HILMAV LAW DECONSULTATION—

An effort is being made before the opening of the next session of the legislature to change the present system of the office of district attorney. The law at present gives the judge of the circuit court the right to appoint the district attorneys, and the judge is in many cases a public officer and possibly a public official, and as such is bound to appoint men who will stand for induction, but has nothing to do with the law or the administration of justice. The law should be changed, and the district attorney should be a man of experience in the law, and should be appointed by the secretary of the state, and should be paid a salary of $2,000 per year and a per diem of $3.

A WAR PARTY OF BATTLESHIPS—

The war party of the governments of the United States and France is being strengthened. The United States has forty vessels of war, and the French have ninety, and the British have fifty. The British government is also sending a large number of vessels to the Mediterranean, and the French government is sending a large number of vessels to the Baltic. The war party of the United States and France will be ready to attack the British government at any time, and the British government will be prepared to defend itself.

SPRING CROPS AND FORAGE CROPS—

Spring crops and forage crops are both important. The spring crops are the most important, and they should be planted early in the spring. The forage crops are also important, and they should be planted early in the spring. The spring crops will provide food for the animals, and the forage crops will provide food for the stock. The spring crops will also provide food for the people, and the forage crops will provide food for the stock. The spring crops should be planted early in the spring, and the forage crops should be planted early in the spring.

CHURCH AND STATE.

The church and state are two distinct and separate institutions. They are not to be confused, and they are not to be mixed.
