Powerful Medicine Secured from Yper.

New York, April 29.—For the first time in medical history, a supply of the
best remedy for consumption is now available to the public. It has been
secured from the rich deposits of Yper, in France, by the late Sir James
W. Lipton, of London, who, after years of patient research, has been able
to produce it in a form that is both safe and efficacious. It is known as
the "Lipton Tonic," and is said to be the most valuable discovery in
medical science for over twenty years. It is made from the root of the
Yper plant, which grows in the vicinity of the town of Yper, in France.

Ingestion in Situ Case.

An ingesting in situ case was recently reported by Dr. J. W. Lipton, of
London. The patient, a man of thirty, was taken ill suddenly with a
severe pain in the chest. He was taken to the hospital immediately,
where he was operated on. The surgeon found a large tumor in the
lungs, and was able to remove it. The patient made a complete recovery,
and is now living a healthy life.

Dr. T. Morgan was recently called on by a friend who was looking for
a place to stay. The doctor showed him around and said, "This is a
great place to live. The air is pure and fresh, and the people are
very friendly."

The Price of Railroads.

In placing the good roads question before the public, it is necessary
to draw attention to the great importance of the railroads. They
are the lifeblood of the country, and without them, commerce
and industry cannot flourish. The railroads have come to stay, and
it is time we realized their importance.
