The Colored State College.

Orangeburg is called by negroes, "The Athens of South Carolina" on account of its superior position for the negroes in the state. It is a negro settlement and has a negro college. It was the birthplace of Mr. Thomas E. Miller, who is at the head of the Colored State College. Mr. Miller was seven years old when he was sent to school, but he was taught by his mother and a colored teacher. He was able to read and write by the time he was ten years old. He was a clever student and was able to travel to other parts of the United States to study. He returned to Orangeburg and opened a school, which was attended by some of the best young men in the state.

The opening this year is not as brilliant as last year, but it is still a most important occasion. The negro wants his Latin and Greek, but he also wants his English, and he also wants to study the sciences, because he is a man of intelligence.

Mr. Miller thinks it is best to give English and the sciences to the negroes, because they are the most important subjects for the negro to study. He says that the negroes should have a chance to study these subjects, and that he will try to give them a chance to study them. He says that the negroes should have a chance to study English and the sciences, because they are the most important subjects for the negro to study.

But Mr. Miller thinks it is best to give English and the sciences to the negroes, because they are the most important subjects for the negro to study. He says that the negroes should have a chance to study these subjects, and that he will try to give them a chance to study them. He says that the negroes should have a chance to study English and the sciences, because they are the most important subjects for the negro to study.

Mr. Miller says, "I have no doubt that the negroes will be able to study these subjects, because they are the most important subjects for the negro to study. I will try to give them a chance to study them." He says that the negroes should have a chance to study English and the sciences, because they are the most important subjects for the negro to study.

The negro wants his Latin and Greek, but he also wants his English, and he also wants to study the sciences, because he is a man of intelligence. He says that the negroes should have a chance to study these subjects, and that he will try to give them a chance to study them. He says that the negroes should have a chance to study English and the sciences, because they are the most important subjects for the negro to study.
The seeds of the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
the good we reap, we sow in
the earth. As we go on our way,
The LANTERN.

Pony's Defense.

Sweetening Stomach.

scared and that the fact that we had in the United
States nearly eleven thousand United States regi-
ments of troops, of which nearly ten thousand were
reports of conscripts they only had in Switzerland and
Wales during the same length of time one hundred
and sixty-three, should account for a widespread dis-
comfort of the above subject.

We think no better remedy can be suggested than the following:

1. The purchase of "Mary's Mercy" and the regular
driving of humane instruction by teachers in all public schools.
