“Carefully sterilize with hot boiling water” every utensil before it is used. Also the jars, rubbers, and rubber bands.

In buying jars, use the best. One of the most satisfactory jars is the “Lightning Patent” with a glass top held in place by a simple wire aprinu.

The best grade of tin cans will cost a little more than the cheaper grade. With Klatson, always use low rubber.

Fruit for canning should be ripe but firm. Do not use overripe peaches. -

Vegetables for canning should be young and tender.

Fruit and vegetables are better for canning if gathered in the early morning and kept in a cool place until ready for use.

Fruits and vegetables must be thoroughly cleaned before being put in jars or cans. Do not attempt to can decayed or dirty fruits or vegetables.

Our Work

Many people have said that their particular line of work

made them nervous and caused them to have headaches

and other ailments. Some have said that they had a

feeling of uneasiness when they were working and felt

better when they were away from the office. Others

have said that they could not concentrate on their work

and felt that they were not doing their best. These are

the symptoms that many people experience when they

are working under stress.

We have found that Castoria helps to relieve these

symptoms. It contains a special blend of herbs, spices,

and nuts that are known to be beneficial to the body.

This blend helps to calm the mind and relax the body.

We have seen many people who have been able to

improve their concentration and work more efficiently

after taking Castoria. We believe that this is due to the

beneficial effects of the herbs and spices in the blend.

We recommend Castoria to anyone who is feeling

nervous or stressed while working.
