' We have joined the Big Eight Conference. The meaningless shooting this past week was hurt by Winthrop's initial offer of the Dallas Cowboys. We don't know how to act in a populous community. This can be seen in the number of rumors circulating. Winthrop's众小学校 seem to forget that there are still a lot of us who don't know how to act in a populous community. This can be seen in the number of rumors circulating.

We are a big school — we shouldn't gush anymore. Alternatives: call the police, campus security, or local newspaper for fact-check information.

The recent news heard last weekend included "mass shootings by a group of protest- ing Iranians" to a "mob of communist blacks retaliating against whites." The facts are that there were two young adults charged with two counts of assault and battery, with intent. They are also charged with three other fire-arm related incidents. After hearing the rumors, I was ready to leave town, but when I called the Rock Hill Police I soon found out the facts.

Another problem that this ex-small school is having is the influx of many students and athletes as they have passed through W.C. They are even trying to recruit a graduate of the Physical Education Department and woman athlete. Why? She is a PROFESSIONAL. A professional in every sense of the word. She represents Winthrop College with pride, respect, love, and a philosophy that cannot be equalled. Dr. Griffon has touched the lives of many students and athletes as they have passed through W.C. She is a graduate of the Physical Education Department and woman athlete.

I honestly cannot believe the conclusions that your article implies. You seem to want people to believe that Dr. Griffon was incompetent asElements of this article are being distributed without the explicit permission of the copyright owner. This violation of copyright law could result in severe financial penalties and other legal ramifications.

To the Editor:

After reading Mr. Jackson's latest column, I began to wonder, if there could possibly be two Dr. Mary Roland Griffiths at Winthrop College. After about one second of hard thought I realized that the only one Dr. Mary Roland Griffon.

Dr. Mary Roland Griffon has earned the Winthrop College student for 13 years. She is a Winthrop graduate who returned here to teach, and become Director of Athletics. She is a woman who has friends in every part of South Carolina and in almost every college across S.C. She has represented Winthrop College with pride, respect, love, and a philosophy that cannot be equalled. Dr. Griffon has touched the lives of many students and athletes as they have passed through W.C. She is a graduate of the Physical Education Department and woman athlete.

In conclusion, Mr. Jackson, I don't believe you've read the article. The author of the column is Kathy D. Hill Senior Physical Ed. Major

We are a young "big school," yet we haven't changed our name to Winthrop University. There is no need to relieve yourself over the toilet, or else they herd you out as fast as possible, not trusting you to go by shotgun-wielding youths prior to the shooting. We don't need the five-minute limit on phone calls. I'm willing to comply if the madre and padre are.

Mr. Jackson's quotes were taken. He arrived at his conclusions without seeing the material which Jackson's quotes were taken. He arrived at his conclusions without seeing the material.
Previewing the war of 1979-80

Bob Ford

Okay. You can set aside all the unimportant stuff. The Iranian situation, tension in the Middle East, the recession, and the energy crisis can all take a back seat for now. Let trivial matters fade into the background. It is time to talk about Atlantic Coast Conference basketball.

The most noticeable aspect of the ACC this year is the overall strength of the league. The ACC is awesome in its power, this is largely due to the great recruiting of 1976 and 1977 (Mike Gmms, Gene Banks Mike O'Keehen, Al Wood, Hawke Whitney, Clyde Austin, Frank Johnson, Jeff Lamp, Lee Raker, Albert King, and Billy Williams - a group which should produce several All-Americans in the next two years - were all recruited in those two years). North Carolina and Virginia are legitimate national title contenders, with Duke only a good bench away. N.C. State, Clemson, Wake Forest and Maryland lost three starters between them and probably could all win 20+ games playing in another conference.

As usual, television coverage will be excellent, especially when the conference schedule begins in January. An average of three or four ACC games a week will be shown on the Winter. Following is a team-by-team analysis of the ACC:

GEORGIA TECH: This is Georgia Tech's first year in a full-fledged member of the ACC. Coach Dwayne Morrison lost his two best players and experienced a sorry recruiting year. Well, fellows, welcome to the ACC.

NORTH CAROLINA: Dean Smith, winningest active coach in the nation, is a master strategist and is unparalleled at getting his players to perform at or above their potential. The Tar Heels are led by All-America forward Mike O'Keehen and All-ACC forward Gene Banks, Bob Berder, Kenny Dennard, and Vince Taylor, a dynamic starting lineup. Coach Bill Foster recruited four top-notch freshmen who must immediately provide depth to the Blue Devils. That is Duke's only weakness. The starters, especially the Big G, must remain healthy. The talent is enough to carry Duke into the top ten and perhaps into first place in the ACC.

NORTH CAROLINA STATE: The Wolfpack has suffered disappointment since David Thompson graduated in 1975. Norman Sloan can recuit - evidence is the signing of Thuray Bailey, Sidney Lowe, and Derrek Whitens this year - but defections, early graduations, and a lack of team play and teamwork have derailed the Wolfpack. Over the summer most State returnees stayed in Raleigh to work together. Listening to the players, it sounds like the team is much better than last year. The team Includes four players hovering around 6-10 in Bill Ross, Horace Wyatt, John Campbell, and Larry Nance, the only one last year to display any consistency. If one of the other big men could develop, Foster could go with a double-post offense utilizing all three talented guards. If so, the Wolfpack could be a team to watch.

MARYLAND: The "UCLA of the East" never became one. After three straight disappointing seasons (disappointing when you consider the talent the Terps have possessed) this is a crucial year for Lefty Driesell. The team is again loaded with Bill Williams - who led the ACC in rebounding as a freshman, Brent Graham, potential All-America Albert King, and a plethora of competent guards. There is no center, however. Lefty will probably switch Williams to the pivot. But Maryland's most serious problem is attitude. They exhibit a lackadaisical defense and a tendency towards one-on-one basketball. Worsen, they seem to give up when the going gets tough. One of the primary functions of a coach is to instill the proper attitude in his players. Driesell must get his act together.

VIRGINIA: Everyone knows about Jeff Lamp and Lee Raker, both back from All-ACC seasons. Lamp led the league in assists as a non-starter, and Raker is a cinch to make All-America. Round out the team are Jeff Jones, who led the ACC in rebounds, and four-year starter Mike Owens. The strongest starting five in the conference could make for an average bench. Coach Terry Holland is a crafty floor general. By season's end the Cavs could be the league's best team and the nation's best. (They play the Russian national team tomorrow night.)

DUKE: Being an ardent Blue Devil supporter, I will tell you unequivocally that Duke is the best team in the ACC. The Greatest Team In The World is led by All-America center Mike Gums and All-ACC forward Gene Banks, Bob Berder, Kenny Dennard, and Vince Taylor. The starters, especially the Big G, must remain healthy. The talent is enough to carry Duke into the top ten and perhaps into first place in the ACC.

Now for the also-eams which teams which break into the top 20, but not the top 10:

NORTH CAROLINA STATE: The Wolfpack has suffered disappointment since David Thompson graduated in 1975. Norman Sloan can recruit - evidence is the signing of Thuray Bailey, Sidney Lowe, and Derrek Whitens this year - but defections, early graduations, and a lack of team play and teamwork have derailed the Wolfpack. Over the summer most State returnees stayed in Raleigh to work together. Listening to the players, it sounds like the team is much better than last year. Soccer team district champs—

(Continued from page 1)

BY KELLY GORDON

The Winthrop Chanticleers took an unexpected break in their annual fall tournament, held in Byrnes Auditorium Nov. 6. with a 1-0 victory over the No. 20 University of Alabama in Huntsville last Saturday. Yet the match was not even the half of the story, as the University of Alabama, the soccer Eagles can win the championship during the 11-year history of District 4.

Edgerton kept the momentum in control when he said to the audience, "No, this was not planned, we'll have the fire out in less than a second." Later he added, "I know there's been talk of getting new curtains..."

The fire was extinguished after ten to fifteen minutes of fire-fighting, and Edgerton added that the fire received more publicity than the concert itself. "It's rather ironic that people get more excited about a small inconsequential fire than the beauty of musical masterworks," said Edgerton. "An accident is newsworthy, but an accident is not as newsy, but the concert itself was even reviewed. The concert was just as newsworthy, if not as spectacular."

Phi Upsilon Omicron initiation

Phi Upsilon Omicron, National Honorary Home Economics Club, will initiate new members November 19 at 6:00 in Thursday 110, according to Deborah Martin, President. Martin said that the initiates have shown leadership, character and service and have maintained a 3.2 GPR. Phi Upsilon Omicron meets every second Monday.

Iranian students defend their country

BY PENNY THERRELL

"The Shah is not human; he's an animal."

This statement was made by Shahab Lavasani in an interview that he and Bagher Seblehamedd, a fellow Iranian student, had on November 9 concerning the Iranian and U.S. conflict.

"Why doesn't President Carter care about one foreigner when he should be concerned with sixty of his own people?" added Seblehamedd in disgust. Both students held the overall policy of the United States towards Iran, which they believed to be a continuation of the Shah's policies.

According to Lavasani, President Carter should have helped the people of Iran and not the Shah.

Ensemble series to be held

BY BECKY ALLEN

The Winthrop Concert and Jazz Ensemble will perform in Byrnes Auditorium at 8:00 Thursday, Nov. 30th, as part of the School of Music Ensemble Series.

The program will be in two parts. The Concert Band, conducted by William Malamet, will play the first half, and Dr. David Franklin will direct the Jazz Ensemble in the second half. Admission is free and open to the public.

Malamet encourages all students on campus "to come and hear their band," and promises a "program of quality." The Concert Band will play five selections including a piece guest conducted by Major Jim Smith of the United States Army Reserve and director at Spartanburg Senior High School.

The first half of the program will feature JERICHO RHAPSODY by Morton Gould. This piece features the trumpet section playing antiphonally and is based on JOSHUA FIT THE BATTLE OF JERICHO.

Franklin is very pleased with the progress of the Jazz Ensemble. "This semester begins with a number of freshmen in the group," said Franklin.

The Ensemble program includes current and classic pieces in jazz and big band styles. "What we try to do with the band is perform not only contemporary big band literature but provide classic historic literature for the education of the people in the band and the audience as well," said Franklin.

The Jazz Ensemble program consists of seven works including Bossa-Rock (bossanova and rock) and pieces written for the Count Basie Orchestra and the Buddy Rich Band.

N-dump closures threaten to halt nukes

(CPS) - "We don't have any problem now because we can ship this stuff twice a year," says Bill Wilson, a nuclear researcher at Washington State University. "But in six months, we'll have a problem."

It's not alone. Universities all over the country that do nuclear research or use radioactive material have had no place to dispose of their nuclear waste since two of the nation's three commercial nuclear dumps were closed last month.

Dumps at Hanford, Washington and Beatty, Nevada, were closed in the wake of a joint letter from Washington Governor Dixie Lee Ray, Nevada Governor Robert List, and South Carolina Governor Richard Riley to the Nuclear Regulatory Commission (NRC). The letter warned they'd close the dumps if the NRC didn't clamp down on packaging and transport of radioactive waste.

Ray and List carried out their threats in October. Now Riley of South Carolina has threatened to close down the dump at Barnwell, S.C.

The closure at Barnwell would only make a bad situation worse, since the Hanford and Beatty closings have already left most schools without a place to dispose of their nuclear waste.

Most campuses report they have some limited room to store waste until the dumps re-open, but many research efforts have been slowed to cut down on waste production. Thus far only one research program has been severely restricted by the closings.

"Right now we're stopped," Paul De Luca of the University of Wisconsin told the CHRONICLE OF HIGHER EDUCATION. "We've been stopped for three or four weeks, and if something doesn't happen pretty soon, I'm not sure what we'll do."

De Luca, a physicist, has been involved in cancer research using a "fast" neutron generator, the only one of its kind in the nation. De Luca's work was stopped when the University of Wisconsin's quota of tritium—a radioactive isotope—had been filled. The NRC regulates the amount of radioactive material any university may have at one time.

But De Luca's problem is unusually severe. Most campus research projects are being continued, even though some are concerned about coinciding storage problems.

At Purdue the disposal of radioactive trash is contracted out to Atomic Disposal Co., an Illinois firm that sent Purdue's last shipment of waste to the Hanford site in Washington.

"We can hold out about three months," Dr. Richard Vetter, assistant safety officer at Purdue said. "Then we will have to go back to the university for more space."

Dr. Vetter explained that Purdue ships out about 400 cubic feet of radioactive trash every three months, at a cost of about $10,000 a year to the university. Most of the waste is medical, along with paper, gloves, syringes, and animal carcasses, all of which are stored in a Quonset hut a mile from campus.

"I don't perceive this as a technical problem. It seems to be more of a political problem," Vetter observed. "If the NRC can insulate safe disposal and transport, I think Washington and Nevada will open right up."

The big concern at health-related nuclear programs is that patients needing radiological treatments will soon be turned away.

Leonard Freeman, president of the Society of Nuclear Medicine, has asked the governor to allow hospitals and research laboratories to continue shipping waste until some other means of disposal can be found.

"The waste problem is causing an immediate crisis for nuclear medicine," Freeman declared, "and for thousands of Americans who need its vital services."

But Michael O'Brien, University of Washington radiation safety officer, said, "The medical use does not generate much waste."

O'Brien said the biggest threats to nuclear research at UW were animal carcasses used in radioactive experimentation.

The university briefly restricted animal use. O'Brien reported, until it found more storage space.

"We'll store it in the hallways in front of the president's office," O'Brien commented facetiously. "But we must find a way to store it indefinitely, or story the research."

Governor Ray did announce last week that he may open the Hanford site if federal officials crack down on sloppy waste shipment practices.

Chairman Joseph Hendrie said the NRC is stepping up inspections of interstate waste shipments, and will be "pressing enforcement and inspection responsibility very hard."

"If all of these things fall into place," Governor Ray replied, "then I think we can say we will make the site available, particularly for nuclear medicine waste."

If you missed Bob Lacey and Moira Quinn, you can catch a glimpse of them at Winthrop on the Nov. 28th and 29th PM Magazines. (Photo by Tim Hartis)
P.E. professor receives honor award

(McA Release)

Martha Sue Taylor, associate professor of physical education at Winthrop, has received the 1979 Honor Award from the South Carolina Association for Health, Physical Education and Recreation (SCAHPER).

Taylor was the only recipient of the award this year. SCAHPER presents the award to members who have exhibited outstanding service in the field of physical education, health, and recreation. Recipients are selected by the board of directors.

Taylor was born in Asheville, N.C., but later moved to Greenville, S.C. She majored in physical education at Winthrop, and began her teaching career in Greenwood, S.C. Taylor earned her master's degree at the University of Tennessee and doctorate at the University of North Carolina at Greensboro.

Taylor has published articles dealing with teacher-learning subjects in the S.C. JOURNAL OF HEALTH, PHYSICAL EDUCATION, AND RECREATION and the PHYSICAL EDUCATOR. She has conducted numerous clinics and workshops on topics including "Alternative Careers in Physical Education" and "Movement Experiences for Young Children." A recipient of an institutional improvement grant at Winthrop, Taylor established a physical education lab, designed teachers' workbooks for teachers, and worked on committees to develop curricula at the state and local levels. Students have also nominated her for the Winthrop Excellence in Teaching Award.

Four principle student-life areas will be covered by the Winthrop Board of Trustees as they consider the board's future planning," said Murdy. Four principle student-life areas will be covered by the Self-Study Survey Committee, consisting of Dr. Mundy, Dr. Bill Shepard, assistant professor of business administration-management, and Dr. Gerald Pernsley, associate professor of business administration-management.

The Institutional Goals Inventory (IGI) will be conducted on campus the week following Thanksgiving, according to Dr. Bill Mundy, professor of psychology and chairman of the Self-Study Survey Committee. IGI, conducted at random by mail, will involve 160 Winthrop employees from the areas of Arts and Sciences, professional schools, Board of Trustees, Academic Administration and Services Administration.

"The Institutional Goals Inventory is an instrument designed for colleges and universities to help them determine their educational goals, establish priorities among these goals, and give direction to their present and future planning," said Mundy.

The survey suggests 90 possible institutional goals which are rated on a five-point scale. It will be conducted by the Self-Study Survey Committee, consisting of Dr. Mundy, Dr. Bill Shepard, assistant professor of business administration-management, and Dr. Gerald Pernsley, associate professor of business administration-management.

The survey will be conducted on 500 freshmen, sophomores, juniors, seniors and graduate students by the Student Development Committee and the Student Advisory Committee under the direction of Dr. Carol Anfinson, assistant professor of elementary education and chairperson of the Student Development Committee.

"The purpose of the SRC is to help administrators and faculty members understand the needs and concerns of students so that programs and services may be made more responsive to those needs," said Mundy.

Four principle student-life areas will be covered by the survey: processes of instruction, program planning, administrative affairs, and out-of-class activities.

"Supershaw" cast

Les Reynolds, associate professor of English and drama, has announced her cast for "Supershaw," a comedy to be presented November 29 and 30 in Johnson Auditorium.

The cast includes: Ele Trowell, Bob Crabtree, Betsy Cole, Jenny Dunn, Carol Sullivan, Terry Moore, Jeff Smith, Bart Silver, Phyllis Ariel, Jay McLeod, Geoff Winters, with Roy Magen, associate professor of music, in the role of George Bernard Shaw.

"Supershaw" is the framework of two of Shaw's plays, "The Devil's Disciple" and "Man and Superman," that I have adopted and compiled into a script," said Les Reynolds.

The production is a collaboration of the Drama Department with Dr. Christopher M. Reynolds as associate producer, Blair Bessey as technical director, and myself as director," Reynolds said.

Trustees choose architect

A Charleston architectural firm is Winthrop College's top choice to design a new School of Education building on the campus.

The selection of Lucas & Stubbins Associates by the Winthrop Board of Trustees will be submitted to the S.C. Budget and Control Board for final approval. As their second and third preferences, the Winthrop trustees have chosen Lockwood-Green Engineers, Inc., of Spartanburg and Willbur Smith and Associates of Columbia, respectively.

McLaurin Building, built in 1901 as Winthrop's second dormitory, will be razed to make way for the new School of Education building. Demolition of the 54,000-square-foot McLaurin would cost half a million dollars more than a new building the same size. Plans now call for a $9.000-square-foot building at an estimated cost of $4.5 million.
Springs show under fire

BY TIM HARTIS

The controversial 21st Annual Traveling Art Show opened Thursday, Nov. 15, in the Rutledge Art Gallery, according to Edmund D. Lewandowski, chairman of the Art Department.

The 40-piece exhibition by Carolina artists was selected by Ira Licht, director, Lowe Art Museum at the University of Miami and Jane Livingston, associate director of the Corcoran Gallery of Art in Washington, D.C., from 864 amateur and professionals’ works.

Mike Kampen, Charlotte Observer art critic, recently directed criticism at Springs Mill’s show saying that “the judges have created a highly questionable collection that will be generally accepted as the best art being produced in the Carolinas.”

Livingston responded in the Observer saying that “Ira and I came to an honest agreement. The show is varied, arresting and lively; in short, it is not boring.” Since the first Springs Art Show in 1959, drawing 147 entries and offering a $500 first prize, the show has grown to more than 1300 easel paintings, graphics, paintings and drawings on paper, mixed media and sculpture in 1977 competing for $6000.

Off this year’s best-of-show easel painting, “Joseph Detective: With Rainbow And Moon” by Paul Hartley, East Carolina University professor, Kampen said, “I do not find it sufficiently imaginative to be included in the traveling show, much less cany the best-of-show honors.”

Winthrop art faculty have expressed similar, but milder, views toward the show. “This exhibition is a highly personal selection of work expressing the art taste of the jurors. It fails to show a more comprehensive range of work currently being done by the established artists of the Carolinas,” said Lewandowski.

David Freeman, associate professor of art, said, “I feel that it is an extremely unusual and varied exhibit. The jurors selected a few very fine pieces, but I feel that the inclusion of a large number of pseudo-primitive works weakens the quality of the exhibition as a whole.”

The Springs Traveling Art Show can be seen Monday-Friday, 9:00-4:30 and Sun. 2:00-5:00 through December 1.

News briefs

Registration time near

Early Registration for second semester 79-80 will take place in McBryde Hall November 28, according to Jane Tucker, director of Registration.

Each presently enrolled undergraduate and graduate student — excluding December graduates — will receive registration packets the week of November 10. December 1979 graduates should go to the Admissions Office if they intend to return to Winthrop for further study.

Tucker said that students needing assistance in planning their programs should consult their advisors November 12-16, or at times set up by their respective academic divisions.

Greek show to be held

A Greek show featuring various sororities and fraternities on campus will be held Wednesday, November 28, at 5:00 in front of Byrnes Auditorium, according to Janet Adams, president of Zeta Phi Beta, the sorority sponsoring the event.

“The purpose,” said Adams, “is to bring the Greek organizations together.” Adams said that the show is open to the campus and will feature pep songs, sweetheart songs, and "steps" of the participating sororities and fraternities.

BSU presents musical

"Part the Waters, Lord," a musical by Charles Brown will be presented Thursday, November 29 at 6:00 at the Baptist Student Union, said Dena Lucy, Baptist Student Center secretary.

“The choir consists of Baptist Student Union members who enjoy singing contemporary sacred music," said Lucy, "The choir will be directed by Sandra Yapp, a junior majoring in social work. The program is open to all Winthrop students."

RAX. YOU SAID A BUNFUL.
Eagles gear up for their sophomore season

BY DAVID JACKSON

As the Winthrop Eagles embark upon their second season of existence, there is only one thought on each member's mind — Kansas City. Kansas City is to NAIA (National Association of Intercollegiate Athletics) basketball players what Mecca is to a Moslem. It is the holy grail of NAIA basketball, the place where 31 district champions and a wildcard team go every year to play for the national championship.

Last year, the Winthrop Eagles came within two points and two seconds of making this trip, losing to Central Wesleyan 75-74 in a disputed call in the District 6 championship game.

This year, the Eagles are expected to take that championship and make that epic trip to western Missouri. At least that's what the district coaches think. Through a poll conducted among them recently, here are the projected order of finish for this year's district:

1) Winthrop
2) Lander
3) Coastal Carolina
4) Newberry
5) USC-Allen
6) Francis Marion
7) Central Wesleyan
8) College of Charleston
9) Presbyterian
10) Erskine

A major reason for this optimism is the fact that Winthrop is returning everyone (plus one) from that first year team which finished 25-10 and came oh so close to the championship.

Winthrop's one new player is Charles Johnson, a 6'6" forward transfer from Gardner-Webb who will help immediately. He becomes eligible on January 10.

One thing to worry about is injury and it has already taken its toll on one key player, Doug Schmiedling, a starter for the first 13 games until a knee injury sidelined him. Schmiedling is still recovering from a subsequent operation on that damaged knee.

The Eagles will also be hurting early on due to the absence of back-up center Alan Grah. Grah has 2½ years of eligibility remaining and is taking this semester off so he can play complete junior and senior seasons.

A highlight of this year's schedule will be the Wofford Carolina Classic tournament Dec. 5-6 at Belmont Abbey College. Winthrop will be in a field which includes nine members from the powerful North Carolina District 26. The Eagles' first round opponent will be Johnson C. Smith on Thursday, Dec. 6 at 8:30.

How well will the Eagles do this season? Well, it's hard to tell, but I'll say this. Coach Niel Gordon goes into this year with 376 career victories. If this team can consistently play up to its capabilities, then Gordon may well record his 400th victory before this season is out.

For a close up review of this season, here are some comments we recorded from the coach and players together with a complete statistical review of last season and a 1979-80 schedule.

GORDON: No, I think the pressure of the first year was so great that I'm really looking forward to a more relaxed ball club than had last season. Those pressures had a lot to do with our inconsistent play of last season. That shouldn't happen this year.

GORDON: I try not to let it be a distraction. If anybody tells you that there is not a lot of work involved with trying to do these two jobs at once, then they've never done it before. However, having a good staff of people working within the Athletic Department enables me to concentrate on the basketball season.

Also, having my assistant coach, Skip Goley, helps me tremendously. He's handled our recruiting and Skip, it would be an impossible task.

GORDON: Yes, I definitely would rather be cast in the role of the No. 1 team because it is a tribute to our program and our players realize they will have to perform at their very best each and every night they play.

GORDON: I have to go with the teams which have been there before and have proven themselves like Lander, Coastal Carolina, Erskine, and Newberry. Right behind them, would be those teams which have been knocking on the door but have not made it to the NCAA (National Association of Intercollegiate Athletics).

GORDON: Yes, we're going to go into a delay game if we are unable sooner to try to protect the lead and build on it with a controlled offense. I feel like the experience of guards will let us do that this year.

GORDON: Well, we're set on four positions. We'll have Ronnie Creamer at one forward, and Donnie at center. Rick Rice and Ben Bonner will start at the guards with Gerald McAfee and Dave Hampton as backups. We've still undecided about the other forward spot, as Carl Ferri, Tim Richter, and Jim Gibson have all had starting assignments in previous games at this position. It appears that Britt Hudson, based on his previous games, will be used as a player only in certain situations.

TJ: Do you like being the favorite?

GORDON: Yes, I definitely would rather be cast in the role of the No. 1 team because it is a tribute to our program and our players realize they will have to perform at their very best each and every night they play.

TJ: What are the District 6 teams you are most worried about?

GORDON: I have to go with the teams which have been there before and have proven themselves like Lander, Coastal Carolina, Erskine, and Newberry. Right behind them, would be those teams which have been knocking on the door but have not made it to the NCAA (National Association of Intercollegiate Athletics).

GORDON: Yes, we're going to go into a delay game if we are unable sooner to try to protect the lead and build on it with a controlled offense. I feel like the experience of guards will let us do that this year.

TJ: Have you settled on a starting lineup?

GORDON: Well, we're set on four positions. We'll have Ronnie Creamer at one forward, and Donnie at center. Rick Rice and Ben Bonner will start at the guards with Gerald McAfee and Dave Hampton as backups. We've still undecided about the other forward spot, as Carl Ferri, Tim Richter, and Jim Gibson have all had starting assignments in previous games at this position. It appears that Britt Hudson, based on his previous games, will be used as a player only in certain situations.

A Talk with Coach Gordon

Editor's Note: In order to get an overall perspective on the upcoming campaign, The Johnsonian took its tape recorder to the office of head coach Niel Gordon.

TJ: First of all, what is your opinion on the controversial last minute of last year's district championship game?

GORDON: In the confusion, I honestly didn't know what had taken place. After sorting out everything the next day, I found out that the basket we scored after the foul on the Moslem (which we thought was a free throw) was instead a regular basket.

TJ: The excitement of making this trip, losing to Central Wesleyan 75-74 in a disputed call in the District 6 championship game.

GORDON: Yes, I definitively would rather be cast in the role of the No. 1 team because it is a tribute to our program and our players realize they will have to perform at their very best each and every night they play.

TJ: What are the District 6 teams you are most worried about?

GORDON: I have to go with the teams which have been there before and have proven themselves like Lander, Coastal Carolina, Erskine, and Newberry. Right behind them, would be those teams which have been knocking on the door but have not made it to the NCAA (National Association of Intercollegiate Athletics).

GORDON: Yes, we're going to go into a delay game if we are unable sooner to try to protect the lead and build on it with a controlled offense. I feel like the experience of guards will let us do that this year.

TJ: Have you settled on a starting lineup?

GORDON: Well, we're set on four positions. We'll have Ronnie Creamer at one forward, and Donnie at center. Rick Rice and Ben Bonner will start at the guards with Gerald McAfee and Dave Hampton as backups. We've still undecided about the other forward spot, as Carl Ferri, Tim Richter, and Jim Gibson have all had starting assignments in previous games at this position. It appears that Britt Hudson, based on his previous games, will be used as a player only in certain situations.
No. 11

RONNIE CREAMER, one of the famous twins, is a 6'10" Center from Williamston (or Anderson), S.C., who will start at Center for the Eagles this season. Last year, Ronnie averaged 10 points and 8.8 rebounds per game. This past summer, he and his brother Bennie toured with an NAIA star team in Aus-

No. 12

RONNIE CREAMER is, like his brother, a 6'10" Center from Williamston (or Anderson), S.C. He was Winthrop's only all-district performer last season, averaging 17 points and 8.8 rebounds per contest.

No. 13

DONNIE CREAMER, one of the famous twins, is a 6'10" senior from Williamston (or Anderson), S.C. who will start at Center for the Eagles this season. Last year, Donnie, Bennie and Ronnie earned a first place finish with their own com-

No. 21

DAVE HAMPTON is a 6'11" senior from Germantown, Ken-

No. 32

JIM GIBSON is one of the leading candidates for the starting center position. A 6'7" sophomore who played with Rick Riese at Wakefield High School in Millis, Mass., Gibson started the last 14 games of last season after coming off the bench very little during the first half of the year.

TJ: During the first part of last season, you played bench at all. During the second half of the season, you started most of the games. Why the change?

GIBSON: I just never got a good opportunity to show that I could do for about the first 25 games. After I came back from Christmas break, I worked hard and had a good attitude towards basketball and just kept being tall, and I finally got in the

TJ: How do you avoid charges that you are timid, playing one good game at one bad game?

GIBSON: That's mostly from always being a undersized man, I guess. I've been working on my consis-

TJ: What are you shooting for statistically this season?

GIBSON: No statistics in par-

TJ: Ok, you've been criti-

MCAFEE: Yes, a lot, I think I've improved on it, but I know I need to improve a lot more.

TJ: Does it matter whether or not you start?

MCAFEE: Not really. I would like to, but I can if I have to

TJ: Does it matter whether or not you start?

MCAFEE: Not really. I would like to, but I can if I have to

TJ: Does it matter whether or not you start?

MCAFEE: Not really. I would like to, but I can if I have to
still not that good, but I've improved. I've also worked on my passing and going strong to the boards for rebounds.

Sophomore from Sharon (York), C. is also a possible starter at forward. His biggest handicap is his size, since he often has to go up against other players several inches taller. However, he has tremendous desire and his effort and hustle is quite inspirational.

TJ: How do you overcome your 6’2” height disadvantage while playing a forward?

FEEMSTER: Hustle, keep up team spirit and give it your best during the last minutes of a close game.

TJ: You've only played one game this year. What are your feelings about coming off the bench?

FEEMSTER: Well, it's an advantage in that you can come in fresh and take advantage of being the fresh man. But it hurts you because you're kind of stiff. You've just got to be ready to play at all times.

TIM RAXTER, a local Rock Hill product who is a 6'7" sophomore, is the third candidate for that fifth starting assignment. Raxter is aggressive who just loves to dunk. He had a great district tournament last March (particularly in the semifinals against Lander) and came within a few votes of making the all-tournament team.

No. 44

GARY ADOCK, a 6’5” sophomore from Kankakee, Illinois is one of the three Eagles who will not be returning for the opening of the season. But unlike Alan Ours and Charles Brunson (who are both ineligible until second semester) it is uncertain when Schmieding will return as he is nursing the effects of several knee injuries and an operation. Schmieding started the first 13 games last season and averaged 10 points a game before first injuring himself over the Christmas break.

TJ: How do you feel about your role on the team?

SCHMIEDING: I hate it. Especially, this season, because this is going to be a good year, I can tell. Hopefully, I will be able to contribute this year.

EAGLES BASKETBALL

All Ours, the 6’11” gentle giant from Silver Springs, Md., is ineligible first semester. Ours did a good job last year in backing up Donnie Creamer at center and giving him a rest in certain games. He has a remarkable outside shooting touch for one so very big.

TJ: What did you work on over the summer?

Ours: My aggressiveness and quickness mainly. I also worked on my inside moves.

TJ: What’s the story behind your ineligibility this semester?

Ours: Well, I’ve got 2½ years of eligibility left, so I’m picking this semester to sit out so I can play my entire junior and senior years. I’ll be eligible Jan. 1 of next year.

TJ: Are you looking strictly to back up Donnie when you return or are you aiming for a starting berth?

Ours: My role is pretty well decided—to back up Donnie. I’m going to try and fill that as best as I can by coming off the bench and sparking the team if it needs it.

CHARLES (or CHARLIE) BRUNSON, a 6’5” sophomore from Great Falls, S.C., is the Winthrop Eagles’ new kid on the block. He is a transfer from Gardner-Webb College (which beat WC 113-77 last season) and will be eligible on January 10, 1980. Few people around District 6 know about Brunson but, beginning in January, they will quickly learn that this guy can play.

TJ: Why did you transfer?

Tour a foreign country

BY LORI RIDGE

Have you ever wanted to tour a foreign country, let's say France, for instance? Sure it's expensive, and maybe you don't speak a second language, but don't put the idea completely out of your mind. There is a way you might enjoy the various sites of France without charging and with little or no comprehension of the language.

Winthrop's Modern and Classical Language Department is presenting a series of 15-minute filmstrips, shown every Tuesday in the third floor language lab (327-A) of Withers, between 4 and 5 p.m. One filmstrip per week is repeated four times during the hour, and each filmstrip, narrated in French, provides some insight to aspects of the French culture.

Two more filmstrips will be shown before the end of this semester. They are entitled, "Vola les Partisans," to be shown November 27, and "Noel," being shown December 4.

The language lab is run primarily by student language majors. Freshmen Fred Powell and Joyce Davis, both French majors, claim that their jobs as language lab assistants have proven to be academically beneficial. "This is my way into the Language Department," Fred says. "It can get pretty hectic, there's almost always something to do. One of the biggest advantages is that we can always listen to our lessons on tape while we're working.

Joyce explained what it is that lab assistant does. "We run audio-visual equipment and change recordings on tape," she said. "Basically it's a job that calls for anything from operating expensive equipment to running errands. All according to Fred, "There are some native speakers (of almost any language) in the department) who work in the lab, and if you come in, they'll be glad to help you with pronunciation or other problems."

Other language lab assistants are Sherry Green, Beatrice Cote, Laura Jane Siridy, and Ed Elnar.

According to Mr. Spencer Heyton, assistant professor of modern languages and lab director, "Use of the lab facilities is very valuable in a language program, especially if you want to become a foreign language teacher. Actually, the lab is useful to anyone who desires to improve their language skills in any way.

The Foreign Language Department is not only expanding in its number of language majors, but it is also acquiring modernized equipment to accommodate the students' needs. The latest addition to the lab machinery is a self-propelled Mirotonic Dukane film projector on which the weekly filmstrips are shown. Some of the other facilities include a standard projector, which pulses the filmstrips shown on the Dukane; and a Telex copier, which duplicates master cassettes onto students' own Scotch brand tapes at high speed.

Also, there is a laboratory console on which two reel-to-reel tapes can be operated and four different cassettes can be played simultaneously, piped into any set of headphones. Before the Telex copier was acquired, another console was the only piece of equipment available for duplicating tapes. This console is still used for other material.

The Foreign Language Department is one familiar to many Winthrop students, and yet too few language students use the recording laboratory in their spare time. But remember, you don't have to be a foreign language major or minor to enjoy and benefit from the facilities available.
Historic Withers

BY MICHELE HAULTER

Sarah Craig and Elizabeth Stowe of York County nominated Withers Building, located on the Winthrop College campus, to the National Register of Historic Places, which is the national official list of Cultural Resources Worthy of Preservation, on Oct. 30, the open meeting of the York County Historical Society at the Polk Johnson Center.

According to Stowe, the Historical Society crowded into the Center with such large numbers extra seating was needed to accommodate all present.

"A nomination is no easy matter," said Stowe, "for the register blank is quite complicated and extremely detailed." The bulk of the research was done by Sarah Craig and Elizabeth Stowe, both formally of the Winthrop Training School.

Lewis Cook and Walter Schrader also contributed much time and effort to complete the register blank.

Withers, previously known as the Winthrop Training School, was named after Miss Sarah Withers who was the principal of the training school from 1903 to 1917. Withers, said Stowe, is subdivided into three sections, with its middle part being the oldest building on campus, dating back to 1862. The Tower gymnasium, in back, was one of the earliest built gyms in South Carolina. It was later renovated in 1951 and is still in use today. The front part, modeled after Hampton Court Palace, in England, is Tudor Gothic structure. The front was completed in 1912 with its massive tower rising 110 feet above ground level.

The Winthrop Training School began in Columbia, S.C., in 1896 by David Bancroft Johnson as an answer to his dream of educating women to become qualified teachers, said Stowe. The training school's first home was a small one-room carriage house in Columbia and loaned to Johnson by the Columbia (Presbyterian) Theological Seminary. In 1898, the building was brought brick by brick to Winthrop and now is located behind the mumu wall.

Johnson, after receiving some financial assistance, began looking for a city in which to build his training school. Rock Hill outbid several other cities, including Greenville and Spartanburg, by offering money, land, and brick.

The training school was a major factor in establishing the Winthrop Normal and Industrial College of South Carolina. The training school officially opened in 1913 with the purpose of providing practical training of teachers for South Carolina schools. The Winthrop Training School, according to Stowe, was the first place South Carolina and South-east superintendents came to employ teachers.

The training school was a part of Rock Hill school system through it was operated by Winthrop College. The school consisted of grades starting at kindergartners and ranging to the twelfth grade (which was added in 1948-49). The Trustees in the 1912 annual report said, "The training school is the very heart of professional and practical training for which the Normal School exists as to strengthen and perfect the work of the college." The training school also served as a preparatory school for those women unable to enter college due to the lack of school facilities in their communities.

This institution was the first college for women in South Carolina and one of the first in the Southeast, according to Stowe. The training school discontinued grades even through twelve in 1965-66. The school was later closed in 1988 when it was converted into a classroom building. Dr. Charles S. Davis, then president of Winthrop, said of the conversion, "the expanding number of students engaged in the practice of teaching, of which only a small proportion can be accommodated at the training school, has made it necessary for such steps to be taken."

As Elizabeth Stowe said, Withers is not only a historic landmark for Winthrop, York County, and South Carolina, but the fact that the whole building is still in use makes it even more important to be recognized as a national resource.

Food situation seminar

A seminar on the World Food Situation (International Area Studies 425) will be offered next semester, (spring 1980) on Mondays and Wednesdays at 4:00 to 5:15 under the International Studies Program, according to Dr. John Freeman, professor of Biology.

According to Freeman, the course will consider the food situation from several perspectives including nutritional needs, environmental aspects of food production, implications of population growth, effects of political decisions, economic policies and historic developments, the present status of U.S. food policies, and the ethics of food assistance and choices.

"Students interested in further information about course content and organization may call Dr. Freeman at 323-2111 and students interested in information concerning registration and costs may call the Winthrop Admissions Office at 323-2191," Freeman said.

Korean martial art

Winthrop will offer a new course this spring, "Introduction to Tae Kwon Do, the Korean Martial Art," according to Ron Chepesluk, head of Special Collections, Dacus Library.

"Tae Kwon Do is a sophisticated combination of Karate, Aikido and Jujitsu and emphasizes endurance, discipline and self-control," Chepesluk said. A preregistration demonstration will be held in room 106, Peabody Gym, Nov. 26 at 6:30 p.m.

The three-credit hour course, numbered PE 208, will be offered through the Kim School of Tae Kwon Do, Mr. Ju Ilun Kim, 7th degree black belt, director.

Campus rapes appear to be increasing

BY HELEN CORDES

(CFP)- There's a lot going on at the University of Alabama, especially on campus security. The recent rapes of a woman in her dorm room and a man in the campus library have raised concerns among students and university officials. The latest report indicates that there have been at least 25 cases of rape on campus in the past year, with the majority occurring late at night in poorly lit areas.

The University of Alabama Police Chief, Hugh Griffin, puts it this way: "We are concerned about the increase in these incidents and are working to improve safety measures across campus." Griffin has called for increased lighting, more security officers, and stricter rules for visitors entering campus.

Female students seem to be less enthusiastic about student-organized protests to reduce the number of attacks. More frequently, they are pressuring universities to provide adequate security. "Take Back the Night" demonstrations have become more common, with students taking the streets to demand safer campus environments.

Other universities have also seen an increase in campus rapes, with the FBI Crime Index showing a rise in sexual assaults in recent years. The index lists the number of reported rapes, which has been increasing steadily over the past decade.

The University of Pennsylvania has also reported an increase in rape incidents, with the most recent case involving a student who was attacked in a dorm room. The university is taking steps to address the issue, including increased patrols and improved lighting.

Female students are reporting a growing sense of fear and vulnerability, with many feeling unsafe walking on campus after dark. The university is responding to these concerns by implementing new safety measures, such as increased security patrols and better lighting in high-risk areas.

In conclusion, while the increase in campus rapes is concerning, the university community is working together to address the problem and provide a safer environment for all students.
Professor of the week: Sharon Tkacz

BY LORI RIDGE

If you are taking any coursework in psychology, chances are that you have heard of or have taken a spatial ability test that was used by a Winthrop professor in her dissertation and research. The professor is Dr. Sharon Tkacz, instructor of psychology, and this is her first semester at Winthrop.

Originally from Cleveland, Ohio, Tkacz attended Bowling Green State University in Ohio where she earned a Bachelor of Science degree in psychology and math, plus a Masters and PhD, in psychology. She specializes in cognitive performance and sex differences, particularly in light of spatial ability, a topic which she says is "interesting but hot; a lot of people misinterpret the data." Spatial ability is the measurement of an individual's ability to perceive and recognize objects at different orientations in space, and the test results tend to show a correlation with stereotyped masculinity and femininity.

Tkacz currently teaches Introduction to Psychology, undergraduate Development, and graduate Development courses. Next semester, instead of teaching graduate Development, she will conduct a course entitled Psychology of Women.

Tkacz said, "My work is a big interest to me. There is a lot of new research that relates to my dissertation, and I like to keep up with it in order to learn about any new developments and findings." She also said that while she is here at Winthrop, she would like to continue her research "to find and explain the factors for the apparent sex differences in spatial ability and cognitive development.

Tkacz believes that motivation plays a key role in understanding and applying study material. Referring to students in general, she said, "I can see that some people don't apply what they learn and learn to class to how they think and study. People can be motivated, but they can act the wrong way." Tkacz also said that in her opinion, "some people going to college don't know why they're there. I think that once you get out of your parents' home you need to motivate yourself."

In applying this principle to herself and her career, Tkacz said she thinks that if she had not entered the teaching profession, she would have devoted herself to research in the same field. "I think you should have a job that you find interesting and fun," she said, "not necessarily one that pays more. Psychology research is a way that you can learn more about myself as well as about others."

Aside from her career and research, Tkacz enjoys "sewing, macrame, crochet, knitting... and all the other things I just don't have time for," she says nonchalantly.

Tkacz has previously taught at Bowling Green State University and at Central Piedmont Community College in Charlotte. She is currently serving a temporary contract with Winthrop. Tkacz said that she was influenced to come to Winthrop because her husband, who is also a psychology professor, works here. "It isn't often that a college or university has positions on its staff that are filled by a married couple," she said. "We're very lucky and happy to be working here together."

In conclusion, Tkacz said that if anyone is interested in doing some research for credit in psychology, they should contact her in the afternoons on Mondays, Wednesdays, and Fridays in office 500-K Thurmond, extension 2117.

Winthrop picked to win district

BY DAVID JACKSON

GREENWOOD—The Winthrop Eagles in their second year of existence have been chosen to take this year's NAIA District Six basketball championship in a poll conducted among the league's coaches.

Andy Belk, the district secretary and publicity chairman who doubles as Sports Information Director for Winthrop, made the announcement at the district's annual pre-season basketball press conference Sunday.

Last season, Niel Gordon's Eagles finished with a 25-10 record and came within a single point of winning the district's championship game, losing in the final seconds to Central Wesleyan, 76-74. Every player from that WC team returns this season.

Winthrop is followed in the poll's Top 10 by, in order of votes received, Lander, Coastal Carolina, Newberry, USC-Allen, Francis Marion Central Wesleyan and the College of Charleston (which tied for seventh), Presbyterian and Erskine. Allen, USC-Aiken and Lander each received one vote.

Winthrop's Ronnie and Wofford return all of the players from last year's team. Presbyterians and Voorhees defeated Winthrop last year.

In addition, fine teams like Lander, Erskine, Newberry, USC-Allen (all of whom defeated the Eagles at least once last season), and Coastal Carolina lost only one or two players from last season's squads.

Another major factor behind the district's rise in quality of play is the improvement of the league's coaches. Bergman commented that this year's district has "the best coaches we've ever had in the league since I arrived five years ago. The super job they have done in recruiting and coaching is comparable to any league or conference in the nation."

The district's newfound optimism, confidence and enthusiasm was dramatically brought out by Francis Marion's Lewis Hill who boldly said that "we have finally caught up and passed many other schools in the country, including District 26 in North Carolina" (which sent four different teams to the NCAA national finals during this decade).

Gordon echoed Hill's sentiment by claiming that "Coastal's Daniel Hastings (which are used to determine District 6 standings) still has us beat about 10 points behind."

The Winthrop basketball team will get a chance to prove this comparative thesis when it participates in the Charleston WBTV Classic, Dec. 5-8, with nine other North Carolina small college teams.

Among the exciting players which the district is banking on to make this a banner year include Winthrop's Ronnie and Donnie Creamer and Rick Hesse; Central Wesleyan's Kenny Walson; Dan Dixon of Erskine; Francis Marion's Robert Moore; James Hill of Newberry; Dick and George Crippen; USC-Allen's Jack Norris and Terry Cooper; the USC-Aiken team; and Central's John Kress, Limestone's Gene Hastings and Larry Wall of USC-Allen.

Kress comes to the College of Charleston with impressive credentials, earning several years as assistant coach to Lou Carneswine with the old ABA's New York Nets and St. John's University which advanced to the NCAA quarterfinals last season.

Wall, who will be in his first year at USC-Alken, is also an interesting study. He had a very successful eight years as coach at North Greeneville College, taking several teams to the National Junior College Tournament. Last year, he won 23 games in his only season at Cumberland College in Kentucky.

At Alken, Wall inherits a team that returns seven people from last year's playoff team which lost in the district quarterfinals by a basket to eventual champion Central Wesleyan. In addition, he has added four men who played for him two seasons ago at North Greeneville, including Strickland, a Junior College All-American. However, Wall's first season at Alken will be a toughie—the Lancers host league favorite Winthrop on Saturday, Nov. 17.

For more information about the upcoming season, turn to our special section.

CATCH A GOOD HOLIDAY!
Volleyball team grabs second

BY DAVID JACKSON

The Winthrop volleyball teams experiences against the College of Charleston this season have been awfully frustrating. Twice during the regular season, they lost to the Cougars in matches that were really not that close and in which the Eagles did not play well at all. Winthrop also played Charleston twice last weekend at the South Carolina AIAW Division II championship tournament in Florence. They played much better in these two matches, yet again lost each. However, it was not a totally lost weekend for Elaine Mozinho.

The Nov. 9-10 weekend's work apped Winthrop's season record to a very impressive 37-4. All four losses have been at the hands of the College of Charleston Cougars. As for her team's performances against Charleston, Mozinho said, "We played really good against them in the tournament—both matches went to three games. We know we can beat them, because we have beaten them three games in the matches we've played against Charleston." Winthrop may well get another shot off Charleston in the regional tournament.

Winthrop opened up the state tournament with pool play on Friday, November 9, and recorded three easy wins. They whipped the Presbyterian Blue Hose 15-3, 15-9, South Carolina State 15-2, 15-7; and Baptist College 15-11, 15-9. "Those three wins put them into the championship pool the next day."

The Eagles opened up its play on Saturday with a tough 8-15, 15-3, 15-7 over host team Francis Marion. Then came Charleston.

The Eagles lost this first match to Charleston 10-15, 10-16, 8-15. However, they rallied to beat Francis Marion 15-11, 10-15, 15-3 to clinch at least second place. They could still win the title if they could beat the Eagles. But it was not to be as Charleston rallied up its fourth consecutive win over Mozinho's team, this time by a score of 15-10, 8-15, 15-12.

The point in both matches against Charleston was very close," said Mozinho. "Each match could have gone either way."

Women's preview

Due to the Thanksgiving break, T.J. will miss a week of publication, disrupting plans to run the women's basketball preview next week in time for their first game. So, the preview of the 1979-80 women's basketball team will be a week late and will appear on December 3.

In the meantime, here is the opening schedule of Coach Ann Ellerbe's team:

Wednesday, Nov. 27 - USC-Charlote (7:00)
Thursday, Nov. 29 - ANDERSON JUNIOR COLLEGE (6:00)
Saturday, Dec. 1 - at Lander (7:00)

I am sorry about the mistake and will rectify it on December 3.

Christmas crafts short course

With the season to be jolly just around the corner, Short Courses is offering a class in Christmas Crafts. Taught by a member of the Rock Hill Department of Parks and Recreation, the class will meet November 19, 26, and December 3.

The class will last from 7-9 p.m. and will be held in 220 Dinkins. There is a $2.50 fee which will cover materials. All interested persons must have a WCID and sign up at the Dinkins Information Desk. A 20-person limit has been set for the course.

Josh White concert

The Dinkins Program Board proudly presents Josh White, November 28 in Tillman Auditorium. Admission to the 8 o'clock concert is a WCID, $1 for guests. According to Ronnie Laffitte, DSU president, White is one performer "you won't want to miss. He has a unique style which makes you want to see him again and again."

Laffitte said White's music is a mixture of folk, pop, blues, and gospel, all accompanied by six or twelve-string guitar. A powerful yet sensitive performer, White blends his vocal and instrumental abilities with unique comedy to produce a concert of quality beyond compare.

Laffitte also announced that the questionnaires handed out at the door will serve a dual purpose—to evaluate past concerts and dances in hopes of learning how to allocate money in the future, and to serve as a raffle ticket. The raffle portion will be used to select a door prize winner. The $25 prize will be awarded after the concert. Only one questionnaire per person will be accepted.

ATS presents Martha Holder

ATS will move to the sounds of Martha Holder, a Windthrop graduate from Fort Mill, on November 30 and December 1. DSU president Ronnie Laffitte claims that Windthrop should be proud to have a performer like Holder as "one of our own."

Holder performs popular music by performers like Jimi Ian, as well as her own compositions, from laid back to light and breezy. This former Winthroopian can be seen for a mere WCID.
