About twenty times an hour

all the blood in your body passes through and is filtered by the kidneys. Think of what this means. If the kidneys are not strong and healthy they do not extract all the poisonous material and the blood is in a lack of health and misery that will remain until these organs are properly taken care of.

These symptoms will tell you
when your kidneys need attention and assistance: If you have Backache, Tiredness, Headache, Swelling Pains across the Loins, or in the Back, Sleeplessness, Chills, Urine of an unnatural color, Scaliness, Urine, They cause Kidney Trouble, and you can’t get a better remedy.

Vaughn’s Lithotriptic
