An Unfavorable Sign

Good rains and not a great deal of
sunshine are needed to improve the
condition of our crops. The
weather in Chester county is very
unfavorable for crop development.
During the week, there has been
only a few showers, and these
have been very light.

Some rain is expected, however,
and this would be welcome.
The crops need moisture to
continue their growth.

J. W. WILSON

In the event that there is no
rain, the crops will continue
to suffer.
