Senor Titus is speaking of the dispensary issue. I do not mean to intrude upon the subject during the adjournment, but I am of the opinion that some of the best minds in the city should be called upon to give their opinions on the subject.

In my opinion, the dispensary is not what it was intended to be. The idea of it was that of a place where the sick might be put to rest and not be put to annoyance. I do not think the people of the city are satisfied with the way it is worked up. It is a place of business and not a place of rest.

I should like to see the people of the city put something into the way of the dispensary. It is not that I am against the idea of it, but I think it should be worked up in the way it is intended to be.
