Continued "from last issue."

This man then had to make three more trips, for the remaining three thousand pounds of wire, and it required his time with the four mules.

At 11 o'clock, the next morning, to finish the hauling. Had the improved road been extended to his farm, the original train of two mules could have hauled the wire in two and one-half hours.

Before the road between Zehnour and Jonesville, County, Va., was improved, merchants' hauling goods from Ben Hur, the nearest railroad station to Jonesville, found it necessary when the road was in ordinary condition to use a two horse team for 2500 pounds. Since the road has been improved, these same merchants haul 30 sacks of fertilizer weighing two hundred pounds each with two mules and now makes two trips a day instead of one. The heaviest load of coal hauled on the unimproved road was 30 to 35 bushels, but since the improvement they are hauling 50 bushels of coal.

In Jefferson County, Tenn., between Dandridge and Jefferson City, was a bad for a two horse team. The hauling is done on 100 miles of road, but much is blind and impenetrable.

An account of the value of road service and the improvement of roads.

The United States is spending $12,000,000 a year for the construction of roads. Observation and inspection show that many new roads are being built, but the old ones are in a bad state.

LIVING TOO HIGH.

A public speaker recently said, "The tone of living in America is altogether too high," and a second thought will convince one that he has hit the mark. Middle-class people are too apt to live up to their income; they strive to acquire a degree of "style" which is most unwise in its effect upon society. There is a great deal of this sort of thing going on in the South Carolina cities. People who are not wealthy are attempting to live like people who are rich. It is a very common thing to see a man who earns $20 a week, for instance, wearing a suit worth $50, and this is a very common thing to see. The result is that people are spending more money than they have, and this is destroying the economy of the city. And, no doubt, the people who live like this are not very happy themselves. It is a very bad thing to be in debt, and the people who live like this are in debt. They are living beyond their means, and this is destroying their health, and in the end it will destroy their lives. It is a very bad thing to do.

**J. LYLES GLENN FOR CONGRESS**

To the Democratic Voters of the 5th District.

In the time enjoyed by my opponents to make their statements, I have had time to study the actual conditions of the district and the people who live here. It has been my consistent policy to make the people of the 5th District understand that every public question should be presented in such a manner that the people of the district shall be able to judge for themselves. This has been my policy in making each of my campaign speeches. I have not attempted to present the facts in such a manner that the people of the district would be in any doubt as to what I believe is right.

Very truly yours,

J. LYLES GLENN

P.S. I believe that it is not necessary for me to enter into a discussion of the platform of Mr. W. F. Stevenson. I have had no personal connections with Mr. W. F. Stevenson, and I believe it to be unfair to present the facts in such a manner that the people of the district would be in any doubt as to what I believe is right.
