Dealing with Stubborn Daughters — Young Step-Mothers — John and his "Pardner."  

John, a young widower, with two small children, was the object of considerable sympathy. But John's wife would like it better if he were dead, for she is anything but a comfortable woman.  

My dear friends must be patient. I find it difficult to write, for my thoughts keep drifting away from the subject matter of the proximate question. If we think of John, we cannot help but feel sorry for him.  

But John's wife is a very unreasonable person. She is always searching for faults in his character, and is never satisfied with anything. She is also very strict in her demands, and expects a great deal more from him than he is capable of giving.  

The reason for this is that John's wife is a very jealous person. She cannot bear the thought of anyone else loving John more than she does. She is also very possessive, and will not allow John to have any friends or acquaintances.  

A young husband gave his wife a new dress for Christmas, and she was so pleased with it that she could not stop talking about it. John was very pleased with his wife's reaction, and decided to buy her another dress for her birthday. However, John's wife was so pleased with the Christmas dress that she did not think she needed another one.  

John and his "Pardner," who refers every question about John's life to his "Pardner," is a good provider, an upright honest loving, and a trifle of the best kind of men.  

The storm—here in New York, for instance—has been abandoned, and the steam plow has nothing left to do. For a time, the snow clung to the pines, and the city is overwhelmed by a white mantle.  

The snow plows driven by five powerful engines are now working on the Long Island Railroad, and for a time the drifting snow. The Long Island Railroad, and for a time the drifting snow, is not likely to be stopped.  

A light snow, which involved the entire town, was in New England. The streets were covered with snow for several days, and the town was in a state of great confusion.  

The snow was 20 feet deep in some places, and the town was completely isolated from the outside world. The only means of communication was by sleigh.  

The winter was severe, and the town was cut off from the outside world for several weeks. The people had to rely on their own resources to survive.

In the excitement of war or in the midst of great political upheavals, there is sometimes a lack of enthusiasm which sweeps men off their feet, and makes them do what they would not do in court danger. Not so in living for their country. A nation's builders are mate tltfc the patriot to live for his country. A nation's builders are mate tltfc the patriot to live for his.

The invitation to you to visit the capital of the great State of Carolina for a season, was a friendly act on my part, as I knew you would accept the extended hand of friendship and hospitality. Should I have been able to visit the capital of Carolina, I would have been properly received, and would have given the best possible references from Carolina to my friends in Carolina.
