A Talk to Proli-Growers

The yield will be increased threefold, or fourfold the amount of your food crops. The key is in the quality of the fertilizer. The better the fertilizer the more the yield. There is a record of every batch of fertilizer to prove its quality. The better the fertilizer the better the crop.

The fact that over a million acres of cotton were held last year in the South is not the only thing to be said for the fertilizer. Every fruit grower, every truck grower, every farmer who makes his living by his farm, should use the best fertilizer available.
