NEW COAST GUN.

When a new gun at Steel Mills, New Jersey, was fired last Saturday, it exploded with a roar that filled the town as far as the eye could reach, and the gun itself fell into a thousand pieces. It was a new gun which had been under experiment for the last three months, and it was expected to be the most powerful gun ever made. The gun was 25 feet long and weighed 180 tons, and had a range of 250 miles. It was designed to be used for long-distance bombardment of ships and forts. The explosion was caused by a defect in the gun's mechanism, and it resulted in the destruction of the gun and the loss of several lives. The investigation of the accident is still in progress, and it is not yet known whether the gun will be repaired or rebuilt.

When a Policeman May Shoot.

"So long as our vast fortunes continue to be maintained by the blood of the poor, we shall have no peace," said the old woman, as she looked into the faces of her children. "You who are rich, remember that you are the cause of poverty and suffering, and that your wealth is the result of the labor of others."

"We shall never be able to stop the accumulation of our wealth, until we destroy the system of slavery and poverty," said the man, as he looked at the boy. "The world is full of injustice and suffering, and we must fight against it."
