TUESDAY, JANUARY 16

One can make a survey of the business world with a profit and gain, and regard the future of business as the home of capital and property and practically all will see that the country is making greater yearly wealth.

Moreover, these same people who claim we need wholly different, can only look to the past, to the past, to the past. But if the past is going to be the bar, then we are not going to get much of anything.

To be sure, it is going to be a long way, but we have got to get our past off the back of us. It is going to be a long way, but we have got to get our past off the back of us.

The best way to get our past off the back of us is to go to school. If we don’t go to school, we are going to have a hard time.

On the other hand if the people of Chester could educate their children, they would have a better chance and more wealth in the future.
