SE. N IN FRANCE WILL BE MODIFIED CORPS—WILL PROTECT BRITISH FORCES UNTIL QUIET

By this arrangement additional of more than 2,000 doctors, who have left their civilian practice to join the colors, will have actual war experience to put the finishing touch on their training for the care of the United States soldier in the field. All of which seems to be only another way of saying that at last America is really in a war in which the administration to the town and the country will no longer be bought. War was declared last month, but it was a year ago last month that the medical profession of the country began to prepare for it. And the results to the present moment, so far as they can be indicated by figures, are that 10,000 of the doctors of the United States are enrolled for military service, and 8,000 of them are have received their commitments as surgeons and medical officers in the army. This means, figuring on the basis of seven medical men for every thousand men, that with 21,000 physicians and surgeons enrolled the country is medically prepared for an army of 3,000,000 men. The 8,000 already commissioned are efficient for an army of something more than a million.

WOULD INVOLVE CAPITAL

it was learned today that the committee of three appointed at yesterday's conference on trade and shipping consisting of

Dr. Pratt of the State Department, Would have the chief function in the investigation of the trade relations of the United States with the countries bordering on the enemy.

The question of feeding Denmark, and Scandinavia without supplying Germany at the same time, is receiving the most serious consideration, and it will be the duty of this committee to study the trade of these neutrals and report to the American and British Governments on the amount of imports that can be allowed to reach them to exactly fill their requirements without leaving a surplus which can be sold to Germany.

One of the problems of joint effort between the United States and Canada which has been under discussion between Secretary Redfield and Sir George Foster, acting Premier of Canada, is now well on its way toward solution. This was raised by the Canadian demand for tin cans in which to ship foodstuffs to the Canadian expeditionary force, made urgent by the general shortage of cans throughout the continent. Through cooperative action by American tin manufacturers and manufacturers in pig tin and steel, the difficulty is now being met.

WON'T AND WOON'T

In Baltimore, May 2.—It now appears that the tear gas used by the Allies is the invention of Dr. Robert W. Wood, professor of experimental physiology at Johns Hopkins University. Professor Wood sent the formula for it to a friend, Professor Cotton, in Paris, and it was turned over to the French War Department. Dr. Wood is a member of the Naval Consulting Board.

SHOOTING IN BEAUFORT

Beaufort, May 3.—Bob Ford, a negro, was shot in Beaufort yesterday morning about 8:30 o'clock by Claude M. Aman, a well-known attorney, of this place. It is not yet known whether the man, who was shot five times, will recover or not. It is said that the provocation of Mr. Aman was objectionable language addressed to his wife.

PRAISES CHESTER

Upon the occasion of the recent arrival of Mr. H. H. Wherry of DeSoto, as the new proprietor of the Chester Store, the management of the store has been greatly impressed with the quality of Mr. Wherry's work. The new store is a fine example of progress and development in the business.

WASHINGTON CHERRY

A. A. Wherry

Mr. A. A. Wherry of the Washington Cherry has been a valuable addition to the staff of the store. His knowledge of the business is exceptional, and his attention to detail is beyond compare. The staff is highly satisfied with his contributions to the store.

The Great Creator Will Be Here on the Last Day Of Chautauqua Week

Chester Ice & Fuel Co.

The Greatly Increased Cost of Everything Connected With the Manufacture of Ice Forces Us, in Self Defense, To Increase the Price of Our Product; But We Are Making the Increase as Light as Possible, and the Moment Our Expenses Get Back to the Former Level Will Restore the Old Prices. Just to Give You Some Idea of What We Are Up Against in This Respect We Wish to Cite a Few Figures: And Also Beg to Say That During the Month of April We Made a Careful Test and Found That With Present Prices of Supplies We Simply Could Not Break Even; Prices on Commodities and Products of All Kinds, As You Know, Are Far Above What They Were a Few Months Ago, and We Feel That You Will Agree with Us That the Increase Which We Are Putting On Is Entirely Reasonable. Look at What We Were Paying a Year Ago for Supplies and What We Are Paying To-Day.
