J T. Bigham
CHILDs ON PROHIBITION

The Author of the Prohibition Measure Makes a Strong Argument In Its Favor.

The debate on prohibition in the legislature is about to attract the attention, and the surrounding states are eagerly awaiting the trip to the State Capital where the bill is to be introduced. Mr. D. H. Enders, the author of the measure, wrote recently in the St. Louis Post-Dispatch that the spirit is a disease, and he has no hesitation in expressing his strong disapproval of the situation. His views are held by many in the state, but they are not shared by all. The bill is expected to be introduced in the legislature this week, and it is anticipated that it will be hotly debated and vigorously opposed. Despite this, Mr. Enders believes that the time is ripe for the legislature to take action, and he urges them to do so without delay.

A BIG COTTON CROP

The 9,000,000 Bales Mark Has Been Reached and Passed.

Secretary Hamersly's New Orleans Cotton Exchange reports that the South Carolina crop is advancing strongly and that the total production is expected to reach 9,000,000 bales by the end of the season. This is a record crop for the state and is expected to bring good prices to the growers. The cotton is of high quality and is expected to command a good market in the South and North. The cotton belt extends from Texas to Georgia and includes parts of Alabama, Mississippi, and Louisiana. The climate and soil are ideal for cotton growing and the state is one of the leading producers in the country. The cotton crop is an important source of income for the farmers and their families, and it provides employment for many others in the region.

The Panama Canal

From the time of the conquest of South America by the Spanish, navigation through the Panama Canal has been of great importance. The canal was a strategic link for trade and military purposes and was a source of revenue for the Spanish Empire. After the fall of the Spanish Empire, the canal fell into disuse and was neglected. It was not until 1881 that the idea of a canal across the Isthmus of Panama was revived by the French. The French attempted to build a canal, but they were forced to abandon the project due to financial difficulties and technical problems. In 1904, the United States took over the project and began construction on the canal. The canal was completed in 1914 and has since become an important link in world trade. It is used by ships from all over the world and is a symbol of the United States' commitment to global trade and commerce.

How Many Farmers Have Stevenson's Cookbook?

The recent performance of Mark Twain's book, "The Adventures of Huckleberry Finn," has led to renewed interest in the book's author, Mark Twain.Many farmers have been inspired by Twain's work and have turned to him for guidance in their farming practices. In particular, the book has been seen as a source of inspiration for those who want to improve their farming methods and increase their productivity. The book's emphasis on the importance of hard work, ingenuity, and perseverance has resonated with many farmers, and they have looked to Twain's advice as a way to improve their own farming practices. In this article, we will explore the ways in which farmers have been inspired by Twain's work and how they have used his advice to improve their farming practices.

The story of the "yellow dog" that saved the farm and the "tobacco boy" who learned to read are just two of the many stories in the book. The book's portrayal of the farming life and the importance of the land has resonated with many farmers, and they have seen in it a source of inspiration. The book's emphasis on the importance of hard work and the value of the land has led many farmers to turn to it for guidance in their farming practices.

The book has also been seen as a source of inspiration for those who want to improve their farming methods and increase their productivity. There was, and probably always will be, a certain amount of jealousy on the part of the sailors in the Woonsocket Cog.
