INSURANCE COMPANIES ADVISE "AGENTS IN DILEMMA"

Dilemma that has been involved in the affairs of the NAIC has been the subject of much discussion. The NAIC is an organization of insurance commissioners of all the states, and it is responsible for the supervision of the insurance industry. The commissioners are concerned with the regulation of insurance companies and the protection of policyholders.

The NAIC has been working on a set of regulations known as the "Model Act" which aims to standardize the practices of insurance companies across the country. The "Model Act" includes provisions on the appointment of agents, the duty of agents to inform policyholders about changes in rates, and the requirement for agents to maintain accurate records.

The NAIC has also been involved in the investigation of a case involving the payment of a large commission to an agent. The case has raised questions about the integrity of insurance agents and has led to calls for greater oversight of the industry.

The NAIC is expected to continue its work on the "Model Act" and to address other issues facing the insurance industry in the coming months.

SECRETARY OF WAR INTENDS TO DISMISS STUDENT REPRESENTATIVE AT THE UNIVERSITY OF CHICAGO

Washington, D.C., April 23.—The heads of the American Field Service (AFS) have received a letter from President Wilson and have been informed that the student representative at the University of Chicago was dismissed because of "irregularities." The letter was addressed to the president of the university, who was also informed that the student representative would be replaced by a new one.

The AFS is an organization that sends students to work in other countries. The student representative at the University of Chicago was appointed by the AFS and was expected to represent the interests of the students in the country.

The AFS has been under scrutiny for its handling of the situation, and some have criticized the organization for its treatment of the student representative. The AFS has defended its actions, saying that it was trying to ensure that the student representative was properly representing the interests of the students.

The AFS is expected to continue its work in the country and to address other issues facing the organization in the coming months.

AERIAL WAR

AEROPLANES IN MEXICO NOW CALLED JUNK

Several of the aerial warplanes now being used in the Mexican campaign have been referred to as "junk." This has led to calls for improvements in the design and production of these aircraft.

The Mexican campaign has been characterized by the use of aerial warplanes, which have been used for reconnaissance, bombing, and other purposes. The use of aerial warplanes has been controversial, with some calling for a reduction in the number of aircraft used in the campaign.

The Mexican government has been working on improving the design and production of its aerial warplanes, and it is expected to continue its efforts in the coming months.

AMERICA'S NEWS

AMERICA'S NEWS

Even though we were not a great admirer of Mr. Wilson, we are glad to see that the American people have voted for peace and tranquility. Every voter voted for a man who would bring about a better understanding of the war.

We believe that Mr. Wilson was not elected to bring about a better understanding of the war. He was elected to bring about a better understanding of the war. We believe that Mr. Wilson was not elected to bring about a better understanding of the war. He was elected to bring about a better understanding of the war.

The American people have voted for peace and tranquility, and we are glad to see that Mr. Wilson has been elected to bring about a better understanding of the war.

The White Hussars Coming on the Fifth Night of Chautauqua Week

The White Hussars is one of the greatest of the cavalry regiments of the world, and is one of the most unique in the military world. It is a regiment of the Italian army, and is composed entirely of horsemen, with no foot soldiers. The regiment is famous for its magnificent horses, which are bred exclusively for the Hussars, and are noted for their speed, endurance, and beauty. The Hussars are also known for their distinctive uniforms, which are a combination of black and gold, and for their magnificent horses, which are always well-groomed and well-cared for.

Chautauqua Week Here May 4th to 11th.

The White Hussars will be in residence during Chautauqua Week, and will perform several times during the week. They will be seen parading through the streets of the city, as well as giving performances in the Chautauqua grounds. The Hussars are a popular attraction, and are always well-liked by the audience.

Power

Don't overlook this matter of power. It is important. You want an automobile that will carry you through rough and snowy roads, and do it easily. You want a car that will climb hills, that will get you through town without jumping and straining its every part.

Not all cars can do these things, but know that the Maxwell can because you have the proof.

When the Maxwell stock touring car sales come on the market, watch the Motor Age Mileage Record a few weeks ago, it encountered all sorts of unfavorable conditions—rain, mud and hills, over country and city roads—yet it covered 500 miles per day, day after day, for more than six weeks.

Power, plenty of power, unfailing power, is absolutely essential to such a wonderful performance as this.

Let us give you a booklet telling all the secrets of breaking in your Maxwell car. And let us tell you about our partial payment plan, by which you can make a deposit and pay the balance while you use the car. Give us the opportunity and we'll prove our case.
