About twenty times an hour all the blood in your body passes through and is filtered by your kidneys. This means that if your kidneys are not strong and healthy they do not extract all the poison from your system and this results in sickness and misery that will remain until these organs are properly taken care of to keep back to healthy activity.

These symptoms will tell you when your kidneys need attention and assistance:

1. If you have Backache. Tired Feeling. Dizziness. Headache.
2. Swellings in various parts of the body.
4. Sickness. Trouble to urinate, and you can't get a better remedy than Vaughn's Lithotriptic.

This is a perfectly safe preparation and will effectually cure Dyspepsia and Gravel. It is simply the Dye of the Walden Family, reducing them to a normal healthy condition and eradicating all diseases.
