WAREHOUSE SYSTEM: MARKETING COTTON

ARREST ALLEGED
GERMAN PLOTERS

Cotton is sold by the bale in New York and the figures appear to show that there is a reasonably steady demand for cotton there. The price of cotton in New York is higher than in any other part of the world, and the demand for cotton there is consequently greater.

The market situation is very much influenced by the demand for cotton in New York. A large demand for cotton in New York will tend to raise the price of cotton, while a small demand will tend to lower the price. The demand for cotton in New York is influenced by a number of factors, including the demand for cotton in other parts of the world, the production of cotton in the United States, and the weather conditions in the cotton-growing areas.

The production of cotton in the United States is influenced by a number of factors, including the availability of water, the availability of labor, and the price of cotton. The weather conditions in the cotton-growing areas are also important, as a good harvest will tend to increase the supply of cotton, while a poor harvest will tend to decrease the supply of cotton.

The demand for cotton in other parts of the world is influenced by a number of factors, including the demand for textile products, the availability of substitute materials, and the price of cotton. The availability of substitute materials is important, as a decrease in the availability of substitute materials will tend to increase the demand for cotton, while an increase in the availability of substitute materials will tend to decrease the demand for cotton.

The price of cotton is also influenced by a number of factors, including the supply and demand for cotton, the availability of substitute materials, and the cost of production. The supply and demand for cotton is important, as a decrease in the supply of cotton will tend to raise the price of cotton, while an increase in the supply of cotton will tend to lower the price of cotton. The availability of substitute materials is also important, as a decrease in the availability of substitute materials will tend to raise the price of cotton, while an increase in the availability of substitute materials will tend to lower the price of cotton.

The cost of production is also an important factor, as a decrease in the cost of production will tend to lower the price of cotton, while an increase in the cost of production will tend to raise the price of cotton.

The market situation is very much influenced by the demand for cotton in New York. A large demand for cotton in New York will tend to raise the price of cotton, while a small demand will tend to lower the price of cotton.

There are times in every woman's life when she must have a tonic to help her over the hard places. When that time comes to you, know what tonic to take—Cardui, the woman's tonic. Cardui is composed of pure vegetable ingredients, which act directly, yet surely, on the weakened womanly organs, and helps build them back to strength and health. It has benefited thousands and thousands of weak, ailing women in its past half century of wonderful curing, and it will do the same for you.

You can't make a mistake in taking Cardui-Tonic for Women.

The Woman's Tonic

Cardui is the greatest tonic for women that has ever been brought to the market. It has been proved to be a sure and steady measure for the cure of each and every woman's distress. For over half a century Cardui has been the guiding light for all weak and ailing women, and has helped them over the hard places of life. It has cured the most stubborn cases of weakness, and has been the secret of the recovery of many women who were thought to be hopeless cases.

Cardui-Tonic is the greatest tonic for women that has ever been brought to the market. It has been proved to be a sure and steady measure for the cure of each and every woman's distress. CHESTER COUNTY GETS USUAL SHARE OF PRIZES

Chester County is "around town" this week in the Pennsylvania State Fair. The usual highlights of the fair, including livestock shows, horticultural exhibits, and agricultural displays, will be observed at the West Chester Junior Fair, which opens today.

A feature of the stall will be the Fair's continuous one, which is open from 10 A.M. to 10 P.M. The stall will be managed by the junior fair committee, and several of the girls will be on hand to help in the big building.

In the poultry department, several of the best high quality fowls will be exhibited. Most of the fowl will be home raised.

Saturday, July 15, 1915

Va., signed an application for a limited license on July 17, 1910, and paid the first quarterly premium of $6.00 to the agent, taking in exchange therefor the Company’s check of $6.00, which was accepted as the full premium therefor. This policy was issued and executed on August 7, 1910. The applicant, however, did not sign the application, nor was the policy delivered to him. He was merely given a copy of the policy. The premium was paid by the agent, and the policy was delivered to the applicant on August 7, 1910.

PARKER, N. C. MAN

GETS QUICK RELIEF

W. R. Conservator Better After First State of Ohio

W. R. Conservator of Parker, N. C., said this week that he thought the man's health had been improved by his recent trip to the North. The man has refused to go to the hospital and says he is satisfied with the treatment he is receiving.

MATH ON COST OF ROAD CONSTRUCTION

Road construction nowadays costs much more than it did years ago. In 1915, the cost of a road depended upon the type of surface used. For example, a gravel road cost $3,000 to $4,000 per mile, a concrete road cost $5,000 to $6,000 per mile, and a asphalt road cost $7,000 to $8,000 per mile. The cost of a road has increased because of the higher cost of materials and labor.

MATH ON ROAD BUILDING

In 1915, the cost of building a road was much lower than it is today. The average cost of building a road in 1915 was $1,000 per mile, while the average cost of building a road in 2023 is $5,000 per mile. The increase in cost is due to the higher cost of materials and labor.

MILEAGE OF CONCRETE ROADS

In 1915, there were only a few concrete roads in the United States. In 2023, there are over 100,000 concrete roads in the United States.

1. Availability as a base for another surface.
2. Attractive appearance.
3. Fireproofing.
4. Non-polluting. Many states have regulations that require the use of concrete roads in certain areas.

In the past, roads have frequently been paved with cobblestones or gravel, which washed out during storms. Concrete roads are more durable and have a longer lifespan.

New Jersey State Road, Illuminates, Washington, District of Columbia.

Paving, with a view to the possibility that future investigations may change the character of the road, has been a matter of great concern to the United States government. In 1915, the government was only $1,000 per mile, whereas in 2023 it is $5,000 per mile. The increase in cost is due to the higher cost of materials and labor.

Good roads are not only cheaper but are safer also. They are also more comfortable to travel on and they reduce the cost of transportation. The improvement of roads is important because it affects the economy of the country and the well-being of the people.

CONTROL OVER LOCAL ROADS

The control over local roads is important because it affects the economy of the country and the well-being of the people. The improvement of roads is important because it affects the economy of the country and the well-being of the people.
